Report

Message from the Board of Directors

Dear Shareholders, Customers, Employees and Stakeholders,

As part of our commitment to transparency and good governance practices, we present below the Management Report for the 2025 financial year, reflecting both the progress made and the enormous challenges overcome and, above all, the new opportunities, which demonstrate the strength of our business model, the resilience of our teams and the growing confidence of our Customers.

National and international context

The year 2025 was once again marked by geopolitical instability, both in the Middle East and Eastern Europe, and global economic uncertainty. An aggravated scenario, on the one hand, by US protectionism through the Trump administration's increased tariffs and, on the other hand, by the lack of definitive and clear bilateral and multilateral agreements.

Despite the challenging macroeconomic environment, BFA exceeded expectations, achieving a Net Profit of AOA 230,622.1 million in 2025.

Even so, according to the International Monetary Fund's forecasts, the slowdown in the world economy has been moderate, with a verifiable growth of 3.2% in 2025, compared with 3.3% in the previous year.

The Angolan economy also grew throughout 2025, although at a lower level than in 2024. According to the national accounts published by the National Statistics Institute, up to the third quarter of the year Angola's economy grew by 2.1%, a slowdown of around 2.9 percentage points compared with the same period last year, mainly due to the continued decline in oil production and the consequent fall in oil GDP (-6.9% YoY). This situation directly affected the country's access to foreign currency and, naturally, its ability to finance itself in the international market.

Non-oil GDP supported Angola's economy, with the Communications (+40.5% yoyo) and Diamonds and Minerals (+15.5% yoyo) sectors recording the largest increases.

We would like to highlight the Angolan State's efforts to diversify the economy. However, we believe that structural reforms remain fundamental to increasing competitiveness, improving the business environment and consolidating the country's growth.

As far as monetary policy is concerned, the consistent slowdown in inflation in 2025 has enabled the Banco Nacional de Angola to ease interest rates, which should help to boost the economy's growth next year.

Our identity and competitive advantage...

For more than three decades, we have affirmed our ambition to be the No. 1 Bank for all Angolans, always committed to contributing to the country's sustainable development, guaranteeing the satisfaction and quality of the services provided to our Customers and investing in the personal and professional growth of our Employees.

What sets us apart from the rest of the Angolan banking system is the quality of our people. Thus, in 2025, we approved the new Performance Evaluation Model and made salary adjustments, with a view to improving internal equity and strengthening competitiveness in the face of market trends, covering a total of 2,499 Employees.

In addition to improving the working conditions in our buildings and in various branches of our commercial network, we have also created collective transportation for our Employees in Luanda, with the aim of making it easier for them to travel between their home areas and their workplaces.

Building capacities...

The year 2025 marked the second implementation cycle of the 24-26 Strategic Plan. This plan, geared towards innovation and the excellence of our service, has enabled us to advance a significant number of initiatives, including the following:

- the expansion of the ATM network;
- an increase in the number of Automatic Deposit Machines;
- the expansion of the network of banking agents;
- improvements to digital channels; and
- greater digitisation of processes.

Moving towards sustainability...

In the area of sustainability, we have focused our efforts on creating internal regulations to integrate Environmental, Social and Governance (ESG) practices into all areas of the Bank, and on internal training to raise our Employees' awareness of the need to reduce the Bank's carbon footprint, particularly with regard to cutting paper, water and plastic consumption.

The implementation of the 24-26 Strategic Plan has allowed us to increase the number of Customers to a total of 3,511,420, which demonstrates its effectiveness, as well as our solidity, security and credibility in the market.

In the area of social action, we created the Fundação BFA, which is fundamental to expanding the Bank's social intervention capacity, separating social responsibility from the business area, and thus allowing us to focus more on supporting communities and generating a greater and more structured impact. In 2025, the Bank earmarked the equivalent of around 2.7 million dollars in kwanzas for various social initiatives, particularly in the areas of health and education.

Our financial performance...

The results presented in this Annual Report are proof of our sustained growth over the last three years:

millions of kwanzas

	Dec. 25	Dec. 24	Δ% 25-24
Net profit	**230 622,1**	205 821,2	12,0%
Net interest income	**343 203,5**	293 309,6	17,0%
Non-interest income	**94 233,5**	81 924,7	15,0%
Operating income	**437 437,0**	375 234,3	16,6%
Overheads (I + II + III)	**179 038,1**	143 215,5	25,0%
Return on assets (ROA)	**5,7%**	5,5%	0,2 p.p
Return on equity (ROE)	**31,1%**	33,7%	-2,6 p.p
Cost-to-income	**40,9%**	38,2%	2,7 p.p
Total Capital Ratio	**38,8%**	40,7%	-1,9 p.p.

- The Initial Public Offering (IPO) of BFA shares on BODIVA was a milestone. It was the largest operation ever in the Angolan capital market, and also recorded the widest geographical spread ever achieved (from Cabinda to Cunene) and the unprecedented participation of institutional investors;
- Net Profit grew by 12.0% to AOA 230,059.5 million;
- The number of Customers increased (+311,866), reaching a total of 3,511,420;
- The Customer Deposits portfolio rose by 6.4% compared with 2024, standing at AOA 3,210,711.5 million; and
- Loans and Advances to Customers rose 22.1% compared with 2024, to AOA 892,107.3 million.

A look into the future...

In 2026, aware that the challenges will continue to be many, especially with regard to the international situation, we know that we can count on the talent, dedication and passion of our teams, who will help us overcome any obstacle, always with the determination that has defined us for more than three decades.

In 2025, the Board of Directors' mandate came to an end and the Shareholders' Elective Meeting is scheduled for next year, from which a new management team will emerge, equally committed to innovation, excellence and strengthening our position as a benchmark in the Angolan financial system.

In what will be the last year of implementation of the 24-26 Strategic Plan, we will optimise the Bank's business model, increasing the digitalisation and efficiency of services, always focusing on our Customers.

We are fully confident that we will continue to play a decisive role in Angola's economic and social development.

A word of appreciation and esteem...

We would like to express our deepest thanks to all BFA Employees and their families for their dedication, resilience and commitment throughout the 2025 financial year. The professionalism, commitment and continuous dedication of the entire team are essential pillars for the institution's solidity, stability and sustainable growth.

Moreover, we want to thank the Shareholders and other Stakeholders for their continued support and the trust they have placed in the Bank's management team. Your commitment and investment are crucial to the realisation of our strategy, encouraging us to face challenges, leverage opportunities and continually reinforce standards of governance, efficiency and excellence.

We would also like to express our sincere gratitude to the Customers who have trusted the Bank as their financial partner over the last 32 years. Your loyalty is the basis of our actions and guides all the institution's strategic decisions. We recognise that there are still opportunities for improvement and we reaffirm our commitment to continuous evolution, with a view to responding ever more efficiently to your needs and exceeding your expectations.

Lastly, we wish to extend our thanks to everyone who has been part of BFA's journey for their trust and partnership. It is this joint commitment that underpins our vision of responsible, solid and sustainable long-term growth.

Together we will continue our commitment to excellence, consolidating our position as a reliable financial institution in Angola and achieving our ambition of being the No. 1 Bank for all Angolans.

STRATEGIC PRIORITIES

- To increase BFA's Personnel efficiency and productivity
- Increase business processes efficiency
- Service model digitalisation/ streamlining
- Streamlining of the technological infrastructure and data management
- Business growth
- Sustainability

VALUE PROPOSITION

To enhance BFA's ability to meet and address its Customer

base needs, while actively investing in attracting, empowering, retaining, and acknowledging our top and most skilful professionals.

Strategic Plan 2024-2026

Entitled +EASE, from the acronym Empathy, Agility, Simplicity and Efficiency, BFA's 2024–2026 Strategic Plan aims, on the one hand, to improve the Customer experience by increasing the capillarity and agility of the services provided and by making changes to the business model and, on the other hand, to strengthen the Bank's image as the best place to work.

In 2025, BFA was able to implement the following measures across the six defined strategic axes:

1
IMPROVING EFFICIENCY AND PRODUCTIVITY IN PERFORMANCE

- New performance evaluation model;
- Updated occupational classifier;
- Change management with communication and team training activities.

2
INCREASE BUSINESS PROCESSES EFFICIENCY

- Implementation of the account opening/updating process, adherence to remote channels and allocation of a debit card (+Cliente);
- Start of the Integrated Management System (ERP) implementation process;
- Start of the back-office automation programme (robotisation);
- Creation of the Centre for Effectiveness and Innovation (CEI).

3
SERVICE MODEL DIGITALISATION/STREAMLINING

- Design of the Banking Agent network's evolution journey;
- Approach to optimising the operational load and commercial window of the Individuals and Businesses Directorate (DPN);
- Expansion of the ATM network and implementation of MDA (deposit machines).

4
STREAMLINING OF THE TECHNOLOGICAL INFRASTRUCTURE AND DATA MANAGEMENT

- Improved security posture and reduced attack surface;
- Adoption of best practices in data governance and quality;
- Harmonisation of business concepts and the approach to data quality management.

5
BUSINESS GROWTH

- Implementation of new choreographies and commercial systems (high-value segments);
- Improving the management of interactions with Customers by extending the use of CRM (Customer Relationship Management system).

6
SUSTAINABILITY

- Action plan for DEI (Diversity, Equity and Gender Equality);
- Adoption of ESG (Environmental, Social and Governance) criteria when selecting suppliers;
- Adoption of ESG (Environmental, Social and Governance) metrics in the RAS (Risk Appetite Statement);
- Operationalisation of the Sustainability Office;
- Publication of the 2024 Sustainability Report.

Strategic Goals and Initiatives

+EASE aims to achieve nine strategic objectives until the end of 2026:

- Enhance Employees' satisfaction;
- Increase productivity levels per Employee;
- Raise the percentage of critical processes that fulfil the SLA;
- Heighten High-Net-Worth Retail and Corporate Customers' NPS;
- Grow the percentage of Customers adopting/engaging with self-service channels;
- Decrease the volume of operations and transactions carried out at BFA branch counters;
- Increase the Operating Income / Expand the Affluent, Private and Corporate Customer base;
- Heighten the number of products procured through alternative channels;
- Implement initiatives with an operational impact on external Stakeholders within the scope of sustainability.

+EASE aims to improve Customer experience and strengthen BFA's image as the best place to work.

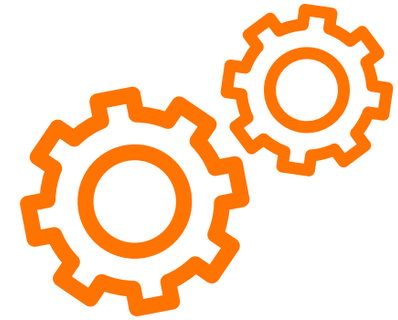

Within the scope of these objectives, 20 initiatives have been defined as priorities, grouped into six axes:

Axes	Initiatives
Enhance BFA's Personnel efficiency and professional performance	• Performance assessment and compensation procedures within Central Services and Commercial Areas • Development of the career management model (Internal Mobility • Organisational culture and transformation/transition management • Advancement of the Organisational model and associated functions
Increase business processes efficiency	• Execution of the Backoffice automation programme • Journey of the basic offer for Individuals (mass market) • Designing, optimising and implementing the processes defined in the ERP implementation
Service model digitalisation and streamlining	• Evolution of the Banking Agent Network (Size and Services) • Operational load and commercial window of DPN Agencies • Development of self-service channels (new or expanded)
Streamlining of the technological infrastructure and data management	• Governance & Data Quality Model • Evolution of the EDW platform • Evolution of Application Architecture • Cyber Security and Resilience
Business growth	• Organization of commercial action with high-value segments
Sustainability	• Human Capital • Operational Eco-Efficiency • Risk Management and Sustainable Financing • Governance and Operating Model • Communication

To guarantee the implementation of the Strategic Plan, a governance model has been established that includes monitoring and execution functions, allowing for the optimisation of resources and an integrated vision of the strategic initiatives underway in the organisation.

The results achieved are followed up and monitored on a monthly and quarterly basis by the Board of Directors, whose overall reporting is supported by the Board of Directors' Office, in the role of strategic Project Management Office (PMO). The Strategic Plan's comprehensive coordination is based on an execution timeline headed by the EASE Office, which was established specifically for this purpose and is tasked with acting as the operational Project Management Office with a mandate to manage the entire strategic plan.

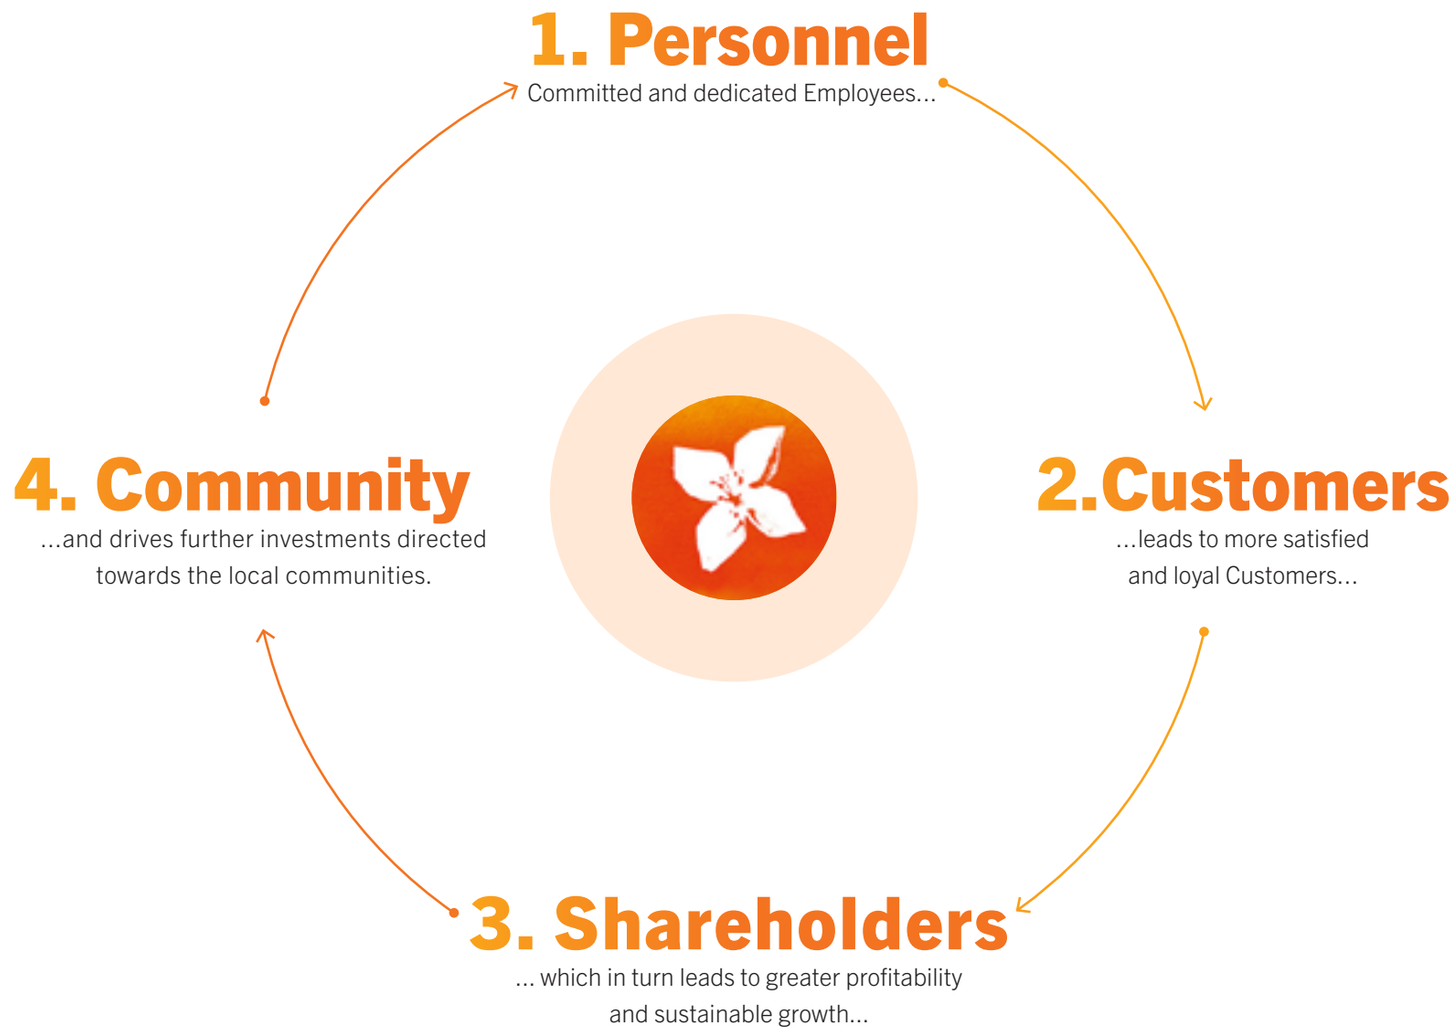

How BFA adds Value

BFA's value creation proposition is underpinned by the values and commitments that the Bank has always identified itself with since its inception.

BFA believes that motivated and dedicated Employees increase Customers' satisfaction and loyalty, which in turn encourages sustainability and profitability for all Stakeholders with whom the organisation interacts, leading to further investments and opportunities directed towards local communities.

BFA believes that having motivated Employees increases Customer satisfaction and loyalty, which leads to better sustainability and profitability for all Stakeholders and leading to further investments in local communities.

2026 Outlook

In 2026, BFA will embark on a new stage of its strategic journey, focusing on continuous modernisation and sustainable growth. Following the progress made in 2025, the Bank will launch new initiatives that reinforce its ambition to establish itself as a modern, agile and Customer-oriented institution. In an increasingly competitive market, the strength of the business model and the ability to differentiate will continue to be key factors.

The Bank will continue to invest in improving its efficiency, in digitalisation and technological evolution, as well as in updating the services provided to Customers, in what is the last year of implementation of the 24–26 Strategic Plan. BFA therefore continues to focus on the Customer, providing innovative solutions, reinforcing contact channels and guaranteeing a high-quality service, with a view to strengthening relationships and building Customer loyalty.

At the same time, BFA will continue to invest in its Human Capital, establishing itself as the best place to work by attracting, developing and retaining the most qualified professionals in the financial sector. To this end, it will continue with the training, performance evaluation and salary compensation programmes, as well as evolving the career management model.

In the coming year, the areas of sustainability and social responsibility will guide all the Bank's actions, boosting sustainable credit and strengthening financial literacy, always with the aim of transforming lives and promoting a future of inclusion and sustainable development in Angola.

In 2026, BFA will continue to bet on digitalisation and technological evolution, as well as human capital. Sustainability and responsability will guide the Bank's actions so as to amplify financial literacy and contribute to transform lives, while also building a more inclusive and sustainable future.

02

Macroeconomic Framework

Macroeconomic Framework

Global Economy

According to the International Monetary Fund (IMF) forecasts, the global economy will have expanded by approximately +3.2% over the course of FY25, slightly down the +3.3% recorded in FY24. The year 2025 was marked by several events that immediately shook the confidence of economic agents in the future of the global economy. With tensions already existing in both the Middle East and Eastern Europe, the resurgence of US protectionism further aggravated the sense of uncertainty, provoking a negative reaction in international markets. The combined effect of the US government's tariff measures and the absence of definitive and clear bilateral and multilateral agreements created an atmosphere of doubt and limited trade stability. Despite this, the slowdown in economic activity was mild, both because of the anticipation of household consumption and investment, and because of delays in implementing the announced tariffs and the redirection of trade, which helped cushion the negative impact.

Advanced economies are expected to have grown by 1.6% in 2025, down from 1.8% in 2024. Tariff issues, immigration restrictions and interruptions in the production chain have had a negative impact on economic activity in the United States, with GDP forecast to have slowed from 2.8% in 2024 to 2.0% in 2025. For the Eurozone, the forecast is quite positive, with an expansion of 1.2%. Germany, the bloc's largest economy, is expected to move from a contraction of 0.5% to growth of 0.2%, supported by increased investment in key sectors that were once stagnant, namely the automobile and manufacturing industries, which have helped generate employment and boost innovation.

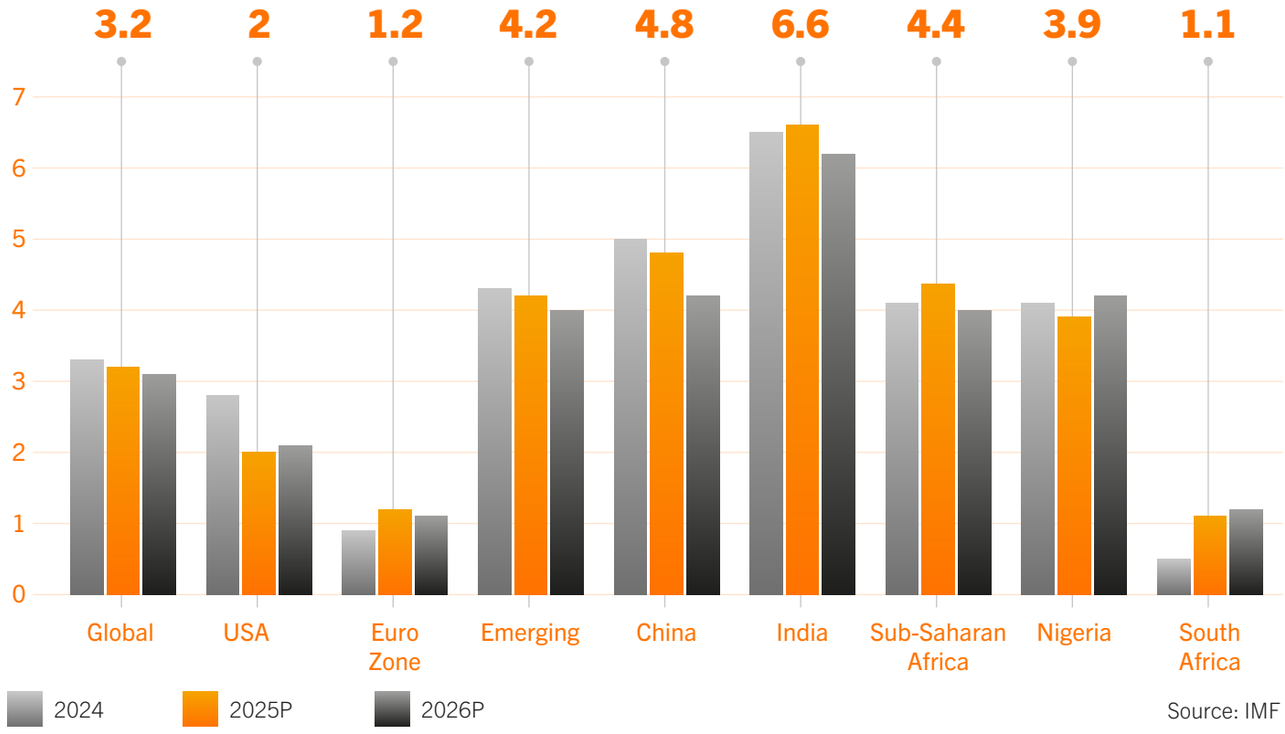

Emerging markets and developing economies, on the other hand, recorded a more solid and resilient performance throughout the year, with growth forecast at around 4.2%. China is expected to have grown by 4.8%, driven by the expansion of industrial production and the services sector. In India, growth is forecast at 6.6%, while in sub-Saharan Africa it is estimated to have been 4.1%, a similar level to that reached in 2024.

According to the Bretton Woods institution, the world economy could grow by 3.1% in 2026, maintaining the downward trend seen over the last two years. The more advanced economies may register levels similar to the current ones (+1.6%), in response to stagnation in the European economies and the slight expansion projected for the United States. The slowdown is expected to extend to emerging and developing economies (+4.0%) at a more pronounced level, due to the anticipated slowdown in the Chinese economy to 4.2% and in India to 6.2%. Sub-Saharan Africa region is foreseen to experience an economic expansion to approximately 4.4%, with Nigeria and South Africa expected to record an economic growth of approximately 4.2% and 1.2%, respectively.

According to the Bretton Woods institution, the world economy could grow by 3.1% in 2026, maintaining the downward trend seen over the last two years.

Growth

Money and Bond Markets

The process of lowering interest rates, which began in 2024, continued for much of 2025, particularly in the more advanced economies.

For the European Central Bank (ECB), the favourable dynamics of inflation throughout the year were the main driver of the various reductions: the Eurozone's inflation rate rose in the first quarter in response to trade uncertainties, but fell from April onwards, allowing the general rate of price growth to stabilise around the medium-term objective of 2%. This dynamic allowed the ECB to cut the key rates on four occasions during the year, which ended at 2.00%, 2.15% and 2.40% for the interest rates on the deposit facility, the main refinancing operations, and the marginal lending facility, respectively.

In the case of the Federal Reserve, the start of 2025 was marked by a more moderate and cautious stance, as a result of the uncertainties surrounding the start of Donald Trump's administration. Meanwhile, at the end of the third quarter, and despite the less favourable indicators, with economic activity expanding at a fairly moderate pace, the slowdown in employment and the acceleration in energy-sector prices led monetary policy decisions to move in the direction of easing in order to boost the acceleration of economic activity. At its last meeting, the US Federal Reserve decided to reduce the reference interest rate range by 25 basis points, to 3.5%–3.75%.

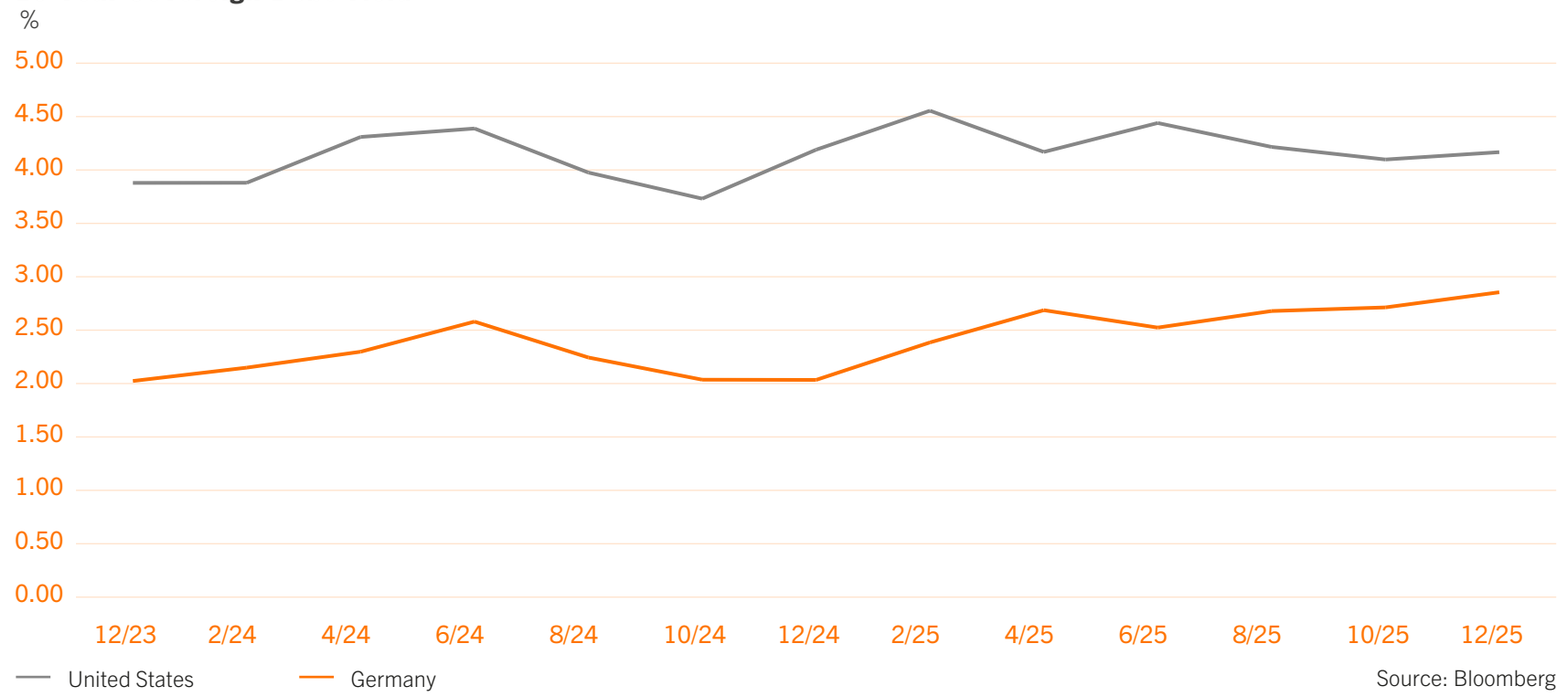

For 2026, the European Central Bank's (ECB) projections indicate that economic growth will remain soft, at around 1.2%, driven by increased domestic demand and also affecting price dynamics, with the overall inflation rate expected to stand at 1.9% by the end of the year. Despite the positive performance of the aforementioned indicators, interest rates are expected to remain around current levels.

On the Federal Reserve side, further cuts are expected, albeit at a slower pace. Bloomberg forecasts indicate a possible reduction in rates to 3.2% for the upper limit and 2.9% for the lower limit by the end of 2026.

As far as market rates are concerned, the SOFR closed 2025 at 3.6%, well below the 4.5% seen at the start of the year. Euribor rates slowed over the course of the year, with the 6-month and 12-month Euribor standing at 2.1% and 2.3%, respectively.

As for German 10-year public debt ended the year with a yield of 2.85%, slightly up from the 2.46% recorded at the end of the previous year (FY24). The United States debt, over the same period, ended the year with a yield of 4.17%, below the 4.54% recorded YoY.

Angolan Economy

The Angolan economy grew throughout 2025, although at a lower level than the previous year. According to the national accounts published by the National Statistics Institute (INE), the national economy grew by 2.1% in the third quarter, a slowdown of around 2.9 percentage points compared with the same period in 2024. The Communications (+40.5% YoY) and Diamonds and Minerals (+15.5% YoY) sectors recorded the highest growth in the period. The Diamond and Mining sector was one of the most significant contributors to Gross Domestic Product (GDP) in 2024. However, by 2025, the results were more moderate, reflecting the stabilisation of production at the Luele mine and the loss of the low comparative statistical advantage. As far as the oil sector is concerned, the contraction was 6.9% YoY during the period in question. This performance is due to the continuous drop in production. Oil activity has been falling consistently since the end of 2024, mainly due to the natural decline of fields and the lack of new projects large enough to compensate for the losses. Between January and October 2025, average production stood at 1.03 million barrels per day (mbd), down from 1.11 mbd recorded in the same period last year. July proved to be particularly weak, reaching the lowest level since March 2023, with production of less than 1.0 mbd. Conversely, October was the strongest month, with production of 1.07 mbd.

As far as monetary policy is concerned, the favourable evolution of the main macroeconomic indicators, especially the consistent deceleration of inflation, allowed for greater flexibility on the part of the Banco Nacional de Angola (BNA). Although there were events that contributed to the creation of inflationary pressure, the BNA adopted a more active stance, motivated by the slowdown in monthly price variations and the stability of the national currency. At the last meeting of the Monetary Policy Committee (CPM), held on 17 and 18 November 2025, the BNA cut all the main key rates by 50 basis points, bringing the basic interest rate to 18.5%, the interest rate on the marginal lending facility to 19.5%, and the interest rate on the deposit facility to 16.5%. Between January and July 2025, the CPM made cuts to the Mandatory Reserve Coefficient in National Currency (NC), reducing it by 300 basis points and setting it at 18%.

Economic Growth

YoY, %

Source: IMF

Oil activity has been declining since the end of 2024, mainly due to the natural depletion of fields and the lack of new projects.

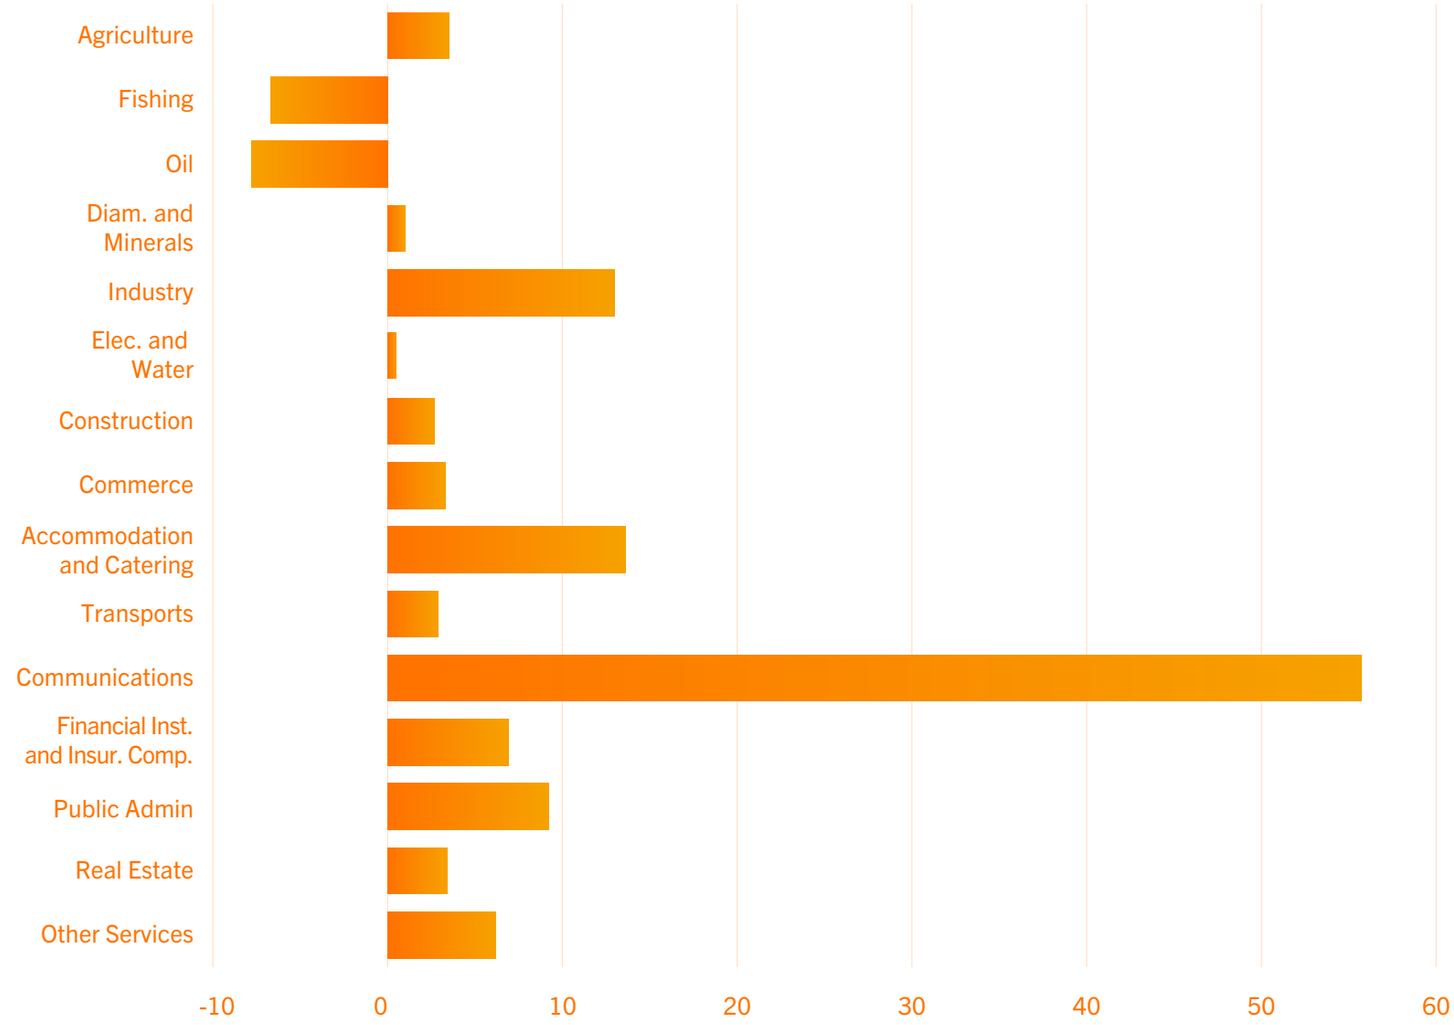

According to the IMF, Angola's real GDP growth rate in 2025 is expected to be 2.1%. For 2026, the outlook is moderate, and the Fund estimates that economic growth will settle at 2.1%. The government forecasts an inflation rate of 13.7% at the end of 2026 and projects GDP to expand by 4.2%, driven by the combined effect of the non-oil sector (+4.7%) and the oil sector (+1.1%). As far as the non-oil sector is concerned, economic activity will be boosted by the 'Diamond, Metallic and Other Non-Metallic Minerals Extraction', 'Fisheries and Derivatives' and 'Transport and Storage' sectors, which are expected to grow by +9.5%, +8.5% and +8.4%, respectively. The expansion of the former will be based on increasing diamond production, the second on implementing artisanal fishing and aquaculture projects, and the third on modernising transport and logistics. For the oil sector (crude oil and gas), growth is forecast at around 1.1%, following the start-up of new wells and increased efficiency in existing fields.

Foreign Exchange Market

In 2025, the foreign exchange market was marked by the stability of the Kwanza against the US Dollar and some volatility against the Euro. The USD/AOA exchange rate remained around 912 throughout the year. The EUR/AOA exchange rate, on the other hand, declined by 13.1% (significantly more than the 3.5% recorded in 2024), closing the year at 1,072. The gap between the official and parallel exchange rates ended the year at around 21%.

External Sector

According to BNA data, the goods account recorded a surplus of USD 4.1 billion (bn) in the third quarter, a reduction of 31.3% compared with the same quarter of the previous year, mainly driven by the decrease in exports. Oil exports totalled USD 7.3 billion, of which crude oil exports amounted to USD 6.3 billion, a decrease of USD 8.1 million, due to the reduction in the price per barrel (-12.7% YoY) and in production volumes (-11.0% YoY). With regard to gas, there was a slight increase in exports (+11.1% YoY), due to higher export volumes (+19.0% YoY). Non-oil exports rose by 21.8% YoY. Imports increased slightly (+5.7% YoY), with non-oil imports growing by 11.9% YoY. According to BNA, the current account balance in the third quarter of 2025 corresponded to 1.2% of GDP.

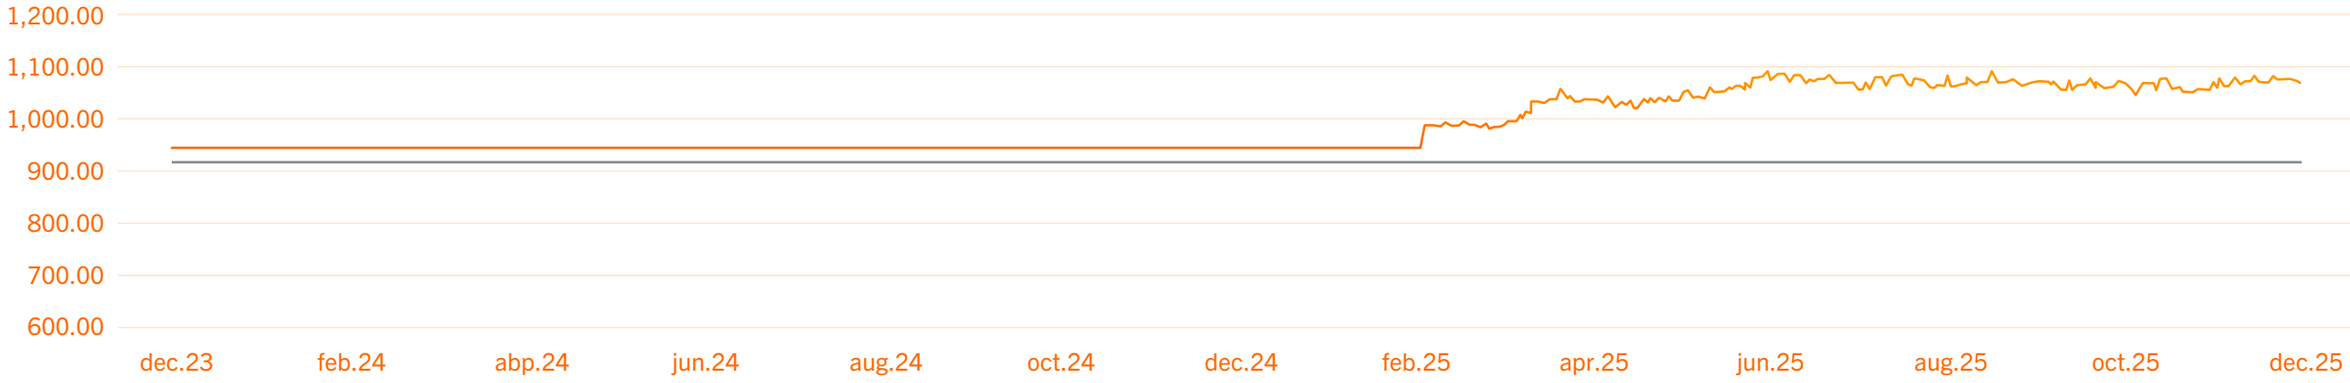

Net international reserves amounted to USD 15.9 billion by year-end, which equates to approximately 7 months' worth of imports of goods and services.

According to BNA, in November 2025, the stock of credit to the economy, in national currency, reached AOA 7.2 billion, an increase of AOA 1.3 billion (+21.1%) compared with the same period last year. The total credit granted under BNA Notice 10/2024 for the promotion of the real economy reached AOA 1.3 billion. Credit to the private sector in national currency amounted to AOA 7.7 billion, a year-on-year increase of 12%. Credit to the public sector in national currency expanded by AOA 404.3 million to AOA 1.2 billion.

With regard to the lending breakdown by economic activity sector during the period under review, it is worth highlighting the following key aspects:

- Wholesale and Retail Trade accounted for a 19.2% share, amounting to AOA 1.7 billion;
- Households accounted for an 18.9% share of the total lending (totalling AOA 1,6 billion);
- Manufacturing industries accounted for AOA 0.8 billion, representing 9.0%.

Exchange rate

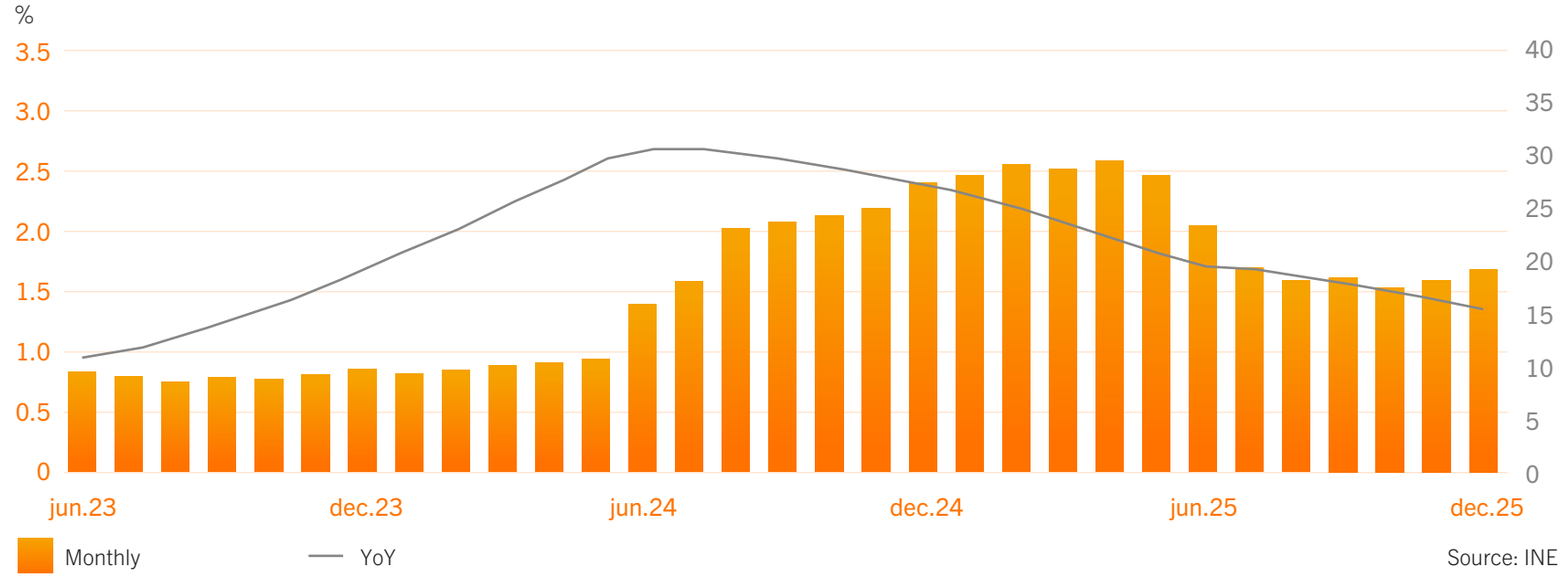

Source: BNA

Inflation

Year-on-year inflation declined consistently throughout 2025, influenced by the moderation in the National Consumer Price Index (CPI). The process of eliminating fuel subsidies, the adjustments to energy and water tariffs, and the 20.7% increase in school fees and emoluments were largely transitory measures, which did not generate first- or second-round effects capable of reversing the downward trajectory of year-on-year inflation. The latter continued its downward trend, decreasing by around 11 percentage points (p.p.) between January and December and ending the year at 15.7%.

THE BFA

THE BFA

A nossa história

1990
- Opening of a representative office of the former Banco de Fomento Exterior (BFE) in Luanda.

1993
- The BFE strengths its footprint in Angola with the opening of a branch in Luanda, which began operating as a Universal Commercial Bank, with a share capital equivalent to 4 million USD.

1996
- BFA acquires the legal status of an autonomous entity under Angolan law.

2002
- BFA acquires the legal status of a full autonomous banking entity under Angolan law.

2003
- Opening of the new BFA Head Office in Luanda, a major milestone achieved in terms of positioning the BFA brand in the Angolan market and a major landmark within the Bank's Retail Network expansion plan, since it allowed the Bank's Central Services to be located in a single building.

2004
- Start of the Retail Network customer segmentation process with the opening of the first three Corporate Centres, aimed at specialised service to Corporate Customers.

2005
- BFA's Social Fund was established, based on three pillars of action: Education, Health and Social Solidarity;
- Rollout of the BFA Gold Credit Card, making it the first credit card available in the Angolan market.

2006
- Major boost to the retail network expansion and strengthening of the customer segmentation, with the opening of the first Investment Centre.

2007
- Retail Network expansion to 96 Retail Outlets, 83 Branches, 7 Business Centres, 4 Investment Centres and 2 Banking Service Points;
- In partnership with VISA and EMIS, BFA is the first bank to rollout a cash withdrawal service using credit and debit cards at all BFA ATMs.

2008
- Changes made in BFA's shareholding structure as a result of the sale of 49.9% of BFA's capital to Unitel;
- Expansion of the Investment Centres Network to the Benguela Province, with the opening of the first Investment Centre in Lobito;
- Rollout of the BFA Super Savings product, the main instrument for attracting new customer deposits, particularly in USD.

2009
- Retail Network expansion to 129 retail outlets;
- Rollout of the BFA Savings Plan product and the Western Union service.

2010
- Setting up the Central Archive as part of an up-to-date and dynamic information system, aimed primarily at improving the quality of customer service in terms of enquiries and documentation requests.

2011
- Rollout of the BFA SMS service for private customers;
- Launch of the eMudar@BFA project, aimed at providing the Bank with an application platform for process management;
- Signing of the Bankita Programme Agreement with the BNA.

2025
- Completion of the largest Public Offering of Shares;
- Creation of the BFA Foundation.

2024
- BFA's Customer Base growth achieves a new historical milestone exceeding 3 million customers;
- BFA's Banking Representatives Network expansion, with a sound increase of BFA's banking representative offices footprint nationwide.

2023
- Rollout of the Banking Representatives Network "BFA Here";
- Incorporation of the company "BFA Pensions";
- Implementation of a new Data Center;
- Rollout of the banking customer service points entitled "Orange Spaces".

2022
- Release of the BFA App 2.0;
- Incorporation of the company BFA Capital Markets..

2020
- BFA becomes the first Angolan Bank to accept American Express Cards;
- Upgrade/transition to the 'Banka 3G' platform.

2019
- BFA reaches a customer base of over two million customers;
- Completion of the Risk Function Implementation and Operationalisation process;
- Opening of the first BFA Private Banking branch;
- Establishment of two specialised Business Centres for the Public and Institutional Business Sectors.

2018
- Establishment of the Agribusiness Department, tasked with supporting the sustainable development of this business sector in Angola;
- Effective implementation/operationalisation of the Bank's Risk Management Function;
- Setting up BFA's Training Academy.

2017
- The company UNITEL buys +2% of BFA's share capital, becoming the majority shareholder.

2016
- Legal incorporation of the subsidiary BFA Asset Management ('BFA AM'), a company specialised in the marketing and management of investment funds.

2015
- BFA becomes the first member of BOVIDA, with more than 70% of the market share in terms of number and volume of transactions;
- BFA releases its first mobile application.

2014
- Rollout of the BFA Customer Service Helpline;
- Rollout of the Kandandu Prepaid VISA Card.

2013
- Setting up the Oil & Gas Vendors Corporate Centre, which ensured an effective response to the specific needs of service provider companies for Oil & Gas industry corporations.

2012
- Establishment of the Oil & Gas Operators Business Centre which ensured an effective response to the specific needs of Oil & Gas operators;
- BFA's Retail Network expansion to a total of 167 retail outlets, 139 branches, 15 Corporate Centres, 8 Investment Centres and 5 Banking Service Points in December;
- BFA's retail counters in the Luanda province reach a 20% market share (out of a total of 498).

Corporate Governance

Corporate Governance Guiding Principles

The BFA Corporate Governance Guiding Principles in force are underpinned by the strict compliance with both national and international legislation and regulations, applicable international standards and recognised best corporate practices, as well as in alignment with the highest ethical and deontological values and principles.

Management transparency:

- Permanent and complete **Internal information** that allows the non-executive members of the Board of Directors and the members of the Supervisory Board to effectively carry out their supervisory and inspection duties;
- Comprehensive and accurate **External information** that allows Shareholders, authorities, auditors, investors, and the community in general to assess the quality and conformity of the information provided and the results achieved;
- **Independence of executive management** from Shareholders or specific interests;
- **Fairness and harmony in the relationship** with Shareholders, Customers and Employees and in the alignment of their respective interests;
- **Loyalty, embodied in the implementation of mechanisms** to prevent situations of conflict of interest;
- **Efficiency in the operation and interaction** amongst all the Bank's management and supervisory bodies;
- **Accuracy in managing the many different inherent risks** underlying the Bank's operations and activity;
- **Decision-Making Involvement**, achieved through the adoption of collegial models in decision-making processes and by fostering and supporting teamwork;
- **Performance and merit, fundamental criteria** of the assumptions on which the remuneration of Employees and directors is based;
- **Value creation**, the corollary of all the principles set out and the primary objective of BFA's management and Employees.

Corporate Structure and Governance Model

Shareholder Structure

BFA was incorporated by public deed on August 26th of 2002, following the changeover of Banco BPI, S.A.'s Angolan Branch into a legal banking entity under Angolan law.

Until the beginning of 2017, BFA was majority owned by the BPI Group, with 50.1% of the respective share capital, and with the remaining 49.9% held by UNITEL, S.A.

On January 5th of 2017, in accordance with the purchase and sale agreement celebrated on October 7, 2016, BPI, sold its 2% participation in BFA to UNITEL, SA. The latter became BFA's major Shareholder, holding 51.9% of its share capital.

Pursuant a public deed published in the Official Gazette III Series – No. 11, of 17th January 2017, in accordance with the unanimous written resolution of the company's Shareholders, dated 14th October 2016, and the corresponding authorisation from the Banco Nacional de Angola (BNA), BFA's articles of association were comprehensively redrafted as a result of the change in its Shareholder structure.

By deed published in Official Gazette III Série – No. 103, of 5 June 2025, following the Unanimous Written Resolution of the respective Shareholders of 30 April 2025, and the authorisation of the BNA, the share capital and the number of shares per vote were changed, along with the complete reformulation of BFA's Articles of Association.

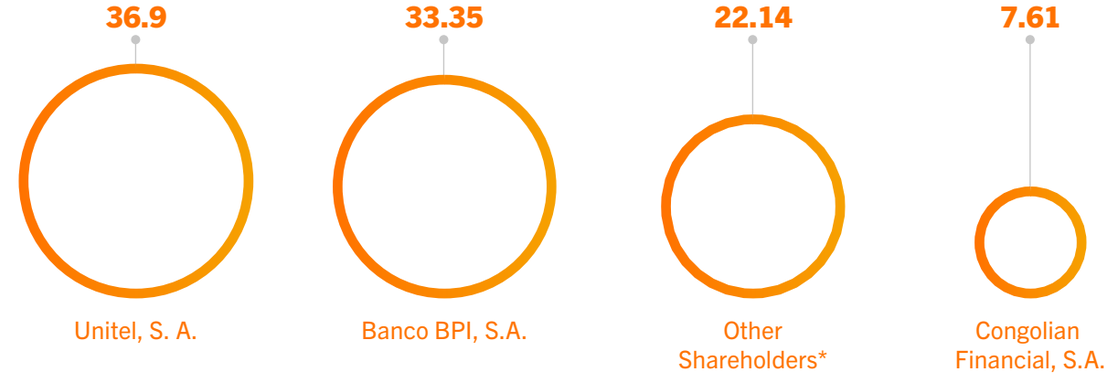

The company's capital, fully subscribed and paid up, is AOA 90,000,000,000 (ninety billion kwanzas) and is represented by 15,000,000 (fifteen million) shares, each with a nominal value of AOA 6,000 (six thousand kwanzas).

As a result of the Public Offer for Sale (OPV) of 4,462,500 ordinary, book-entry, registered shares, with a nominal unit value of AOA 6,000, representing 29.75% of its share capital, and the admission to trading of 15,000,000 ordinary, book-entry, registered shares, with a unit value of AOA 6,000, representing the totality of its share capital, BFA changed its Shareholder structure.

Since 30 September 2025, BFA's share capital has been divided among the following Shareholders:

Shareholder Structure

%

*With holdings of less than 2% of the share capital, distributed between companies, individuals and institutions.

The BFA holds equity stakes in the following companies:

	*EMIS – Sociedade Interbancária de Serviços	*Sociedade de Fomento Habitacional	*Instituto de Mercado de Capitais	Fundo Kimbo	BFA Gestão de Activos, SGOIC, S.A.	BFA Pensões SGFP, S.A.	BFA – Capital Markets. SDVM, S.A.

Activities Carried Out	Management of infrastructures and support technology for national and international payment systems, Management and control of cards (debit and credit), Provision of electronic services for the transmission and management of information and data, Management of the network of automatic payment terminals and ATMs	Management of the Housing Loan Guarantee Fund to be granted by BFA as part of the Zango housing project, to be developed by BFA and the Fundação José Eduardo dos Santos;	Provision of Training Services for Capital Market Participants	Investment Fund	Management company of collective investment undertakings	Pension Fund Management Company	Securities Distribution Company

*Up to the present date, these companies do not materially contribute to the financial performance and profitability of the BFA Group, as they are currently considered dormant companies.

EMIS – Empresa Interbancária de Serviços

BFA is a founding Shareholder of EMIS – Empresa Interbancária de Serviços, S.A. (EMIS), and is also its largest private Shareholder, with 20% of the capital. In addition, BFA is also its main Customer and user of the services provided by EMIS, which currently manages the entire national payment system (Multicaixa network, credit transfer and check clearing systems, as well as the card issuing and management platform).

EMIS's corporate purpose is to provide banking services, specifically payment system management, such as the Multicaixa network and national payment systems, with particular emphasis on credit transfers and check clearing.

According to EMIS' articles of association, approved at the General Meeting on December 17th, 2010, the EMIS management is performed by a Board of Directors, which may delegate the day-to- day management to an executive committee.

Throughout its existence, EMIS has received constant support and encouragement from BFA for its corporate initiatives, with BFA often being one of the leading banks in the financial system to seek out and implement new solutions and services to be made available in the market.

BFA Asset Management

BFA Gestão de Activos – Sociedade Gestora de Organismos de Investimento Colectivo, S.A. is a company incorporated under Angolan law in December 2016 and headquartered in Luanda, Talatona, at Condomínio Zenith Towers, Torre 2, Piso 10, registered with the Capital Markets Commission under number 001/SGOIC/CMC/12-2016, registered with the 2nd Section of the Commercial Registry Office of Luanda, Guiché Único da Empresa, under number 1.491-16/0329, with tax identification number 5417405345, and a share capital of AOA 400,000,000.00 (four hundred million kwanzas).

A market leader with a team of highly skilled financial markets experts, BFA Assets' Management is engaged in the professional management of one or more collective investment schemes (CIS), as well as the marketing of participation units and the provision of investment advisory services. BFA Assets' Management's investment strategy encompasses a full spectrum of asset classes, identified through careful/detailed monitoring and analysis of the opportunities and trends emerging in the financial markets over time.

BFA Capital Markets – SDVM, S.A.

BFA Capital Markets – SDVM, S.A., incorporated on 29 September 2022, started its activity in June 2023, and its corporate purpose is to carry out activities related to the Securities Market, namely the reception and transmission of orders on behalf of others, the execution of orders on regulated markets or outside them, trading for own portfolios, registration, deposit and custody services, assistance in unsecured public offerings, and advice on capital structure, industrial strategy, as well as the merger and acquisition of companies, and the granting of credits, including the loan of securities.

BFA Capital Markets – Securities Broker-Dealer Company PLC, has a share capital of AOA 200,000,000.00 (two hundred million kwanzas) represented by 200,000 (two hundred thousand) shares. BFA is the largest Shareholder, holding 94.94% of the capital directly and 5% indirectly through BFA Gestão de Activos, for a total of 99.94%.

BFA Pensões – Sociedade Gestora de Fundos de Pensões, S.A.

BFA Pensões – SGFP, S.A. (hereinafter referred to as "BFA Pensões"), after its incorporation on 23 November 2022, began operating in June 2023, following the granting of the License Certificate for the exercise of its activity and the subsequent formal approval by the sector regulator of the members appointed by the Shareholders for the composition of its Governing Bodies.

In terms of the corporate governance model and the internal control system, the company has aligned itself with the three lines of defence model in force at the parent company and with the corporate governance policy in force at the BFA Group, and the responsibilities are adequately distributed among the members of the management body.

The company's business strategy is aligned with the company's guiding principles outlined hereunder, and in accordance with BFA's corporate purpose and strategic vision.

Fundo Kimbo

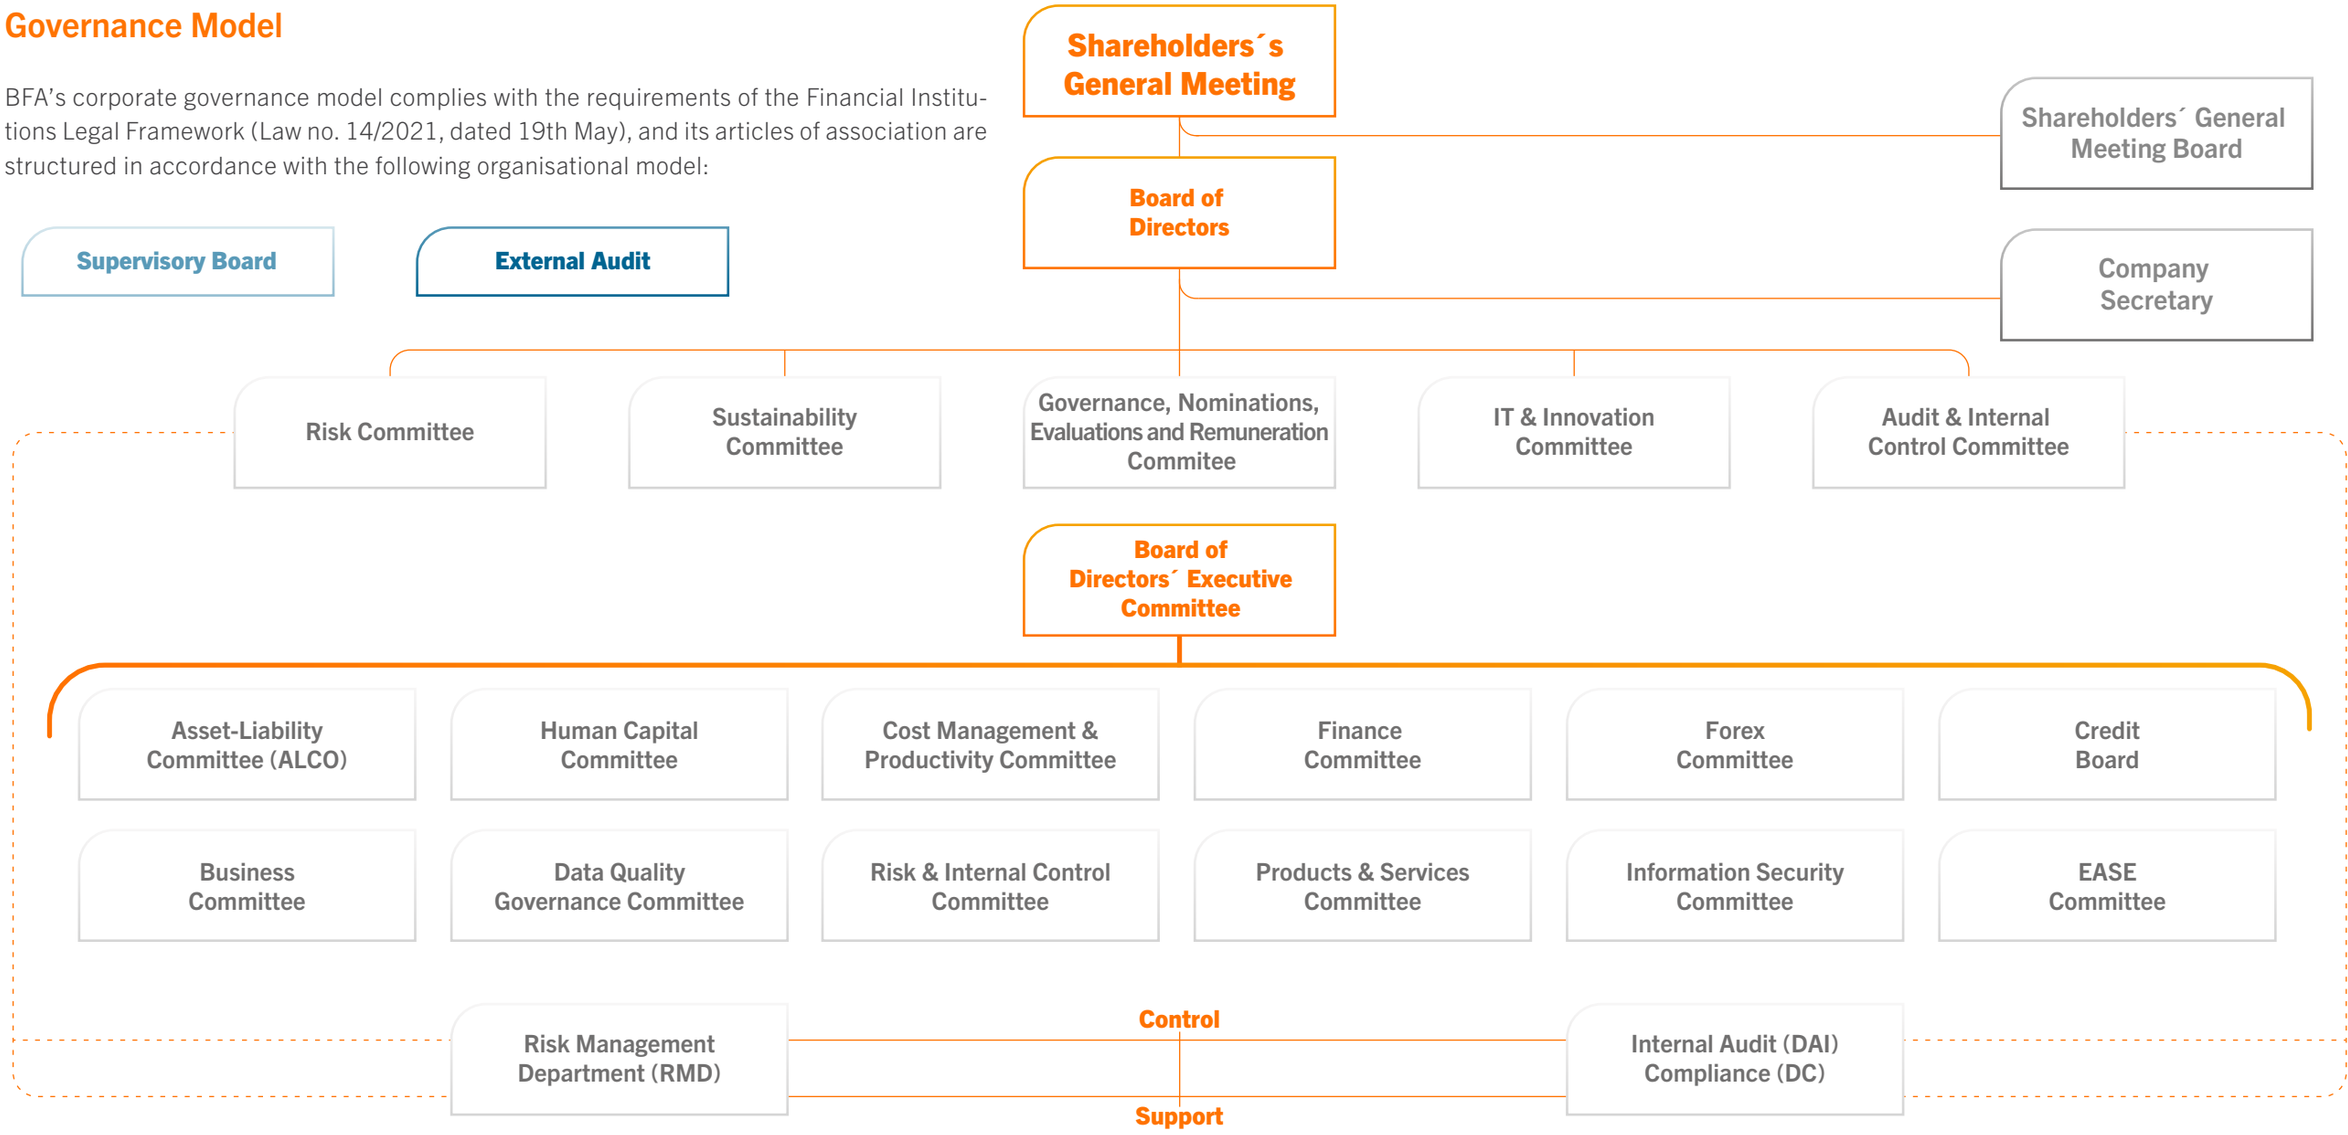

On the 29th of August 2024, the Angola's Sovereign Wealth Fund (Fundo Soberano de Angola – FSDEA) formally joined the Venture Capital Investment Fund (Fundo Kimbo) in partnership with BFA Asset Management (BFA AM), with a total investment of USD 5 million. This strategic agreement represents a major breakthrough and a key step forward in the collaboration between the `FSDEA' and `BFA AM' by strengthening combined endeavours to promote sustainable economic development in Angola through the financing of Small and Medium-sized Enterprises (SMEs).

The Fundo Kimbo is in its first capitalisation phase targeting a total value of USD 20 million (amount also expressed equally in the national currency Kwanza) with a 10-year maturity. Venture Capital Investment Fund (Fundo Kimbo) is expected to invest in a wide range of strategic sectors in accordance with the government goals of diversifying the national economy, with a particular focus on the following sectors:

i) Agribusiness downstream activities and ii) Logistics.

Governance Model

BFA's corporate governance model complies with the requirements of the Financial Institutions Legal Framework (Law no. 14/2021, dated 19th May), and its articles of association are structured in accordance with the following organisational model:

Pursuant to a unanimous resolution adopted at the BFA's Shareholders' General Meeting on the 24th of July 2023, new members of the Bank's Governing Bodies were appointed for a three-year term (2023/2025).

All members of BFA's governing bodies have the technical skills, professional experience, and appropriate moral repute and standards to perform their functions. They are bound by strict duties of confidentiality and subject to a set of rules aimed at preventing conflicts of interest or situations of insider trading, in accordance with the best corporate practices as well as respecting the best principles of sound and prudent management.

General Meeting

The General Meeting is the corporate body composed of all the Bank's Shareholders, whose functioning is regulated under the terms of the Bank's Articles of Association.

BFA's Shareholders' General Meeting has the following key powers and duties:

- Amendment of the Company's Articles of Association, including increases or reductions in share capital;
- Merger, demerger, transformation, or dissolution of the Company;
- Issuance of any securities that may give rise to subscription or conversion into shares;
- Introduction of limitations or suppression of Shareholders' pre-emptive rights in capital increases;
- Acquisition and disposal of own shares or bonds;
- Distribution of profits for the financial year, under the terms laid down in BFA's Articles of Association;
- Other distributions of assets to Shareholders and advances on account of profits.

Composition of the Shareholders' General Meeting Board

CHAIRPERSON	SECRETARY
• Coutinho Nobre Miguel	• Flávia Nahari Furtado Gomes

Board of Directors

In accordance with BFA's Articles of Association and particular rulebook, the Board of Directors has the following powers, duties and composition:

- It is composed of an odd number of members, with a minimum of seven and a maximum of 15, as decided by the General Meeting, which elects the Chairman and, if it so decides, one or more Deputy Chairmen;
- The Board of Directors meets regularly once a month and whenever convened by its Chairman. It is incumbent upon the Chairman to coordinate its activities, preside over its meetings, and monitor the implementation of its resolutions. The Chairman is also responsible for representing the institution before the public authorities and other authorities.

In accordance with BFA's Articles of Association and its particular rulebook, the Board of Directors has the most comprehensive powers of management and representation of the company, namely:

I. Approval of business and strategic plans, budgets, and any amendments thereto, under the conditions defined in the Articles of Association;

II. Decisions with a significant impact on equity (i.e., with a value of more than 7.5% of equity) or strategic decisions not foreseen in the business plan or budget, namely expenses and/or investments that trigger the need to increase equity, and partnership agreements, joint ventures, or similar;

III. Any significant change in the geographical area in which the Company operates, unless provided for in the strategic or business plan;

IV. Listing of shares representing the share capital of the Company or its subsidiaries;

V. Approval of the proposed appropriation of results;

VI. Transactions with related parties exceeding USD 2,500,000;

VII. Issuance of subordinated debt, unless provided for in the company's budget;

VIII. Amendments to the Board of Directors (BoD) and Board of Directors' Executive Committee (EXCO) particular rulebooks, as well as to the credit and risk areas rulebooks;

IX. Incorporation of any subsidiary or acquisition of a shareholding resulting in the establishment of a subsidiary;

In addition, it is also incumbent upon the Board of Directors to carry out all other relevant corporate deeds that are deemed appropriate or required for the pursuit of the business activities included within the company's corporate purpose and, in general, perform all deeds that do not fall within the powers of other company's governing bodies. Accordingly, among the duties and responsibilities of the Board of Directors (BoD), the following core powers stand out:

I. Acquisition, sale or encumbrance of movable and immovable property;

II. Provision of bonds and personal or real guarantees by the Company;

III. Opening and closing offices;

IV. Changes in the organisation of the Company;

V. Appointment of legal representatives to perform certain corporate deeds or categories of deeds, with a clear definition of the scope of their duties and tenure.

It is also incumbent upon the Board of Directors (BoD) to approve and monitor the comprehensive business strategy and risk strategies, as well as the policies and actions necessary to achieve the established corporate and strategic goals, which are implemented by each of the Bank's departments engaged in their execution.

The Board of Directors' resolutions are recorded in the minutes, drawn up in the company's official book, and signed by all members in attendance.

Executive Committee of the Board of Directors

The Bank's executive management is entrusted to the Board of Directors' Executive Committee (EXCO), which, in accordance with BFA's Articles of Association and particular rulebook, possesses the following key duties and powers:

- It comprises three (3), five (5) or seven (7) members appointed by the Board of Directors, which shall appoint the Chairperson (CEO) from among its members. According to the table above, BFA's ECO is currently made up of seven Directors;
- It meets when convened by its Chairperson (CEO), usually once a week and at least once a month;
- Its exercise is constantly monitored by the Board of Directors, the Supervisory Board, and the External Auditor.

Within the framework of its particular rulebook, approved by the Board of Directors and subject to the action plans and annual budget, as well as other measures and guidelines approved by the Board of Directors, the EXCO holds broad management powers, required or appropriate for carrying out financial banking activities, under the terms and to the extent provided for in the applicable law, namely, the power to deliberate and to represent BFA with respect to the following matters:

I. Credit or financing operations;

II. Provision of real guarantees for securities, which are necessary or convenient for the pursuit of the activities included in the Company's object;

III. Acquisition, disposal or encumbrance of any securities that do not represent an equity stake in any companies;

IV. Disposal of properties/real estate that have fallen into the Bank's legal portfolio as a result of credit proceedings and/or other legal disputes, whether settled out of court or through the courts;

V. Procurement and award of third-party goods and services, per single contract or set of contracts concluded with the same entity over the course of the calendar year, up to USD 2 million or equal amount in another currency;

VI. Admissions, and definition of levels and categories of Employees, under the terms set out in the Company's budget and in the decisions approved by the Board of Directors;

VII. Exercise of disciplinary power and application of any sanctions;

VIII. Appointment of legal representatives, with or without powers of attorney, to perform certain deeds or categories of deeds, which shall lay down the scope of their powers of attorneys' mandates;

IX. Representation of the Bank, both in and out of court, actively and passively, including the initiation and contestation of judicial or arbitration proceedings, as well as the confession, withdrawal, or settlement of any actions and the assumption of arbitration commitments.

With regard to the companies in which the Bank holds a shareholding position, the Board of Directors' Executive Committee (EXCO) may:

I. Appoint who shall represent the Bank at the General Meetings of its subsidiary companies, and determining the voting rights to be exercised therein;

II. Appoint nominees to assume corporate positions in governing bodies to which the Bank may be elected, as well as the individuals that the Bank must nominate to stand for any corporate positions in companies in which it merely holds an interest.

Supervisory Board

The Supervisory Board's composition and *modus operandi* are governed by the provisions laid down in BFA's articles of association and its particular rulebook, which stipulates the following:

- It is composed of a Chairman and two members, one of whom must be an expert accountant.
- Its members must be natural persons with full legal capacity and possess the technical qualifications (particularly in law, accounting, auditing, and financial management) and professional experience, including operational knowledge of the banking business, that enable them to effectively fulfill the responsibilities assigned to them.
- It convenes at least once every quarter.

The Supervisory Board is responsible for carrying out its statutory and legally assigned duties, namely those set out in Article 441 of the Companies Act:

I. Supervise the management of the Bank;

II. Ensure compliance with the law and bylaws;

III. Verify correctness of corporate books and registries and supporting documentation;

IV. Ensure compliance with the law and bylaws;

V. Verify correctness of corporate books and registries and supporting documentation.

External Audit Firm

BFA's external audit is performed by KPMG Angola, under the terms of the service provision regulations laid down in BNA Notice no. 12/22.

The Bank upholds and warrants that its auditors are independent in complying with applicable regulatory and professional requirements and that their objectivity is not compromised.

For this purpose, BFA has incorporated in its governance practices and policies several mechanisms that safeguard the independence of the external audit firm.

External Auditor
KPMG Angola

* By Official Letter No. 618/DRO/25 of 16 December 2025, the National Bank of Angola approved the request for a preliminary assessment prior to the appointment of Mr Gilberto Rodrigues Caliatu as Vice-Chairman of the Supervisory Board.

Support Committees to the Board of Directors

Audit and Internal Control Committee

The Audit and Internal Control Committee has the following composition:

MEMBERS WITH VOTING RIGHTS

Chairwoman
Maria do Carmo Bernardo

Deputy Chairwoman (Independent)
Laura Alcântara Monteiro

Members
Jacinto Manuel Veloso
Maria Amélia Duarte
Rui Sousa Malaquias
Filomeno Alves de Ceita
Divaldo Kienda Palhares
José António Cerqueira

REGULAR INVITEES

Chairman of the Executive Committee
Luís Roberto Gonçalves

Executive Director with responsibility for Risk and Internal Control
Natacha Sofia Barradas

Members of the Audit Committee
Alcides Safeca
Gilberto Caliatu
Valdir Rodrigues

Head of the Internal Audit Department
Irene Vicente

Head of the Compliance Department
Liana Santos

Head of the Risk Management Department
Manuel Bamba

In accordance with its particular internal rulebook, the Audit and Internal Control Committee (AICC) main powers are as follows:

I. To ensure the establishment and implementation of an effective and properly documented reporting system, including the process of preparing and disclosing the financial statements;

II. Supervising the formalisation and operationalisation of the institution's accounting policies and practices;

III. Reviewing all financial information for publication or internal disclosure, in particular the annual accounts of the Board of Directors;

IV. Supervising the independence and effectiveness of the internal audit, approving and reviewing the scope and frequency of its actions, and overseeing the implementation of proposed corrective measures;

V. Supervising the performance of the Compliance function, to ensure the continuous improvement of the management of internal controls associated with Compliance risk and the effective, efficient, and independent exercise of the function;

VI. Supervising the performance of the Risk Management function, in terms of monitoring the effective management of operational risk and other non-financial risks;

VII. To oversee the external audit firm's activity and independence, by setting up a communication channel aimed at obtaining information on the findings and conclusions of the audits conducted, as well as on the audit reports that have been drawn up.

Risk Committee

BFA's Risk Committee (RC) has the following composition:

MEMBERS

Chairman
Filomeno Alves de Ceita

Deputy Chairwoman (Independent)
Laura Alcântara Monteiro

Members
Divaldo Kienda Palhares

Rui Sousa Malaquias

Jacinto Manuel Veloso

José António Cerqueira

REGULAR INVITEES

Executive Director with responsibility for Risk and Internal Control
Natacha Sofia Barradas

Executive Director with responsibility for Credit
José Nascimento

Head of the Compliance Department
Liana Santos

Head of the Risk Management Department
Manuel Bamba

Head of Corporate, Institutional and Project Credit Risk Management
Katiavala Silva

In accordance with its particular internal rulebook, BFA's Risk Committee main powers and duties are as follows:

I. Evaluate and promote the effectiveness of the Risk Management and Compliance functions, as well as the processes and procedures in place for managing materially relevant risks; more specifically, assess whether the internal functions responsible for controlling risks have adequate resources to properly execute their responsibilities. The Risk Committee must appraise and issue an opinion on the functions' activity plans and assess the annual activity reports;

II. To advise the Board of Directors on subject matters relating to the Bank's risk strategy;

III. To monitor BFA's risk management policy with regard to the Bank's activity overall risks;

IV. Analyse and issue an opinion on credit operations approved by the Board of Directors;

V. To monitor compliance with total capital and liquidity requirements and the Internal Capital Adequacy Assessment Process (ICAAP) and Internal Liquidity Adequacy Assessment Process (ILAAP), taking into account the policies laid down for the implementation of BFA's risk profile;

VI. To analyse a set of feasible and potential stress scenarios (stress tests) to assess how the Bank's risk profile would react to external and internal events, identifying vulnerabilities and corrective measures, where applicable, and monitoring their implementation;

VII. Assessing the effectiveness and efficiency of the Bank's internal control processes, namely by evaluating the recommendations of internal and external auditors and regulators to the Risk and Compliance functions, and monitoring the proper implementation of the measures adopted;

VIII. To issue an opinion on general institutional assessments concerning Anti-Money Laundering, Counter Terrorism Financing and Proliferation of Weapons of Mass Destruction (AML/CTF/PWMD) internal control and other special compliance risks and to provide relevant suggestions and recommendations;

IX. To evaluate the comprehensive compliance risk management standards in all their scale/domain;

X. To issue opinions on risk management as well as compliance rules and policies;

XI. To analyse the development of materially relevant risks, monitored through reports (brief reports, highlighting the key issues, with the relevant risk metrics and submitted in a timely manner), which properly enable a well-informed position to be formulated on the risks being monitored and managed. The reports should be prepared and submitted at a frequency decided by the Risk Committee, allowing for an overall assessment and the appropriate presentation of the topics to the Board of Directors;

XII. Review whether the incentives established in the Bank's Remuneration Policy appropriately consider risk, capital, liquidity, and performance expectations, including revenue timelines;

XIII. To monitor the performance of the Risk Management Framework, as provided for in Notice No. 8/2021, dated 18 June.

IT and Innovation Committee

The IT and Innovation Committee has the following composition:

VOTING MEMBERS

Chairman
Jacinto Manuel Veloso

Members
Maria Amélia Duarte

Filomeno Alves de Ceita

Rui Sousa Malaquias

José António Cerqueira

Divaldo Kienda Palhares

REGULAR INVITEES

Chairman of the Executive Committee
Luís Roberto Gonçalves

Executive Director with the IT Systems Department Portfolio
Paulo Alves

Head of the Marketing Department
Francisca Costa

Head of the IT Systems Department
Helder Muondo

Head of the Marketing Department
Filipe Silvério

Advisor
Amilcar Safeca

In accordance with its particular rulebook, BFA's IT & Innovation Committee main powers and duties are as follows:

I. To advise the Board of Directors (BoD) on the Bank's IT systems development strategy as well as its implementation;

II. To oversee and monitor the projects implementation related to the Bank's IT systems;

III. To support and provide guidance to BFA's Board of Directors in setting out the cybersecurity strategy and reviewing the projects' state of play.

Governance, Nomination, Evaluation and Remuneration Committee (GNERC)

The Governance, Nomination, Evaluation and Remuneration Committee has the following composition:

VOTING MEMBERS

Chairwoman
Maria do Carmo Bernardo

Deputy Chairwoman (Independent)
Laura Alcântara Monteiro

Members
Maria Amélia Duarte

Rui Sousa Malaquias

REGULAR INVITEES

Chairman of the Executive Committee
Luís Roberto Gonçalves

Without prejudice to the powers assigned to other governing bodies, the Governance, Nomination, Evaluation and Remuneration Committee (GNERC) is entrusted with the following powers and functions:

I. To support and advise BFA's governing bodies on matters related to the Bank's governance, namely:

- The adoption by the Board of Directors of Corporate Governance policies in line with the provisions of the Articles of Association, the applicable legal provisions, and in accordance with national and international recommendations, standards, and best practices;

- The implementation of the Policy for the Prevention and Management of Conflicts of Interest, Transactions with Related Parties, and the Code of Conduct;

II. Supporting the Governing Bodies in matters related to filling vacancies on the different bodies, and in the assessment and remuneration of Governing Bodies and Employees associated with critical functions, namely:

- In the selection of candidates for Directors and the preparation of proposals to submit to the Shareholders' General Meeting, with a view to their appointment;
- In the selection of in-service Directors and the preparation of proposals to present to the Board of Directors, with a view to their inclusion in the Executive Committee;
- On preparing succession plans;
- Appointment, dismissal and mobility of Directors of areas of special relevance;
- Preparation of the proposal for the remuneration of the Governing Bodies to be decided by the Company's General Meeting;
- Definition of the key performance indicators underlying the award of variable remuneration;
- Decision on the application of the 'malus' and claw-back clauses, and on the assessment of events that may justify their application;
- Definition of guidelines on the appraisal and remuneration of Employees associated with critical functions and management functions of the internal control system, as well as other areas of special importance;
- Assessment of the remuneration policy alignment with BFA's risk policy and with national and international regulatory requirements developments in force;
- To issue an opinion on the variable remuneration proposal for Senior Executive Positions or Key Management Roles.

III. When performing its duties aimed at enhancing and fine-tuning BFA's governance and supervisory model, BFA's Governance, Nomination, Evaluation and Remuneration Committee (GNERC) must issue an opinion on the following aspects, prior to their approval by the Board of Directors:

- BFA's compliance with the legal, regulatory, and supervisory provisions applicable to matters falling within the remit of the Governance, Appointments, Evaluation and Remuneration Committee;
- Assessment of BFA's governance structure's efficiency and effectiveness;
- Drafting of proposals for the improvement of BFA's governance structure.

IV. Without prejudice to the provisions of the foregoing paragraphs, whenever the GNERC deems it appropriate or is requested to do so, to propose to the Board of Directors (BoD) measures aimed at:

- Improve the current organisational and governance model, including the structure, organisation, distribution of powers, and functioning of the Governing Bodies;
- To enhance BFA's reporting quality standards provided to the market and to the relevant oversight bodies.

The Governance, Appointments, Evaluation and Remuneration Committee prepares an Annual Report on its activities each year, which it submits to the Board of Directors and the Supervisory Board by the end of February of the year following the one to which it relates.

The Governance, Appointments, Evaluation and Remuneration Committee prepares an Annual Report on its activities each year, which it submits to the Board of Directors and the Supervisory Board.

Sustainability Committee

The Sustainability Committee has the following composition:

VOTING MEMBERS

Chairwoman
Maria do Carmo Bernardo

Deputy Chairwoman (Independent)
Laura Alcântara Monteiro

Members
Filomeno Alves de Ceita

Maria Amélia Duarte

Jacinto Manuel Veloso

Divaldo Kienda Palhares

José António Cerqueira

Advisors
Mariana Assis
José Van-Dúnem

REGULAR INVITEES

Chairman of the Executive Committee
Luís Roberto Gonçalves

Executive Director with responsibility for Risk and Internal Control
Natacha Sofia Barradas

Executive Director with responsibility for Sustainability
Luís Roberto Gonçalves

Executive Director with responsibility for Finance
Francisca Costa

Head of the Sustainability Office
Denise Pinheiro

Head of the Risk Management Department
Manuel Bamba

The Sustainability Committee is entrusted with the following main duties and powers:

I. To advise the Board of Directors and the Executive Committee on the transversal corporate sustainability strategy, in terms that are integrated and consistent with BFA's strategy, with a view to promoting environmentally and socially responsible standards of action, adopting sustainable internal policies and conduct, and fostering the dissemination and awareness of socially and environmentally responsible behaviour;

II. To express an opinion, on its own initiative or at the request of the Board of Directors, on the Bank's sustainability, social solidarity, education, science, innovation, environmental, and cultural patronage policies;

III. To support the development of local clusters by helping to redesign products and markets;

IV. To monitor and oversee the implementation of the required internal conditions for BFA's sustained growth, from a three-dimensional viewpoint: economic, environmental and social, alongside with internal operational practices and sustainability policies;

V. To support the Board of Directors and the Executive Committee in drawing up their corporate purpose in social and environmental terms, as well as fostering and driving BFA's operational activities forward towards becoming a sustainable company, thus making it recognised as such both internally and externally;

VI. To compile, manage documentation standardisation and, whenever appropriate, disclose information on BFA's sustainability matters, including national and international standards and corporate best practices, studies, internal reports and guidelines issued by the financial institution governing bodies;

VII. To issue an opinion on BFA's Annual Solidarity Award Jury appointments;

VIII. To advance internal and external initiatives aimed at increasing sustainability matters awareness-raising;

IX. To prepare an annual report on the Bank's corporate social and environmental sustainability practices, providing an accurate account of the Sustainability Committee's activities over the year;

X. To assess the Annual Sustainability Report to be drawn up by the Organisational Unit(s) directly involved/accountable;

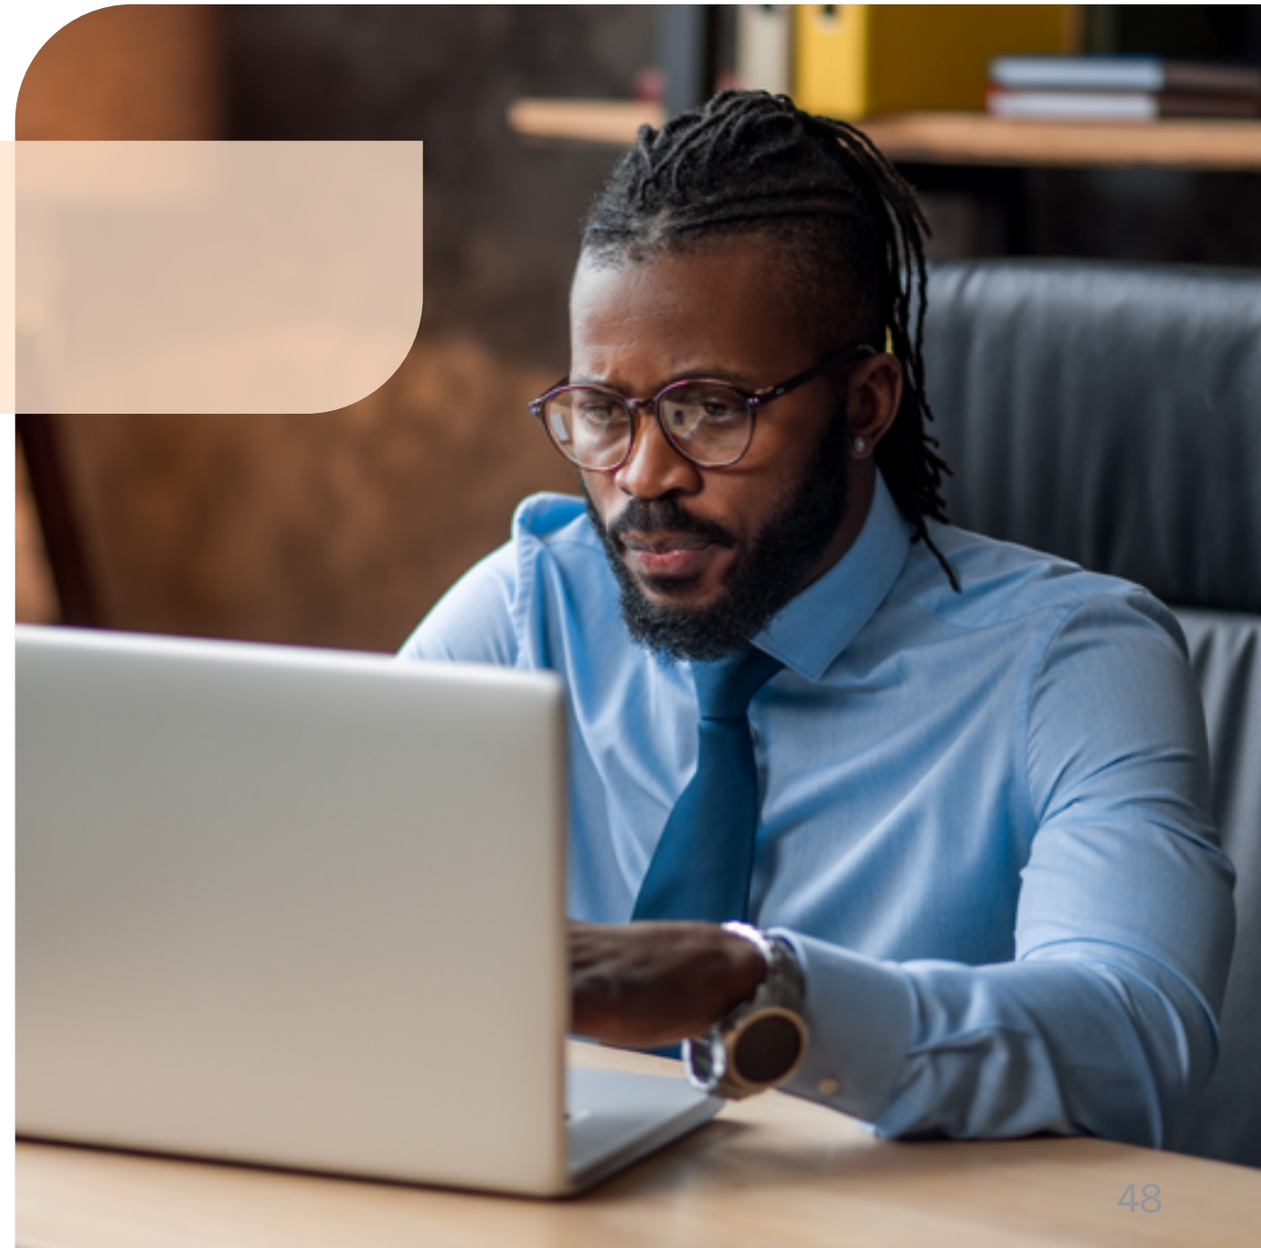

XI. To issue an opinion on BFA's Annual Activity Plan within the scope of corporate social and environmental responsibility;

XII. To issue an opinion on the allocation of resources and the strengthening of BFA's Social Fund operating plan, including Subsidies, Awards, Volunteering, or any other intervention methods within the social and environmental domain.

EXCO Expertise Committees

Additionally, and in compliance with both international standards and corporate best practices, the Executive Committee of the Board of Directors (EXCO), also includes twelve expertise committees:

ALCO Committee	Human Capital Committee	Productivity & Costs Committee
Financial Committee	Labour Discipline Committee	Business Committee
Governance & Data Quality Committee	Products & Services Committee	Internal Control & Risk Committee
Information & Security Committee	EASE Committee	Credit Board

Overview of the Committees and Their Composition

ALCO Committee

- To advise the Executive Committee of the Board of Directors with regard to the Assets and Liabilities management strategy;
- To submit a proposal to the Executive Committee of the Board of Directors on Assets and Liabilities management policies, with regard to liquidity, interest rate, exchange rate and market risk management, and to follow up and monitor these policies;
- To monitor key performance indicators and metrics and their alignment with the corporate goals and strategic targets established in the Strategic Planning with regard to the Balance Sheet's financial management;
- To monitor the national and international macroeconomic framework, particularly in terms of analysing market interest and exchange rate trends and identifying potential impacts.

Business Committee

- To monitor the business development and commercial performance of the different corporate networks;
- To monitor the competitive landscape and business development prospects;
- To set out the business policy, in particular through the identification of priorities, opportunities and constraints to the business activity;
- To request the drafting of proposals to be submitted to the EXCO aimed at addressing and troubleshooting obstacles/bottlenecks relevant to the business activity;
- To monitor the implementation of the established priorities, namely by analysing deviations and their impacts;
- To develop and drive the implementation of new products to be launched on the market, as well as monitoring their business performance;
- To monitor and boost the business activity by identifying new opportunities to implement processes and/or new methods as well as to ensure their subsequent analysis and assessment by the EXCO.

Human Capital Committee

- Analyse and provide inputs on Personnel management policies and regulations, whenever requested by HCD/EXCO;
- Analyse and issue an opinion for review and assessment by the EXCO:
  - Regarding proposals to appoint Employees to management or leading positions in the business departments (managers or equivalent);
  - Regarding internal mobility proposals for management positions in the business departments.
- Monitor the development and implementation of onboarding and training plans, with a particular focus on those aimed at the sales teams, and to propose changes or adjustments to the EXCO, whenever deemed appropriate;
- Review and provide inputs on the Succession Plans concerning key positions, for subsequent submission to the EXCO;
- Analyse labour-related incidents reported by the Audit Committee or any other corporate or governing body that may indicate potential serious irregularities, constituting a violation of the code of conduct or other labour duties, and submit a proposal to the EXCO on the implementation of measures deemed appropriate to prevent similar events from occurring in the future.

Products & Services Committee

- To monitor the business development and commercial performance of the different corporate networks;
- To monitor the regulatory framework that shapes BFA's financial products and services offer, in its different dimensions/aspects, namely product features, pricing and sales processes;
- To monitor the competitive landscape and the business development prospects related to the financial products & services offer in the domestic market;
- To submit a proposal for the ECBOD decision, the priorities for the development of new financial products and services, considering the evolving regulatory and competitive environment as well as the potential impact on the Bank's business;
- To monitor the implementation of the priorities established for the development of new products and services, namely by analysing deviations and assessing their corresponding impacts;

- To monitor the implementation of pricing policies, in particular regarding banking service charges and fees, requesting the drafting of proposals to be submitted to EXCO with the aim of adjusting them to the regulatory framework in force and/or to the competitive landscape.

Productivity & Costs Committee

- Monitor BFA's budget execution control and the attainment levels of the company's previously established strategic goals;
- Analyse the relevant shortcomings, deficiencies, or gaps in liaison with the heads and/or managers of each business unit and submit a proposal for the implementation of mitigating/corrective measures to EXCO.

Labour Discipline Committee

- To receive and assess information or reports concerning Employee conduct that may constitute a breach of employment duties, as provided for in the General Labour Law (GLL), the Bank's Code of Conduct, the Human Capital Regulations and other applicable Bank regulations;
- To decide on the initiation of disciplinary proceedings against offending Employees, in compliance with the applicable legal formalities and deadlines;
- To assess the final reports of disciplinary proceedings, evaluate the evidence, decide and apply disciplinary measures to offending Employees, restricting its decisions to the disciplinary measures provided for in Article 87(a), (b) and (d) of the GLL, namely: oral warning, recorded warning and temporary reduction in salary;
- To submit cases where the proposed disciplinary measure is Disciplinary Dismissal to the ECSC for decision.

Financial Committee

- To propose efficient methodologies for controlling the Bank's financial activity;
- To monitor the legislation and prudential regulations in force;
- Pricing Policy;
- To draw up the business strategy for launching new products;
- To manage balance sheet risks, namely: exchange rate risk, interest rate risk and liquidity risk.

Information & Security Committee

- Advise the EXCO with regard to the Information Security strategy;
- Advise the EXCO with regard to the Information Security policies;
- Monitor, analyse and report on the 'SGS' risk and performance metrics;
- Draw up remedial action plans, monitor their implementation and assign the appropriate functions and duties;
- Monitor and report on the information security internal and external framework and promote the periodic review of the related regulations.

Governance & Data Quality Committee

- To draw up the data management operational model and strategy and submit both for approval by the EXCO;
- To assess and submit for approval by the EXCO, the regulations supporting Data Governance (DG), the implementation of the necessary organisational structures and the initiatives aimed at implementing the appropriate technological and data infrastructure;
- To determine the inclusion criteria applicable to data owners and administrators based on the business areas/data domains relevant to Data Governance (DG);
- To monitor the development of the Data Management ecosystem, troubleshoot bottlenecks/shortcomings as well as ensure the active involvement of the relevant Stakeholders;
- To assess the risks associated with Data Governance and ensure appropriate reporting;
- To become aware/acknowledge, assess and prioritise the resolution of the main data-related problems;
- To approve mitigation/troubleshooting measures and corrective actions within the scope of data quality;
- To approve concept definitions, indicators and metrics including calculation rules;

- To establish, when appropriate, the setting up of Working Groups focused on particular frameworks or functional areas, with the aim of prioritising and/or troubleshooting critical topics related to the data quality, integrity, accuracy, or completeness.

Internal Control & Risk Committee

- To monitor the Risk Management and Compliance functions effectiveness, as well as the processes and procedures currently in place for managing materially relevant risks;
- To monitor the implementation of the strategy for managing all risks associated with the Bank's operations and activities, namely: liquidity, interest rate, foreign exchange, market, credit, operational, compliance strategy and reputational risks;
- Periodically monitor and analyse all outstanding recommendations for improving the management of risks overseen by the second line of defence (issued by regulators or auditors), considering the situations identified and the corresponding associated risk level, with the aim of ensuring that the necessary corrective measures are implemented in a timely manner;
- To assess and decide on the proposal for level 2 metrics of the Risk Appetite Statement, as well as their monitoring and appraisal of potential action plans to mitigate risks;
- To assess and decide on the proposal of key operational risk indicators (KRI), as well as their monitoring and appraisal of potential action plans to mitigate risks;
- To analyse the development of materially relevant risks, monitored through reports (brief reports, highlighting the key issues, with the relevant risk metrics and submitted in a timely manner), which properly enable a well-informed position to be formulated on the risks being monitored and managed;
- To issue opinions on the Group's strategic plan initiatives with regard to the risks and impacts against the approved ASR limits, aimed at keeping both the business strategy and the risk strategy aligned;
- To assess and issue an opinion on risk management rules, thresholds and practices for the Group's companies/subsidiaries, taking into account the risk thresholds established by the Board of Directors;
- To monitor the comprehensive compliance risk management standards in all their scale/domain;
- To oversee the ongoing development, implementation and maintenance of a comprehensive Compliance programme at the Bank;
- To monitor the execution of the Compliance function's activity plan, identifying key aspects and elements for improvement, and consequentially implementing the relevant corrective measures.

EASE Committee

- To manage the global priorities (360º Vision of EASE) of each Axis, and to monitor and report on the implementation of the Strategic Plan, particularly the level of achievement of the Plan's objectives, the progress of ongoing initiatives and their respective KPIs;
- To resolve operational management matters, such as investments and implementation schedules;
- To decide on resource allocation in the event of conflicts or unavailability of resources;
- To expedite the identification of the need for external advice and the analysis of contracting processes.

Credit Board

- The Credit Board is entrusted with the core remit of the decision-making process related to Tier 3 Loans, i.e. loans equal to or exceeding AOA 1,000 million and less than AOA 4,000 million, for both Retail and Corporate Customers.

Executive Committee of the Board of Directors

Organisational chart

The Bank's Organisational Chart is underpinned by a functional organisational framework, which allows for a clear separation of each Institutional Department's business areas and functions, under the aegis and authority of each individual Executive Director.

Note: The Audit and Inspection Department, the Office of the Board of Directors and the Company Secretary report directly to the Chairwoman of the Board of Directors.

Luís Gonçalves

Chairman

Nationality: Angolan
Date of Birth: 6 June 1972

Mr. Luís Roberto Gonçalves holds a Degree in Advanced Management Accounting from the Lusíada University of Angola and a Postgraduate Degree in Monetary and Financial Economics from the University of Évora, Portugal. His professional career highlights include expert training in Anti-Money Laundering and Counter-Terrorist Financing (AML/CTF) and Sanctions at PricewaterhouseCoopers (PwC), the Corporate Governance: Managing Board Dynamics at IVENS – Governance Advisors, the Effective Leadership Programme at Nova School of Business and Economics, the Value Investing Programme at Columbia Business School, and the International Directors Programme at INSEAD.

Mr. Luís Roberto Gonçalves began his banking career in 1996 at BFA and, over several years, held numerous high-profile and executive management positions within the Bank. In 2016, Mr. Luís Gonçalves was entrusted with setting up BFA Asset Management Company (BFA AMC), where he was appointed Chair of its Executive Committee.

Between 2017 and 2020, Mr. Luís Gonçalves held the position of Executive Director at Banco de Crédito do Sul, and, at the end of January 2020, he was appointed as a member of BFA's Board of Directors.

From July 2020 to this date, Mr. Luís Gonçalves has held the position of Chair of the Executive Committee of BFA's Board of Directors. Until the end of December 2024, he will hold the position of Chairman of the Board of Directors of both BFA Asset Management and BFA Capital Markets.

Sebastião Massango

Director

Nationality: Angolan
Date of Birth: 10 September 1976

Mr. Sebastião Machado Francisco Massango holds a Degree in Business Management from the Agostinho Neto University School of Economics. In addition, he also holds in its academic curriculum a Postgraduate Degree in Business Management from the Catholic University of Lisbon.

Mr. Sebastião Massango boasts a 23 years' professional track record at BFA, having held several high-profile positions within the Corporate Banking, Risk Management and Agribusiness Management Departments. During the 2020-2022 term of office, he was appointed BFA's Executive Director entrusted with overseeing and running, under his portfolio management, the following Business Departments: Retail and Business Network (Northern and Southern Regions), Agribusiness Department, Investment Centres Department and the Private Banking Department.

In 2024, he was assigned to head under his management portfolio, the following business departments: Credit Monitoring, Recovery and Litigation Department, Credit Management Department, Corporate and Business Credit Risk Department, Large Companies, Institutional and Projects Credit Risk Department, and Retail Credit Risk Department.

Natacha Barradas

Director

Nationality: Angolan
Date of Birth: 25 September 1978

Ms. Natacha Barradas holds a Law Degree (LL.B.) from the Catholic University of Angola. In addition, Ms. Barradas also completed two Postgraduate Degrees: Corporate Law and International Trade Law from the University of Lisbon and Agostinho Neto University. Furthermore, she holds a Master's Degree in Business & Law from the Portuguese Catholic University, as well as a Certificate in Corporate Governance from INSEAD.

On her career path, Ms. Barradas held several high-profile positions, including Head of the Legal Department, Company Secretary and Chair of the Shareholders' General Meeting Board at Standard Bank Angola. Moreover, she was a member of Angola's Sovereign Wealth Fund's Supervisory Board during a two-year period. Previously, she practised at several law firms such as: MLGTS – Morais Leitão, Galvão Teles, Soares da Silva e FBL – Faria De Bastos e Lopes Advogados Associados. In 2013, she joined Angola's Ministry of Finance as Head of the Legal Office and later as Head of the Finance Minister's Office. Ms. Barradas also held the position of Legal Counsel at Banco BPI in 2008 and at New Insurance Company of Angola (Nossa Insurance Company) in 2005. In 2005, she took up the role as a lecturer at Angola's Catholic University Law School.

Since June 2020, she has been BFA's Executive Director.

Paulo Alves

Director

Nationality: Angolan
Date of Birth: 24 November 1978

Mr. Paulo Freitas Alves holds a Linguistics/English Degree from the Higher Institute of Educational Sciences in Lubango and completed a Master's degree in Business Management from the Open University in Lisbon.

Mr. Paulo Freitas Alves has a professional track record of over 25 years in the banking industry, including 20 years at BFA, where he has held numerous high-profile executive management positions, namely within BFA's Retail & Business Banking Division, Transformation Department and Corporate Banking. He has also worked in another financial institutions where he held the positions of Counter Clerk, Credit Technician, Counter Manager, Deputy Branch Manager and Branch Manager. In 2005, he was invited to join the BFA team as a Branch Manager, and until 2017 he held numerous senior management positions in the Retail & Business Department, namely: Manager, Business Area Manager, Deputy Manager and Head of the Commercial Department. Later, he was challenged to join the Transformation Team as Head of one of the work groups and, in 2019, he returned to the Corporate Banking Department.

During the 2020–2023 term, he served as an Executive Director, overseeing the Companies, Information Systems, Organization and Quality, and Project Management and Strategic Initiatives departments.

José Nascimento

Director

Nationality: Angolan
Date of Birth: 22 May 1970

Mr. José Nascimento holds a Degree in Business Management & Management Control from the University of Salford, Manchester, United Kingdom, and has completed a Master's Degree in Investment Management from London City University, London, United Kingdom.

On his career path, Mr. José Alves do Nascimento held the positions of Executive Director and CFO of Banco Económico S.A. from January 2019 to November 2022. He worked at Banco de Poupança e Promoção Habitacional – BPPH as a Shareholder Representative, and at Banco de Promoção e Desenvolvimento – BPD as a member of the Executive Committee. He also worked as a Financial Consultant at QSL-Bases Logísticas e Instalações Petrolíferas for five years.

Francisca Costa

Director

Nationality: Portuguese
Date of Birth: 14 December 1986

Ms. Francisca Costa holds a degree in Corporate Finance from ISCTE – Instituto Universitário de Lisboa and has completed various specialisations and training courses, including: Advanced Corporate Finance at INSEAD, a Specialisation in Corporate Sustainability at NOVA SBE, ICAAP/ILAAP training at the Instituto de Formação Bancária de Lisboa, and training in IFRS/IAS and Tax Codes, from the consulting firms KPMG, Deloitte, PwC and EY in Lisbon and Luanda.

Ms. Francisca Ferrão Costa has over 20 years of professional experience in the financial sector. During her career, she served as Vice-President of the Board of Directors at BFA Gestão de Activos between 2023 and 2024, and as Head of the Accounting and Planning Department at BFA from 2017 to 2023. Between 2007 and 2017, she worked at KPMG & Associados SROC, S.A. and KPMG Angola S.A., in Lisbon and Luanda, where she held the position of Audit Manager, and in 2005 she held the position of Supervisor at Espírito Santo Contact Centre in Lisbon.

Currently, Ms. Francisca Costa also holds the position of Vice-President of the Board of Directors of BFA Capital Markets, a role she has held since 2023.

Paulo Silva

Director

Nationality: Angolan
Date of Birth: 19 April 1975

Mr. Paulo Silva holds a Degree in Financial Management from AIEC University, Brazil, has a postgraduate degree in Business Management from ISCTE, Portugal, and a postgraduate degree in Marketing from UCA – University for the Creative Arts, England.

Mr. Paulo Valódia de Carvalho Moreira da Silva boasts a 21-year career in the banking industry, which began in 2003 within BFA's Commercial Division, where he held the positions of Commercial Assistant, Credit Technician, Account Manager, Assistant Manager and Manager. From 2011 to 2018, Mr. Paulo Silva was appointed BFA's Commercial Director, before moving to the Transformation Department (Strategic Plan) while being appointed as Deputy Head of the Department. In 2019, he took over as Head of the Retail & Business Department, and, during the following year, he was appointed Head of the Large Companies Department.

Corporate Governance and Internal Control System

The Supervisory Board of Banco de Fomento Angola, S.A. (BFA) submitted, on the 30 of January 2026, the Company's Annual Report on Corporate Governance and Internal Control System, as at 31st December 2025, in compliance with the provisions of article 46(1) of Notice no. 1/22 dated 28th January.

Within the scope of its Internal Control System, specifically in the area of Risk Management, and with the aim of establishing a sound system of guiding principles for the implementation of a risk management framework across Angolan financial institutions, BNA published a comprehensive package of Notices and Instructions last year. These set out extensive risk governance requirements, with which BFA is fully committed to comply, ensuring the continued operationalisation of its Risk Management Framework.

At the time being, BFA believes that it is well-provided for in terms of in-house processes, systems and human resources, and its ongoing development is part of the risk management strategy, in accordance with the requirements established by Law no. 14/21 dated 19th May, which aims to ensure the development of a risk management system that is consistent with regulatory requirements and international best corporate practices, to advance the ongoing adjustment/updating and improvement of risk management, as well as the monitoring, reporting and providing assessment to BFA's management and supervisory bodies on the financial institution's comprehensive risk.

With a view to improving compliance controls and enhancing its alignment with international best internal control practices, BFA has stepped up the process of strengthening its internal control environment in terms of setting up and improving compliance and risk management processes and procedures, Anti-Money Laundering and Countering Terrorist Financing (AML/CTF), including updating the AML Risk Management solution for operational and functional improvement integrated with BFA's processes, as well as cross-training its Personnel on these matters.

In accordance with BFA's corporate governance guiding principles, the assignment of powers and risk management, as well as the Whistleblowing Policy, which aims to ensure protection against illegal business practices/activities by means of enforcing core rules of conduct and implementing national and international best corporate practices, also strives to strengthen the Internal Control System in order to uphold and safeguard the interests of BFA's Shareholders and other Stakeholders.

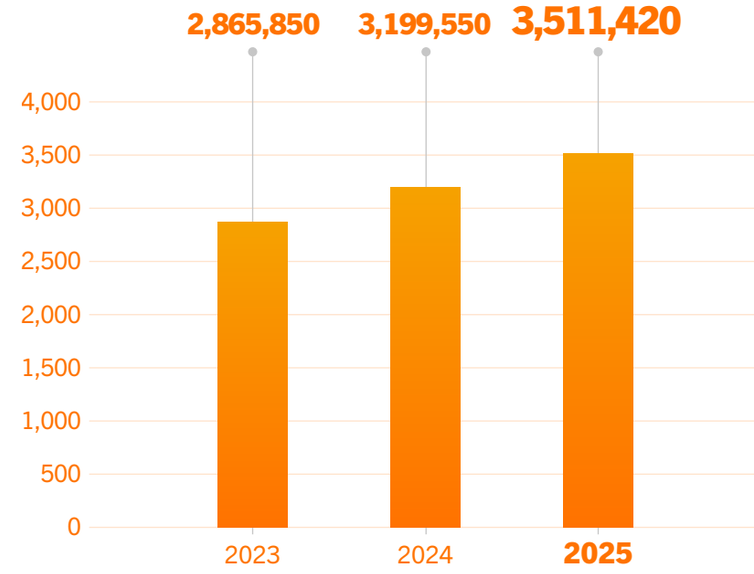

BFA's Customer service enhancement, particularly through improving Customer service quality standards, has been one of BFA's cross-cutting operating principles, which is being expressed through the Bank's Customer base's steady growth.

Key Business Areas

Sustainability and Strengthening of the Market Leading Position

BFA's Customer service enhancement, particularly through improving and streamlining Customer service quality standards, has been one of BFA's cross-cutting operating principles, which as in previous years is being expressed through the bank's Customer base's steady growth. In 2025, the Bank's customer base grew by 9.8% compared with 2024, bringing the total number of Customers to 3,151,420.

Customer Base Growth
Number of Customers

Sustained investment in the physical branch network

Commercial network present throughout Angola

To ensure excellent service, BFA's commercial network is organized according to a market segmentation strategy into three areas:

- Branches;
- Personal Customers;
- Entrepreneurs and Business.

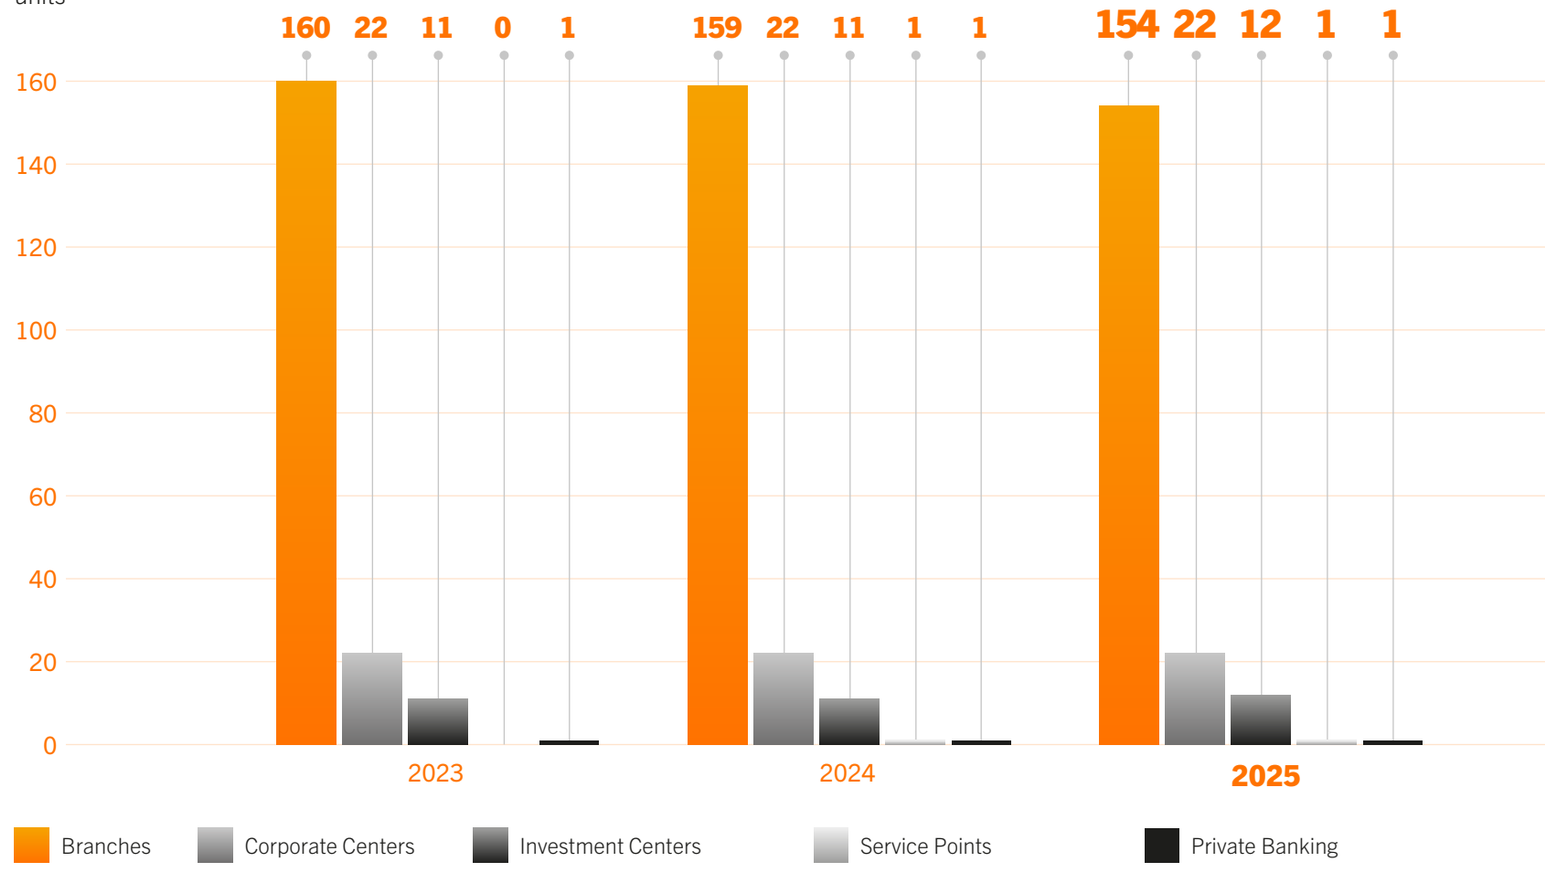

With the aim of increasing financial inclusion, given its paramount importance and contribution to the country's economic and social development, BNA released Notice No.18/2022 on the 11th of October 2022, which mandates that key systemic financial institutions must expand their retail banking network by 30/06/2023, by adding at least one service point in each of the country's main municipality centres, with a view to facilitating the population's access to banking services.

In this context, in 2025, the Bank entered into contracts with 282 banking agents, representing 393 service points, and opened 21 self-service facilities (ATM Centres) known as "Orange Spaces" (Espaços Laranja).

There are currently 154 branches, 22 corporate centres, 12 investment centres, and 1 private banking centre.

BFA's Distribution Network

units

Individuals and Business

Enhancement of Customer Service Efficiency

One of the core principles guiding BFA's operational activities is to upheld its service quality standards, which has led the financial institution aiming to keep adjusting its business practices and systems, placing the Customer at the centre of the entire process. The +Customer initiative was approved, which allows BFA Customers to open accounts, update their data and, soon, to issue Multicaixa cards via the +Customer tablet, with a shorter average transaction time than traditional channels.

Implementation of the Service Facilitator role to enhance the efficiency and fluidity of Customer service.

Furthermore, the financial institution has launched several initiatives in the remote channels with the aim of better serving its Customer base, including: the installation of cash deposit machines at BFA's commercial outlets and the creation of retail service points entitled 'Orange Spaces' to further strengthen BFA's ATM network.

Implementation of a **QR Code system for evaluating service quality:** this initiative aims to measure the satisfaction of Customers using our in-person services.

Enhancement of Customer service quality through the **Orange Shirts** initiative, which has visibly improved financial literacy and optimized queue management.

Quality of Service

Mystery Shopper Study

The Mystery Shopper approach is based on an active participatory observation, which allows the quality of services to be assessed from the shopper's perspective in a discreet, scientific and professional manner. Each retail branch is visited twice by two consultants from a market research company certified by the Mystery Shopping Providers Association (MSPA). The Bank's efforts in this regard are aimed at reinforcing the quality of its Customer service, as well as the Customer-centric focus of its sales teams.

Market Leaders in Customer Acquisition

Over the course of FY2025, the Retail & Businesses segment totalled 3,511,420 Customers, up by 9.8 % YoY.

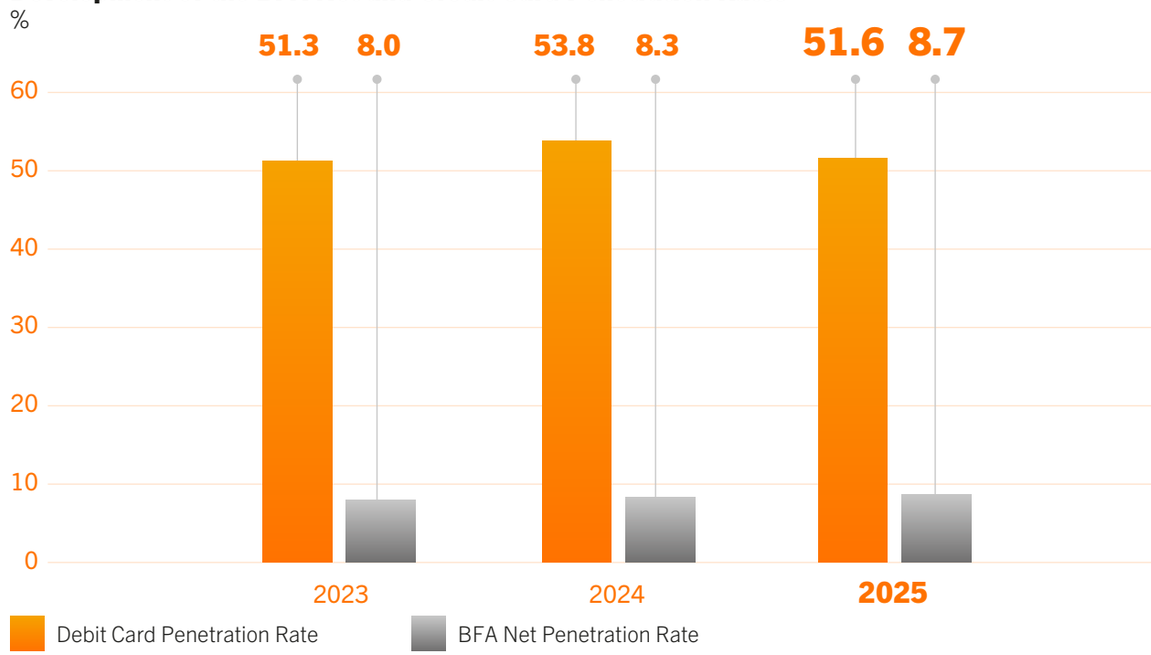

BFA Net rose by 15.1% and active Credit Cards grew by 51.3% YoY. The number of debit cards reached 1,802,390 in 2025, representing a 5.1% increase compared to the previous year. Salary Accounts also grew by 22.6%, reaching a total of 380,851.

The debit card penetration rate decreased from 54.32% in 2024 to 51.6% in 2025, while BFA Net grew by 15.1% compared to 2024, reaching 303,001 Customers.

2026 Outlook

For 2026, BFA has defined the following priorities:

- Expand the implementation of Automated Deposit Machines (ADMs) across additional branches, following the pilot phase currently underway, to help reduce the pressure on branches from low-value cash deposits; This implementation will help shorten the long waiting times currently experienced by Customers and enable Employees to focus on services that require more specialised assistance;
- Expand the network of bank agents to a portfolio of 450 active positions;
- Given the importance of the commercial area and direct Customer interaction, it remains particularly important to continue investing in specialised training for Employees;
- Allocate all active Customers within the department to the Commercial Assistants' portfolios to maximise commercial follow-up and optimise the quality of service;
- Leverage the technological transformation to better monitor Employees' career development and define career management plans;
- Continue focusing on improving service quality, with particular emphasis on the cultural transformation of the Bank's people and teams, as well as on each individual's contribution to the overall Customer experience;
- Implementation of the Credit Solution product: a credit product with highly flexible conditions, notably requiring no guarantor and no contract authentication, making it an ideal solution for meeting Customers' funding needs;
- Installation of the self-service machine, enabling Customers to request various banking products in a safe and convenient manner.

BFA's Strategic Pillars

BFA's new strategic cycle, aimed at making the Bank simpler, more agile, more Customer-oriented, and a better place to work, is based on six pillars:

- **Pillar I.** Enhance BFA's Personnel efficiency and professional performance component;
- **Pillar II.** Increase business processes efficiency;
- **Pillar III.** Service model digitalisation/streamlining;
- **Pillar IV.** Streamlining of the technological infrastructure and data management;
- **Pillar V.** Business growth;
- **Pillar VI.** Sustainability.

Each strategic pillar aims to ensure that the financial institution improves its capacity to address and meet its Customer base needs and, at the same time, that enhances its capacity to attract, empower, retain and acknowledge its top and high-performance professionals.

Priorities of the Investment Centres Department – FY2026

1 BUSINESS

- Loyalty of 4,163 new Customers;
- 22% growth in the loan portfolio across the different headings;
- 2% reduction in non-compliance monitored by the Board;
- A 13% increase in commissions received.

2 PERSONNEL

- Performance evaluation and quarterly feedback;
- Proximity to the Teams;
- Recognition through meritocracy;
- Active participation in the Teams' training process.

3 PROCESSES

- SLAs compliance – enhancement of business process management efficiency and effectiveness;
- Placing the Customer at the centre of our business activity;
- Standardisation of business processes and procedures in the Directorate.

Private Banking

Private Banking Department

In 2025, the Private Banking Division defined its action plan based on the Bank's budget assumptions, establishing targets for Resources and Credit. The actions focused on five fundamental pillars: (i) developing people; (ii) expanding deposits; (iii) increasing credit; (iv) reducing defaults; and (v) improving organisation and internal control.

Recognising that people are the Bank's greatest asset and that training is essential for acquiring and developing skills critical to commercial activity, various training activities and information sessions were conducted throughout 2025, with the following initiatives standing out:

Training

- The Transformation Call (MTW)
- Introduction to Shares – Structural Concepts | IPO Training (BFA Academy)
- Insurance | Fidelidade (BFA Academia)

Workshops

- Workshop on National and International Macroeconomic Scenarios – Perspective 2025
- Workshop on Managing Change and Meaning at Work
- Workshop on Copilot | Adoption Masterclass

- Workshop on Public Offering
- Workshop on the BFA Pensions Project (EY Parthenon)
- Workshop on Cybersecurity Risk – Phishing
- Workshop on Emerging Risks: Browsing the New Capital Market Risk Map (RMD)

Forums

- Energy and Water Forum
- Oil & Gas Banking Forum

Lectures

- Lecture on Mental Health and its Relation to Cancer (HCD)
- Lecture on Suicide Prevention (HCD)

Prospects and Expectations for 2026:

For 2026, the forecast includes:

- Consolidation of a structured continuous training plan, with tracks differentiated by function;
- Increased deposit-taking from high-potential Customers;
- Controlled and sustainable growth of the loan portfolio;
- Strengthening integration between the commercial, risk, recovery, and investment areas;
- Reinforcing the role of internal control as a strategic element and business partner;
- Focus on improving service quality, promoting the cultural transformation of people and teams, and reinforcing each individual's contribution to the Customer experience.

Training is essential for acquiring and developing skills critical to commercial activity, therefore, various training activities were conducted throughout 2025.

Corporate

Corporate Segment Specialisation

In November 2020, with the aim of providing tailored support to each of its Corporate Customers, BFA established the Large Companies Department, the Medium-sized Companies Department and the Oil & Gas Department, with laser-focused teams specifically oriented to address the particular needs of each business segment, with the capacity to offer its Customers a wide array of financial products, services and solutions in order to meet a wide range of business requirements.

BFA operates 11 Medium-sized Business Centres in Luanda, Lubango, Benguela, Lobito and Cabinda, alongside with 7 Large Companies Business Centres in Luanda, with the aim of ensuring the highest level of closeness and support for the Corporate Customers segment. It also has four Oil & Gas Centres (Vendors and Institutional).

Conducting business visits and meetings

Within the scope of BFA's corporate strategy to leverage business efficiency, the Corporate Banking Departments carried out several business visits and meetings throughout FY2024 with a wide range of companies (i.e. BFA's corporate Customers) operating within the commercial, industrial and the provision of services activities in Angola. The visits took place in various provinces of the country: Cabinda, Benguela, Huíla, Lunda Norte e Sul, Huambo, Zaire and Cabinda.

There were also visits and meetings outside Angola, particularly in Portugal, aimed at strengthening partnerships with companies operating in Angola but headquartered in Portugal. The visits in Portugal were organised and conducted with the direct participation of two members of the Executive Committee and the Head of the Large Companies Department.

Among the main objectives of these visits were: (i) strengthening relationships and loyalty; (ii) understanding the primary needs of companies; (iii) identifying market opportunities; and (iv) obtaining direct feedback from the key influencers of major decisions in Angola.

Participation in conferences and forums

As part of its strategy to engage with companies across different sectors and attract new opportunities and business, the BE team participated in the following conferences and forums:

1. Cape Town Energy Week;

2. International Oil and Gas Conference in Angola;

3. International Conference on the Mining Sector in Angola;

4. Annual Conference on Local Content;

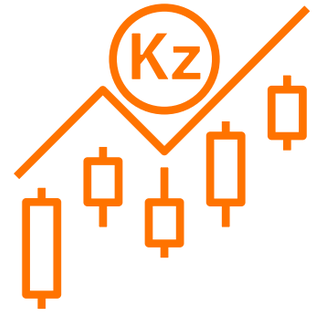

5. Banking and Mining Forum;

6. Business Conference and Ornamental Stone Exhibition;

7. Round Table with CEO;

8. Angola HUB SUMIT;

9. SIBOS.

Customer Deposits Growth

Over the course of FY2025, Customer Deposits and Other Loans within BFA's Corporate segment rose by approximately 11.3% YoY, amounting to AOA 1,885,519.1 million at year-end.

Customer Deposits – Corporate

AOA millions

	2023	2024	2025	Δ% 24-23	Δ% 25-24
Savings	1,571,702.0	1,667,093.3	**1,855,519.1**		11.3%

Term deposits	874,515.0	938,710.1	**1,049,451.1**	7.3%	11.8%

During FY2025, BFA continued to experience a rise in the Term Deposits share, which accounted for 56.6%, as opposed to the Demand Deposits share, which accounted for 43.4% of the total Customer Deposits and Other Loans heading at year-end.

Credit Evolution

Throughout FY2025, BFA also experienced a positive upward trend, albeit slightly more moderate, concerning the growth of its Corporate Banking Division's credit portfolio, up by 16.7% YoY. This variation was the result of an increase in signature credit and current account credit headings, with variations of 58.8% and 25.9% respectively, compared to 2024.

Agribusiness

Agribusiness Department

Direct support for the Angolan economy's diversification

The agribusiness sector plays a strategic and extremely valuable role in supporting the sustainable development of the Angolan economy. The Bank, focusing on the agriculture, livestock, fisheries, forestry, and related industries sectors, provides its Customers with specialised support through experienced and dedicated teams. These teams possess in-depth knowledge of the sector's specificities, current legislation, and public policies, ensuring effective solutions for agribusiness. As a result, BFA has been able to establish itself as a household name within the domestic market as well as on the international stage, being acknowledged by bilateral organisations as a key player and primary partner when it comes to developing agribusiness projects and programmes in Angola.

For 2026, BFA will continue its strategic focus on the coffee, fruit and vegetable, and poultry subsectors, while supporting projects in other subsectors that demonstrate differentiation and add value to the agricultural ecosystem.

The work of the Agribusiness Department continues to be fundamentally based on three essential pillars:

1. **Commercial network support:** Identifying and attracting new Customers, promoting the expansion of the sector.

2. **Marketing support:** Development of financial products and tailor-made solutions aligned with the specific needs of Customers in the sector.

3. **Support for risk areas:** Detailed technical, operational, and economic analysis of funding requests for investments in agri-livestock projects.

Highlights of key activities in 2025

- **Disclosure of knowledge & know-how across institutions:** BFA launched the "Fundamentals of Agribusiness" training programme, providing training for Employees of the commercial networks in the strategic provinces. By combining practical modules and field visits, the initiative equipped teams with essential technical skills aimed at optimising project acquisition, mitigating risks, and delivering specialised Customer support.

- **Strategic Partnerships:** The Bank consolidated its collaboration with the scientific and agribusiness ecosystem through strategic meetings with the Instituto de Investigação Veterinária (IIV) and the Instituto de Investigação Agronómica (IIA). The objective was to explore the establishment of future partnerships with IIV in the context of the research centre, which will be located at the vaccine production facility. At the IIA, in addition to synergies in the research area, the possibility of developing inclusive projects for small producers was discussed. In February 2024, BFA signed a Memorandum of Understanding with INCA to promote the growth and consolidation of Angolan micro, small, and medium enterprises (MSMEs) within the coffee value chain, particularly in regions with high potential for cultivating Robusta and Arabica coffee. Within the scope of this Memorandum of Understanding, in the same year BFA worked closely with INCA and the Ministry of Finance to draw up the required terms and conditions for its implementation in 2025.

- **Evaluation of Partnerships:** Steering Committee meeting held to assess the progress of the partnership with Rabobank and to define the next phases.

Monitoring of the Agribusiness Client database

By the end of 2025, the Agribusiness Customer Database recorded a total of 418 Customers, representing growth of approximately 11% compared to the previous year. These Customers are distributed across the Commercial Divisions and the various sectors mentioned, as shown in the table below:

Agribusiness Customers in 2025

Sectors	Corporate Department	Retail and Business Department	Total
Agriculture	61	217	278
Livestock	14	27	41
Salt production		6	6
Fishery	10	20	30
Trade	10	15	25
Forestry	1	6	7
Agro-industries	17	14	31
Total	**113**	**305**	**418**

The financial institution continues to actively undertake a wide range of initiatives with other agribusiness related Stakeholders aiming to identify different offering solutions from those currently available on the market.

Strategic analysis of operations and sector trends in 2025

In 2025, the volume of proposals analysed remained stable, totalling 52 cases. However, there was a slight increase in the overall number of operations, accompanied by a notable shift in the distribution between sectors of activity and the financing mechanisms used, namely BNA Notice 10/2024 and co-financing operations under the PDAC protocol. The agricultural sector consolidated its position as the primary focus of Customer preferences, reflecting the priority given to supporting the primary sector. At the same time, significant diversification occurred into sectors such as agro-industry and distribution, demonstrating a dynamic response to market opportunities. Conversely, sectors such as forestry and services declined in relative importance within the portfolio of operations.

These indicators suggest that, while support for the primary sector remains central to the institutional strategy, there are clear signs of diversification and adjustment in financing mechanisms, aligned with market trends and emerging Customer needs.

Activity Sector	2024			2025		
	Notice no. 10/BNA	PDAC (1) (2)	Total	Notice no. 10/BNA	PDAC (1) (2)	Total
Agriculture	8	30	38	25	15	40
Livestock	2	2	4	3	3	6
Income from services	0	1	1	0	0	0
Agro-industry	0	0	0	2	0	2
Agriculture and Livestock	1	0	1	1	0	1
Fishery/Aquaculture	3	0	3	2	0	2
Forestry	2	0	2			0
Manufacturing Industry	0	1	1	0	0	0
Distribution	0	0	0	0	1	1
Total	**16**	**34**	**50**	**33**	**19**	**52**

(1) Only pre-analysed applications that turned into operations under review were taken into consideration

(2) The projects' financing within the scope of the PDAC protocol are granted pursuant to BNA Notice no. 10

The agricultural sector consolidated its position as the primary focus of Customer preferences. At the same time, significant diversification occurred into sectors such as agro-industry and distribution.

2026 Outlook

1. Strengthening presence and communication

- **Integrated communication:** Intensify the dissemination of the agribusiness strategy internally and consolidate a dedicated portal on the official website, centralising all sector information and services;
- **Boosting the commercial network:** Conduct joint prospecting and fundraising activities in regions with high agricultural potential, enabling the network to convert opportunities into real business.

2. Relationships and innovation in the sector

- **Ecosystem and dialogue (round tables):** Promote meetings with key players in the value chains to share best practices and enable sustainable and inclusive projects, accelerating local production;
- **Implementation of pilot projects:** Implement initiatives focused on the coffee, fruit, vegetable, and poultry subsectors. With strategic support from Rabobank, prioritise the inclusion of small producers and productive resilience.

3. Operational efficiency and cross-selling

- **Reinforcement of cross-selling actions:** Engage with suppliers (upstream) and buyers (downstream) to migrate financial flows to BFA, ensuring greater predictability in payments and building loyalty within the production chain;
- **Data management:** Develop solutions for the continuous improvement of the database, ensuring reliable information to support decision-making and business risk management.

BFA Asset Management

Leading the asset management market in angola

BFA Asset Management "BFA AM" is an asset management company registered with Angola's Capital Market Commission 'CMC' since December 2016. It is currently one of the largest Collective Investment Schemes Management Companies "CISMC" (Portuguese acronym: "SGOIC") operating in Angola's domestic market.

It provides incorporation, management, and consultancy services for Collective Investment Schemes to private and institutional investors, as well as asset management services.

BFA AM's investment philosophy spans a broad spectrum of asset classes, from fixed income to equities, including alternative instruments invested in both private and public markets.

Up to December 2025, BFA AM managed the cumulative placement of an aggregate total of 38 Collective Investment Funds in the Angolan Capital Market, of which 29 have been liquidated and 9 remain active. During this period, it recorded an accumulated track record of approximately AOA 516.47 billion in assets under management, based on the total share capital of each Fund established, and AOA 78.60 billion in assets under management, based on the overall net asset value of each Fund.

This performance reflects the high level of professionalism and anticipation of investors' needs, as well as the dynamism of the entire BFA Group team. The commitment, transparency, resilience, and capacity for innovation demonstrated since its creation underpin its objective of providing the market with differentiated products and services.

2026 Outlook

BFA AM believes that 2026 will essentially be marked by the following five aspects:

- **Increase in assets under management** – the prospect of growth driven by continuous efforts to retain strategic Customers, diversification of fund features in line with the new dynamics of the capital market, and the digitalisation of the management company, enabling investors to subscribe more quickly and conveniently;
- **Expansion of the investor base** – consolidation of BFA GA's position as a SGOIC with a robust investor base, strengthening relationships with Private and Institutional Customers;
- **Expansion of fund sales channels** – establishment of partnerships with other distribution entities, with the aim of increasing the quantity and quality of assets under management, including the signing of strategic partnerships and the development of applications that facilitate interaction with current and prospective partners;
- **Financial literacy** – as part of the Angolan financial system, BFA GA is committed to contributing to the enhancement of financial literacy, promoting the consolidation of existing investors' knowledge of the Collective Investment Schemes (CIS) industry and encouraging potential investors to understand its dynamics. To this end, BFA GA plans to participate in and organise workshops, as well as support or sponsor initiatives aimed at improving financial literacy.
- **Employee training and capacity building** – in order to address market challenges, BFA GA will continue to invest significantly in the training and professional development of its Employees. This decision aims to strengthen service quality as a driver of success, mitigate operational risk, anticipate investors' needs, and continue to promote innovative investment solutions. This reinforcement is intended to foster reliable and lasting relationships, contributing to the consolidation of BFA GA's position in the capital market.

BFA Capital Markets

A BFA Capital Markets – SDVM, S.A. (hereinafter referred to as 'BFA Capital Markets') was established following the regulatory framework requiring banks to cease carrying out investment services and activities. This framework arises, in particular, from Instruction 03/CMC/06-25, of 6 June, which amends and republishes Instruction 05/CMC/03-23, of 21 March, on the Transfer of Investment Services and Activities in Securities and Derivative Instruments, stipulating that such activities must be conducted by legally autonomous entities specifically authorised for this purpose.

The company was incorporated under Presidential Decree No. 5/13, of 9 October, which established the Legal Framework for Securities Brokers and Distributors. The company is registered with Angola's Capital Markets Commission (CMC) under the number 02/SDVM/CMC/01-2023 and commenced operations in June 2023, with its governing bodies appointed for a three-year term of office (2022-2024).

The purpose of BFA Capital Markets is to contribute to the development of the capital market in Angola by providing its Customers with safe, efficient, and reliable access to investment solutions, and by promoting corporate financing through the structuring and placement of instruments tailored to their needs.

In this context, the firm aims to establish itself as a benchmark for investors and companies, basing its activities on accumulated experience, technical expertise, and the quality of the services provided, thereby contributing to the strengthening of trust, transparency, and sustainability in the market.

Excellence in management is ensured through a robust framework of rules and guidelines that promote transparency, accountability, and operational security, keeping the company consistently aligned with best market practices and applicable legislation. With regard to its corporate governance model and internal control system, BFA Capital Markets is aligned with the three lines of defence model adopted by its parent company and with the corporate governance policy in force within the BFA Group, responsibilities are appropriately allocated among the members of the management body.

Business activity and performance

In 2025, BFA Capital Markets continued to contribute to the strengthening and stabilisation of the capital market's operating model, following the transfer of investment services and activities from banking financial institutions to securities brokers and distributors, thereby promoting their effective consolidation in the market.

During the year, its performance was marked by dynamism and the achievement of tangible results, notably its active participation in the structuring and placement of issuances under the Privatisation Programme (PRIVPRO). In this context, BFA Capital Markets led the consortium comprising all securities brokers and distributors within the MVM, totalling 19 financial intermediaries, and played a leading role in the preparation, execution, and success of Banco de Fomento Angola's (BFA) Initial Public Offer (IPO).

The company ranked among the three institutions placing the highest number of shares, with a total of 1,085,621 shares placed (22.86%). This transaction, of significant strategic importance to the national market, was admitted to trading on the stock exchange and recognised as the largest equity offering in Angola (AOA 220.8 billion), as well as the second largest in Africa in 2025, reinforcing BFA Capital Markets' position as a benchmark in the Angolan capital market.

During the year under review, BFA Capital Markets strengthened its proximity to Customers and supported the development of the capital market by launching its institutional website, enabling the online opening of custody accounts, and continuing to enhance its digital platform. These initiatives contributed to a 27.9% increase in the number of investors and to a total amount traded of AOA 1,984.3 billion.

In parallel, the company invested in enhancing efficiency in access to market information and strengthening transparency, making market access safer, more accessible, and more transparent. In this context, it held the second edition of its annual conference, bringing together investors, companies, entities, and regional partners, thereby consolidating its position as a benchmark forum for discussion of the financial market, particularly the capital market in Angola and at regional level.

Through its institutional website and other communication channels, BFA Capital Markets ensures continuous communication with Customers, providing key information about the company and its services, and reinforcing its commitment to transparency and proximity.

BFA Capital Markets maintains an active commitment to sustainability and the promotion of financial literacy in Angola, seeking to generate a positive impact on economic growth and financial education. In this regard, it organised workshops in the provinces of Luanda, Benguela, and Huíla, with the aim of strengthening relationships with local communities. In 2025, it launched its first crowdfunding campaign, aimed at supporting the Food Bank Against Hunger and developed with the institutional support of the UNDP, reinforcing its commitment to initiatives that combine financing, social responsibility, and the development of the capital market.

2026 Outlook

BFA Capital Markets aims to implement its new Strategic Plan during 2026, modelled on the following business pillars:

- **Leveraging business growth** – Develop initiatives aimed at boosting business growth and diversification.
- **Leveraging its people** – Position the company as one of the best places to work in Angola, promoting the attraction, retention, and development of top talent in the market.
- **Strengthening the control culture** – Consolidate best practices in the sector by ensuring sound and reliable operations, supported by a robust and efficient internal control system.
- **Strengthening digitalisation and efficiency** – Enhance technological capabilities through the implementation of digital solutions that support BFA Capital Markets' operations and business.
- **Creating a positive impact** – Contribute to Angola's future by generating a positive and sustainable impact through its activities.

BFA Capital Markets recognises the importance of its active participation in market operations, including IPOs conducted under the Privatisation Programme (PRIVPRO), with the aim of stimulating the market and creating new opportunities for investors. For 2026, the Company intends to promote and intermediate new issuances, as well as expand its range of products and services, diversifying the investment and financing solutions available. These initiatives are aligned with the defined strategy and are intended to generate value for Customers and contribute to the development of the financial market in Angola.

BFA Pensões SGFP, S.A.

Pension fund management company

A BFA Pensões – Sociedade Gestora de Fundos de Pensões, S.A. (hereinafter referred to as 'BFA Pensões – SGFP, S.A.', and/or 'Management Company') was incorporated on the 23rd of November 2022, pursuant to the Minister of Finance's Order No. 4869/22 dated 25th of October and published in Angola's Official Gazette (Diário da República) No. 161, Series II. The company commenced its business operations following the issuance of Licence Certificate No. 7/ARSEG/MF/23, on 10th May 2023, by the Angolan Insurance and Pension Funds Regulatory and Supervisory Bureau (Portuguese acronym: 'ARSEG').

In accordance with its Articles of Association, the Management Company provides services relating to the establishment, management, administration, and representation of Pension Funds, as well as related activities such as actuarial and financial consultancy, carrying out all its activities in Portugal.

In the 2025 financial year, BFA Pensões – SGFP, S.A. continued to focus on consolidating its position in the domestic pension fund market, reinforcing operational efficiency, commercial expansion, and proximity to participants. This period was also marked by the revision of the Business Plan and the definition of the Strategic Plan, both aligned with the BFA Group's strategic priorities, with a view to strengthening synergies among its companies. In this context, structural improvements were implemented in processes, with particular emphasis on organisation and internal control, thereby strengthening operational robustness, transparency, and compliance with best regulatory and governance practices.

Guided by a medium and long-term vision, the Management Company has prioritised the delivery of service excellence to both institutional Customers and private individuals, underpinned by high standards of governance, transparency, and technical rigour.

In this context, the strategy defined for 2025 is structured around the following fundamental axes:

I. Business expansion and differentiation;

II. Operational excellence and Human Capital;

III. Innovation and digitalisation;

IV. Impact on the ecosystem and sustainability;

V. Prudent and efficient management of the Funds under management;

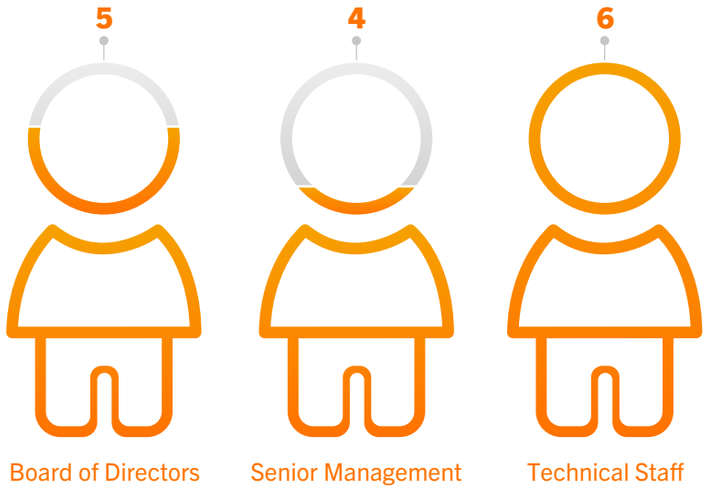

VI. People development, with a focus on operational excellence and talent retention;

VII. Leveraging BFA Group synergies.

VIII. Promotion of a people-centred organisational culture and strengthening of internal capabilities.

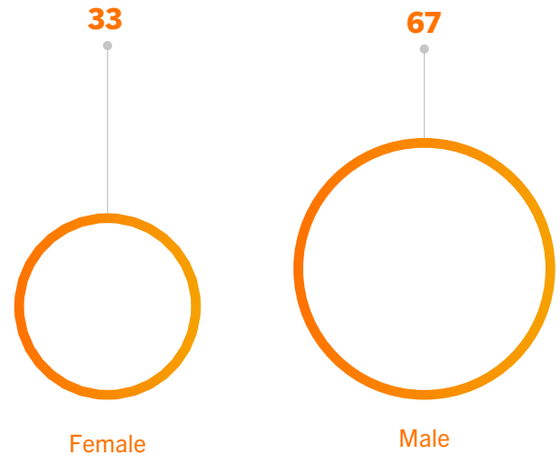

Within the scope of its talent development policy, the workforce of BFA Pensões – SGFP, S.A. in 2025 comprised 15 (fifteen) Employees.

Functional category

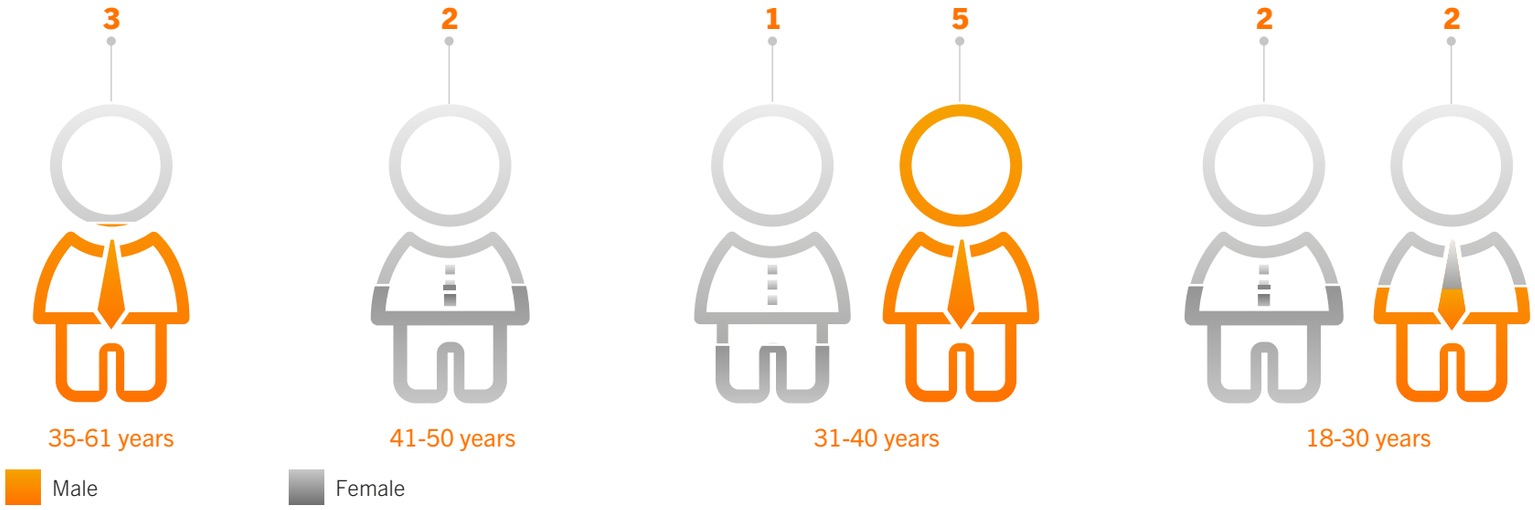

Breakdown of the headcount by gender

%

Age structure by gender

Characterisation of the team

With regard to gender distribution, there was a higher representation of males, accounting for approximately 67% of the total workforce, i.e. 10 Employees out of a total of 15.

In terms of academic qualifications, approximately 93% (14) of BFA Pensões – SGFP, S.A. Employees have a university degree, with seven graduates, seven post-graduates/specialists and one Employee with a university degree.

Business Activity and Performance

For the Management Company, the year 2025 was marked by:

- **Operational consolidation and strategic affirmation**, following the assumption of management of the BFA Pension Fund and the promotion of the BFA Sustainable Open Pension Fund, launched in the previous financial year;
- **Sustained growth in assets under management**, driven by an increase in contributions and subscriptions, while strengthening brand recognition and credibility;
- **Strengthening of governance and management processes**, ensuring high standards of regulatory compliance and financial, actuarial, and accounting efficiency;
- **Prudent investment management**, supported by the decisions of the Investment Committee and aimed at optimising the risk-return profile;

- **Enhanced communication with participants** and progress in the **digitalisation of services**, promoting greater proximity, transparency, and service quality;

- **Conclusion of the transfer contract for the UNITEL Pension Fund**, establishing the conditions for BFA Pensões – SGFP, S.A. to commence its management from 2026, a significant milestone in terms of expansion and market confidence;

- **Signature of a Cooperation Protocol between BFA Pensões and ISPB - Instituto Superior Politécnico de Benguela**, aimed at promoting financial literacy, social security education, youth entrepreneurship, and applied scientific research, thereby strengthening the link between academia and the financial sector.

In 2025, BFA Pensões – SGFP, S.A.'s assets under management totalled approximately AOA 90.5 billion, corresponding to the BFA Pension Fund and the BFA Sustainable Open Pension Fund.

Within the scope of activities directly related to fund management, the following milestones stand out:

- **Maximisation of the return on assets under management**, achieving a return of 9.46%, reflecting a prudent approach focused on optimising the risk-return profile;

- **Transfer of the KIXICRÉDITO Pension Plan** effected through Collective Adhesion to the BFA Sustainable Open Pension Fund, strengthening the participant base and the volume of assets under management;

- **Review and update of the Investment Policies** of the funds under management.

2026 Outlook

BFA Pensões – SGFP, S.A. expects the 2026 financial year to be marked by commercial expansion, digital innovation, and closer engagement with Participants and Beneficiaries. This strategy will be underpinned by prudent and efficient management, aligned with best international practices, in order to ensure robustness, transparency, and sustainable value creation.

The year is also expected to be characterised by the implementation of the objectives set out in the Strategic Plan and the revision of the Business Plan, ensuring alignment with BFA Group guidelines and promoting initiatives geared towards sustainable growth.

In this context, the main expectations and lines of action for 2026 include:

- **Accelerating the growth of the BFA Sustainable Open Pension Fund**, through structured commercial campaigns and strategic partnerships, with the aim of broadening the base of individual and corporate participants;

- **Expanding the Closed Pension Funds portfolio**, focusing on attracting new institutional Customers and effectively converting identified commercial opportunities;

- **Launching and consolidating the BFA Pensões App** to strengthen the digital experience, transparency, and proximity to participants;

- **Intensify financial and social security literacy initiatives**, promoting retirement savings and awareness of the benefits of pension funds;

- **Continuing to invest in team development** and training through ongoing programmes aligned with technical, regulatory, and market requirements;

- **Ensuring high standards** of reporting and compliance;

- **Strengthening BFA Pensões' position** as a benchmark in the Angolan market, based on principles of sustainability, financial soundness, innovation, and excellence in Customer service.

Human Capital

The strategic management of human capital is a fundamental pillar for achieving the objectives set out in the Bank's Strategic Plan for the period 2024–2026. In 2025, the Board of Directors approved the new Performance Evaluation Model and continued the salary adjustment process, covering 2,196 Employees.

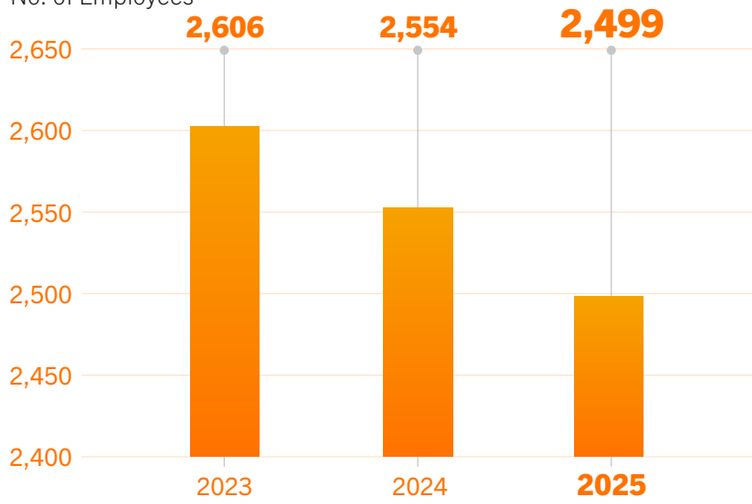

This axis reinforces the Bank's commitment to operational excellence, continuous innovation, and the strengthening of an organisational culture geared towards high and sustainable performance.

BFA has maintained its dedication to people-centred management. This approach reflects the institutional commitment to fostering a culture of meritocracy, collective engagement, and professional development, recognising each Employee as an active agent in the transformation and consolidation of the Bank within the national financial sector.

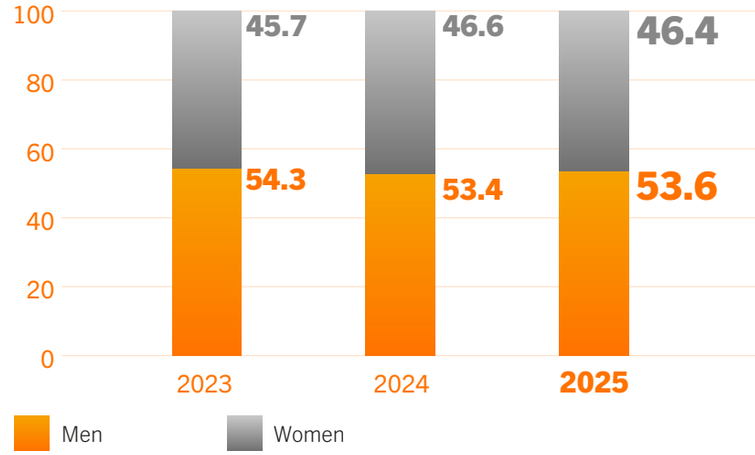

BFA's permanent staff

At the end of 2025, the BFA staff was composed of 2,499 Employees, representing a 2.1% decrease in relation to the previous year. This slight variation reflects the stability of the Bank's organisational structure.

BFA's permanent staff
No. of Employees

Employees by gender
%

Employees by gender

In 2025, the gender composition of BFA's workforce remained balanced, with men accounting for 53.6% and women 46.4% of the total Employees.

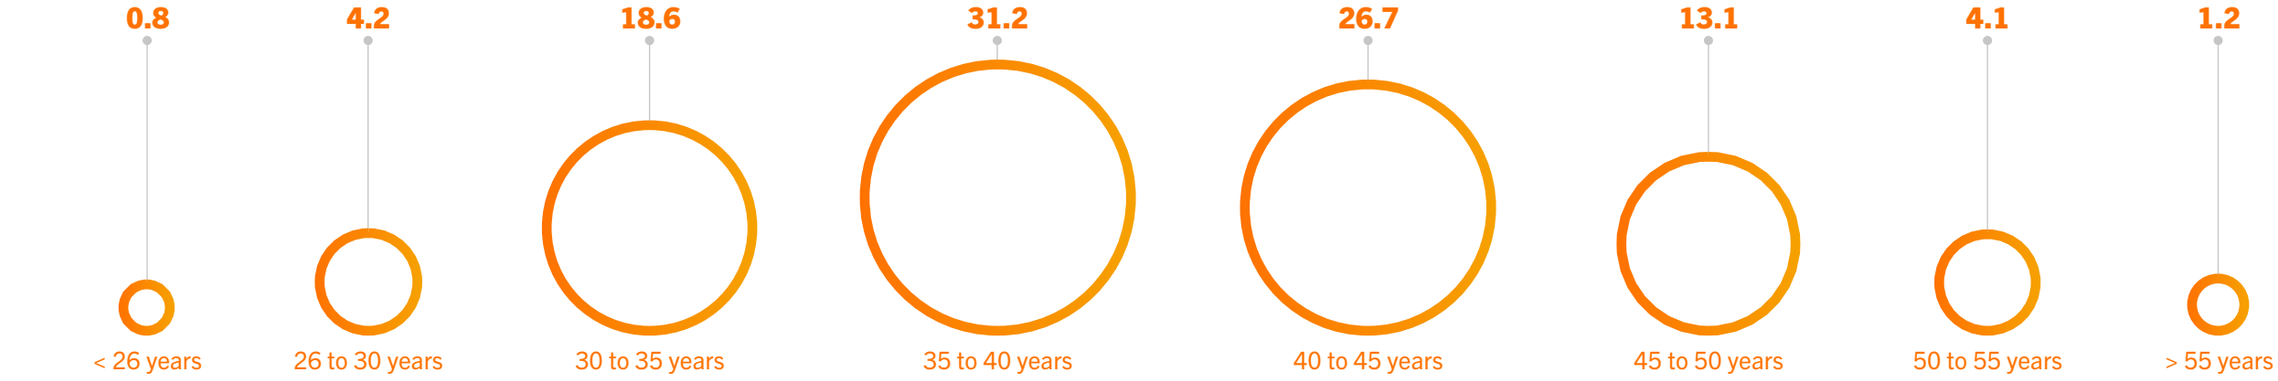

Compared to the previous year, when men accounted for 53.4% and women 46.6%, there is a marginal variation, demonstrating the stability of gender representation over the two consecutive years.

This indicator confirms the Bank's ongoing commitment to the principles of equity, inclusion, and diversity, values that are fundamental to its organisational culture.

Age structure

The age profile of BFA's Employees shows a predominantly young-adult workforce, with a significant concentration in the 30 - 45 age group. A more detailed reading follows:

Age structure
%

Average age

The average age recorded in 2025 was 40 years, representing an increase compared to the previous two years, when it was 39 years. This one-year increase may reflect a slight shift in the age profile of the analysed workforce, suggesting potential ageing trends or changes in demographic composition.

Academic degree

Higher Education (Bachelor's degree or above): 41.34%. By representing nearly half of the permanent staff, this proportion reflects the Bank's commitment to attracting highly qualified professionals with the skills required to meet the strategic and operational challenges of the financial sector.

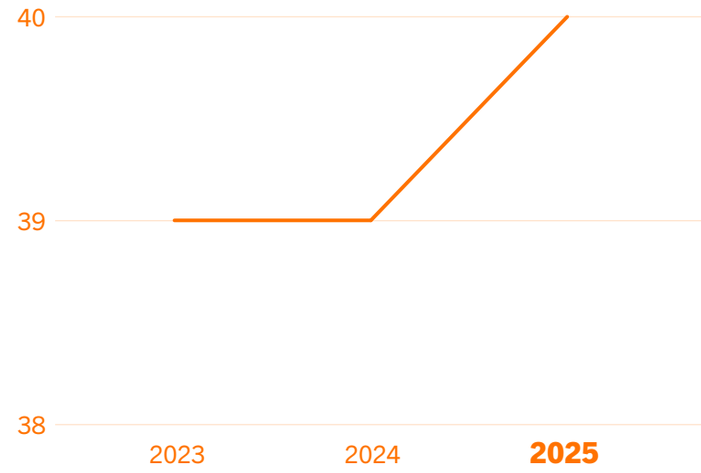

Other (High School and Technical Specialisations): 58.30%. These profiles make up the majority of Employees and are trained in technical execution, operational tasks, and the performance of essential functions that ensure the daily running of the institution. They thus play a decisive role in maintaining internal stability, efficiency, and productivity.

Hedge effectiveness

At the end of 2025, BFA's staff had an average tenure of 13 years. This indicator reflects a stable organisational structure, characterised by high retention levels and strong alignment of professionals with the Bank's institutional values.

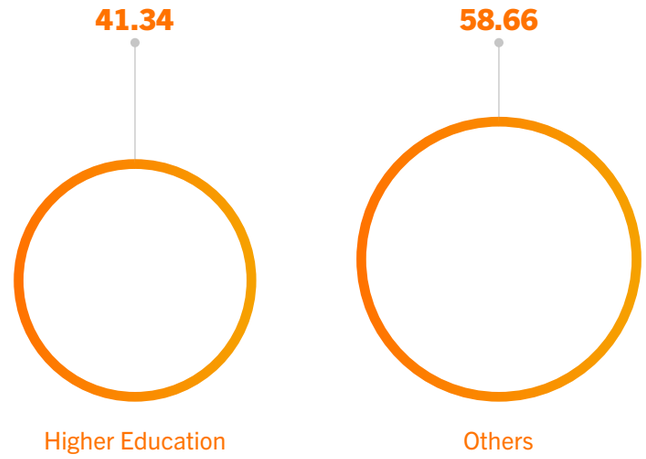

The observed average longevity demonstrates the impact of policies focused on valuing, developing, and retaining talent.

Average age

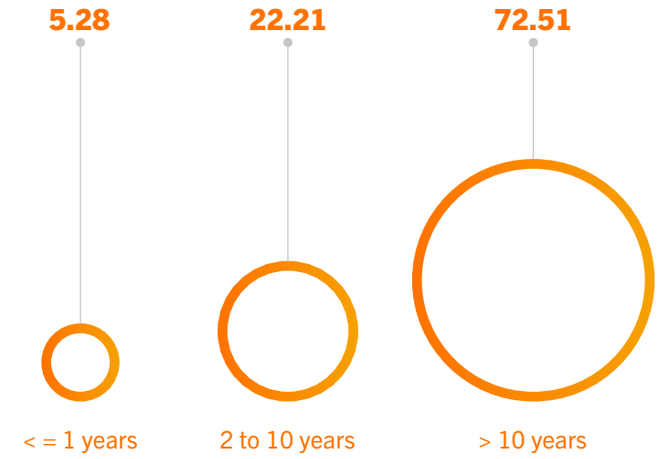

At the end of 2025, BFA's staff had an average tenure of 13 years, which reflects a stable organisational structure, characterised byhigh retention levels.

Educational qualifications
%

Effectiveness
%

Remuneration and incentives

The Bank's remuneration structure is based on two fundamental components: fixed remuneration and variable remuneration, both aligned with principles of recognition, internal fairness, and market competitiveness.

The fixed component represents the salary base assigned to each employee, determined with rigor, clarity, and transparency according to the level of responsibility associated with the role and its position within the career map.

Variable remuneration includes performance bonuses and a range of benefits aligned with the requirements and framework of each position. These benefits comprise travel allowances, overtime pay, and subsistence allowances.

The Bank has implemented strategic salary adjustments aimed at strengthening internal equity and enhancing competitiveness in line with market trends, reaffirming BFA's commitment to the well-being, recognition, and appreciation of its professionals.

Attracting and retaining talent

The strategy for attracting and retaining talent aligns with the Bank's current phase, characterised by internal restructuring and the integration of new technologies. The focus is on simplifying processes and modernising operational practices to promote a more agile, efficient, and results-oriented environment.

In this context, the approach adopted is increasingly targeted, prioritising strategic profiles that meet the specific needs of the business and current challenges. The objective is to ensure that teams are robust, well-prepared, and fully aligned with the Bank's vision for the future.

Internal mobility

Internal mobility is a key lever for professional development and talent retention. BFA's strategy focuses on valuing Employees by creating opportunities for them to develop, explore new areas, and assume new responsibilities within the institution.

In 2025, eleven internal mobility movements were carried out, three within the commercial area and eight in central services, this measure reinforces the Bank's commitment to a culture of continuous growth and recognition.

Human capital and community impact programmes

Trainee Programme: Held every two years, this programme aims to provide opportunities for young talent by offering a one-year paid internship. During this period, participants gain exposure to the banking environment, develop practical skills, and demonstrate their professional potential.

The third edition of the Trainee Programme is currently in its final phase, with promising prospects for the integration of most selected participants into the Bank's workforce. This outcome reflects the Bank's commitment to investing in young talent and developing professionals who will contribute to shaping the future of the institution.

BFA Academy

The training and continuous development of Employees is a strategic pillar of the Bank's operations and is particularly important in a context characterised by high levels of demand, accelerated transformation, and the increasing complexity of financial markets.

Through its Academy and in collaboration with key Stakeholders, BFA implements a structured and systematic approach to continuous learning, materialised through the design and execution of training programmes aligned with the institutional strategy, business priorities, and sector developments. This approach aims to strengthen technical, behavioural, and leadership skills, contributing to sustainable performance, risk mitigation, and value creation over the medium and long term.

Excellence in Customer service relies decisively on the work of highly qualified professionals, which is why the Bank considers valuing its human capital a strategic commitment that permeates its business. In this context, the ongoing commitment to innovation in learning methodologies, diversification of training formats, and provision of structured programmes, including induction, ongoing, and specialised training, is an essential factor in sustainably enhancing the quality of services provided. This integrated approach enables the development and continuous updating of technical and behavioural skills while promoting a culture of excellence, efficiency, and innovation. At the same time, it supports the consolidation of the Bank's position as a benchmark institution in the sector, aligned with Employee expectations and focused on effectively meeting Customer needs, thereby creating sustainable value over the medium and long term.

Business activity in 2025

In 2025, the Training Plan was developed in line with the Bank's human capital development policies, integrating the behavioural (soft skills), technical (hard skills), strategic, and organisational dimensions in a coordinated manner. This integrated approach reflects the Bank's commitment to the continuous training of its Employees and to strengthening the skills critical for executing its strategy.

The training strategy placed particular emphasis on innovation and digital transformation, change management, strategic leadership development, and reinforcement of the organisational culture, with the aim of fostering a high-performance environment and ensuring the Bank's capacity to adapt to the dynamics and demands of the financial ecosystem.

In addition, the Bank ensured full compliance with the rules and guidelines issued by the regulator, with particular attention to regulatory training. In this context, ongoing training and skills-development activities were promoted, focusing in particular on the following areas:

- Anti-Money Laundering and Terrorist Financing;
- Prevention of Corruption, Fraud and Other Financial Crimes, and Whistleblowing;
- Code of Conduct;
- Information Security;
- Sustainability.

In the area of technological training, sessions were delivered on platforms and tools such as Azure, Power BI, SAP Analytics Cloud, Information Security, and Social Engineering, skills considered essential for accelerating digital transformation and strengthening the Bank's operational resilience.

Training was also provided in artificial intelligence, as part of a structured and continuous programme, aiming to develop advanced skills and prepare the Bank to respond to emerging challenges in the financial sector.

Senior managers participated in high-level training programmes covering strategic topics such as Strategic Leadership, Change Management, and Uncertainty Management, delivered by internationally renowned lecturers. These initiatives strengthen decision-making skills, leadership capacity, and the preparedness of the Administration to address the complex and constantly evolving challenges of the economic and financial environment.

In addition, and in partnership with MTW, a structured Skills Development programme was implemented to address highly relevant topics such as Communication, Change Management, Emotional Intelligence, and Customer Orientation, helping to consolidate leadership skills and strengthen organisational effectiveness.

Recognising the strategic importance of sectors such as Oil & Gas and Diamonds, the Bank also invested in the participation of professionals in conferences, forums, and seminars, enabling not only the expansion of sector-specific knowledge but also the stimulation and attraction of new business, reinforcing the Bank's position in the economic and business environment and expanding opportunities for sustainable growth.

In line with the +EASE Strategic Plan, significant investments were made in training programmes to strengthen the technical, operational, and strategic skills of the Bank's teams. Among others:

- **SAP Training and Certification Programme**, promoting mastery of essential tools for managing internal processes;
- **Training in specific tools and software**, including Customer Relationship Management (CRM) and Enterprise Resource Planning (ERP), was provided to improve Customer relationship management and optimise internal processes.

These training efforts are an integral part of the Bank's commitment to developing its People, preparing them to respond effectively to the demands of a constantly evolving corporate and market environment.

In addition, a training session was held to reinforce leadership and culture, aimed at the Bank's entire management, including members of the Governing Bodies (Executive Directors), conducted by Ynner. The aim of the programme was to strengthen leadership skills and the organisational culture, promoting greater internal cohesion and ensuring the strategic alignment of the entire institution.

Continuing the practice adopted in previous editions, the Bank maintained a strategic partnership with Católica Luanda Business School, enabling its professionals to take part in the Executive Master in Banking Management. This collaboration demonstrates the Bank's ongoing commitment to developing critical skills and training leaders who are able to face the challenges of the financial sector and the constantly evolving economic environment in an efficient and innovative way.

The existing pool of in-house trainers is an essential element in ensuring the effective transfer of knowledge within the organisation, allowing it to be continually updated and systematically shared with Employees. This model helps to promote a culture of continuous improvement and agile adaptation to market and sector dynamics, including products, services and internal processes.

262

No. of courses

114,779

Total hours

61.51%

Technical functional group with the highest proportion of training hours

BFA continues to invest in the pedagogical training of trainers, with the aim of consolidating and expanding this internal pool of specialists. In line with this strategic need, Initial Pedagogical Training for Trainers was carried out to strengthen the internal capacity for disseminating knowledge and to sustainably expand the organisation's body of internal trainers, ensuring the continuity, quality and effectiveness of training programmes.

In this regard, the Bank is convinced that access to learning opportunities not only enhances the individual development of Employees but also drives the creation of a more collaborative, creative, and innovative work environment. This approach stimulates internal talent and promotes adaptability in the face of emerging challenges, fully aligning with the institution's strategic objectives and its vision of excellence, sustainable growth, and leadership in the sector.

Specific training sessions were conducted to prepare the teams in view of the IPO.

Training programmes held

Over the course of FY2025, a total of 262 training courses were held, totalling 114,779 hours taught.

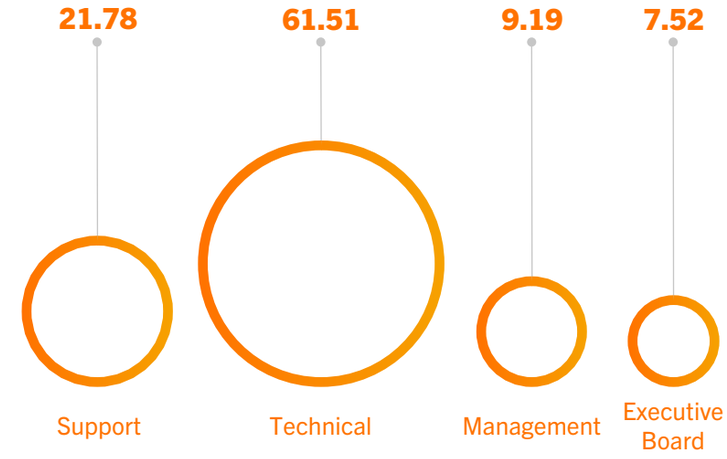

Variables	2024	2025	Δ% 25-24
No. of courses	250	**262**	4.8%
Total hours	66,216	**114,779**	73.34%

In terms of developing technical skills, the functional groups with the highest participation in training hours were Support and Technical, accounting for 83.29%. By contrast, the Management and Senior Management groups were less represented, with 9.19% and 7.52% respectively.

These results demonstrate the Bank's commitment to strategically investing in the training of operational and support teams, while continuing to promote initiatives for management and senior management, ensuring the balanced development of skills across the organisation. In this way, the Bank strengthens and prepares all Employees to meet the present and future challenges of the sector.

Total training hours distributed by functional groups

%

Total hours per skill

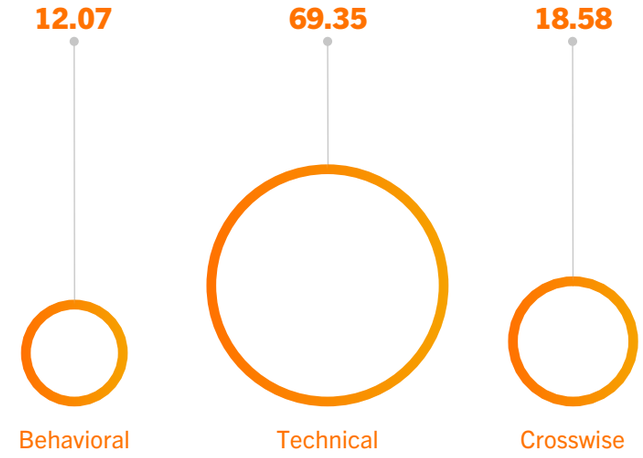

In 2025, the total distribution of training hours showed a strong focus on developing technical skills, which accounted for 69.35% of the total. Behavioural and soft skills accounted for 12.07% and 18.58% respectively. These figures reflect the Bank's strategy of balancing technical specialisation with the strengthening of interpersonal and transversal skills, promoting the comprehensive development of Employees and preparing them in a comprehensive manner.

Each eligible Employee devoted an average of 47.14 hours to training over the course of the year, demonstrating the Bank's ongoing commitment to professional development and the continuous improvement of its teams' skills.

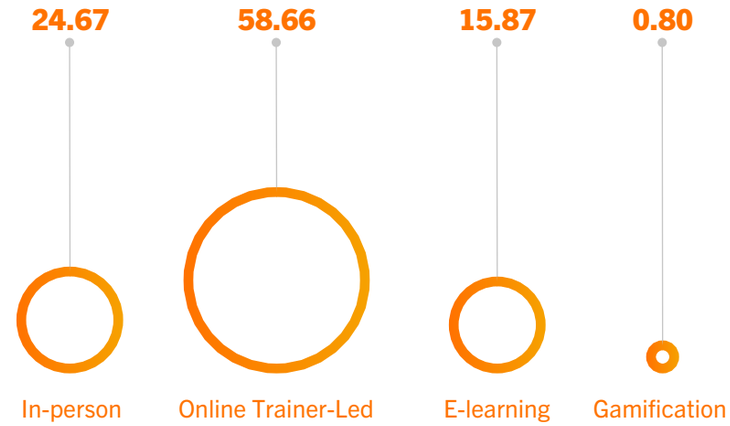

In the area of technical skills, the Bank continuously invests in the development of its people, proactively preparing them for the challenges posed by digital transformation and the changes associated with this process. This strategic approach aims not only to ensure the institution's readiness to meet the demands of today's market, but also to strengthen its capacity for adaptation, innovation, and operational excellence, building an increasingly promising and sustainable future based on consistent growth and consolidating its position as a benchmark in the economic and financial landscape.

The Bank continues to provide training programmes for all Employees, including instruction in digital tools and language platforms, with the aim of strengthening technical and communication skills and preparing teams to perform with excellence in a global and digital environment.

Total training hours distributed by competencies
%

Total hours per training methodology
%

Training methodology

Of the total time dedicated to training, approximately 24.67% of the hours were conducted face-to-face, while 58.66% were delivered online with guidance from the trainer. These training methodologies have made a significant contribution to the development and enhancement of Employees' technical and behavioural skills.

Courses implemented using gamification methodologies (game-based learning) accounted for 0.8% participation. These courses incorporate personalised and engaging content, making the learning process more dynamic, interactive, and appealing.

Each eligible Employee devoted an average of 47.14 hours to training over the course of the year, demonstrating the Bank's ongoing commitment to professional development and the continuous improvement of its teams' skills.

Innovation and Technology

Information & Communication Systems

Information & communication systems strategy

The Bank's Information and Communication Systems strategy is governed by the Information Systems Department (ISD) and forms part of the 2024-2026 Strategic Plan, which defines a set of structuring axes aimed at technological modernisation, operational efficiency, strengthening information security, and the continuous improvement of the Customer experience.

During the 2025 financial year, the Bank continued to implement this Strategic Plan, consolidating a progressive and structured approach aimed at positioning the Organisation in an increasingly digital, resilient, and data-driven context, while ensuring high levels of security, compliance, and operational sustainability.

In defining each of the strategic areas, there was a common objective: to assess the Bank's current reality, compare it with future ambitions, and define the initiatives required to map out the roadmap for the three-year period, with the aim of moving the Organisation towards an increasingly digital and self-service context.

Each of the strategic areas has a set of specific goals to be attained, as well as areas and initiatives to be further expanded, as described in detail hereunder:

Application Architecture

Strategic focus:

- Consolidation of the modernisation of the application architecture, with a focus on interoperability, scalability, and reduction of technical debt;
- Strengthening integration between systems and channels, promoting greater functional consistency and operational efficiency;
- Continuous evolution of digital and face-to-face channels, in line with business needs and the Customer experience.

In terms of application architecture, the Bank continued the process of modernising and rationalising its application ecosystem, with a focus on improving the robustness, scalability, and interoperability of business support systems.

Initiatives were developed to enhance digital and face-to-face channels, improve integration between systems, reduce technical debt, and progressively adopt more modular and service-oriented architectures, ensuring greater capacity to respond to business needs and providing a more fluid experience for Customers.

Data & Innovation

Strategic focus:

- Strengthening governance and data quality, ensuring more reliable information and decision support;
- Consolidation of analytical and reporting platforms, in line with regulatory and risk management requirements;
- Creating the conditions for the governed adoption of advanced analytics and artificial intelligence solutions.

In 2025, data and innovation played a central role in the Bank's technological strategy, with a particular focus on strengthening data governance, improving information quality, and consolidating analytical platforms to support decision-making.

Initiatives were also developed to create the technical and organisational conditions for the responsible and governed use of advanced Analytics, Artificial Intelligence, and GenAI solutions, boosting efficiency gains, improving processes, and supporting risk management, compliance, and reporting processes.

Cloud Adoption

Strategic focus:

- Phased implementation of the cloud strategy, with reinforcement of governance, cost control, and security models;
- Development of internal skills and technical training for teams;

- Preparing the technological infrastructure to support hybrid environments and innovative solutions.

In the area of cloud adoption, the Bank continued to implement a phased strategy, based on a prudent approach and in line with the regulatory and security requirements applicable to the financial sector.

The initiatives developed in 2025 focused on strengthening internal skills, defining appropriate operational and governance models, optimising costs, and preparing the technological infrastructure to support cloud and hybrid solutions, ensuring appropriate levels of control, resilience, and scalability.

Cyber Security

Strategic focus:

- Reinforcement of information security processes and controls, in line with international best practices;
- Improved capabilities for detecting, monitoring, and responding to security incidents;
- Strengthening technological resilience and business continuity.

Cybersecurity remained a strategic priority in 2025, and the Bank consistently strengthened its mechanisms for protection, prevention, detection, and response to information security incidents.

Initiatives have been developed to strengthen security processes and controls, improve monitoring capabilities, enhance identity and access management, increase maturity in business continuity and recovery, and promote a culture of security among Employees.

Information and communication systems strategy

In 2025, the Bank continued to implement a structured portfolio of technological initiatives, duly prioritised according to their criticality and impact on the business, ensuring continuous alignment between the technology strategy and its strategic objectives.

The approach adopted has made it possible to strengthen the resilience of information systems, improve operational efficiency, reduce technological and operational risks, and foster innovation, contributing directly to enhancing the quality of services provided to Customers and strengthening the Bank's competitive position.

Continuous investment in technology, people, and processes has resulted in a sustained improvement in the Organisation's technological maturity, while ensuring compliance with regulatory requirements and the adoption of international best practices.

Cybersecurity remained a strategic priority in 2025, and the Bank consistently strengthened its mechanisms for protection, prevention, detection, and response to information security incidentes.

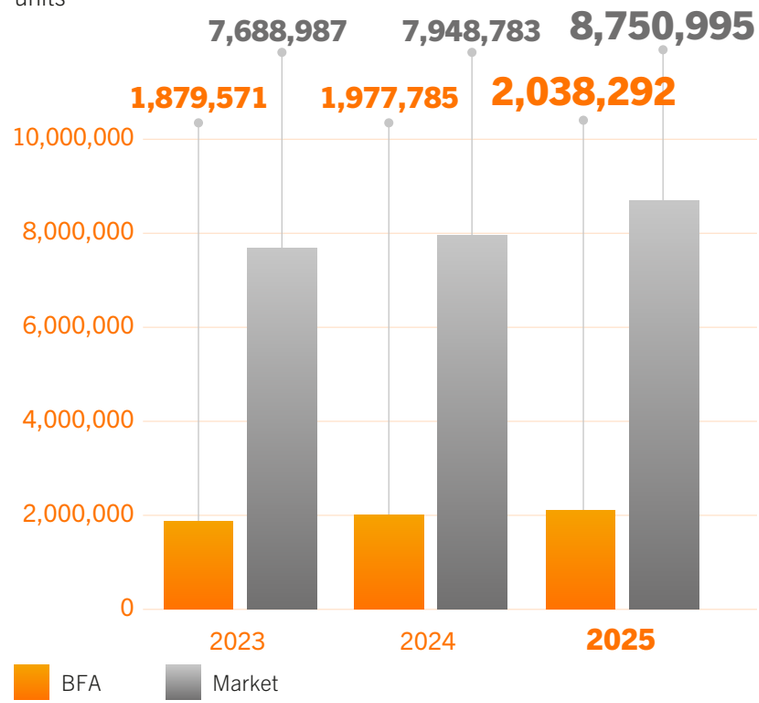

Payment Systems

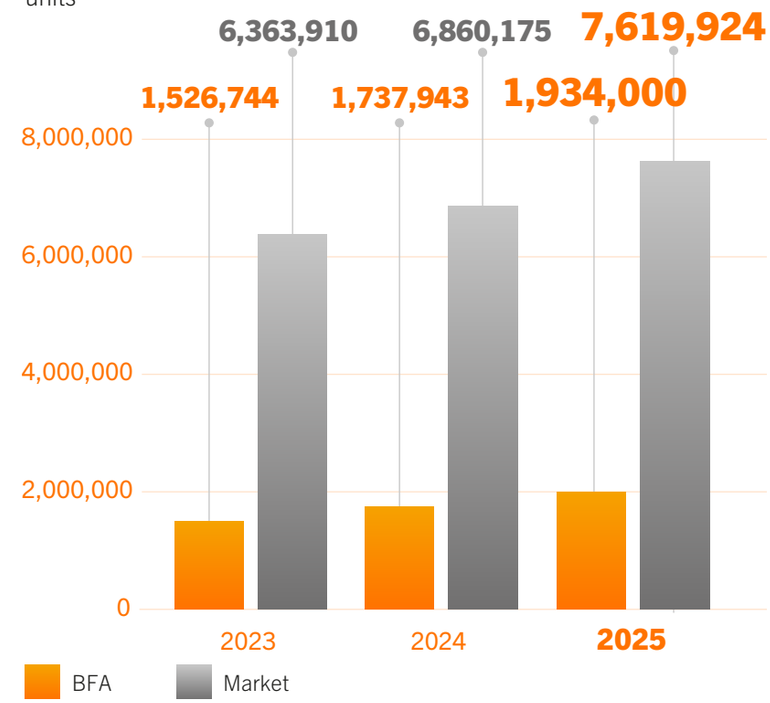

Debit Cards

In 2025, the total number of valid Debit Cards (active and inactive) reached 2,038,292, representing growth of 3.1% compared to the previous year. This increase was below the average market growth of 10.1% over the same period.

Number of valid Debit Cards
units

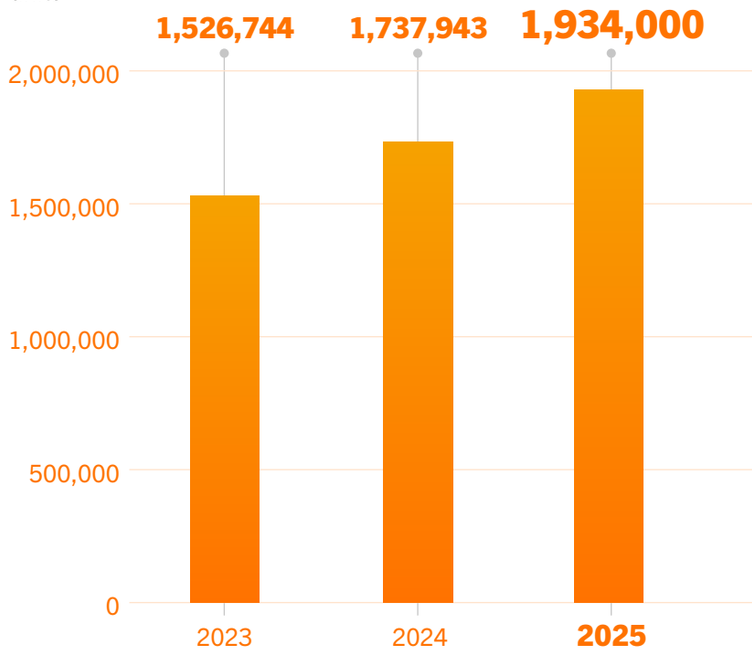

Number of active Debit Cards
units

The stock of active cards (cards that recorded at least one Customer transaction in the month) totalled 1,934,000, representing growth of 11.3%, slightly above the market growth rate of 11.1%.

Approximately 87.6% of BFA cards are enabled with EMV technology.

Evolution in the number of active BFA Debit Cards

ATM and POS Networks

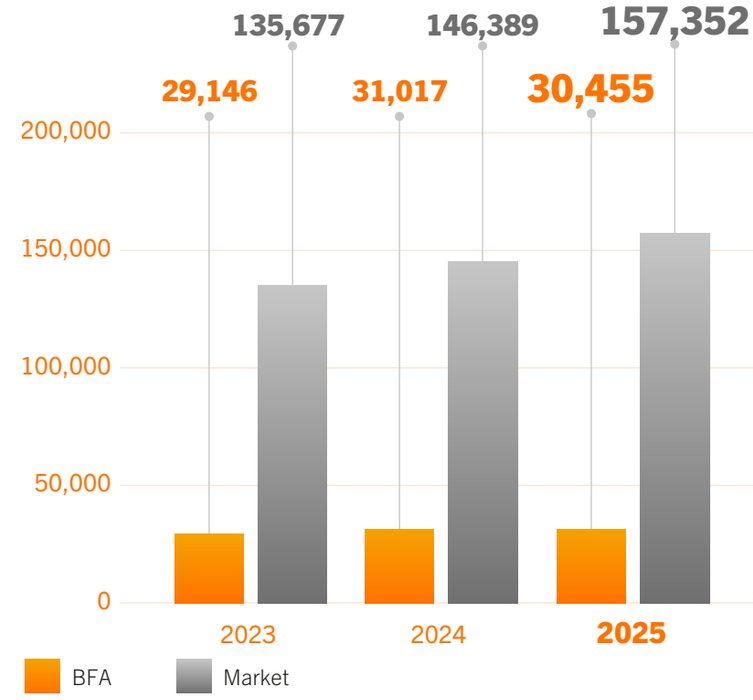

In December 2025, BFA accounted for a total of 35,207 POS terminals registered, down by 17.2% YoY.

BFA recorded a reduction of 562 POSs, corresponding to a 1.8% decrease in active POSs.

Number of registered POSs
units

Number of active POSs
units

Development of Total BFA's active POS Terminals

The highlight of the year goes to the construction and inauguration of the Orange Spaces, which were designed as tailored Customer self-service areas, with a focus on improving the financial services provided to BFA's Customer base and the general public. This initiative forms part of the Bank's strategic vision for the modernisation and digitalisation of its operations, with the objective of delivering an excellent Customer experience.

Despite the reduction in the number of active POSs, the average daily value of purchases increased by 8.2% compared to 2024.

Number of registered ATMs

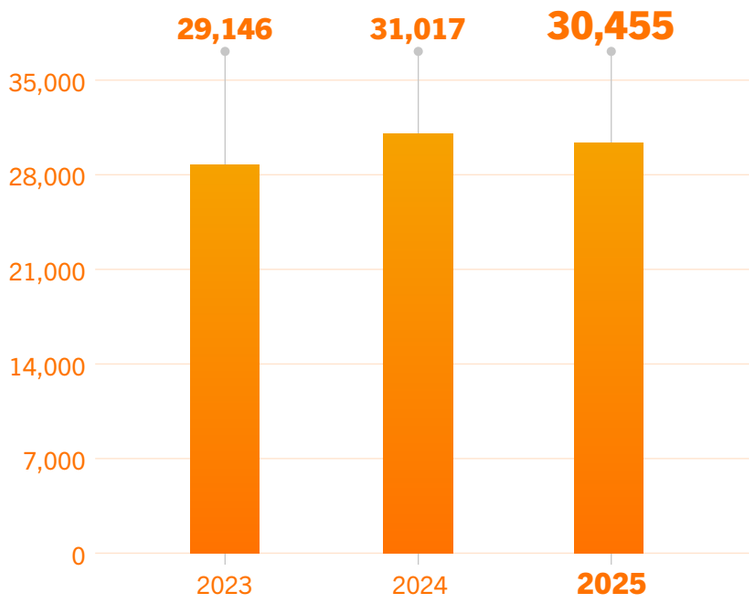

In 2025, Banco BFA recorded growth in the number of ATMs, with a particular focus on improving the services provided to its Customers and the general public. One of the main developments was the launch of the Orange Space project, aimed at creating ATM centres in municipalities with lower coverage.

Number of active ATMs

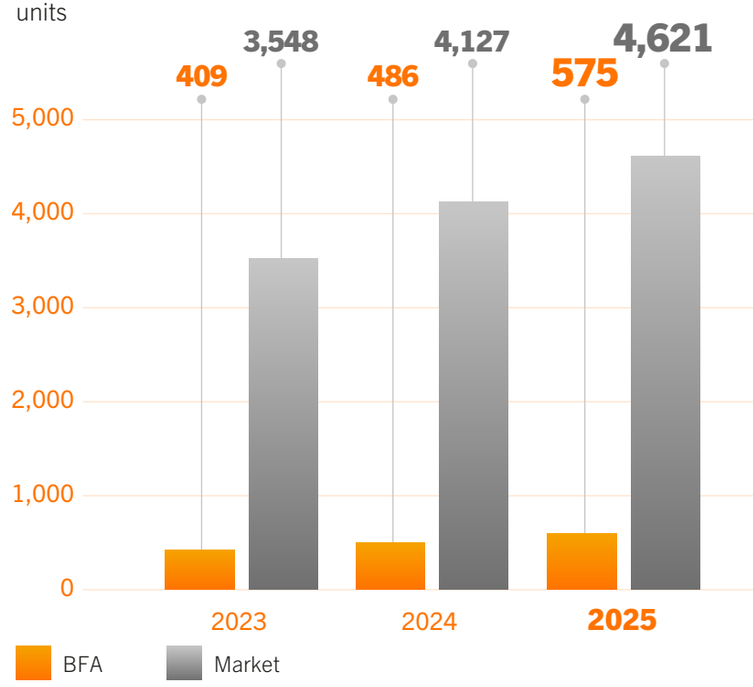

In 2025, there was an increase of 89 active ATMs, mainly driven by the creation of Orange Spaces, as well as by commercial initiatives assigning BFA ATMs to Customers, following the identification of commercial potential for this purpose.

In terms of ATM withdrawals, the market reached AOA 5,312.8 billion, corresponding to a 20% increase compared to 2024, representing a rise of 300 b.p.. BFA recorded AOA 783 billion processed through this equipment, an increase of 15% (+AOA 101 billion).

AOA 4 062 262 million

Average daily amount dispensed per ATM

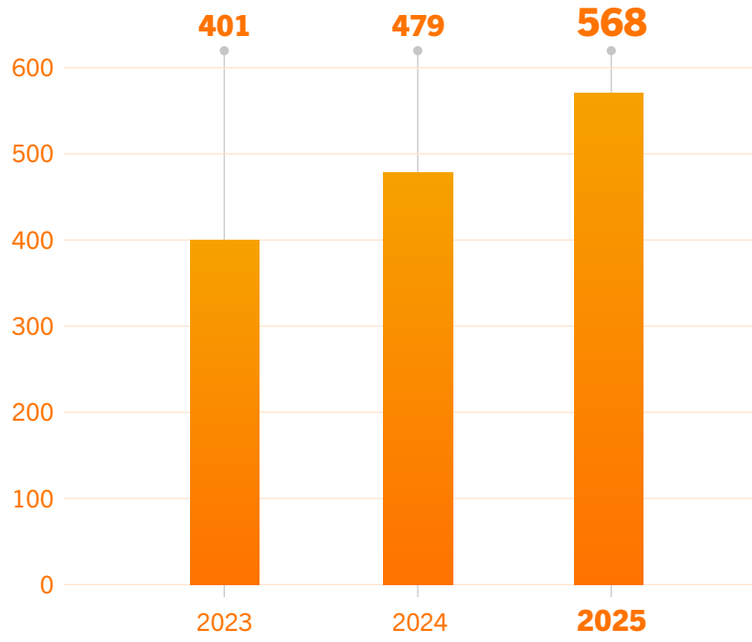

Average daily amount dispensed per ATM

In line with the increase in amounts withdrawn, the average daily value dispensed also grew by 4%, partly explained by the seasonal effect of withdrawals, characterised by transactional peaks. This indicator reinforces the high availability of ATMs and remains above the market average for withdrawals.

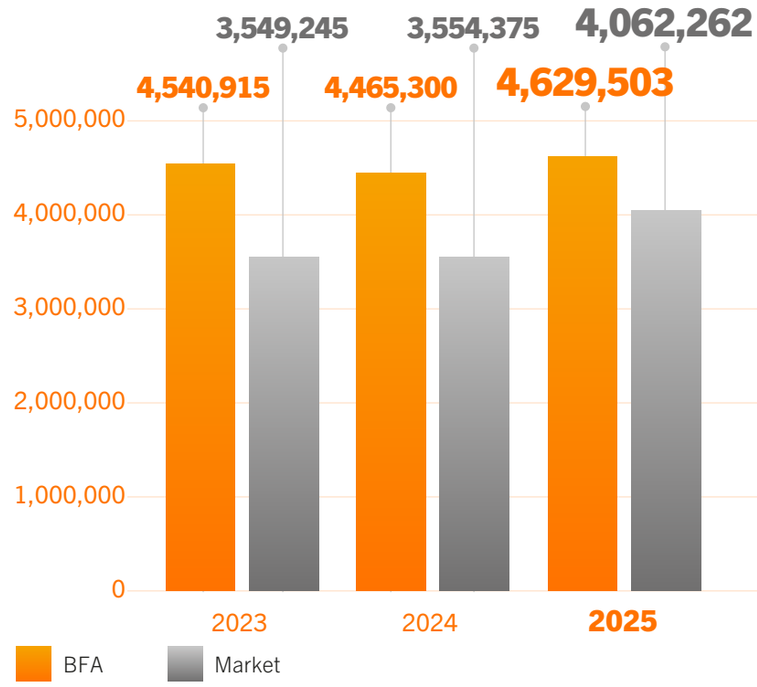

Average ATMs operating rate

The operating rate of BFA's network remained stable, although slightly below the market average. Conversely, the market recorded an improvement, with an increase of 120 b.p. in the Network Operating Ratio (NOR). This result reflects a continuous and consistent effort, demonstrating the strength of BFA's commitment to its Customers.

Average daily amount dispensed per ATM
AOA

Average ATMs operating rate
%

Average downtime rate due to a lack of banknotes (ATMs)

During the period under review, the market-wide ATM downtime rate fell by 570 b.p., reflecting an across-the-board improvement in service. BFA outperformed this trend, recording a reduction of 620 b.p., even as its ATM network expanded. Despite this positive trend, the average downtime due to cash shortages worsened, rising from 27.4% in 2024 to 46.3% in 2025, placing it slightly above the market average (45.7%). This development reflects increased pressure on automated channels amidst greater usage and operational demands.

International Payment Systems (IPS) Cards

BFA has been modernising its payment system by adopting international standards for security, interoperability, efficiency and financial inclusion, ensuring high levels of security, transparency and robustness in line with international best practice.

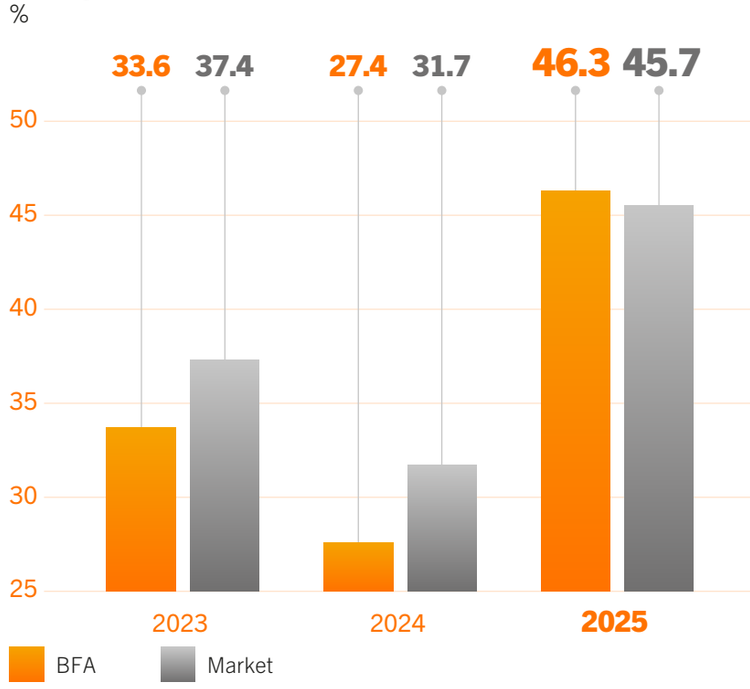

Number of Valid IPS Cards

In 2025, Banco de Fomento Angola (BFA) recorded a reduction of 179 valid IPS Cards (VISA Credit and Prepaid Cards) compared to 2024.

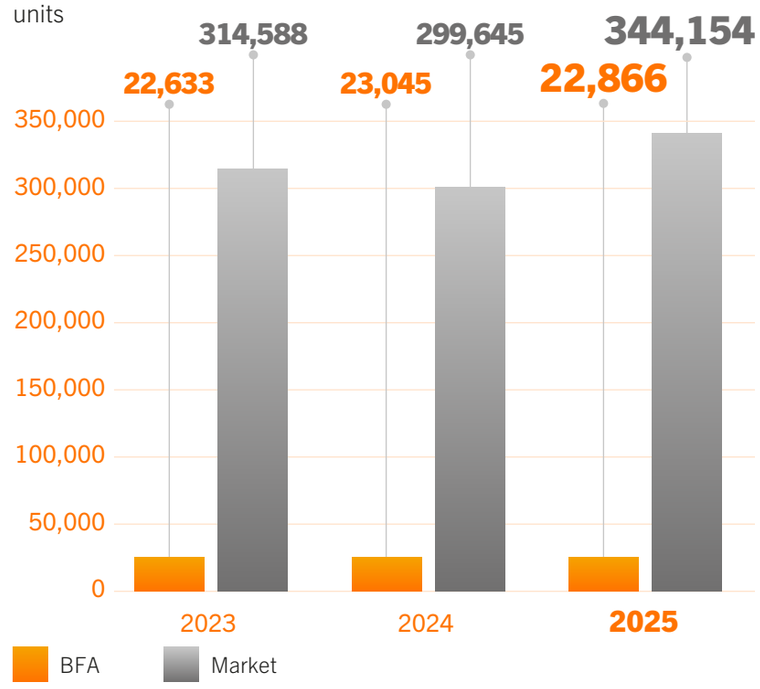

Number of Active IPS Cards

On the other hand, the number of (active) IPS Cards increased by 27.9%.

H2H payments

The EMIS (Interbank Services Company) H2H (Host to Host) payments system is an infrastructure that connects a financial institution's payment system directly to EMIS main host. This system aims to facilitate the integration and offering of payment services, allowing financial institutions to enable Multicaixa System functionalities on their own banking systems and platforms.

In 2025, H2H stood out in the Angolan financial landscape, with Banco BFA achieving a 21.5% share of total transactions through this channel. In addition, there was significant growth of 38.5% compared to 2024. This performance reflects the growing adoption and use of the digital solutions offered by EMIS, aimed at modernising and facilitating financial transactions in the country.

Payment via HBMB (Multicaixa Express)

Multicaixa Express is an interbank payment and transfer channel developed by EMIS (Empresa Interbancária de Serviços) in Angola. Launched in April 2019, this service aims to facilitate financial transactions by allowing users to make payments and transfers without the need for a physical card, using only the MCX Express mobile application.

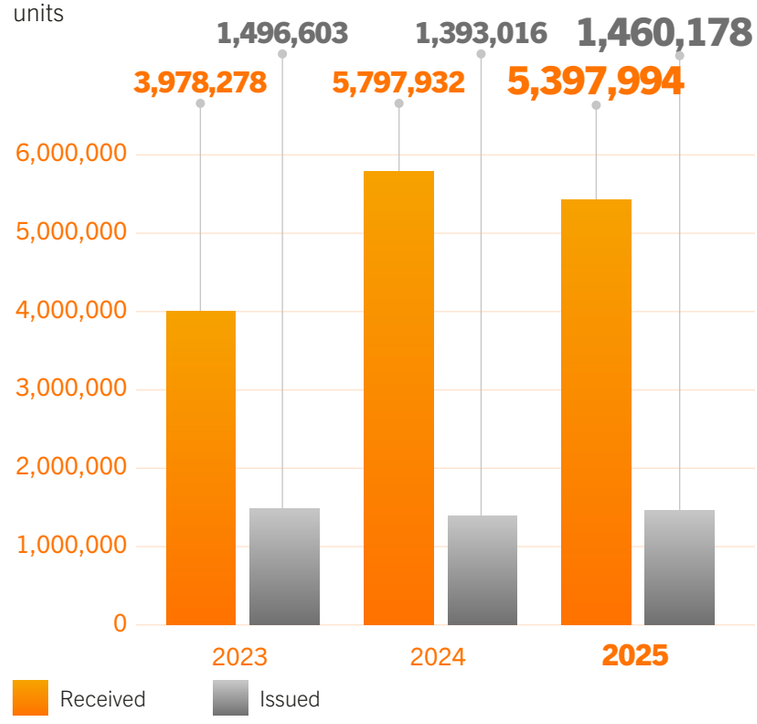

BFA is the bank with the largest number of cards associated with Multicaixa Express, having reached 1,146,515 members (28% market share) at the end of 2025, an increase of 56.3% compared to 2024. Both the number and the average daily value of BFA card transactions (HBMB) grew significantly, by 64.7% in number of transactions and 58.5% in value transacted.

Interbank Transfers

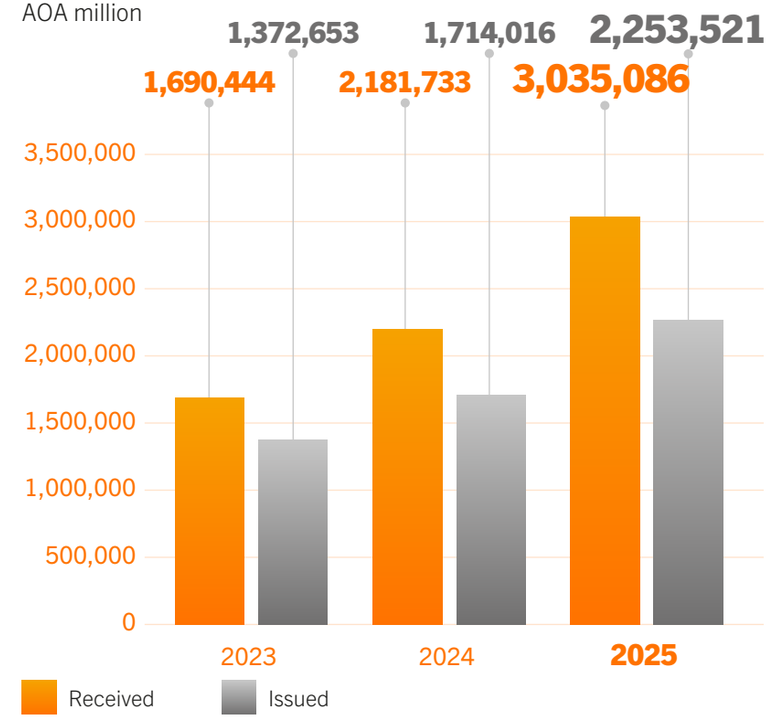

As for wire transfers processed through the Credit Transfer Subsystem (CTS), both the volume of operations and the total amounts processed, witnessed a sharp increase over the course of FY2025.

Growth in the service was driven by the processing of the civil service salary payment operation. Requested by MINFIN and processed via CTS, the CTS — Issued service recorded an increase in the number of transactions of 4.8% (i.e. +67,162), which positively influenced the amount processed by 31.5% (i.e. AOA 539,505.00 million). As for the CTS — Received service, there was a 6.9% reduction in the number of transactions (i.e. -399,938) and a 39.1% increase in the amount processed (i.e. +AOA 853,353.00 million).

CTS – Number of operations
units

BFA's Digital Agenda

The year 2025 was marked by positive results, evidenced by the growth in the use of social networks by Customers, as well as the increase in the number of sessions and active users on the institutional website compared to the previous year.

BFA institutional website

The year 2025 was positive for the BFA website in terms of page visitors and engagement metrics.

These increases were reflected in a rise in conversion actions, mainly simulations (+45%) and document downloads (+34%), as a result of the interest generated by BFA's Initial Public Offering (IPO).

In terms of traffic sources, organic search continues to be the main source of visits to the BFA website. It should be noted that traffic from social networks grew by 152% and direct traffic by 36%.

The Private Area continues to be the most visited section, accounting for 40% of the total number of views on the BFA website.

In terms of traffic sources, organic search continues to be the main source of visits to BFA's Official Website, which grew by +6.0%. It is also worth highlighting the sharp growth in traffic stemming from social networks, up by +260% year-over-year.

The "Retail Banking" area remains the section most frequently visited by the general public, experiencing a +28% rise in the number of visualisations.

	2024	2025	Δ% 25-24
Global Visitors	1,198,265	**1,407,452**	17%

Social Networks

The three main networks for communicating the Bank's content continue to be Facebook, Instagram and LinkedIn.

With the aim of diversifying editorial content and reaching different segments, various communication axes and respective headings were established, such as: commercial, corporate, educational, informative and inspirational.

Facebook

In 2025, the number of Facebook users in Angola grew from 5.1 million at the beginning of the year to around 6.7 million in December. This represents approximately 16.2% of the population, with a predominance of males (58.2%), and the 25-34 age group representing the largest segment of users.

The Bank currently has 442,000 followers in the social network Facebook, a significant increase as opposed to 2024, which recorded 355,000 followers at year's end.

Facebook, being a broad platform combining personal connections, communities, entertainment and informative content, and bringing together multiple languages and audiences in the same environment, Facebook is the main tool used by the Bank to strengthen communication aimed at the mass market, with emphasis on sharing information about products, services and topics related to financial literacy.

LinkedIn

In 2025, LinkedIn registered growth of more than 37,325 followers, representing an increase of 28% compared to the previous year.

LinkedIn is a professional platform focused on careers, business and corporate reputation, expanding professional networks and structured around valuable content, authority and networking, which makes it essential for identifying talent.

In addition, the Bank uses this network to share information about products and services, financial literacy content, as well as news and events aimed at the corporate segment.

Instagram

With around 41,000 followers in 2025, an increase of more than 10,000 compared to 2024, BFA continues to evolve on this digital platform, supported by a strategy focused on building interaction and relationships with followers.

Instagram is a more visual and dynamic content ecosystem; accordingly, the Bank adopts a more image-centric approach, with careful aesthetics and storytelling to create immediate impact and generate greater interaction with younger audiences. In this space, information about products and services is shared, as well as lighter and more inspirational content.

BFA APP 2.0

In 2025, **BFA App 2.0** was consolidated as Banco de Fomento Angola's (BFA) main digital relationship platform, capable of responding comprehensively to Customers' financial needs. The continuous commitment to innovation and adaptation to technological trends remains a fundamental pillar in ensuring competitiveness and promoting high levels of Customer satisfaction.

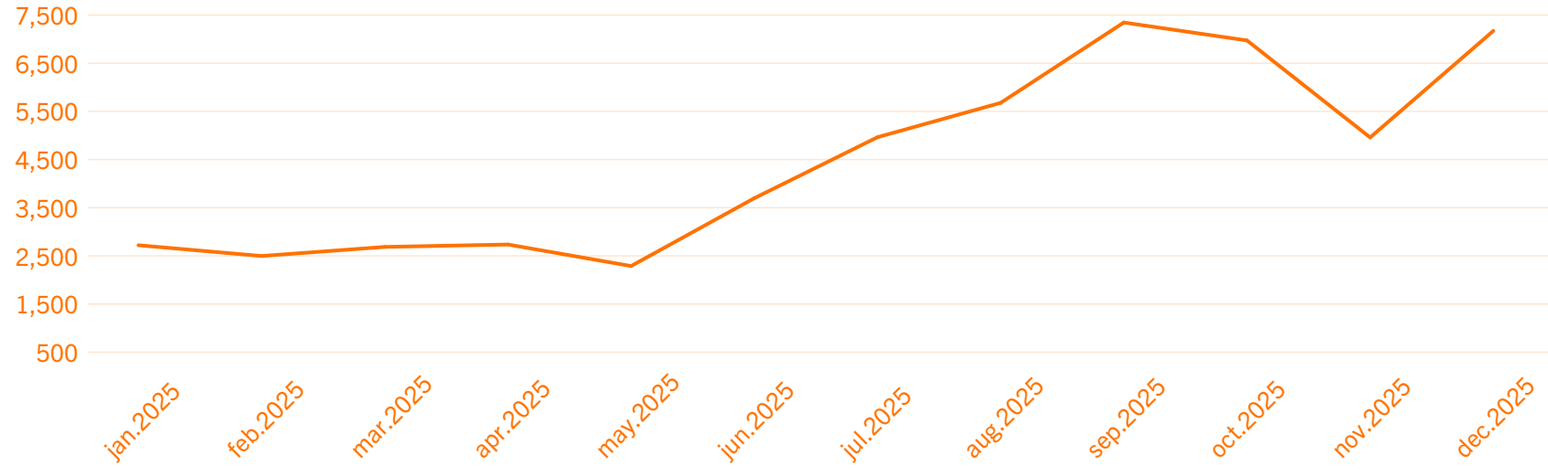

At the same time, the Bank continued to implement its strategic plan for the evolution of this channel, guided by the vision of consolidating the BFA App as a single, comprehensive solution tailored to Customers' needs. Contributions were integrated from the Information Technology (IT), Commercial and Customer Support areas, in line with international technological trends. This process reinforced the strategy of concentrating efforts on achieving a more robust and efficient application, focused on reducing branch visits and increasing digital convenience.

In this context, the implementation of new features and introduced improvements proved crucial in meeting the growing market demands and ensuring a comprehensive, modern, and efficient banking experience.

Customer Details Update

In BFA App 2.0, the "Data Update" feature has been made available. This development enables Customers to update their personal data

New features made available to the market throughout 2025
no. of features

autonomously and quickly. This update can be carried out anywhere and at any time, without the need to visit a branch, offering convenience and full security to Customers.

New Card Area

With the increase in supply in this segment, it became necessary to develop a new Card Area, making it more intuitive and enabling BFA App Customers to carry out various actions, such as cancelling cards, changing payment methods, topping up cards and requesting a new PIN, always with full autonomy.

E-PIN

In order to speed up the process of delivering the PIN to the cardholder and to reduce paper consumption, the PIN has been dematerialised, allowing it to be defined by the cardholder. The dematerialisation of the PIN has enabled the replacement of printed PIN cards with the generation of a digital PIN ID via the BFA App, through which the Customer sets the PIN for their card at an ATM terminal.

Account Transfer (by PIN)

The new feature allows transfers to be made between BFA accounts belonging to the same Customer and is validated solely with the access PIN code, where facial recognition and fingerprint authentication have not been activated in the BFA App. This functionality no longer requires a confirmation key and/or the sending of an SMS code, thereby providing a simple and consistent process for Customers' financial management.

BFA Click (BFA Tecla)

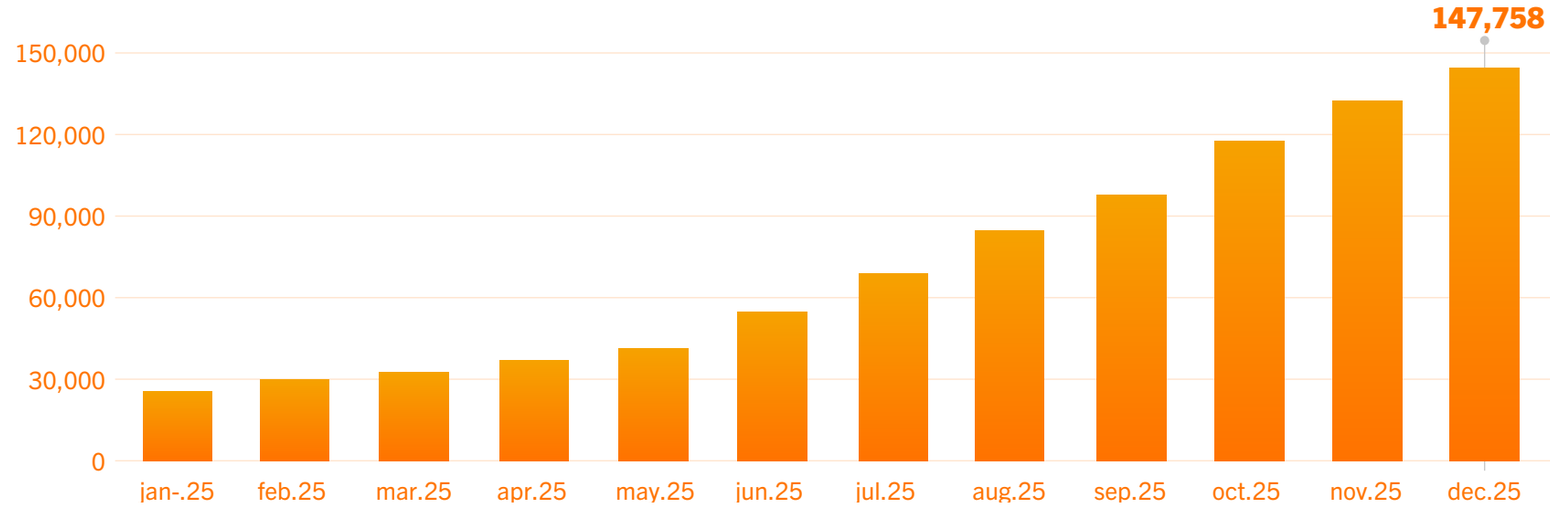

2025 confirmed the potential of the BFA Click channel, which, just over a year after its launch, already has around 147,000 subscribers.

BFA Click has established itself as one of the pillars of Banco de Fomento Angola's financial inclusion strategy, expanding access to basic banking services to segments of the population with lower digital literacy or without internet access. Based on USSD technology, BFA Click enables Customers to carry out essential banking operations using any mobile phone, regardless of model or data access capability, simply by dialling *419#.

With a record of 750,000 logins, BFA Click plays a decisive role in the strategy of bancarisation and modernisation of the Angolan financial ecosystem, ensuring that more citizens have simple and secure access to their banking operations, anywhere and at any time, without the need for internet access.

In addition to subscribing to the service entirely autonomously via mobile phone, the Bank has enhanced the solution with the Credential Recovery option, providing Customers with greater autonomy in accessing and managing their day-to-day finances.

New Digital Platforms: BFA Net/BFA Net Enterprise

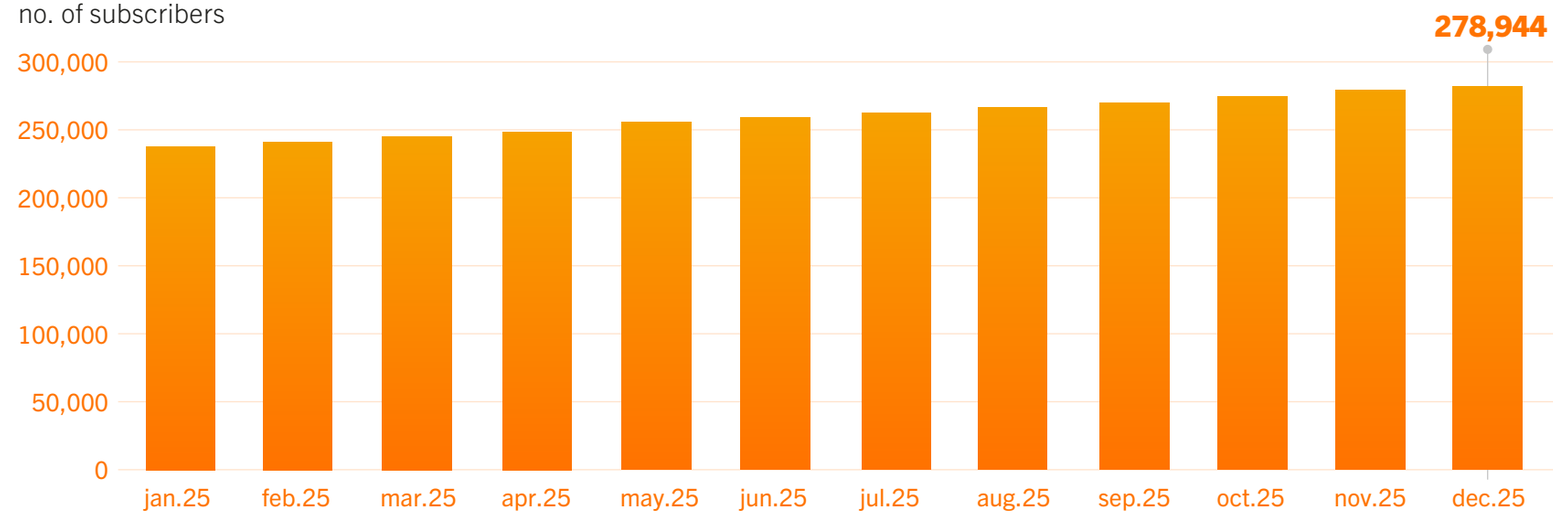

The evolution of the BFA NET channel has been accompanied by continuous improvements in usability, navigation, integration and performance, offering a simplified mobile experience while retaining the full capabilities of the web channel and ensuring quick access from anywhere. The migration of the old sites to the new addresses further reinforced the centralisation and modernisation of BFA's digital offering, contributing to more intuitive navigation and aligning with the Bank's digital transformation strategy.

With 280,000 subscribers, BFA NET reaffirms the Bank's commitment to continually expand and enhance its digital channels, ensuring a financial ecosystem that is increasingly simple, efficient and accessible to all Angolans.

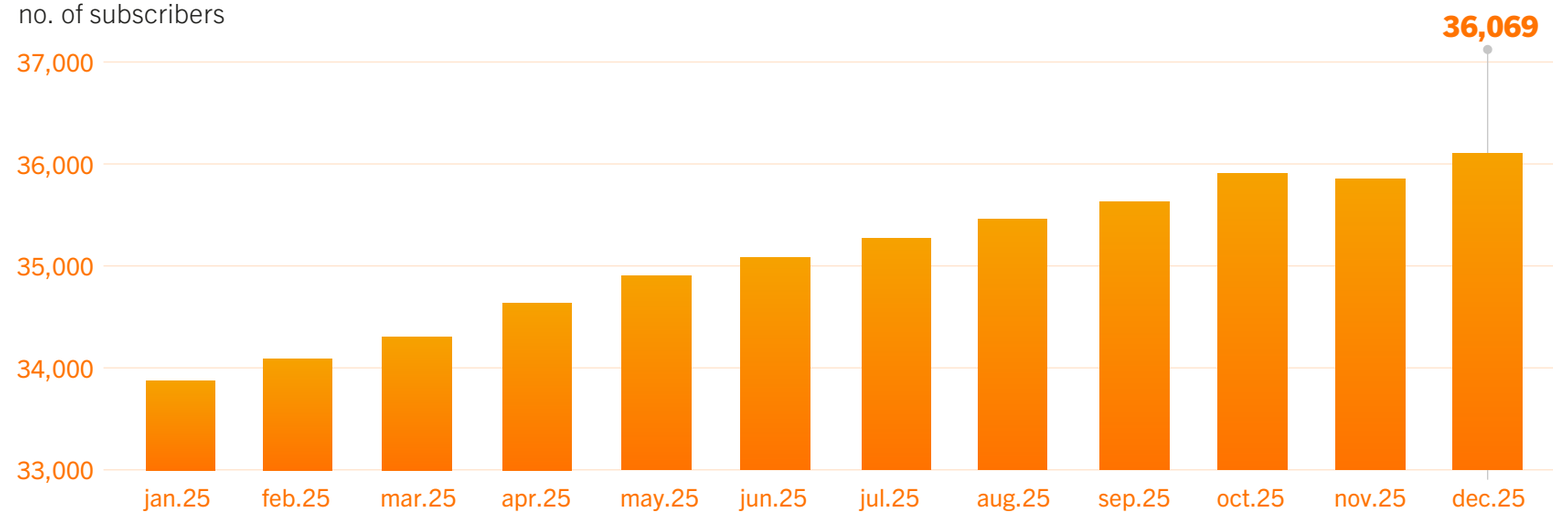

In 2025, BFA Net Empresas consolidated its position as the main digital financial management platform for corporate Customers, reinforcing Banco de Fomento Angola's commitment to modernisation, operational efficiency and proximity to Angolan companies. This channel provides a simple and secure experience tailored to business management needs, enabling companies to carry out transactions without visiting branches.

With 6,000 new corporate members in 2025, BFA Net Empresas has reaffirmed its role as a strategic pillar in supporting companies in an increasingly digital and competitive environment. The platform ensures greater autonomy, speed and security in financial management, while offering full monitoring of corporate Customer growth.

For 2026

In the coming year, BFA will continue to invest in innovation and new technological solutions to further enhance its channels, addressing evolving Customer needs and reaffirming its position as a leading bank in the digital financial services sector.

In 2026, BFA will continue to invest in innovation and new technological solutions to further enhance its channels, addressing evolving Customer needs and reaffirming its position as a leading bank in the digital financial services sector.

Communication

Campaigns

Crédito Solução BFA (BFA Solution Loan)

The loan that meets your needs

Launched in the first quarter of 2025, the Crédito Solução BFA is a quick and simple loan for private Customers that does not require a guarantor or contract authentication.

This product demonstrates BFA's commitment to providing financial solutions that combine convenience, speed and security, ensuring Customers can access products aligned with their lifestyles and priorities.

Expanding the Offer

New insurance launched

With the aim of expanding and diversifying its range of affordable insurance products tailored to Customer profiles, BFA, in partnership with Fidelidade Seguros, introduced five new products:

- Health Insurance;
- Motor Insurance;
- Multirriscos Pack Recheio (Multi-risk Content Pack);
- Occupational Accidents – Domestic Workers;
- Occupational Accidents – Self-Employed Workers.

This partnership, combining BFA's solidity with Fidelidade Seguros' expertise, reflects both institutions' commitment to offering solutions that respond effectively to Customer needs.

BFA Salary Account

Take the first step and enjoy the benefits

In the month in which Workers' Day is celebrated, BFA promoted the Salary Account, an account designed to strengthen the partnership between the Bank and its Customers.

This is a salary domiciliation account that allows access to salary advances and a wide range of the Bank's products and services.

This product enhances the loyalty of Customers who choose BFA as their financial partner and reinforces the Bank's role as an ally in managing personal finances, planning for the future, and carrying out individual and family projects.

BFA Travel Insurance

If you really want to be protected, choose our insurance and relax

In addition to the Salary Account, in anticipation of the vacation season, during May the Bank promoted BFA Travel Insurance, a product aimed at people living in Angola who travel abroad for periods of no more than 90 days.

BFA Travel Insurance strengthens the Bank's commitment to promoting Customer welfare by offering a practical and affordable solution that guarantees security, assistance, and peace of mind on international trips. With cover for unforeseen events such as emergency medical assistance, logistical support, and protection against lost luggage. This insurance provides confidence and comfort, making every journey safer and more peaceful.

BFA Agricultural Campaign Loan

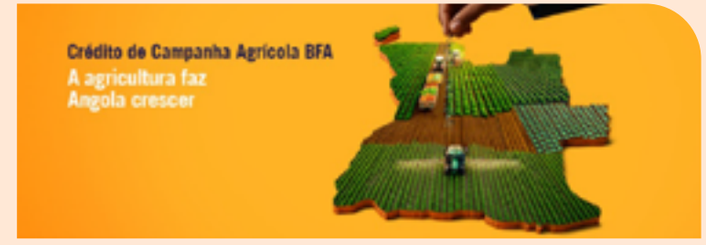

Agriculture makes Angola grow

Committed to the sustainable development of the agricultural sector and the strengthening of the national economy, in the second quarter of 2025 BFA launched Agricultural Campaign Loan, a product designed to support producers in the preparation and execution of their annual crop campaigns.

Making this offer available positions the Bank as a strategic partner for the primary sector and represents an important step in its mission to promote structuring projects that foster Angola's economic and social development.

BFA Kandengue Account

Give your children more of a future

In June, in honour of Children's Month, the BFA Kandengue Account was launched, a product designed to promote savings and financial education among Kandengues.

The BFA Kandengue Account is a savings product consisting of a term investment in kwanzas, with subscription exclusive to Customers under the age of 18. This account allows for periodic top-ups and the mobilisation of invested amounts, subject to a penalty on unpaid interest.

This savings product confirms BFA's commitment to providing solutions that ensure stability and opportunities for younger generations, promoting the habit of saving from an early age.

BFA Anniversary – Special Term Deposit (TD)

BFA's birthday and it's the Customers who get the presents

To mark its 32nd anniversary, in July BFA promoted the Special Anniversary TD, is a one-off fixed term deposit product designed to attract and retain Customer deposits, with an increasing interest rate up to 182 days.

This offer reinforces BFA's commitment to innovation and proximity, providing Customers with a product that reflects growth, trust and a forward-looking vision.

Initial Public Offering of Shares (IPO)

Be part of the Future of BFA

O BFA celebrated with enthusiasm the completion of the largest Initial Public Offering (IPO) on the African continent.

In September 2025, 29.75% of its share capital was put up for sale: 15% provided by Shareholder Unitel, as part of the Angolan government's privatization programme, and 14.75% by Shareholder BPI.

To highlight this historic offer, an integrated communication plan was implemented to promote the sale of 4,462,500 shares to investors.

With more than three decades of activity and consolidated as one of the most profitable and solid banks in Angola, the Bank enters this new phase with determination to continue promoting sustainable growth, innovation and proximity to its Customers.

The IPO not only strengthens the Bank's competitiveness but also opens the Angolan financial market to a broader and more participative public.

Institutional Campaign

BFA, a story with a Future

BFA has been part of Angolans' lives for 32 years. Throughout this journey, it has remained steadfast in its mission to create financial solutions that bring the Bank closer to its Customers, strengthen relationships and trust, and generate value for its Shareholders.

Guided by the values of Innovation, Proximity and Transparency, BFA has built a solid presence across the country, currently serving more than three million Customers, supported by over 2,500 Employees, 194 branches, 208 banking agents and 17 Orange Spaces.

To reinforce its positioning, and in a historic year in which Angola celebrates 50 years of independence, an integrated communication campaign was launched to pay tribute to the country's history alongside that of BFA, two stories that intertwine and continue to shape the future.

90-Day Special Term Deposit (TD)

While you relax, your money earns interest

Every day, BFA reinforces its commitment to offering competitive financial solutions that meet its Customers' needs. With this objective in mind, the 90-Day Special Term Deposit was launched in November.

This term deposit was designed to provide more advantageous investment alternatives, allowing Customers to access safe, accessible options with attractive short-term returns at BFA.

In this way, BFA has established itself as a trusted partner in its Customers' investment choices, promoting opportunities that support individual financial growth and strengthen the country's savings culture.

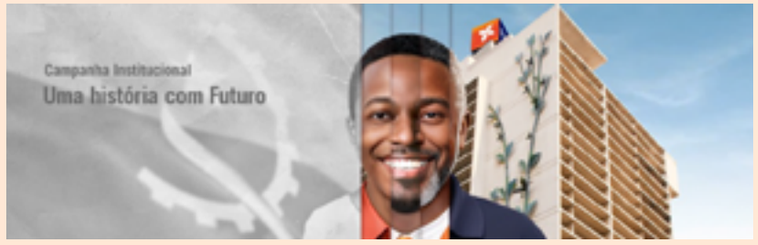

BFA Christmas – Special Term Deposit (TD)

Christmas spirit also pays off at BFA

In the last quarter of the year, BFA promoted the Special Christmas 2025 TD solution, a product designed to offer its Customers a unique opportunity to make the festive season even more memorable.

This is a short-term product, with increasing interest rates and monthly interest payments, available for subscription at BFA branches and via digital channels.

With this exclusive offer, BFA continues to demonstrate its commitment to being close to its Customers, offering products that meet their expectations at key times of the year, while promoting a solid, trusting, and long-term relationship.

Season's Greetings Angola

As part of the Christmas celebrations, in December BFA launched the Boas Festas Angola campaign, designed to convey good wishes to Angolans.

At this time of year, the Bank reinforces the importance of long-lasting relationships built over time, emphasising that its success is only possible thanks to the trust, partnership, and collaborative spirit of its Customers, which is renewed every year.

BFA Partnerships

BFA has taken a significant step forward in expanding its offerings by establishing strategic agreements with several prominent entities in the domestic market, including partnerships with CFAO Angola Mobility, DAIMIC Motors, Megáfrica, Hiper and ENSA Seguros de Angola.

These alliances reinforce the Bank's commitment to providing accessible and modern financial solutions, aligned with the real needs of Angolans, promoting economic development and strengthening the country's key sectors.

In this way, BFA reaffirms its role as a future-oriented institution focused on creating value and opportunities for its Customers.

These alliances reinforce the Bank's commitment to offering modern solutions, aligned with the needs of Angolans, thereby consolidating BFA's role as a future-oriented institution, focused on creating value for its Customers.

Internal Communication

Tribute

Women's March

In March, the strength, wisdom, resilience, and dedication of the women of Banco de Fomento Angola were celebrated.

This tribute to BFA Women was paid throughout the month via individual and collective messages, praising the fundamental role of women and their decisive contribution to the Bank's growth and success.

Celebrations

Africa Day

On the 25th of May the 'Africa Day' was celebrated. To commemorate the importance of this special date, BFA's Employees were invited to dress in traditional African attire and share individual or group photographs.

The images were later placed in African-inspired frames and shared on BFA's intranet and social media platforms.

Celebration

BFA 32 years Race

The first edition of the BFA 32 Years Race kicked off the Bank's 32nd anniversary celebrations on 5 July, marking a trajectory defined by growth, achievements, and accomplishments.

The strong participation of Employees demonstrated the team spirit, unity, determination, and passion that characterise BFA, making the BFA 32 Years Race an unforgettable event and a living symbol of another chapter in the Bank's history.

August 14th

Bank Workers' Day

The celebration of Bank Workers' Day was marked by a workshop entitled 'Conduct and Integrity for Fraud Prevention', dedicated specifically to professional ethics, where BFA's values were highlighted.
BFA Employees were also surprised with gifts delivered across the country, from Cabinda to Cunene.

Pink and Blue Walk

This Christmas, Share your best

New Podcast

Orange Market

Mercado Laranja (Orange Market) was launched on 3 September as a new BFA podcast aimed at all Employees, it provides monthly information on the Bank's products and services through informative sessions via TEAMS, with space for questions and interaction.

Voluntary Work

Blood Donation Campaign

Reflecting its commitment to health and solidarity, BFA, **in partnership with the National Blood Institute** (INS), promoted a three-cycle Blood Donation Campaign, a high-impact social initiative.

The first cycle ran from **1 to 28 June in Luanda**. The second cycle took place from 22 to 27 September in Huambo and Bié. The third cycle occurred between 3 and 17 November, covering the provinces of Luanda, Uíge, Cabinda, and Namibe.

Cancer Prevention

Pink and Blue Walk

As part of its solidarity and health promotion initiatives, 233 BFA Employees participated in the 3rd Pink and Blue Walk on 16 November, under the slogan '**In the Financial Sector, Solidarity is a Valuable Asset**'.

This initiative aimed to raise awareness of breast and prostate cancer prevention, highlighting the importance of early diagnosis, while also promoting fun and engaging moments among Employees focused on health awareness.

Blue November

Lecture 'Deconstructing the Taboo of Prostate Cancer Diagnosis'

As part of Blue November, the lecture 'Deconstructing the Taboo of Prostate Cancer Diagnosis' was held to raise Employees' awareness of men's health.

This initiative focused on the importance of prevention and early diagnosis of prostate cancer, one of the leading causes of cancer among men, reinforcing the Bank's commitment to the health and well-being of its Employees.

Donation

This Christmas, share your best

United by a spirit of solidarity, BFA Employees, together with the BFA Foundation, organised a campaign to collect donations for the **Centro de Acolhimento El Betel** in Luanda's Zango II, which accommodates around 150 children and young people aged 1 to 17.

The donations, including toys, books, and clothing, demonstrate the **Bank's commitment to solidarity, proximity, and support for the communities** in which it operates.

Events and Sponsorship BFA 2025

Throughout 2025, Banco de Fomento Angola (BFA) strengthened its position as a benchmark institution in the national financial system by participating in and sponsoring strategic initiatives across economic, cultural, sporting, social, and academic sectors. These initiatives helped to reinforce relationships with Customers, enhance institutional visibility, and support Angola's sustainable development.

1. Institutional and market events

VII Conference – E&M Agriculture

For the first time, BFA took part in the 7th E&M Conference on Agriculture on 20 February in Benguela Province. The event brought together financial sector operators, agroindustrial specialists, producers, government bodies, and companies involved in logistics and distribution, promoting debate on the main challenges and opportunities facing Angola's agricultural sector. The conference highlighted the strategic role of transport and logistics in agroindustrial development, as well as the importance of an integrated approach involving all Stakeholders in this area of the economy.

BFA 360º

On 8 May, BFA 360º brought together Customers and partners to present the Bank's financial performance, key strategic projects, and its vision for the future, anchored in digital transformation and innovation.

V Industry Forum

BFA participated in the 5th Industry Forum on 8 May, a national debate focused on industrial competitiveness, efficient infrastructures, cutting-edge technology, and human capital development, reinforcing the Bank's commitment to economic diversification and sustainable growth of the productive sector.

During the event, the Bank contributed to the panel on 'Evaluating the Efficiency of Commercial Banking Financial Products and Services for the Oil Industry', underlining its commitment to supporting the sector and providing financial solutions tailored to the needs of oil companies.

Oil & Gas Banking Forum

BFA sponsored the 5th edition of the Oil & Gas Banking Forum, held on 15 May at the Epic Sana Hotel. The event focused on evaluating the efficiency of financial products and services provided by commercial banks to the oil industry, as well as the role of insurance companies in the Oil & Gas sector.

III Edition of the Angola Banking Conference

BFA participated as a speaker in the 3rd edition of the Angola Banking Conference, organised by PwC and Economia & Mercado magazine, on 28 May, under the theme 'The Role of Artificial Intelligence in the Future of Banking'. The Bank was represented by the Chairman of the Executive Committee, Dr. Luís Gonçalves, who contributed to a panel discussion on the impact of technological transformation on the financial sector, focusing on investment in infrastructures, education, innovation, public policies, and access to finance.

17th Edition – Africa Business Summit

BFA sponsored the 17th edition of the Africa Business Summit, held from 22 to 25 June, under the theme 'Pathways to Prosperity – A Shared Vision for the US-Africa Partnership'. The event brought together more than 1,500 participants, including heads of government, political decision-makers, business leaders, and experts from strategic sectors such as agribusiness, energy, health, infrastructure, information technology, and finance. The aim was to promote new opportunities for cooperation and investment between the United States and the African continent.

Forum "The Impact of the Financial Sector on Local Content"

On 17 July, BFA participated in the Forum on the Impact of the Financial Sector on Local Content, promoted by Global Services Corporation. The meeting focused on reflecting on the role of banking in the development of the national economy.

As part of this initiative, the Bank took part in the round table on value chain integration, with a special focus on the Oil and Gas sectors, and was represented by Director Dr. José Alves do Nascimento.

During the session, the financial sector's contribution to supporting national companies, financing structuring projects, and strengthening local content was highlighted as a driver for sustainable growth and greater integration of the Angolan economy.

XV Edition – Banking Forum

BFA participated in the 15th Banking Forum, held on 18 July, dedicated to the theme 'The Value and Profitability of Banks in Angola'. This edition analysed the current size and profitability of banking institutions, as well as medium- and long-term perspectives, in a context marked by potential changes in share capital, privatisations, mergers, and the entry of new partners.

The conference also addressed the role of the banking sector in a transforming economy, characterised by new needs, increased competitiveness, and the growing importance of private financing in national development.

Initial Public Offering (IPO) and BFA Roadshow

September marked two historic milestones for BFA: the launch of the Initial Public Offering (IPO), announced on 4 September, and the symbolic Ring the Bell ceremony on 30 September, which officially marked **BFA's entry into the Angola Stock Exchange (BODIVA)**. This moment represented a strategic step in establishing BFA as a publicly listed company, reinforcing its commitment to transparency, good corporate governance practices, and openness to the capital markets.

2. Personal development, knowledge and education events

4th Edition of the Personal and Professional Development Forum

The Chairwoman of the Board of Directors of BFA, Dr. Maria do Carmo Bernardo, participated as a speaker at the 4th Edition of the Personal and Professional Development Forum, where she highlighted female leadership and strategic vision. This initiative was aligned with the celebrations of Angola's 50th Independence Anniversary and brought together institutional leaders and managers.

GEM Study 2024/2025

BFA continued to sponsor the Global Entrepreneurship Monitor (GEM), the world's largest study on entrepreneurship, conducted in over 120 countries. This partnership further reinforces the Bank's support for the promotion of national entrepreneurship.

ISPTEC National Programming Competition

For the third consecutive year, BFA sponsored the ISPTEC National Programming Competition, an academic contest bringing together students from across the country, contributing to technological development and the identification of new talent.

Scientific Conference of the Faculty of Veterinary Medicine

BFA sponsored the Scientific Days of the Faculty of Veterinary Medicine (Huambo), an academic event organised by José Eduardo dos Santos University, reinforcing the Bank's support for research and higher education.

II Science Teaching Congress – ISCED Huíla

BFA sponsored the II Science Teaching Congress – ISCED Huíla. This event formed part of the national celebrations for the 50th anniversary of Angola's independence and reinforced the Bank's support for scientific development.

Literacy Gala

BFA sponsored the special edition of the National Literacy Award, recognising the work of entities dedicated to combating illiteracy in Angola.

3. Culture, arts and heritage

Portuguese Cultural Centre – Instituto Camões

As part of its commitment to national culture, BFA has continuously supported the cultural agenda of the Portuguese Cultural Centre – Instituto Camões, including music, literature, visual arts, and educational initiatives.

Lobito International Fest

As part of the celebrations for the 112th anniversary of the city of Lobito, BFA participated in Lobito International Fest, an initiative that included music and cultural festivals, sports activities, and community programmes.

Companhia de Dança Contemporânea de Angola – CDC

BFA sponsored the 2nd season of the play 'O Vendedor de Inutilidades', by the Companhia de Dança Contemporânea de Angola (CDC), reinforcing the Bank's investment in contemporary culture and the promotion of national artistic talent.

4. Economic events, fairs and regional development

Benguela International Fair (FIB)
BFA participated in the 14th edition of the Benguela International Fair (FIB), a multi-sector event promoting investment and business activity in the region, highlighting the Bank's range of products and services.

FILDA – 40th Edition
BFA had an institutional presence at the 40th edition of the Luanda International Fair (FILDA), Angola's largest business fair, held under the slogan "50 Years, Consolidating Economic Independence", where it promoted new products such as Term Deposits, Lombongo Credit Cards, and BFA Click.

Expo Huíla – Festivities of Nossa Senhora do Monte
BFA participated in Expo Huíla, the largest trade fair in southern Angola, strengthening the Bank's position in the region.

Expo Dundo – 3rd Edition
BFA participated in the Expo Dundo fair, an event marking the 50th anniversary of Angola's independence and the 47th anniversary of Lunda-Norte Province, where the Bank promoted and highlighted its support for the agribusiness sector.

Expo Huambo – 2nd Edition
BFA supported Expo Huambo, a regional fair dedicated to economic diversification, the agricultural sector, and attracting strategic investment.

Expo CATOCA – 30 Years
BFA had an institutional presence at Expo CATOCA, commemorating the 30th anniversary of Sociedade Mineira de CATOCA. The event was attended by Executive Director Dr. Sebastião Massango, who participated in a panel discussion on the mining sector.

'Dutch Diamond' Workshop – Agro-industry
BFA took part in the "Dutch Diamond" Workshop, an initiative dedicated to the dried and dehydrated fruit industry. Through this participation, the Bank strengthened its institutional relationship with international partners.

5. Sports

2. 2nd Edition of the 'Lobito Billfish Classic'
BFA participated in the sport fishing tournament, reinforcing its commitment to supporting sport and tourism development in the region.

Clube Desportivo 1.º de Agosto
Sponsorship of football, handball, and basketball at senior male and female levels was renewed.

The Golf Cup Unitel BFA – 11th and 12th Editions
Two editions were held in the same year, due to the postponement of the 2024 final, and were supported by BFA to promote an event of significant national and international prestige.

Golf Championship – BFA Order of Merit 2025
Sponsorship of the 9th stage of the competition, known as the BFA Special Stage, held on 25 October 2025 at Mangais Resort. More than 73 players participated, and the Bank was represented by three players.

3rd Financial Sector Walk – Pink October & Blue November
Participation in the Banco Nacional de Angola initiative to raise awareness of breast and prostate cancer prevention.

São Silvestre Race 2025
Sponsorship of the 69th edition of the race, reinforcing the tradition of supporting sport and Employee integration.

BFA Solidarity Awards Gala
Annual corporate social responsibility event recognising and awarding projects and organisations with a positive impact on the community.

Sustainability Roadmap

Sustainability roadmap

In 2025, BFA strengthened the integration of sustainability into its strategy, promoted innovative initiatives, and consolidated its commitment to responsible practices. This journey is distinguished by the implementation of inclusive policies, investment in internal training, and an updated materiality assessment aligned with the challenges and opportunities of the financial sector in Angola.

Diversity and inclusion: principles and commitments

The Bank has developed a Diversity, Equity and Inclusion Policy (DEI), which is currently being implemented. This policy establishes fairer and more inclusive processes, promotes respect for differences, and ensures equal opportunities. It is reflected in valuing talent, fostering collaborative environments, and building more diverse and innovative teams.

The implementation of the DEI Policy is based on concrete commitments, including:

- **Valuing diversity** and respecting all individuals, recognising different identities, backgrounds, and abilities;
- **Ensuring fairness and equity** in all processes, from recruitment to career progression;
- **Promoting an inclusive and safe working environment**, open to participation and constructive dialogue;
- Conducting **recruitment and selection processes based on merit**, regardless of gender, age, disability, or other characteristics protected by law;
- **Fostering a culture of belonging and innovation**, supporting Employees in creating a welcoming and safe environment.

Environment: Guidelines and commitments

In 2025, Banco BFA developed its Environmental Management Policy, which is currently being implemented, with the objective of integrating responsible practices into all operations, products, and services. This policy promotes environmental protection, the efficient use of natural resources, and the mitigation of environmental impacts, in line with best national and international practices. It reflects the Bank's commitment to the transition to a low-carbon economy, the preservation of biodiversity, and the promotion of an organisational culture focused on environmental responsibility.

The implementation of the Environmental Management Policy is based on concrete commitments, including:

- **Integrating environmental criteria into decision-making and operations**, promoting energy efficiency, sustainable waste management, and the reduction of greenhouse gas emissions;
- **Support the transition to a sustainable economy** by financing projects and Customers that adopt responsible environmental practices;
- **Promoting environmental education and awareness** among Employees, Customers, suppliers, and the wider community, encouraging responsible behaviour and active participation in environmental initiatives;
- **Prioritising suppliers and solutions with a lower environmental footprint**, valuing local initiatives and sustainable innovation;
- **Monitoring and transparently communicating the results** and challenges of environmental initiatives, promoting open dialogue with Stakeholders.

Sustainability training

BFA launched a comprehensive sustainability training programme for Employees, in accordance with the guidelines of Circular Letter 01/25 of 2025 issued by the Angolan Financial System Supervisory Board. This programme covers topics such as ESG principles, business ethics, environmental management, financial inclusion, and data protection. Its objective is to strengthen team capabilities and prepare Employees to apply sustainable practices in their daily activities. This initiative demonstrates the Bank's commitment to fostering a responsible internal culture aligned with sector best practice.

ESG Criteria for partners and suppliers

The Bank has established ESG principles for the selection and evaluation of suppliers in order to reinforce its commitment to a sustainable value chain. These criteria cover environmental, social, and governance matters, ensuring that the Bank's partners adopt responsible practices

and are aligned with its institutional values. The principles are currently being implemented and include the analysis of suppliers' environmental performance, verification of compliance with social standards, and the assessment of governance practices. Through this initiative, BFA aims to contribute to a more resilient and innovative value chain, aligned with the challenges facing the financial sector in Angola.

ESG Integration into the Risk Strategy

The Bank has incorporated ESG principles into its Risk Appetite Statement (RAS), positioning itself at the forefront of sustainable practices in the sector by integrating environmental, social, and governance metrics into its risk profile. This transversal and proactive approach applies across the institution, strengthening its ability to anticipate and respond to ESG-related risks and ensuring alignment with strategic commitments and market best practice. By adopting these principles, the Bank enhances organisational resilience and promotes more responsible and sustainable risk management.

Materiality: Priority issues for the future

Two years after the previous review, BFA updated its materiality assessment to align the Bank's material topics with best practice in the financial sector, emerging risks, and strategic priorities for the next cycle. The process used the National Development Plan for the period 2023-2027 as a reference, considering its strategic pillars for Angola's development. It also included benchmarking against reference institutions, an assessment of ESG trends across industries, and the evaluation of Stakeholder expectations. The material themes reflect the most significant impacts on the economy, the environment and people, as well as on the Bank's performance and development.

Priority themes for 2025:

- Integration of ESG factors in risk management;
- Talent development and retention;
- Employee well-being and safety;
- Inclusion and financial literacy;
- Technological innovation and data protection;
- Environmental efficiency in operations;
- Responsible supplier management;
- Adapting to climate change;
- Strengthening reputation and trust with Stakeholders.

Diversity, justice, equity, inclusion, merit, a culture of belonging and innovation are BFA's key commitments to the implementation of the DEI Policy.

Social Responsibility

The materiality analysis focused on the following strategic goals:

- Periodically update the analysis to reflect the evolution of Stakeholder perspectives and the country's context;
- To ensure that the key materiality topics chosen will be instrumental in Angola's economic sustainable development.

The analysis of the Global Risks Report 2025, together with the benchmarking and industry analysis, identified the emergence of new risks and reinforced the relevance of these issues, due to their impact on the current context and their significance within the comparative analysis with the sector. This analysis by BFA ensures alignment with national priorities and economic and social objectives, promoting sustainable development.

BFA Policies

BFA implements best corporate practices and policies to advance a Stakeholder-friendly and transparent corporate governance, aiming to ensure Customer fulfilment, personnel empowerment and Angola's socio-economic growth.

Employee Office
Supports initiatives, considers Employees' concerns, and promotes increased productivity.

Policies & Regulations
Implementation of an aggregate total of twenty-nine (29) policies, including the following: "Product Governance Policy", "Employees Compensation Policy" and "Sustainability Policy".

Main sustainability initiatives developed in 2025

- BFA Solidarity Programme
- Fighting Cholera
- TUPPI Project
- BFA + Nurture Project
- BFA + Water + Life Project
- Blood Donation Campaigns
- BFA + Environment Project

The execution of these sustainability-related initiatives enables BFA to maintain its commitment to social responsibility and to the sustainability domain as a means of positively impacting Angola's underprivileged communities.

The materiality analysis by BFA ensures alignment with national priorities and economic and social objectives, promoting sustainable development.

Main Initiatives	Purpose	Result
BFA Solidarity Programme	Launched in December 2018, BFA Solidário is a social responsibility programme that aims to financially support strategic activities and projects developed by third sector organisations whose main beneficiaries are children. The programme was designed to help mitigate the challenges faced by children in situations of greater vulnerability, promoting greater stability for both their families and the communities in which they live. In 2025, BFA Solidário strengthened its commitment to supporting non-governmental and non-profit organisations, focusing especially on education, health, and social and financial inclusion. The initiative aims to foster the institutional development of these organisations, as well as to recognise and give greater visibility to projects with the highest social impact.	• The Evatelo Luunona – Help the Children project supports the formal education of vulnerable children between the ages of 5 and 10 and promotes technical and vocational training for teenagers and young people: • 162 orphaned children included in the education system and free from the discrimination and stigma of HIV; • Reduction of unemployment and social exclusion among young parents affected by HIV/AIDS; • 30 young people received technical and vocational training. • Implementation of a trainee programme focused on the social and academic reintegration of children in foster homes. The project had a direct impact on more than 200 children. • Construction of a Children's Centre in Humpata, Huíla. The centre consists of two structures. One includes three two-bedroom houses. These houses are designed to accommodate children with acute malnutrition and complications requiring continuous monitoring. The second structure is a community children's centre for children aged 3 to 6. The facility includes six classrooms, a kitchen, two bathrooms, and a covered patio. In its first year, the project had a direct impact on more than 2,200 beneficiaries and an indirect impact on more than 1,500. • Reusable pads production cooperative, a project focused on sexual and reproductive health, education, gender equality and youth empowerment. Fighting menstrual poverty by supporting a reusable pads cooperative. The project has helped hundreds of girls and women in vulnerable communities to face, with dignity, the challenges caused by the lack of menstrual products, as well as the stigma and discrimination that often accompany this period. With the support of BFA Solidário, the cooperative has made a qualitative and quantitative leap, evolving from a small artisan initiative with an average daily production of 100 pads into a functional and sustainable cooperative operating in two provinces. This funding has not only improved access to menstrual dignity, but has also directly impacted the lives of young volunteers, who are now empowered, valued, and part of a transformative network.

(continues)

(continuation)

Main Initiatives	Purpose	Result
Fighting Cholera	Supporting the Angolan Government in combating the disease.	• Strengthening the capacity of cholera treatment centres to provide life-saving care. • Improved infection prevention and control in affected communities. • Strengthened public-private collaboration in responding to health emergencies.
TUPPI Project	Promoting the integral and harmonious development and full potential of children in early childhood (0 to 6 years), through community mobilisation, training of volunteer facilitators, family support and the creation of inclusive and quality educational spaces.	• More than 5,000 children will benefit from the project. • Establishment of a replicable and sustainable model of community pre-school education. • Positive influence on public education and early childhood policies in Angola. • Strengthened resilience of communities in the face of social, economic and educational challenges.
BFA + Nurture Project	Increasing the knowledge and skills of health professionals and community health workers.	• Improve maternal and child nutrition outcomes by enhancing access to, and utilisation of, integrated nutrition and health services for pregnant women and children under five in the municipality of Cunhinga, Bié.
BFA + Water + Life Project	Improving water, sanitation and hygiene services in schools, health centres and the community. Support and counselling for women and caregivers of children under 5 to recognise the signs of ASD and adopt appropriate dietary and health practices.	• Improve maternal and child nutrition outcomes by enhancing access to, and utilisation of, integrated nutrition and health services for pregnant women and children under five in the municipality of Cunhinga, Bié.
Blood Donation Campaigns	Skills-building training programmes for teachers and supervisors to become Senior Trainers with a view to implementing the Apprenticeship at the 'Right Age Programme' (Portuguese acronym "AIC") in the Ombadja municipality. Blood Donation	• Collection of 4,597 bags of blood from 6,757 volunteers. • Impacted 18,388 patients, primarily children in the paediatric department and young people and adults in the maternity and emergency departments.
BFA + Environment Project	Preservation and Recovery of Local Ecosystems.	• We continue to nurture the trees we have planted and support the new project aimed at preserving fauna, (turtle species), as well as protecting and restoring the ecosystem at the mouth of the Kwanza River and in Cacuaco.

EXCHANGE RATE GAP (% REGULATORY CAPITAL)

2.9%

BFA's Capital Tiers Remain Sound and Solid

Capital levels remained strong, demonstrating the robustness of the balance sheet, even amid regulatory developments and full compliance with SREP requirements. In 2022, the new regulatory package came into effect, aligning regulatory minimums with the existing European Union thresholds, reinforcing the requirement for capital coverage of Pillar II risks (until 2021, only Pillar I risks were addressed) and establishing the need to allocate reserves to absorb potential losses, specifically capital conservation buffers and systemic buffers. Transitional provisions remain in place for certain asset classes, with expiry scheduled for December 2027.

In December 2025, BFA's Total Capital Ratio stood at 38.8%, well above the minimum regulatory requirement of 8.0% and higher than the average for the Angolan Financial System (24.1%, based on September 2025 data from the BNA). These levels confirm the strength of the Bank's capital structure and its alignment with the business model, ensuring sustainable operations and Stakeholder confidence. Maintaining a high ratio despite regulatory changes also demonstrates the Bank's capacity to adapt to evolving market requirements.

Liquidity Indicators remain high in relation to Regulatory Requirements

Marketable securities that are eligible for discount at the Central Bank are considered liquid assets under international regulations. Within the domestic environment, only the component with a residual maturity of one year is eligible for classification as a liquid asset. These conditions add to the volatility of high-quality liquid assets (HQLA) and raise additional challenges for maintaining liquidity ratios.

Even so, throughout 2025, BFA ensured full compliance with regulatory ratios, maintaining liquidity ratios well above the minimum required levels. This performance reflects the prudent management of investments, in both foreign and domestic currency, and ensures a solid financial position despite regulatory constraints and market dynamics.

Exchange Rate Volatility

FY 2025 was mainly characterised and shaped by the ongoing appreciation of foreign currencies against the national currency Kwanza, although to a lesser extent than in the previous year. In this context, one of the objectives to mitigate potential losses from the foreign exchange position was to reduce the gap between exchange rate–sensitive assets and liabilities, thereby limiting the impact of possible fluctuations on results.

BFA closed the year with a long foreign exchange position of USD 21.8 million, representing approximately 2.9% of Total Capital Ratio. Throughout FY 2025, the average exchange rate position accounted for approximately 2.0% of the Total Capital.

Continuous Strengthening of Regulation and Supervision

The BNA has been implementing a series of measures to reinforce the regulation and supervision of the Angolan Financial System, including an ongoing project to obtain equivalence status as a Central Bank with the European Commission. These initiatives aim to enhance the transparency and soundness of the financial system and reduce systemic risk, although they pose significant challenges in terms of adaptation and the adequacy of technical and human resources. In 2025, notable regulatory developments under the Resolution and Recovery Cycle included the creation of the Resolution Fund, designed to strengthen financial stability by establishing a structured mechanism for managing banking crises and preventing systemic contagion.

Effectiveness in the credit granting strategy, with positive developments in lending to the real economy

BFA's Credit Portfolio during FY 2025 performed well and outpaced the market average, up by 21.78% YoY, amounting to AOA 959,883.1 billion. There was also a significant improvement in the Loan-to-Deposit Ratio, which stood at 29.8%, an increase of 3.7 p.p. compared to 2024. This evolution reflects the effectiveness of BFA's credit strategy, particularly in supporting both companies and households.

Loan Portfolio's Asset Quality remained sound, with improved Overdue Credit and NPL Ratios

Over the course of the year, the ratios of Overdue Loans and Non-Performing Loans (NPLs) decreased. This improvement was primarily driven by the expansion of the loan portfolio, while defaults remained stable. In 2025, BFA's 30-day past-due Credit Ratio stood at 1.4% and the Non-Performing Loan Ratio at 6.5%, an improvement of 0.1 pp and 1.2 pp YoY, respectively.

BFA's Risk Culture

A sound Risk Culture advances a close alignment between risk management and business strategy

BFA's risk culture is transversal across the Organisation and is embedded in the values, knowledge and attitudes of its Employees towards risk-taking. It is reflected in daily behaviours and plays a decisive role in ensuring the effectiveness and quality of the Bank's risk management framework.

In December 2025, BFA's Total Capital Ratio stood at 38.8%, well above the minimum regulatory requirement of 8.0% and higher than the average for the Angolan Financial System (24.1%).

This culture is materialised and disseminated through a set of rules, attitudes and behaviours that promote awareness of the risks assumed and managed by the Bank, enabling anticipation of potential exposures within a framework grounded in a robust control environment.

The main channels, actions and tools for disseminating risk culture remained consistent:

- **Risk profile self-assessment exercises**, in which questionnaires are made available to all of BFA's departments for the assessment of materially relevant risks, enabling them to identify the risks to which the Bank is exposed within the scope of their activities;
- **Risk committees**, in which the main risks are reported and analysed, with the participation of business and support areas, constituting an important channel for promoting a risk management culture;
- **Workshops** that are undertaken with all BFA's departments and which allow for the dissemination of risk management good practices;
- **Intranet**, used to disseminate risk management practices, namely by publishing applicable policies and regulations.

For 2026, it is intended that, in addition to the initiatives mentioned above, the **BFA Academy**, in conjunction with the Risk Management Department (DGR), will provide training in risk management, promoting the strengthening of knowledge in this area among all the Bank's Employees.

Risk Management Model

Risk Management comprises one of BFA's Key Corporate Cornerstones

Effective risk management has enabled the Bank to cope adequately with changes in the economic, social and regulatory context in which it operates, and is one of the key functions in ensuring that BFA remains a solid, safe and sustainable Bank, managed in accordance with the interests of all its Stakeholders.

The Bank seeks to align its internal procedures with the best international practices in global risk management: To this end, it considers the guidelines of the Basel Committee on Banking Supervision (BCBS) and those of the Committee of Sponsoring Organizations of the Treadway Commission (COSO), in order to ensure overall compliance with the prudential requirements established by regulators and supervisors. In this context, BFA's risk management system is based on the following principles:

Principle 1 – **The Board of Directors is the highest governing body of the Bank**
The Board of Directors is responsible for the overall supervision of the business and risk management strategy and defines the guidelines, objectives and limits for the day-to-day management of the Bank.

Principle 2 – **The Risk Management Framework is an element of the organisational structure, performed with Independence and Autonomy**
The risk management system is based on a governance model that includes an adequate segregation of duties between the units that generate risk and the control units. This model includes the existence of an independent Risk Management Framework with functional reporting to the Risk Committee of the Bank's Board of Directors.

Principle 3 – **Ongoing adjustment to market conditions**
BFA's risk management system does not define the Bank's strategy but influences its development and review, ensuring that the risk profile is adapted to market conditions and the external environment.

Principle 4 – **The Risk Appetite Framework is a key component of risk management**
The Bank manages and controls its risks in accordance with its risk appetite framework, which limits the types and levels of risk the Bank is willing to take on in order to achieve its strategy and business objectives.

Principle 5 – **Solvency, liquidity and profitability as core objectives of risk management**
The Bank governs its risk management system on the basis of a risk appetite framework, with the aim of ensuring consistency between the overall risk profile and the business strategy, in order to manage and preserve its economic and regulatory capital, as well as its liquidity position.

Principle 6 – **Risk culture as the basis of the Bank's activities**
The risk management system is based on promoting a risk culture across the entire Bank, supported by instruments related to (i) training resources; (ii) aligning performance assessment, incentives and the risk profile; (iii) communicating and discussing the Bank's main issues and strategies; and (iv) promoting and enhancing the corporate image, both internally and externally.

Risk Governance

Appropriate Risk Governance plays a key role in long-term sustainable growth

With a view to ensure the smooth performance of the Risk Management Framework, BFA relies on a solid risk governance model that ensures that risks are managed appropriately and efficiently, with the aim of enabling a well-informed decision-making process.

The organisational model of the risk management system remained unchanged and is expected to be consolidated in the coming years through the strengthening of the control mechanisms of the departments that make up the internal control system.

The 3 Lines of Defence as an Organisational Model

The Bank's risk management system is organised according to a structure based on the principle of separation of functions, which ensures a complete partition between the responsibilities for originating (or taking) risks and those focusing on managing and controlling risks.

1.st Line of Defence **Business and Support Units**	It identifies and manages the risks arising from its activities, inherent to the Bank's business strategy, and ensures that they are reported on a regular basis. It develops controls over the risks originated in the ongoing operations of the Bank's business activity.
2.nd Line of Defence **Risk Management and Compliance**	It independently monitors, controls and advises on risks. It provides input to the overall development and performance of the risk management system and the Bank's management supporting a well-informed decision and the Front-Line Units activities. It monitors and controls the Bank's activities and identifies any deviations from the established strategy, policies and limits.
3.rd Line of Defence **Internal Audit**	Independently reviews and challenges the other lines of defence. The Internal Audit assesses the efficiency and effectiveness of the Bank's internal control system and risk management system. The External Auditor and the Supervisory Authorities are also part of BFA's risk management model: the former contributes to the effectiveness of the risk management system through an independent and objective assessment of its functioning; the latter ensure supervision of the Bank's internal practices.

1.4%
Ratio of Overdue Loans

6.5%
Ratio of Non--performing Loans

21.5%
Loans to Customers

BFA relies on a solid risk governance model that ensures that risks are managed appropriately and efficiently.

BFA's Risk Management Governance Bodies

In 2025, BFA sought to respond effectively to the internal requirements of the management body and to external guidelines, taking into account developments in risk management within the national financial system. This is in line with the project promoted by the Banco Nacional de Angola to obtain Equivalent Central Bank status from the European Commission.

To this end, BFA has been consolidating a governance model headed by the Board of Directors, whose underlying structural model is designed to provide support to the comprehensive risk management. This model preserves the principles underlying the organisation of the three lines of defence and promotes the effective segregation of functions between the business, support and control units.

Strategic Risk Management	**Board of Directors** • To lay down and approve the risk management strategy and policies; • It ensures the existence of an effective and permanent function that is independent of the Bank's business or operational functions; • Provides the strategic risk management function with appropriate material, human and financial resources to carry out the role it has been entrusted with.
	Risk Committee • Periodically reviews the strategies and policies established for the management and control of the risks to which the Bank is or may become potentially exposed; • It assesses the scope and nature of the activities carried out by the function, as well as the effectiveness of the processes and procedures that support the implementation of the risk management strategy and policies; • It checks that the function has sufficient material and human resources to fulfil its responsibilities; • It assesses the documents supporting the activities of the function and their state of implementation, namely: (i) the risk management plan; (ii) the training plan; and (iii) the budget; • It analyses the results of the function's activities and the risk information it provides and, based on this analysis, issues recommendations to the Board of Directors with a view to correcting the shortcomings identified or implementing improvements.

Operational Risk Management	**Executive Committee of the Board of Directors** • It implements the risk management strategies and policies approved by the Board of Directors; • It ensures the quality and proper documentation of the decisions taken, particularly in situations where the function has expressed a negative opinion; • Provides timely and regular information to the Bank's Board of Directors and supervisory body for the assessment and monitoring of (i) the financial situation, (ii) the Bank's risk exposure, and (iii) relevant decisions adopted by the EXCO; • Analyses and makes decisions on information and recommendations submitted by the Risk Management Function.			
	Information Security Committee	**Productivity & Costs Committee**	**Asset-Liability Committee**	**Governance and Data Quality Committee**
	Products & Services Committee	**Credit Board**	**Financial Committee**	**Internal Control & Risk Committee**
Independent Committee	**Supervisory Board**			

As shown in the figure above, the structure of the governing bodies includes: (i) strategic management responsibilities, which include defining strategies and objectives, the principles and policies that govern the risk management system, as well as the overall monitoring and control of its implementation; and (ii) operational management responsibilities, which include the day-to-day management and control of the business and associated risks.

Risk Management Processes

Strategic Processes	Cross-cutting processes that integrate the Bank's vision on the different risks and consolidate the respective impacts on capital and liquidity.
Operational Processes	Processes are established according to material risk category, which support the ongoing management and control of each risk.
Contingency Planning	Planning that enables the Bank to maintain its activities in disruptive scenarios.

BFA has consolidated a governance model led by the Board of Directors which seeks to support global risk management.

Strategic Risk Management Processes

The strategic risk management processes bring together the elements that enable an understanding of the Bank's risk profile and the definition of its risk appetite and corresponding limits. These processes include the continuous monitoring of risks through both normal and adverse scenarios, which also support the assessment of the adequacy of the Bank's capital and liquidity, as well as overall planning.

Risk Profile Self-assessment	Identification of the risk categories to which the Bank is materially exposed. The results of this process support risk management and control approaches, ensuring that all material risk categories are assessed or quantified in terms of their impact on economic capital or liquidity, and that their management is guided by specific policies. The Risk Management Framework (RMF) is responsible for the overall dynamism and conduct of the process, which must involve the management bodies and all the Bank's Employees.
Risk Appetite Framework	The Risk Appetite Framework is a central element of the Bank's risk management system: • the BFA's Risk Appetite Statement; • the Governance Model; • the Limits System that supports it, as well as the mechanisms for monitoring and responding to breaches of the defined tolerances; • the Risk Appetite Framework Integration Model in the Bank's management practices. The Risk Management Department (RMD) oversees the recording of the elements described in the previous paragraph, as well as the procedures that support them within specific internal regulations (RAF/RAS Governance Regulations).
Internal Testing Program	Definition and simulation of plausible limit scenarios to which the Bank is, or may be, exposed. It has the following objectives: • Identify new or emerging risks; • Assess or reassess exposure to material risks; • Support the assessment of economic capital adequacy status and the liquidity position. It is incumbent upon the Board of Directors, upon proposal by the RMD, to lay down the goals and limits for the stress tests outcomes, in accordance with the Bank's Risk Appetite Framework. It is the responsibility of the RMD to propose mitigation or remediation plans for any heightened risk conditions identified in the test results.
ICAAL & ILAAP	The RMD is responsible for monitoring and controlling risk appetite limits, as well as assessing the adequacy of economic capital and the liquidity position. Commercial banks prepared the ICAAP (Internal Capital Adequacy Assessment Process) and the ILAAP (Internal Liquidity Adequacy Assessment Process) for supervisory assessment, which may result in additional capital and liquidity requirements set by Banco Nacional de Angola, depending on the outcome of the assessment.

Operational Risk Management Processes

The operational risk management processes are supported by the results of the risk profile self-assessment. All material risk categories are underpinned by specific, documented approaches (risk management policies), which establish how each of the Bank's risks is regularly identified, quantified, controlled, and reported.

Identification	Identification of current and potential risks to which BFA is exposed. This phase includes the following main activities: • Collecting reliable and timely information from the various areas of the Bank; • Defining the risk identification strategy; • Defining and reviewing risk indicators and limits; • Incorporating the recommendations contained in the risk reports.
Assessment and Quantification	Analysis of all the information collected for subsequent submission to consistent and auditable qualitative or quantitative evaluation mechanisms. This phase comprises the following main activities: • Collection of reliable and timely data from the various areas of the Bank; • Laying down assumptions and developing risk measurement models; • Calculating and analysing the impact of the risks identified; • Validating and ensuring the updating and suitability of the risk measurement models, subjecting them to periodic audits, and implementing relevant improvement recommendations, if applicable.
Monitoring and Control	Monitoring and definition of risk limits and control mechanisms. This phase comprises the following main activities: • Monitoring risk indicators; • Monitoring the limits defined in the Risk Contingency Plan; • Ensuring that the indicators and limits are up to date and appropriate for the different economic cycles; • Developing control mechanisms and risk warning systems; • Performing stress tests based on the establishment of risk scenarios;; • Monitoring the adequacy of the Risk Management System.
Reporting	Reporting on the results and on the risk management mechanisms applied, whenever necessary or in accordance with the periodicity defined by the regulatory authorities or internally. The main activities include: • Drawing up reports based on the information provided; • Drawing up recommendations for risk mitigation; • Submission of reports for analysis by the Board of Directors and the Executive Committee of the Board of Directors; • Drawing up the action plan and responsibilities for risk mitigation; • Promoting the structured dissemination of reports to the Bank's areas; • Monitoring the implementation of the activities defined in the action plan.

Contingency Planning

In order to respond to exceptional risk circumstances, and in accordance with the results of the strategic and operational control processes for each risk category, the Bank establishes contingency planning which, based on the defined indicators and limits, is activated to ensure the continuity of business activities.

The implementation of the Recovery Plan in 2024 reinforced the Bank's existing contingency mechanisms. Recovery Plans ensure that institutions have the necessary conditions in place to restore their viability in good time, even during periods of significant financial difficulty. These plans are drawn up and approved by the financial institutions' management bodies, taking into account adverse macroeconomic scenarios and financial strain adjusted to the specific conditions of each institution.

Capital and Liquidity	With the aim of putting in place a sound framework and appropriate measures that enable BFA to safeguard and maintain its business operations and activities in the event of a significant deterioration of its capital and liquidity levels, the risk management system includes an emergency response planning (contingency planning) and associated contingency mechanisms. The Risk Management Department (RMD) is entrusted with the duty, in coordination with BFA's organisational units responsible for planning, management control and finance, to advise and support the Board of Directors in the setting and approval of the capital and liquidity contingency plan.
Business Continuity	In order to guarantee the functioning of the Bank's activities in contingency situations, and to mitigate the resulting losses, the Bank has adopted a Business Continuity Management framework, which includes a Business Continuity Plan, in accordance with the requirements of the Banco Nacional de Angola.

Risk Profile

The ability to take risks and the definition of tolerance limits guide behaviour, actions and strategic decisions at BFA.

BFA's Risk appetite is measured through quantitative metrics and qualitative indicators that measure the Bank's exposure, or risk profile, by type of risk. This framework aims to comply with the strategy of maximising value for the Customer and other Stakeholders, protecting the Organisation's solidity through rational and robust risk management.

In order to define and manage risk appetite, the Board of Directors publishes guidelines for action, or qualitative statements, which demonstrate the management body's position and expectations regarding the relevant risks that may affect the business and which guide BFA's strategy.

Risk Mapping / Materially Relevant Risks

The risk profile self-assessment is carried out at least once a year and allows risks to be ranked and material categories to be established. Material categories are those which, according to an institutional assessment or opinion, present characteristics likely to negatively affect results, capital, or liquidity in a sufficiently significant way to require specialised management and control approaches. Consequently, risk categories considered material are subject to enhanced due diligence and, ultimately, to the quantification of capital and liquidity reserves.

- Business Risk and Strategy
- Credit Risk
- Interest Rate Risk
- Financing & Liquidity Risk
- Operational Risk
- Compliance Risk
- Information Systems Risk
- Sovereign Risk
- Concentration Risk
- Foreign Exchange Rate Risk
- Market Risk
- Capital Adequacy Risk
- Reputational Risk
- ESG/Cybersecurity Risk *

* New risk categories, and/or those disaggregated from other categories in the taxonomy calculated in the previous year.

Threshold, Monitoring and Control Systems

After assessing the materially relevant risks, and based on the respective qualitative statements, the metrics that best characterise each risk and the corresponding system of limits are defined – risk appetite limits or statements – which express, in quantitative and qualitative terms, the maximum exposure to risk that the Bank is willing to assume.

Compliance with the risk appetite thresholds is subject to ongoing monitoring. The Risk Management Framework, in carrying out its control activities, must report at least monthly to the Board of Directors and its specialised Risk Committee on the adequacy of the Bank's risk profile relative to the authorised risk appetite.

Excesses and failures to comply with the Risk Appetite Framework are reported to these bodies in greater detail on a quarterly basis. The presentation of these reports is accompanied by information on the underlying causes, an estimate of the expected duration of the situation, and a proposal for corrective actions applicable to the excesses, for analysis by the management body.

As mentioned, BFA maintains the objective of preserving a medium–low risk profile, with tolerance limits aligned to this positioning.

Credit Risk

Credit risk corresponds to the risk of loss arising from Customers failing to meet their contractual obligations. Additionally, this risk may materialise in situations of excessive concentration in a single counterparty, industry, product, geography, or maturity.

Governance of the Credit Risk Management System

BFA's Board of Directors (BoD) assumes ultimate responsibility for the credit risk management system, defining, supervising, and ensuring the application of a Risk Management Framework that guarantees an effective and prudent approach to exposure to this risk, across its various aspects and in relation to the Bank's products, services, and activities. The Board of Directors is also entrusted with the task of setting the overall risk-taking strategy, including measurable risk objectives, the profitability to be achieved, as well as formalising and approving the Bank's credit risk appetite.

Within the scope of the delegation of powers conferred by the Board of Directors and with the aim of ensuring independence in the credit risk management process and strengthening the level of specialisation and knowledge, the Executive Committee of the Board of Directors (EXCO) established the Credit Council, endowed with decision-making powers on credit matters.

The Board of Directors has also delegated powers to the Risk Committee to define and monitor the limits established under this Policy.

Resolutions of the Decision-Making Bodies

- The deliberations of each decision-making body constitute collegial decisions of the respective members and are recorded in minutes signed by all participants;
- Decisions are taken by majority vote, with the presidents of levels 1, 2, and 3 having the right of veto;

BFA maintains its objective of preserving a medium–low risk profile, with tolerance limits aligned with this positioning.

- Members of a decision-making body who have a direct or indirect interest are prevented from taking part in the discussion and decision on any operation; the respective decision is then submitted to the higher hierarchical level.

Validity of Decisions

- Credit decisions are valid for 90 days for formalisation purposes, 120 days in the case of mortgage loans, and are communicated to the Customer;

- All decisions set a maximum period for the use of credit or the issuance of collateral; if not specified, this is deemed to be 30 days after the contract is signed.

Credit Risk Management Processes

BFA's credit risk management policy aims to ensure that an adequate relationship between risk and profitability is maintained at all times, as well as the continuous assessment of the defined risk profile. The implementation of credit risk management processes ensures that the Bank optimises its risk-adjusted profitability, safeguarding that the risk assumed does not exceed the tolerance levels defined in accordance with the Bank's risk profile.

Specifically, the credit risk management cycle enables the Bank to know and control its credit risk profile throughout the life cycle of operations, regardless of the stage they are at: (i) granting; (ii) monitoring; or (iii) recovering credit.

Credit Granting	Credit Monitoring	Credit Recovery
Customer Segmentation	Customer Monitoring Model	Credit Recovery Model
Economic Risk Groups	Credit Portfolio Monitoring	Reporting
Analysis and Decision-Making	Credit Risk Threshold System	
Credit Risk Mitigation Tools	Credit Impairment	
Rating and Scoring Models	Stress Tests	
Reporting	Credit Concentration	
	Reporting	

Each phase of the credit risk management cycle is defined in BFA's internal regulations, which ensure that credit risk is managed properly and consistently.

Reporting and Information Disclosure

BFA's credit risk management system is supported by an information structure that ensures the regular dissemination of control and monitoring reports on the Bank's exposure to this risk.

The Risk Management Department reports to the Board of Directors on a monthly basis regarding credit risk exposure, including analysis of the credit portfolio quality, other risk quantifications prepared, and the results of scenario analyses or stress tests performed.

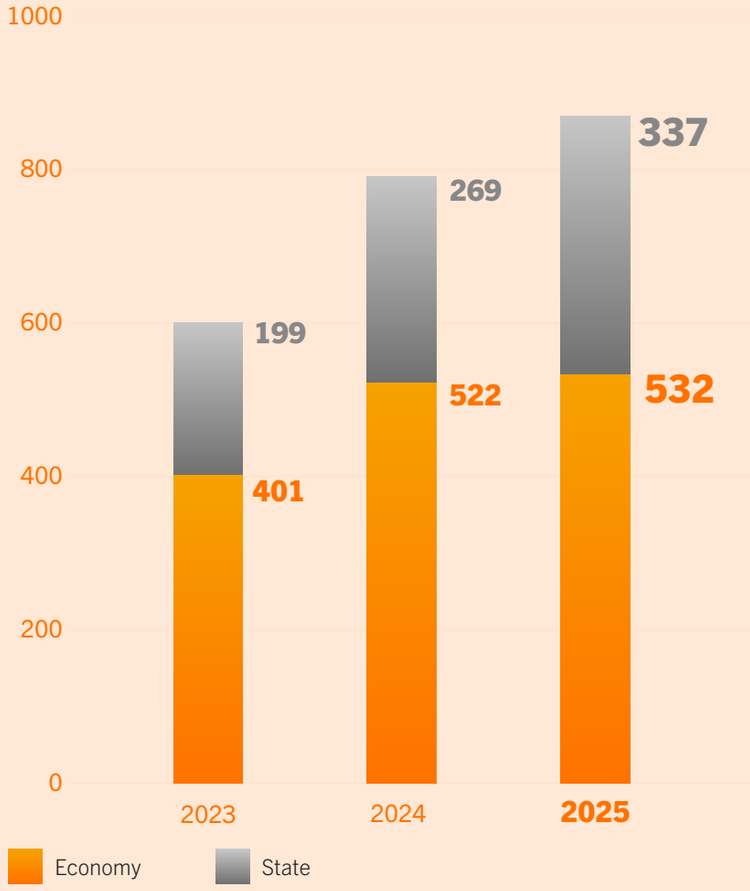

Support for households and businesses to be strengthened in 2025

In 2025, Gross Loans and Advances to Customers rose by 21.5% YoY, amounting to AOA 960.0 billion comparing to AOA 790.0 billion in 2024.

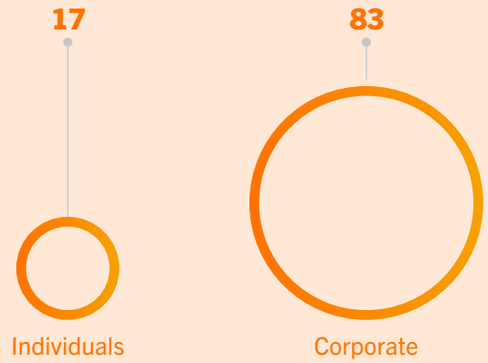

In parallel with this development, loans to the economy also increased by approximately 9.2%, representing 59.3% of the total gross loan portfolio.

The implementation of credit risk management processes aims to ensure that the Bank optimises its risk-adjusted profitability.

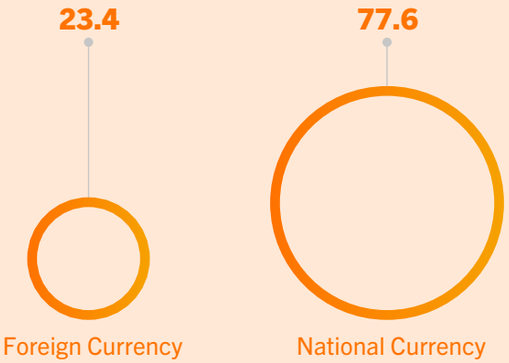

Gross Loans and Advances to Customers

Breakdown of Gross Loans by Currency
%

Breakdown of the Gross Loans Portfolio by Impairment Stages
%

Non-Performing Loans Coverage and Impaired Loans
%

With respect to the breakdown of gross loans by Customer category, approximately 83% of loans were granted to the corporate sector, with the remaining 17% comprising loans to retail Customers.

In 2025, Gross Loans and Advances to Customers denominated in national currency represented approximately 77.6% of the total. The remaining 23.4% corresponded to credit in foreign currency, mainly related to loans to the State and exporting companies.

Improvement of the Loan Portfolio Asset Quality

In 2025, the Loan Portfolio Asset Quality continued to show significant improvements, driven by the strategic growth of new credit and effective management of credit at risk, resulting in a reduction in Non-Performing Loans.

This evolution was supported by a comprehensive self-assessment of BFA's internal capacity to identify and manage non-performing exposures. The evaluation included an assessment of the processes, standards, and human and technical resources involved, as well as a detailed analysis of the evolution of the Non-Performing Loans portfolio.

Gross loans portfolio is broken down by impairment stages as follows:

BFA's experienced a major improvement in the loan portfolio asset quality driven by the recovery of 30-day past due loans, as evidenced by the sharp decline witnessed in the Non-Performing Loans (NPLs) (Stage 3) ratio from 7.7% to 6.5% at year-end 2025.

Non-Performing Loans Coverage and Impaired Loans

During 2025, BFA maintained appropriate coverage levels for both 90-day Past Due Credit (Overdue Loans exceeding 90 days) and Non-Performing Loans (NPLs). The Bank also recorded an increase in provisioning for NPLs and 90-day Past Due Credit, driven by higher impairment losses. The NPL coverage ratio by impairment increased to 102.4%, compared with 96.0% reported in 2024.

In 2025, Gross Loans and Advances to Customers registered an increase of 21.5%, totaling AOA 960 billion.

Balance Sheet Risks

Balance sheet risks are those resulting from mismatches between assets, liabilities and off-balance sheet items in the Bank's portfolio. These comprise liquidity risk, interest rate risk and exchange rate risk.

Governance Model of the Balance Sheet Risk Management System

The Governance Model established for balance sheet risk management is based on the following structuring principles: (i) the Board of Directors has overall responsibility for maintaining and supervising adequate governance of these risks; (ii) the Bank adopts an organisational structure consistent with the principles of the Three Lines of Defence model.

The liquidity risk management is performed in the first line of defence by the Finance & International Department (FID), and in the second line of defence by the Risk Management Department - Balance Sheet Risks Area (RMD-BRA).

BFA enjoys a privileged position in financing its activity due to the particularly prudent management of its liquidity levels. By ensuring a stable, secure and adequate liquidity position, supported by an appropriate level of reserves, the Bank keeps its liquidity and observation ratios high.

Compliance with the limit established for the daily liquidity gap in national currency is ensured by the Finance and International Department (FID). This limit corresponds to the difference between inflows and outflows of funds in national currency on a given day, taking into account compliance with the Mandatory Reserves.

The Risk Management Department – Balance Sheet Risk Area is responsible for implementing the methodologies, processes and activities for monitoring and controlling balance sheet risks. It is also responsible for assessing the main liquidity risk indicators, carrying out stress tests and implementing the Internal Liquidity Adequacy Assessment Process (ILAAP).

Balance Sheet Risk Management Processes

The implementation of balance sheet risk management processes aims to ensure that the Bank streamlines its balance sheet structure, safeguarding that the risk assumed does not exceed the tolerance levels established in accordance with the risk profile.

BFA's balance sheet risk financial management is supported by a set of documentation handed out to the different management bodies, namely:

- **Daily information summarising domestic and international market conditions,** as well as the day's main movements and transactions;
- **Daily report on the regulatory exchange position**, sent to the directors responsible for finance and risk, containing information on the accumulated gap by foreign currency;
- **Monitoring of Early Warning Indicators (EWI)** to assess the Bank's liquidity situation – during the 2025 financial year, no shortfalls were identified in the early warning indicators that would justify the activation of the liquidity contingency plan;
- **Monthly report on the evolution of resource volatility**, complemented by daily monitoring of liquid assets and counterparty limits;
- **Integrated Risk Management Report**, containing a monthly analysis of the main indicators and risk limits relating to liquidity risk, assessed by the Risk Committee and the Board of Directors.

Liquidity Risk

Liquidity risk is considered materially relevant and arises from the Bank's inability to meet its financial liabilities as they fall due.

Regulatory developments pose challenges to maintaining a stable liquid asset base

In 2025, in line with the previous year, there was continued volatility in liquid assets, which led to increased monitoring of liquidity ratios. In 2024, the revision of the regulatory criteria considered securities with a residual maturity of less than one year as liquid assets, helping to reduce the volatility previously recorded in these ratios.

The high level of liquid assets in 2025, combined with the proper management of cash inflows and outflows, allowed this indicator to evolve significantly over the last three years, remaining consistently above the Regulatory Threshold. This performance reflects the continuous strengthening of the Bank's liquidity management, particularly relevant in an adverse context and within the framework of a restrictive monetary policy.

For a more comprehensive analysis, the Net Assets and Liquidity Ratios for 2024 and 2025 are shown below.

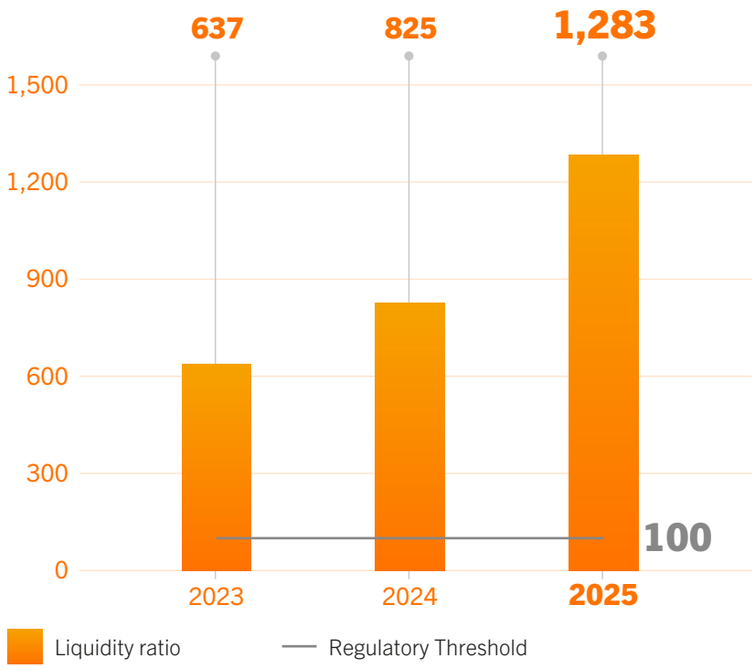

BFA continues to comply with all regulatory ratios. However, maintaining an adequate liquid asset structure remains a challenge, and the International Finance Department continuously evaluates the most efficient investment alternatives, both in national and foreign currency.

Internal Liquidity Adequacy Assessment Process (ILAAP)

The Internal Liquidity Adequacy Assessment Process (ILAAP) is considered a key assessment tool for risk management and for the internal measurement and setting of liquidity needs. As part of this process, the Bank analyses a comprehensive set of qualitative and quantitative information, with the aim of defining a liquidity risk management framework adjusted to its profile and aligned with the guidelines defined by the regulator.

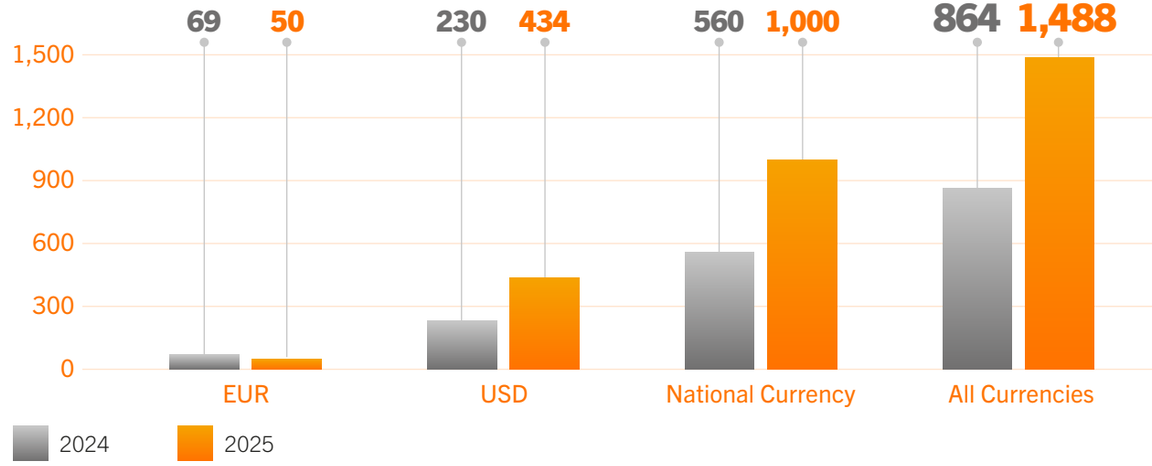

Liquidity ratio

%

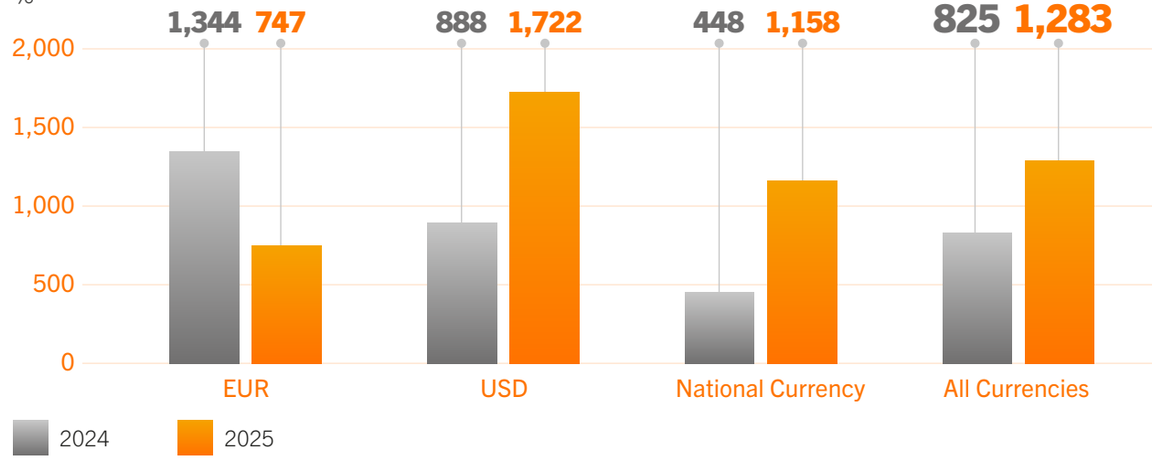

Net assets by currency

AOA bn

Evolution of liquidity ratios

%

1,283%

Liquidity Ratio in 2025

AOA 1,488 thousand

Liquid Assets in all currencies as of 2025

The methodology adopted in the ILAAP exercise takes into account the Bank's specific characteristics, including its business model, governance model, the controls implemented and their monitoring, as well as its size and complexity. In addition, it considers the market conditions and regulatory obligations applicable in the context of the Angolan market.

Over the course of 2025, it is worth highlighting the following key aspects:

- **Concentration of funding sources** as a result of limited options for raising additional funding, with almost all assets financed through Customer Deposits and other Loans;

- **The increase in the Loan-to-Deposit Ratio**, which remained at levels that favoured liquidity over profitability, was mainly the result of limited investment options in the domestic market, particularly with regard to foreign currency investments.

Foreign Exchange Rate Risk

Exchange rate risk is considered materially relevant, arising from fluctuations in exchange rates and resulting from positions associated with holding financial instruments denominated in different currencies.

Exchange rate uncertainty leads to cautious foreign exchange position management

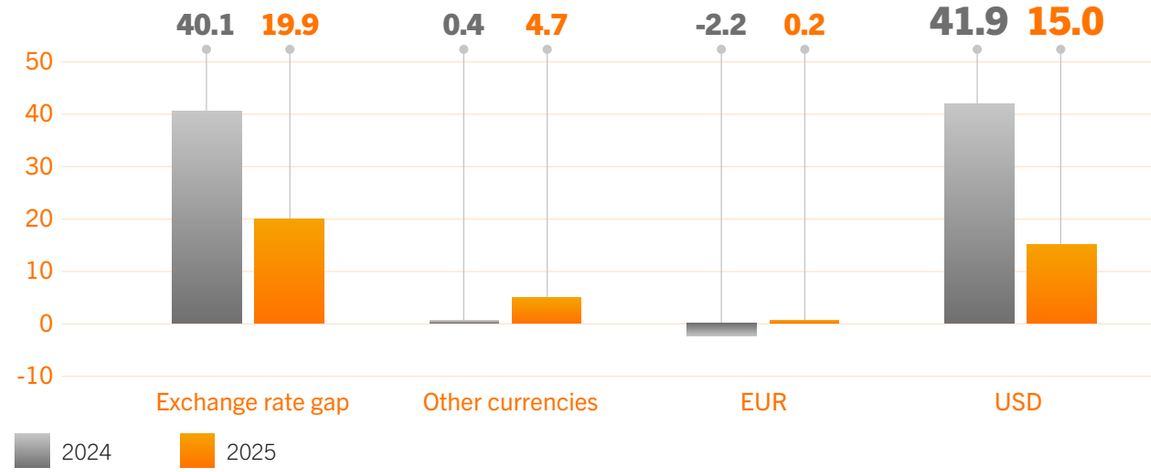

BFA seeks to control its risk through active and particularly rigorous management, keeping its asset and liability positions for each currency within the approved limits.

Foreign exchange risk is managed by the Finance and International Department (FID) and the Balance Sheet Risk Area (BRA), which is part of the Risk Management Department (RMD). The FDI is also responsible for ensuring that the exchange rate gap remains within the established limits. At the same time, the Risk Management Department has the following responsibilities:

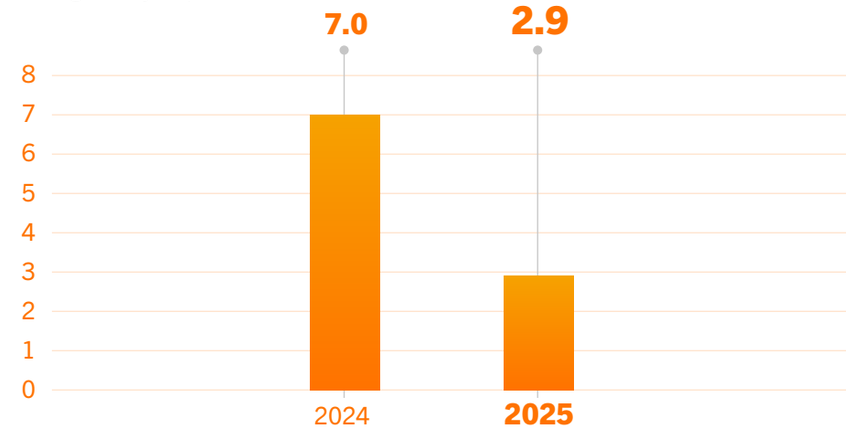

- Implementing methodologies, processes and activities for monitoring and controlling balance sheet risks;
- Evaluating the main indicators of exchange rate risk;
- Ensuring the preparation of stress tests for Foreign Exchange Risk.

The national currency depreciation trend witnessed in 2024 persisted throughout 2025, albeit at a slower pace and in a more contained manner. In view of the instability in the evolution of the exchange rate, BFA has rigorously managed the exchange rate gap between exchange rate-sensitive elements. The exchange rate gap by currency and relative to Total Capital is shown on the right.

Exchange Rate Gap
AOA bn

Exchange Rate Gap
% Regulatory Capital

BFA seeks to control its risk through active and particularly rigorous management, keeping its asset and liability positions for each currency within the approved limits.

As in the previous year, the exchange rate gap remained small throughout 2025, resulting in several months of exemption from the calculation of capital requirements to cover exchange rate risk. In this context, BFA maintained a long foreign exchange position throughout the year, adjusted to the continued devaluation of the national currency.

In 2025, the exchange rate gap fell to 2.9%, compared to 7.0% in 2024. This situation reflects an environment of greater pressure on the foreign exchange market, with impacts on liquidity management and the conversion of assets into foreign currency. Thus, the adoption of a long foreign exchange position helped to mitigate risks and preserve value in an environment marked by exchange rate volatility.

Interest Rate Risk

Interest rate risk is considered materially relevant, arising from adverse movements in interest rates that may lead to mismatches in the amounts, maturities, or repricing periods applicable to financial instruments with interest receivable and payable.

Interest rate gap remained relatively steady throughout 2025

BFA's interest rate risk is calculated by classifying all assets, liabilities, and off-balance sheet headings in the banking portfolio that are sensitive to interest rate fluctuations, and allocating them according to the applicable rate. Monitoring is carried out systematically, based on the repricing periods of assets and liabilities. The purpose of the interest rate risk sensitivity analysis is to assess the Bank's degree of exposure and evaluate its capacity to absorb adverse variations in the interest rates to which it is exposed.

Foreign currency-denominated positions subject to interest rate risk were converted to kwanzas at BNA's official exchange rate on the reporting date. In addition, in view of the importance of dollar-deno minated positions equally subject to interest rate risk, it was deemed appropriate to conduct a separate analysis for this currency, following the same principles and assumptions applied to the domestic currency.

As at 31st December 2025, BFA recorded the following interest rate gaps in quantitative terms:

AOA millions

	2025	2024	Δ% 25-24
Cumulative impact Δ +/- 2% interest rate on Interest Rate Sensitive Instruments	**39,453**	42,756	-7.73%
Total Capital	**687,012**	572,421	19.97%
Economic Value Impact	**5.7%**	7.5%	-1.8 p.p.
Regulatory Threshold	**+/-20%**	+/-20%	-

The reduction in the interest rate gap has stayed within the established regulatory limits.

There was a reduction in the interest rate gap, due to a smaller difference between interest rate-sensitive assets and liabilities, while remaining within the defined Regulatory Threshold.

Looking at interest rate sensitive assets and liabilities with a residual maturity or repricing of up to one year, there is an increase in the interest rate gap, whose estimated impact of a change in rates corresponds to 2.6% of the Net Interest Income.

AOA millions

	2025	2024	Δ% 25-24
Cumulative impact Δ +/- 2% interest rate on Interest Rate Sensitive Instruments up to 1 year	**(9,063)**	(10,006)	-9.42%
Net Interest Income	**343,204**	293,310	17.01%
Net Interest Income Impact	**-2.6%**	-3.4%	0.6 p.p.

Operational Risk

Operational Risk is described in BFA's Risk Taxonomy as the 'risk arising from the inadequacy of internal processes, individuals or systems, the possibility of fraud materialisation (both internal and external), as well as due to the potential occurrence of other external events'. This risk includes the following components:

- **Information Systems Risk** – arising from the inadequacy of information technologies in terms of processing, integrity, control, availability, and continuity, including risks associated with inappropriate strategies or use.

- **Conduct and Compliance Risk** – arising from violations or non-compliance with laws, rules, regulations, contracts, prescribed or generally accepted practices, as well as ethical standards.

Governance of the Operational Risk Management System

Operational risk is inherent to all products, activities, processes and systems, covering all business and support areas. Consequently, all Employees are responsible for managing and controlling the operational risks generated by their work.

The main objective of operational risk control and management is to identify, assess, measure, monitor, mitigate, and report this risk. The identification and mitigation of risk sources is a top priority for BFA, regardless of whether or not they have originated actual losses.

Responsibility for the day-to-day management of operational risk lies with the first line of defence, especially the operations areas and process owners. In addition to ensuring operational effectiveness and efficiency, this line of defence also captures and characterises operational losses in the context of its processes, monitors the respective Key Risk Indicators, and identifies and implements appropriate actions to mitigate operational risk exposures. In this way, it contributes to the strengthening of control mechanisms and the continuous improvement of the internal control environment.

As a second line of defence, the Risk Management Department – Operational Risk Area (RMD-ORA) is responsible for monitoring and controlling operational risk. The RMD-ORA collects, evaluates, and classifies operational risk events, and defines measures (action plans) to eliminate or mitigate the most relevant ones. In addition, the overall monitoring of the Bank's exposure to operational risk is ensured through the systematic monitoring of indicators and established risk limits.

The methodology implemented guarantees alignment with the best international practices, with the following main objectives:

- To boost the implementation of a true risk culture within BFA;;

- To identify and qualitatively assess the risks and controls associated with the Bank's processes;

- To foster the centralised collection of events considered to be operational risks;

- To set and monitor key risk indicators (KRI);

- To ensure the drafting, maintenance and operationalisation of relevant policies related to business continuity management;

- To assess and determine BFA's exposure to operational risk and report periodically to the various Stakeholders, namely the Board of Directors, the Executive Committee of the Board of Directors, and the Risk Committee;

- To promote the definition and monitor the implementation of action plans to mitigate operational risk.

The methodology is also based on the involvement of all the Bank's Employees in the effective management of this type of risk, with the support of the DGR-ARO in assessing the existing risks in the various activities and in identifying and reporting in good time any operational risk events that arise during these activities.

For the purposes of calculating Total Capital Requirements and operational risk coverage, the Bank applies the Basic Indicator Method, as set out in BNA Instruction 17/2016.

Instruments for the Identification and Assessment of Operational Risk

As part of the identification, measurement, and assessment of operational risk, various quantitative and qualitative instruments have been defined which, in a complementary way, enable a comprehensive diagnosis of this type of risk.

Quantitative analysis is mainly carried out using instruments that reflect the potential level of losses associated with operational risk events, namely:

- **Internal events database**, which provides a structured record of operational risk events, regardless of whether they have impacted the accounts. In addition, accounting reconciliation processes are in place to guarantee the integrity and quality of the information recorded;

- **Prior mapping of risks and controls**, for the assessment of residual risk in business processes, enabling the anticipation of potential risks by identifying and implementing mitigating controls. Processes are periodically assessed for their level of risk and the effectiveness of the controls implemented;

- **Stress tests**, which include defining risk factors and quantifying the magnitude and direction of shocks, as well as assessing their impact on relevant indicators, including: Assets, Liabilities, Net Profit, Total Capital, Total Capital Ratio and Liquidity Ratio.

Ongoing enhancement and adjustment of operational risk management tools shaped 2025

In 2025, the operational risk management processes were enhanced, notably through the mapping of risks and controls associated with processes considered critical. There was also a strengthening of the recording, evaluation, and monitoring of events included in the Operational Risk Events Database, as well as progress in the definition of Key Risk Indicators, which play a fundamental role in the early identification of potential risks.

For 2026, it is planned to increase Employees' awareness of operational risk in the performance of their activities, encouraging the timely reporting of events associated with this type of risk, and to advance the automation of processes.

Capital Tiers and Capital Adequacy Risk

Solvency risk arises from the possibility that the Financial Institution does not have a sufficient level of capital to absorb unexpected future losses resulting from its activity.

Governance of the Capital Risk Management System

With a view to ascertain the level of capital, BFA calculates the Total Capital Ratio and Total Capital Requirements. This management is carried out by the Global Risk Area of the Risk Management Department, in close compliance with the regulatory provisions and requirements stipulated by the Banco Nacional de Angola (BNA).

The Risk Management Department is also responsible for carrying out the Internal Capital Adequacy Assessment Process (ICAAP), for the stress tests conducted regularly by the Bank, and for the Recovery Plan, which ensures sufficient capital in the event of a systemic or idiosyncratic crisis scenario.

BFA also defines the Risk Appetite Statement (Risk Appetite Framework and Risk Appetite Statement) for solvency risk and incorporates, where applicable, the metrics, internal limits, and tolerance levels appropriate to the Bank's strategy.

Maintaining Robust Capital Levels

Within the scope of the supervisory equivalence project, in 2021 Banco Nacional de Angola published Notice no. 8/2021 dated July 5th, which sets out the rules for calculating Total Capital, Tier 1 Capital (Tier 1) and Common Equity Tier 1 (CET1).

A set of technical regulations was also published that complement Notice 8/2021 and provide for the calculation of minimum capital requirements for Pillar 1 risks. In the first quarter of 2022, the new regulatory requirements came into force, with transitional provisions for central administrations and financial institutions regarding the determination of capital requirements and prudential limits for large risks.

An analysis of the new capital requirements, taking into account the transitional provisions in force until 2027, shows that in 2025 they continued to have no significant impact on the calculation of capital ratios. This situation has allowed BFA to remain one of the most solid banks in the Angolan financial system, despite the strengthening of regulatory requirements and reserves to accommodate unexpected situations.

In 2025, following the application of the Pillar 2 guidelines, BFA's overall regulatory capital ratio stood at 16.25%, having maintained ratios of around 40% throughout the year.

It should also be noted that, as of 1 January 2025, the transitional provisions applicable to large exposures to sovereign foreign currency exposures were amended. These exposures are no longer exempt and are now considered at 75% for the purposes of calculating prudential limits for large risks, with their exposure limited to 25% of Regulatory Own Funds.

AOA millions

	2025	2024	Δ% 25-24
Total Capital	**687,011,973**	572,421,088	20.0%
Total Capital Requirements	**141,748,662**	112,572,892	25.9%

Tier 1 Ratio	**38.8%**	40.7%	-1.9 p.p.
Total Capital Ratio	**38.8%**	40.7%	-1.9 p.p.
Leverage Ratio	**29.5%**	24.4%	+5.1 p.p.

The risk weight applicable to sovereign exposure in foreign currency will gradually increase to 100% starting on 1st January 2027. In addition, financial institutions will no longer have their risk exposure deducted by 80%, but by 50% as of 31 December 2026. These changes aim to promote greater diversification of investments and reduce the concentration of foreign currency investments with central governments and financial institutions, while allowing for greater investment in the economy.

Despite the efforts that banks can make, it is important to note that almost half of Customer Deposits in the financial system are denominated in foreign currency and that the investment alternatives currently available are limited. In this context, it will be important to assess the impacts of the regulation and weigh the existing investment alternatives.

Internal Capital Adequacy Assessment Process (ICAAP)

Also in terms of capital, in 2025 the Bank carried out the ICAAP process, with reference to December 2024. This exercise also reflects the robustness of the capital, considering that the risk-taking capacity remains significantly higher than the risks to which the Bank is exposed.

On the other hand, this process demonstrates a medium/low risk profile, allowing the Bank to remain one of the most solid entities in the financial system, preserving Shareholders' capital and ensuring an adequate balance between the return generated and the risk assumed.

Compliance Risk

Compliance risk is managed within the scope of the Bank's governance and internal control system, with the aim of ensuring compliance with the applicable legal, regulatory, and normative framework, as well as mitigating potential legal, regulatory, reputational, and financial impacts.

In a context of continuous strengthening of regulatory requirements, compliance risk remains relevant and is constantly monitored, with a particular focus on matters related to Anti-Money Laundering, Counter-Terrorism Financing, and the Proliferation of Weapons of Mass Destruction (AML/CTF/PWMD).

Compliance Department

The Compliance Department, as a second line of defence and acting independently, is responsible for monitoring compliance with legal and regulatory provisions, good practices, and internal regulations, as well as promoting a culture of integrity, ethics, and responsibility, contributing to the Bank's sustainability and solidity.

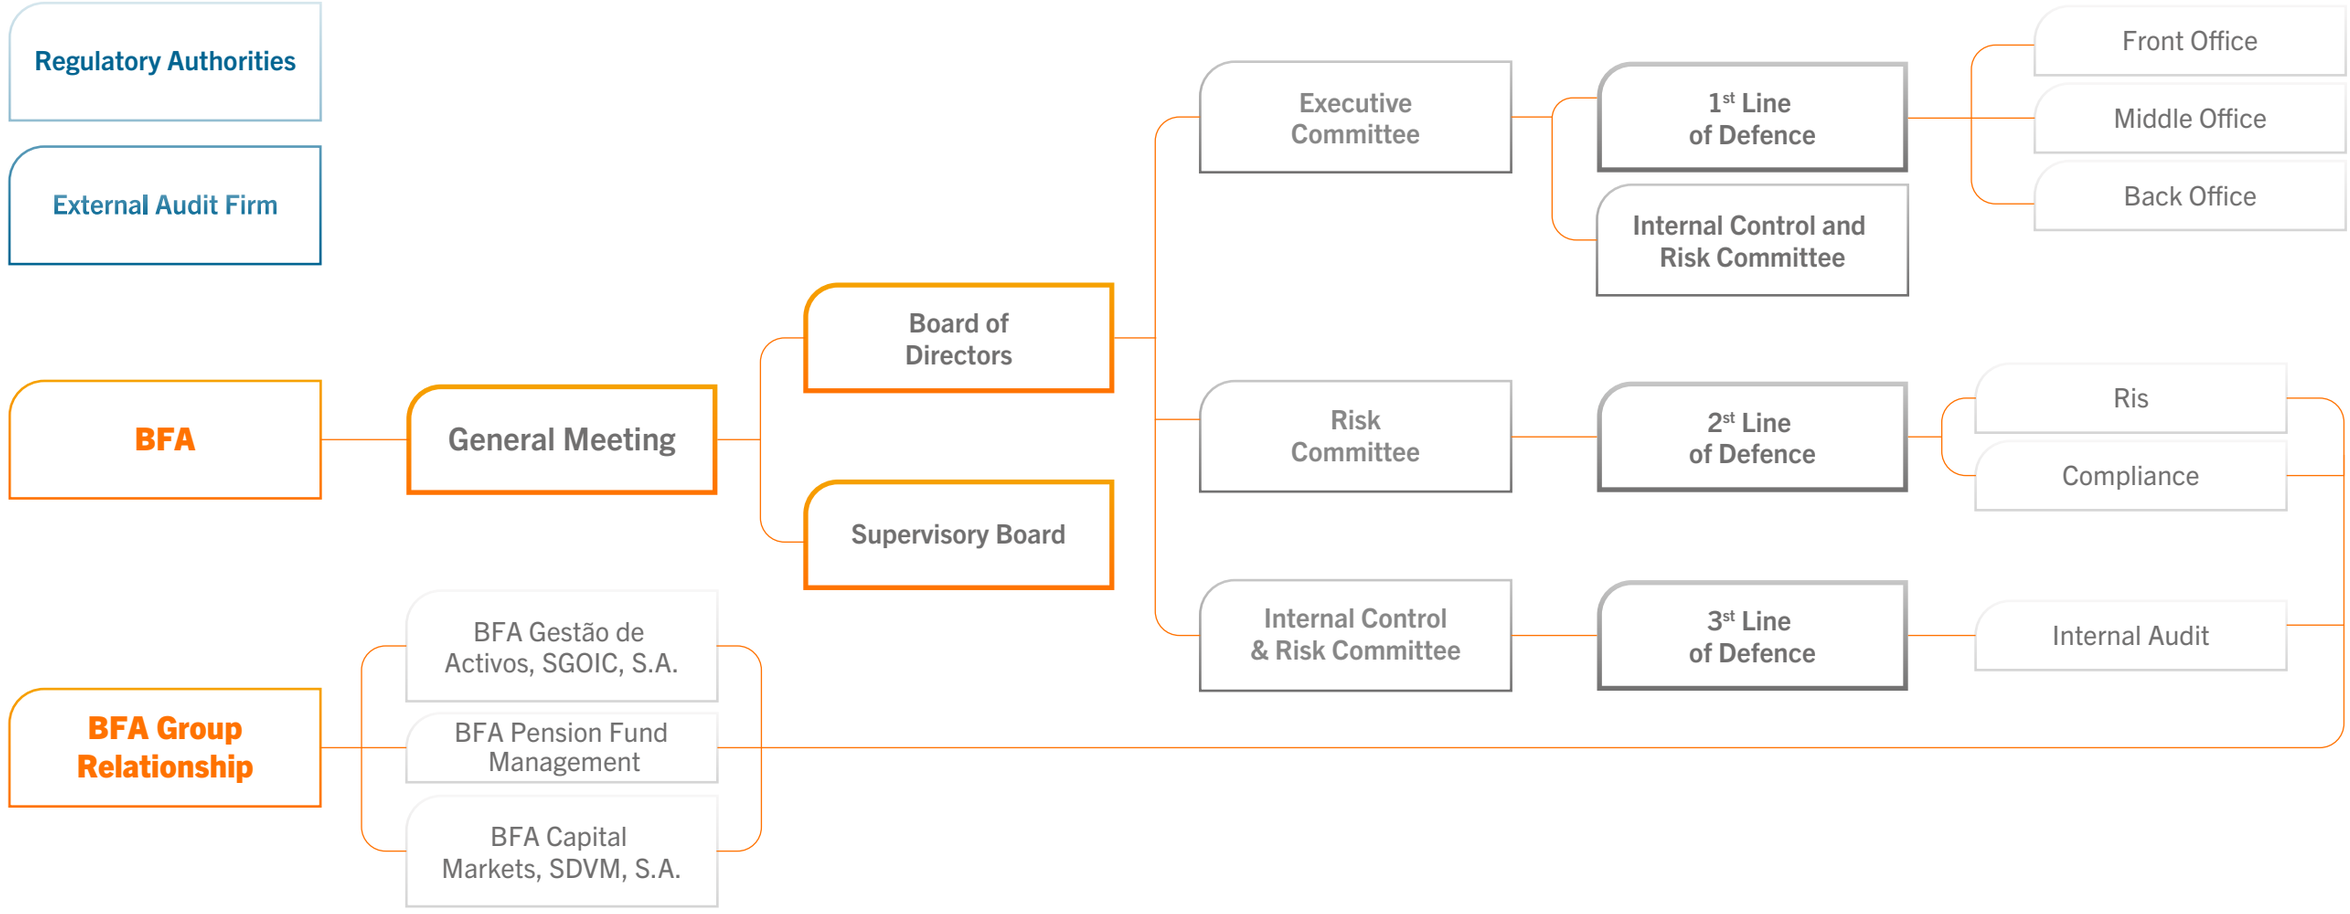

Ongoing training is provided for Employees, raising awareness of regulatory compliance and the importance of preventing and mitigating the associated risks.

Lastly, the Compliance Department maintains constant contact with other areas of the Bank and with regulatory authorities, guaranteeing swift adaptation to legislative and regulatory changes, as well as alignment with the Bank's strategic and institutional objectives.

Governance of the Compliance Risk Management System

The compliance risk management system is based on a governance structure that ensures the Compliance Department is integrated into the Bank's decision-making processes, guaranteeing compliance with the applicable legal, regulatory, and normative framework.

This model is structured according to the principle of the Three Lines of Defence, ensuring a clear segregation of duties and responsibilities between operational areas, control functions, and independent audit. Adequate coordination is also ensured with governance bodies, Group entities, and external supervisory and inspection bodies, as illustrated in the following structure:

Strategic Challenges

Within the scope of the 2025 exercise, it was concluded that the strategic model adopted by the Compliance Department is adequate, preserving the defined axes of intervention and reinforcing areas considered priorities, in response to the evolution of the regulatory framework and the growing complexity of the Bank's activity.

In this context, the following strategic objectives have been defined for the Compliance function:

- Promoting and disseminating a culture of compliance
- Efficiency in implementing regulatory changes and requirements
- Continuous improvement of processes and internal controls
- Strengthening technological capabilities for compliance risk management
- Follow-up and resolution of audit recommendations
- Empowering the Board's resources in the face of new challenges

In the area of **promoting a culture of compliance**, the Board reinforced the dissemination of principles of ethics, integrity, and compliance throughout the Organisation, through awareness-raising actions, internal communication initiatives, and the revision of regulations, ensuring that internal practices are aligned with the applicable legal and regulatory framework.

With regard to the **implementation of regulatory changes**, the Self-Assessment model was revised, adopting a risk-based approach, and the regulatory governance model was strengthened, promoting more structured and effective monitoring of regulatory changes.

As part of the **continuous improvement of internal processes and controls**, monitoring mechanisms were strengthened, with special focus on data quality, monitoring higher-risk Customers, controlling high-risk products and transactions, and aligning with the regulator's guidelines.

In terms of **technology applied to compliance risk management**, the Bank reinforced the system for preventing Money Laundering and Terrorist Financing through the acquisition of a new Oracle AML tool, the implementation of which is currently underway. In addition, solutions aimed at automating regulatory risk management and monitoring regulatory reporting were evaluated.

In terms of **following up on audit recommendations**, the Compliance Department focused on resolving deficiencies classified as higher risk, helping to strengthen internal controls and mitigate critical risks.

Finally, in the area of **resource training**, the Bank continued to invest in the technical development of the team through specialised certification and the preparation of structuring initiatives aimed at strengthening internal skills. These initiatives included projects aimed at preventing conflicts of interest, transactions with related parties, and the prevention of corruption.

AML/CTF/PWMD Programme

The Bank's Anti-Money Laundering, Counter-Terrorism Financing, and Proliferation of Weapons of Mass Destruction (AML/CTF/PWMD) Prevention Programme aims to identify, monitor, and mitigate the practice of illicit activities within the scope of its operations. This programme is based on the following pillars: (i) appointment of a Compliance Officer, (ii) continuous training of Employees, (iii) adoption of strict policies, standards, and procedures, and (iv) implementation of effective support systems.

The programme follows a structured, risk-based approach, covering the definition, identification, and categorisation of exposure to risk factors and their origins, allowing for appropriate containment and ongoing monitoring. This approach enables the calibration of controls according to the nature, specificity, and severity of the risks identified.

In the context of combating AML/CTF/PWMD practices, the Bank ensures the validation and verification of the accuracy of the information provided by Customers and counterparties, supplementing it, where necessary, with the autonomous collection of additional data from credible sources. At the same time, continuous training and awareness-raising activities are promoted, reinforcing the culture of compliance and diligence in meeting the applicable legal and regulatory requirements.

Compliance Risk Management Stages and Implementation Scheme

In order to ensure legal and regulatory effectiveness in mitigating compliance risk, as well as the proper implementation of the respective controls, a minimum set of matters has been established across the Bank, formalised through Policies, Regulations, and Process Standards, as described below.

IDENTIFICATION

Identification of the elements and framework according to the risks affecting the Bank's activity

EVALUATION

Qualitative and quantitative assessment of the risks, their probability of occurrence, and the impact if they materialise

MONITORING

Determining indicators to monitor the risk profile

CONTROL

Definition of responsibilities, regulations, frequency of control, and implementation of mitigation and control measures

REPORTING

Reporting

Anti-Money Laundering and Terrorist Financing Risk

In 2025, BFA intensified the strengthening of its internal control system, promoting an in-depth assessment and comprehensive review of the policies and procedures in place. This work enabled the identification of necessary improvements and adjustments to strengthen alignment with the applicable regulatory framework and with the best international practices for managing the risks of Anti-Money Laundering, Counter-Terrorism Financing, and the Proliferation of Weapons of Mass Destruction (AML/CTF/PWMD).

Risk Management Processes of AML/CFT/PWMD

Identification

As part of establishing and maintaining the business relationship, the Bank implements identification processes and procedures and applies appropriate due diligence measures, which make it possible to know and verify the identity of Customers, beneficial owners, members of management bodies or equivalent bodies, as well as other relevant senior executives with management powers and other related entities.

The Bank collects and assesses the information necessary to understand the nature of the business relationship, the activity carried out, and the respective risk profile, while also ensuring that no relationships or accounts are opened under fictitious names or in circumstances that prevent proper identification of the parties involved.

All identification documents and supporting evidence presented at the time of establishing the business relationship, as well as during its term, are filed and kept in accordance with the applicable regulatory provisions.

If it is impossible to carry out any of the identification or due diligence measures, the Bank shall not proceed with the establishment or maintenance of the business relationship, nor with carrying out operations, and shall refuse or abstain, as appropriate.

Continuous Monitoring

The risk classification of the Bank's Customers is structured into low, medium, high, and unacceptable risk levels. The risk score assigned is decisive in defining the frequency of review, the type of due diligence to be carried out, simplified or reinforced, the periods for updating information, and the level of monitoring of business relationships within the scope of the Know Your Customer (KYC) process.

Depending on the level of risk assigned, the Bank applies different review cycles and a proportional degree of monitoring, ensuring stricter oversight for Customers classified as high risk, namely Politically Exposed Persons (PEPs), as illustrated in the matrix below:

Low Risk (2)	Medium Risk (3)	High Risk (4)	Unacceptable Risk
Five-Yearly Due Diligence	Four-Yearly Due Diligence	Annual due diligence; PEP & Private Banking every two years; Remaining High Risk	Due Diligence: Not applicable, as the Bank has no relationship with these Customers.

Enhanced Due Diligence Know Your Costumer (KYC)

Enhanced Due Diligence measures apply to Customers classified as high risk, either through internal identification by the Bank or by determination of the competent sectoral authorities.

The Bank implements these measures when establishing the business relationship, during the updating of Customer, entity, or account records, and in the execution and monitoring of transactions, ensuring an increased level of control proportional to the risk identified.

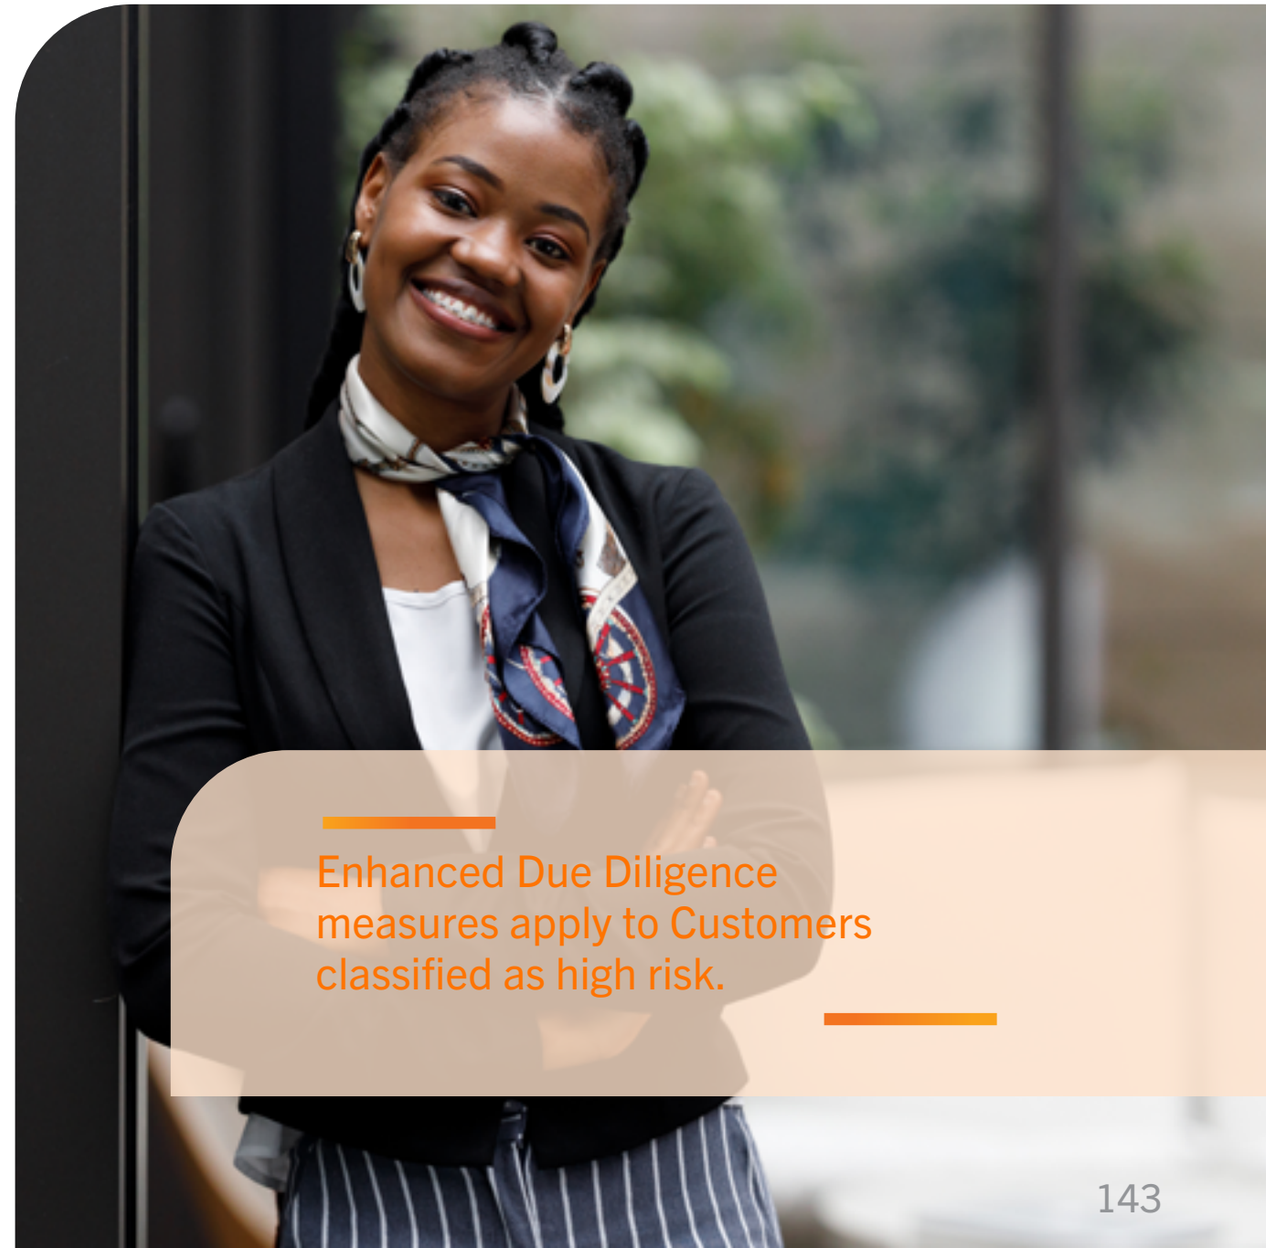

The following entities and/or those maintaining relationships with them are subject to enhanced due diligence measures:

- Politically Exposed Persons (PEPs);
- Non-governmental organisations and non-profit entities;
- Designated Non-Financial Activities and Professions (DNFBPs);
- Non-Bank Financial Institutions;
- Private Banking Customers.

Know Your Transaction (KYT)

Within the scope of the regulatory rules applicable to monitoring Customer transactions, the Bank monitors cash transactions, in national and/or foreign currency, with a value equal to or greater than the equivalent of USD 15,000.00, including the sum of transactions carried out by the same Customer on the same day when the aggregate amounts reach or exceed this threshold.

In addition, transaction monitoring is supported by the AML tool, which incorporates control rules based on objective criteria – namely the transaction value, the jurisdiction involved, the nature of the transactions, and the entities involved – enabling the identification and analysis of situations requiring closer monitoring, in accordance with applicable legislation and internal regulations.

Enhanced Due Diligence measures apply to Customers classified as high risk.

Key Developments in 2025

In the course of 2025, the Bank implemented several improvements within the scope of the AML/CTF/PWMD process and the respective internal control system. We also highlight the following:

Domain	Main actions
Tools and Systems	• Systems Acquisition of Oracle's AML tool to strengthen mechanisms for monitoring, detecting, analysing, and reporting potentially suspicious operations, improving information quality, process traceability, and effectiveness of internal controls. • Implementation of the regulatory reporting management tool to monitor submissions efficiently and ensure timely reporting, contributing to the effectiveness and traceability of regulatory processes.
Risk & Monitoring	• Conducting campaigns to update Customer data (KYC), focusing on high-risk Customers as part of the commercial network's objectives (SIP). Intensified monitoring of own and related PEPs, covering **nine hundred and five (905)** entities.
Human Capital	• Strengthening the Compliance function by appointing a new Compliance Officer and increasing operational capacity through the hiring of four technicians.
Due Diligence, Monitoring and Reporting	• Increase in the number of due diligence procedures carried out year-on-year. • During 2025, the Bank reported **one hundred and ninety-one (191)** Suspicious Transaction Declarations to the Angolan Financial Information Unit (FIU).

Domain	Main actions
Training and Culture	• Training and awareness-raising activities are conducted for all Employees, with particular emphasis on AML/CTF/PWMD issues. • Completion of the international certification process in AML/CTF for **eight (8)** Compliance Department Employees.
Regulation	• Full analysis of legislation published in 2025 with an impact on the Bank's activity, followed by issuing warnings and recommendations to the responsible areas.
Cooperation with Authorities	• Active participation in the work of the National and Sectoral Risk Assessment, led by the UIF, as part of the action plan to address the deficiencies identified by the Financial Action Task Force (FATF).
Protection of Personal Data	• Processing of personal data in accordance with the Bank's Personal Data Protection Policy and applicable legislation. • During the year, there were **sixteen (16)** interactions with the Data Protection Authority (DPA) as part of the regular monitoring of the matter, and no material incidents or relevant impacts on the rights of data subjects were recorded.
Bank Correspondence	• Successful completion of the onboarding process with Deutsche Bank for the opening of USD and EUR accounts.

Key Challenges for 2026

For the 2026 financial year, the Compliance Department plans to continue strengthening the risk areas identified as priorities, with a view to consolidating the internal control system and improving the efficiency of processes.

The implementation of the new AML (Anti-Money Laundering) tool will provide the Bank with a more robust and effective system for preventing and detecting financial crimes, in line with the applicable regulatory framework and best international practices, thereby strengthening existing control mechanisms.

In addition, the Compliance Department will continue to invest in the ongoing training of its Employees, ensuring that their knowledge remains up to date and that they possess the skills needed to meet the challenges of a constantly evolving financial market.

AML/CFT/PWMD Risk Management and Compliance Tools	Completion of the implementation of Oracle's new AML tool.
Audit Recommendations (Internal and External)	Focused efforts on resolving identified high-risk recommendations, with a view to strengthening the control and efficiency of internal processes.
Strengthening the Compliance Function	Enhancing the Compliance function to ensure the effectiveness of processes, procedures, and controls in preventing AML/CFT/PWMD and compliance risks.

USD 15,000.00

Total amount monitored in cash operations

For the 2026 financial year, the Compliance Department plans to continue strengthening the risk areas identified as priorities, with a view to consolidating the internal control system and improving the efficiencyof processes.

In 2025, BFA continued to create value for its customers, shareholders, employees and other stakeholders, reporting a return on equity (ROE) of 31.1% and a return on assets (ROA) of 5.7%.

Net Assets

In a demanding macroeconomic and monetary policy context, the Bank's balance sheet showed growth during the period under review, demonstrating its continued ability to adapt, consolidate, and remain solid.

In December 2025, BFA recorded Total Net Assets of AOA 4,278,401.3 million, an increase of 10.9% year-on-year. This was essentially the result of an 11.9% increase in Securities Investments (AOA 191,299.1 million) and a 22.0% increase in Loans and Advances to Customers (AOA 160,601.6 million) headings.

The Securities portfolio represents the heading with the greatest weight in the composition of Total Assets, at 42.2%, mainly characterised by Treasury Bonds and Bills in national currency and Other Public Debt Securities – Euro Bonds. This was followed by Loans and Advances to Customers heading, with a weight of 20.8%.

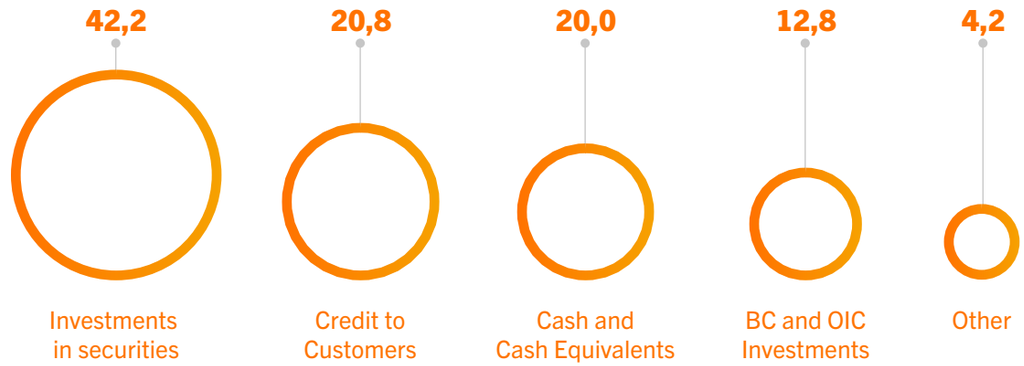

The evolution of the asset structure reflects the Bank's strategy to diversify the balance sheet, while considering the risk, profitability, and liquidity characteristics of the assets.

During the period in question, the exchange rate for the US dollar (USD) was stable, while the euro (EUR) depreciated against the national currency compared to the same period in the previous year. This partly explains the variation in the headings and translates into a higher kwanzas counter-value for exposures denominated in foreign currency. In terms of Total Assets, this exchange rate effect resulted in an increase in value of approximately AOA 40,862 million.

+10,9%
Total Net assets

+24,1%
Cash and Cash Equivalents

Composition of assets
%

Cash and Cash Equivalents

Cash and Cash Equivalents amounted to AOA 857,439.9 million, an increase of 24.1% compared to the same period last year (AOA 166,471.9 million). This development was primarily due to an increase of AOA 82,799.2 million in the Central Bank's cash and cash equivalents in foreign currency (FC), resulting from liquidity generated by the maturity of investments in credit institutions abroad.

Cash and Balances at Central Banks and Other Credit Institutions

The Cash and Balances at Central Banks and Other Credit Institutions headings are particularly important in the structure of BFA's assets, having fallen by -25.0% (AOA -182,575.4 million) compared to the amount recorded in the previous period, which totalled AOA 547,504.6 million in December 2025. Applications abroad stood at AOA 379,919.8 million, a reduction of AOA -171,144.7 million. Applications at the Central Bank fell by AOA 327,808.7 million (-100.0%) year-on-year. This reduction is mainly explained by new purchases of securities in local currency, specifically Treasury Bonds and Treasury Bills, a fact which contributed to the growth of the Securities portfolio.

Overdue Loans Coverage by Impairment	**473.0%**	484.8%	-11.8,p.p.

Total Credit grew by AOA 98,583.6 million (9.3%) compared to the same period in the previous year, totalling AOA 1,160,164.1 million. This growth is largely the result of the increase in credit granted and new disbursements in foreign currency, which reached 133.1%, standing at AOA 223,475.5 million.

As for off-balance sheet exposures heading, made up of Guarantees (Corporate Banking) and unused limits, unused limits fell by AOA 116,940.3 million (73.8%) compared to the same period last year.

Structure of the Loan Portfolio

%

Liabilities

Total Liabilities increased by 9.3% (AOA 293,702.2 million) compared to 31 December 2024, to a total of AOA 3,461,097.4 million, mainly due to the 473.7% increase in the Central Bank and Other Credit Institution Resources headings and the 6.4% increase in Customer Deposits.

Resources from Central Banks and Other Credit Institutions recorded a significant increase of AOA 113,275.6 million, related to the financial settlement of the IPO (Initial Public Offering) with the BPI Shareholder account.

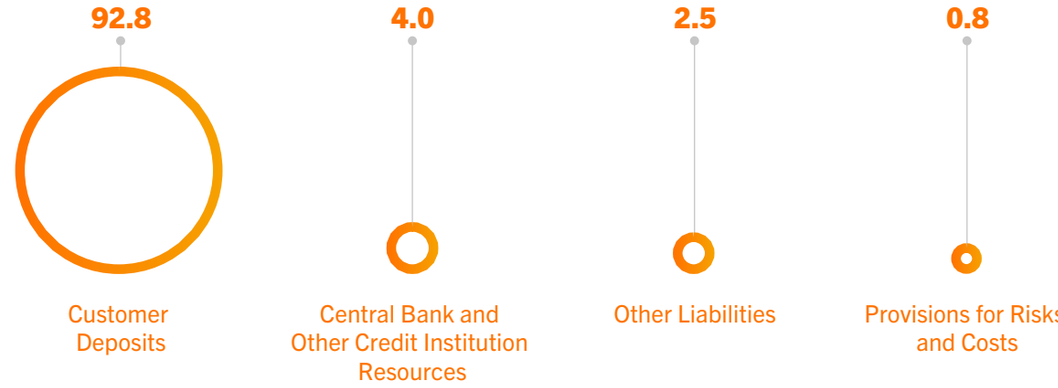

Customer Deposits

26.1%
Total Loan-to-Deposit Ratio in 2024

Total Capital Ratio

The Regulatory Own Funds Ratio stood at 38.8%, a decrease of 1.9 percentage points compared to the same period last year, remaining comfortably above the Regulatory Threshold required by the Banco Nacional de Angola (16.3%), which demonstrates the Bank's level of financial autonomy.

Overall, the structure of BFA's balance sheet in December 2025 shows the continuation of an effective liquidity strategy which, in line with the Bank's policy, allows 94.1% of the asset structure to be financed through a combination of Customer deposits and equity.

Income Statement

Over the course of financial year 2025, BFA recorded a Net Profit of AOA 230,622.1 million, a sharp growth of AOA 24,800.9 million (+12.0%) YoY.

The financial performance is mainly the result of the positive evolution of Operating Income, which grew by 16.6% (AOA 62,202.7 million), underpinned by a 17.0% increase in Net Interest Income (AOA 49,893.9 million). The increase in Net Interest Income was driven by a 36.9% increase in income from securities and a 22.8% increase in income from loans, reflecting the evolution of the exposure of these portfolios in the balance sheet structure.

Income from Liquidity Investments	**64,006.7**	91,393.3	-30.0%
Income from Securities	**241,312.2**	176,303.8	36.9%
Income from Loans and Advances	**126,601.9**	103,102.3	22.8%
Interest and Similar Charges	**88,717.2**	**77,489.7**	**14.5%**
Costs of Deposits	**82,261.1**	74,592.8	10.3%
Other Costs	**6,456.1**	2,896.8	122.9%
Net Interest Income	**343,203.5**	**293,309.6**	**17.0%**

Net Interest Income amounted to AOA 343,203.5 million, which amounts to AOA 49,893.9 million compared to the same period last year, representing a positive variation of 17.0%.

The growth in Net Interest Income was mainly driven by the increase in Credit Income and Securities Income, which rose by 22.8% and 36.9%, respectively.

Costs increased by 14.5%. Interest and similar charges, as a result of the growth in Customer Deposit costs, rose by approximately AOA 7,668.3 million.

In December 2025, Net Interest Income represented 78.5% of Operating Income, maintaining its weight in the Bank's revenues compared to the same period last year.

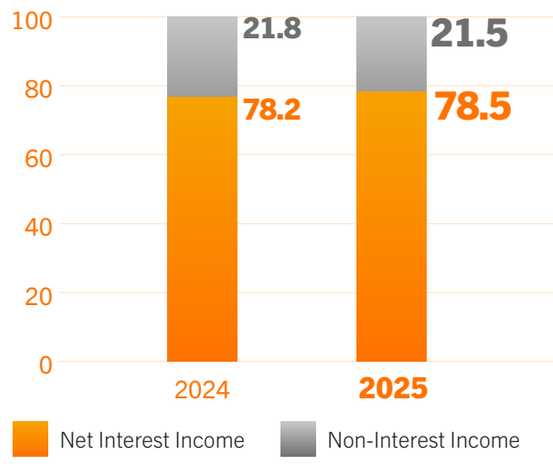

Evolution of the Non-Interest Income

AOA millions

	Dec.25	Dec.24	Δ% 25-24
Income and Charges from Services Fees and Commissions	**24,427.6**	22,210.2	10.0%
Net gains/(losses) on Financial Assets and Liabilities at Fair Value through Profit or Loss	**-**	-	0.0%
Net gains/(losses) on Held-to-Maturity Investments	**5,382.2**	3,590.8	49.9%
Net gains/(losses) on Foreign Exchange	**72,958.1**	62,390.0	16.9%
Net gain from the sale of other assets	**274.7**	154.0	78.4%
Other operating income/(expenses)	**(8,809.1)**	(6,420.4)	37.2%
Non-Interest Income	**94,233.5**	**81,924.7**	**15.0%**

Non-Interest Income stood at AOA 94,233.5 million, up by 15.0% YoY. The favourable evolution of Non-Interest Income was influenced by the increase in Foreign Exchange Earnings of AOA 10,568.1 million (16.9%), explained fundamentally by the increase in business profits of AOA 7,127.0 million and foreign exchange gains from revaluation, which increased by AOA 3,441.3 million compared with the previous year. The positive evolution of this heading made it possible to balance out the decrease in Other Operating Income.

Total Net Fees	**38,083.12**	**31,317.42**	**21.6%**

The results of services and commissions showed a positive variation of AOA 6,765.7 million (21.6%) compared to the same period last year, exceeding AOA 38,083.12 million. This variation is the result of an increase in Net Foreign Exchange Fees of AOA 3,458.8 million (38.9%), due to higher transaction volumes (OPE and CDI), and an increase in Net Card Fees of AOA 3,069 million (42.6%).

Changes in Overheads

AOA millions

	Dec.25	Dec.24	Δ% 25-24
Personnel Costs (I)	**91,498.2**	75,239.6	21.6%
Third-party Supplies and Services (II)	**65,935.0**	50,172.4	31.4%
Depreciation and Amortisation (III)	**21,604.9**	17,803.6	21.4%
Overheads (I + II + III)	**179,038.1**	143,215.5	25.0%
Cost-to-income	**40.9%**	**38.2%**	**2.7,p.p.**

Overheads amounted to AOA 179,038.1 million, an increase of AOA 35,822.5 million (+25%) compared to the same period last year.

This positive variation is explained by the growth in Staff Costs, amounting to AOA 16,258.6 million (+21.6%), resulting from salary increases granted to Employees to improve their purchasing power. It is also worth highlighting the increase in Third-Party Supplies and Services costs of AOA 15,762.6 million (+31.4%), justified by expenditures incurred in implementing strategic initiatives.

In the 2025 financial year, the Cost-to-Income Ratio worsened from 38.2% to 40.9% (an increase of 2.7 p.p.), due to higher structural costs.

Overhead costs have increased by 25%, a positive variation justified by Staff salary increases.

Provisions and Impairment

AOA millions

	Dec.25	Dec.24	Δ% 25-24
Provisions net of write-offs	**(9,628.8)**	(751.4)	1181.4%
Loans and Advances to Customers impairment net of reversals and recoveries	**8,278.0**	9,183.0	-9.9%

Appropriation of net profits 2025

Given that in the 2025 financial year, Banco de Fomento Angola achieved net profits of AOA 230,622.1 million, these profits will be allocated as follows:

- AOA 23,062.2 million to statutory reserves, corresponding to 10% of the net profits achieved;
- AOA 69,186.6 million, to be allocated to Free Reserves, corresponding to 30% of the net profit;
- AOA 138,373.3 million, to be allocated to Dividends, corresponding to 60% of the net profit.

In 2025, BFA has obtained net results exceeding AOA 230 million.

Net Profit	**1,798.5**	**1,352.0**	**33.0%**

BFA Capital Markets' total assets reached AOA 9,324.3 million at year-end 2025, up by AOA 5,199.0 million (+126.0% YoY). This was mainly due to the increase of AOA 4,330.9 million (+167.7%) in the Liquidity Investments heading, which corresponds to Central Bank Applications.

BFA Capital Markets' liabilities totalled AOA 5,563.3 million and equity amounted to AOA 3,761.0 million. The change in Other Liabilities heading was around 157.2% (+AOA 3,400.4 million), essentially due to the increase in the amounts to be paid to BFA under a redemption agreement.

BFA Capital Markets ended the year with a Net Profit of AOA 1,798.5 million, representing an increase of AOA 446.5 million compared with AOA 1,352.0 million YoY. This positive performance is mainly the result of an increase of AOA 2,005.7 million in income from commissions on securities, compared with the figure reached in December 2024.

Income Tax	**38.0**	14.1	168.6%
Net Profit	**544.0**	**314.5**	**73.0%**

In December 2025, BFA Pensões' net assets reached AOA 5,023.3 million, an increase of 73.7% compared with December 2024. This change is essentially due to the increase in the Liquidity Investments heading, as a result of the rise in Applications with National Banks.

BFA Pensões' Equity and Liabilities recorded a positive change of AOA 2,131.4 million (73.7%) compared with December 2024, an evolution supported by the growth in Other Liabilities of around 52.5% (+AOA 1,137.4 million) compared with the same period last year, resulting from amounts to be handed over to BFA under a redemption agreement.

BFA Pensões achieved a Net Profit of AOA 544.0 million, an increase of AOA 229.5 million (+73.0%) compared with the result achieved in December 2024. The financial performance is mainly the result of income, which grew by AOA 430.9 million (+27.3%), especially management commission income of AOA 1,671.3 million.

In December 2025, Fundo Kimbo's net assets amounted to AOA 9,155.4 million, which corresponds to a growth of 298.7% compared with the same period last year. This positive change is explained by the increase in Other Assets in the amount of AOA 7,209.1 million (+100.0%), referring to investment units that are pending realisation.

Total Equity and Liabilities amounted to AOA 9,155.4 million in December 2025, with 99.6% corresponding to Equity, relating to the participation units of the Fund's Share Capital incorporation.

Fundo Kimbo's Net Profit was negative AOA 324.2 million, essentially due to the fact that it was incurring costs with third-party supplies and services.

Interest, commissions and other similar income received		**489,225,829**	375,039,819
Interest, commissions and other similar costs paid		**(113,738,341)**	(102,097,107)
Payments to employees and suppliers		**(151,453,804)**	(122,068,664)
Payments and contributions to pension funds and other benefits		**(3,813,920)**	(3,226,780)
Recovery of loans written off		**1,112,435**	449,212
Other gains/(losses)		**71,772,319**	52,548,819
Cash flows before changes in operating assets and liabilities		**293,104,518**	**200,645,299**
Increases/decreases in operating assets:			
Other loans and advances to central banks and credit institutions		**164,103,321**	260,793,555
Financial assets at fair value through profit or loss		**(5,112,185)**	(35,757,280)
Financial investments at amortised cost		**(159,266,950)**	(83,651,279)
Loans to customers		**(157,977,769)**	(181,037,936)
Non-current assets held for sale		**(42,114)**	(101,427)
Other Assets		**(5,277,215)**	(8,033,941)
Net cash flow from operating assets		**(163,572,912)**	**(47,788,308)**
Increases/decreases in operating liabilities:			
Deposits from central banks and other credit institutions		**110,012,880**	(4,840,667)
Customer deposits and other loans		**153,640,019**	29,621,865
Other liabilities		**(24,715,301)**	794,026
Net cash flow from operating liabilities		**238,937,598**	**25,575,224**
Net cash from operating activities before income taxes		**368,469,204**	**178,432,215**
Income and capital taxes paid		**(18,486,185)**	(14,389,588)
Net cash from operating activities		**349,983,019**	**164,042,627**
Cash flow from investing activities			
Acquisitions of other property, plant and equipment, net of disposals		**(90,711,112)**	(14,975,785)
Acquisitions of intangible assets, net of disposals		**(8,430,648)**	(9,121,102)
Net cash from investing activities		**(99,141,760)**	**(24,096,887)**
Cash flow from financing activities			
Dividend distribution		**(102,910,625)**	(83,754,806)
Net cash from financing activities		**(102,910,625)**	**(83,754,806)**
Changes in cash and cash equivalents		**147,930,634**	**56,190,934**
Cash and cash equivalents at the beginning of the period	4 and 5	**690,972,226**	598,282,241
Effects of exchange rate variations on cash and cash equivalents		**18,542,384**	36,499,051
Cash and cash equivalents at the end of the period	4 and 5	**857,445,244**	**690,972,226**

The accompanying notes form an integral part of these individual financial statements.

1. Introduction

Banco de Fomento Angola, S.A. I Sociedade Aberta (hereinafter also referred to as Bank or BFA), was incorporated by Public Deed on August 26, 2002, following the transformation of the Angolan Branch of Banco BPI, S.A. into a bank under local law, and is fully owned by BPI.

In 2008, BPI sold 49.9% of its stake in the Bank to Unitel, S.A.

On January 5, 2017, pursuant to the share purchase and sale agreement entered into in 2016, the sale by Banco BPI to Unitel of the shareholding representing 2% of the share capital of BFA was completed. Thus, BFA was majority held by Unitel, S.A., with a stake of 51.9%.

As indicated in Note 19, on December 31, 2025, following the admission to trading of the Bank's shares, as part of a public offering of 29.75% of the share capital, BFA's share capital was held 36.9% by Unitel, S.A., 33.35% by Banco BPI and 7.61% by Congolian Financial, S.A., with the remaining 22.14% dispersed among minority shareholders.

The Bank is engaged in obtaining funds from third parties in the form of deposits or other funds, which it invests, together with its own funds, in the granting of loans, deposits in the Banco Nacional de Angola (BNA), investments in credit institutions and acquisition of securities or other assets, for which it is duly authorized. It also provides other banking services and performs various types of operations in foreign currency, having for this purpose, as at December 31, 2025, a national network of 154 branches, 12 investment centers, 7 large corporate centers, 4 Oil & Gas and Public Sector centers, 11 medium corporate centers, 1 Private Banking center and 1 customer service center.

2. Basis of Presentation and Summary of Main Accounting Policies

2.1. Basis of presentation

The Bank's financial statements have been prepared on the going concern assumption and in accordance with International Financial Reporting Standards (IFRS), pursuant to Notice 5/2019, of August 30, of the Banco Nacional de Angola. IFRS includes accounting standards, issued by the International Accounting Standards Board (IASB) and interpretations issued by the International Financial Reporting Interpretation Committee (IFRIC).

The Bank's financial statements now presented relate to the period ended December 31, 2025.

The accounting policies used by the Bank in the preparation are consistent with those used in the preparation of the financial statements as at December 31, 2024, except for the new standards issued, where applicable.

The Bank's financial statements are stated in thousands of kwanzas, rounded to the nearest thousand. The financial statements were prepared in accordance with the historical cost principle, modified by the application of the fair value to derivative financial instruments and financial assets and liabilities recognized at fair value through profit or loss. Other financial assets and liabilities and other non-financial assets and liabilities are recorded at amortised cost or historical cost.

The preparation of the financial statements in accordance with IAS/IFRS requires the Bank to make judgments and estimates and uses assumptions which affect the application of accounting policies and the amounts of income, expenses, assets and liabilities. Changes or differences between such assumptions and reality may have impacts on the actual estimates and judgments. The areas involving a higher degree of judgment or complexity, or areas where significant assumptions and estimates are made in preparing the financial statements are discussed in Note 3.

The individual financial statements for the period ended December 31, 2025 were approved at the meeting of the Bank's Board of Directors on February 19, 2026.

The recently issued accounting standards and interpretations that have not yet come into force and that the Bank has not yet applied in the preparation of its financial statements can be analyzed in Note 32.

2.2. Transactions in foreign currency

Transactions in foreign currency are translated into the functional currency (Kwanza) at the exchange rate prevailing on the transaction date.

Foreign currency transactions are recorded in accordance with the principles of the multi-currency system, with each transaction being recorded according to the respective denomination currencies. Assets and liabilities stated in foreign currency are translated into kwanzas at the exchange rate published by the Banco Nacional de Angola as at the balance sheet date. Non-monetary assets and liabilities recorded at fair value are translated into the functional currency at the exchange rate published by the Banco Nacional de Angola on the date the fair value is determined and recognized against profit or loss. Income and

expenses related to exchange rate differences, whether realized or potential, are recorded in the income statement in the period in which they occur under Foreign exchange gains/(losses). The "forward currency position" transactions relate to currency forward contracts, and the related income and expenses are recorded under the caption Net gains/(losses) on financial assets and liabilities at fair value through profit or loss in the income statement.

As at December 31, 2025 and December 31, 2024, the exchange rates of the Kwanza (AOA) against the United States Dollar (USD) and the Euro (EUR) were as follows:

	31/12/2025	31/12/2024
1 USD	**912.286**	912.000
1 EUR	**1,069.522**	949.483

Forward currency position

The forward currency position corresponds to the net balance of forward transactions pending settlement. All contracts related to these transactions are revalued at market forward exchange rates.

The difference between the equivalent in kwanzas at the forward revaluation rates applied, and the equivalent at the contracted rates, is recorded under assets or liabilities, against income or expenses, respectively.

2.3. Financial instruments

2.3.1. Classification of financial assets

In accordance with IFRS 9 – Financial Instruments, financial assets can be classified into three categories with different measurement criteria:

- Amortised cost;
- Fair value through other comprehensive income (FVOCI); and
- Fair value through profit or loss (FVTPL).

The classification of financial assets depends on the business model and the contractual cash flow characteristics (SPPI criterion).

Business model

The business models foreseen in the standard are as follows:

- Business model whose objective is achieved by holding the asset to maturity to collect the contractual cash flows therefrom (Held to collect);
- Business model whose objective is achieved both by collecting the contractual cash flows from the asset and selling it (Held to collect and sell); and
- Other business models (*e.g.*, trading).

Evaluation of the business model

The business model reflects the way the Bank manages its assets from a cash-flow generation standpoint. Thus, it is important to understand whether the objective of the Bank is only to receive the contractual cash flows from the assets or whether it intends to receive the contractual cash flows and the cash flows resulting from the sale of the assets. If none of these situations apply (*e.g.*, financial assets are held for trading), the financial assets are classified as part of “other business models” and recognized at fair value through profit or loss.

The factors considered by the Bank in identifying the business model for a set of assets include past experience with respect to the way (i) cash flows are received, (ii) asset performance is assessed and reported to management, (iii) risks are assessed and managed and (iv) directors are remunerated.

Financial assets at fair value through profit or loss are held essentially for the purpose of being sold in the short term, or to form part of a portfolio of jointly-managed financial instruments, for which there is clear evidence of a recent pattern of short-term gains. These assets are classified under “other business models” and recognized at fair value through profit or loss.

The evaluation of the business model does not depend on the intentions for an individual instrument, but for a set of instruments, and considers the frequency, the value, the sales calendar in previous periods, the reasons for the referred sales and the expectations regarding future sales. Sales that are infrequent, or insignificant, or close to the maturity of the

asset and those motivated by an increase in the credit risk of the financial assets, or to manage concentration risk, among others, may be compatible with the model of holding assets to receive contractual cash flows.

If a financial asset contains a contractual clause that can modify the timing or the amount of the contractual cash flows (such as early amortisation or extension of term clauses), the Bank determines whether the cash flows that will be generated during the life of the instrument, due to the exercise of that contractual clause, are solely payments of principal and interest on the principal amount outstanding.

In the event that a financial asset includes a periodic interest rate adjustment, but the frequency of such adjustment does not coincide with the benchmark interest rate (for example, the interest rate is adjusted every three months), the Bank assesses, at the time of the initial recognition, this inconsistency in the interest component to determine whether the contractual cash flows represent solely payments of principal and interest on the principal amount outstanding.

Contractual conditions that, at the time of the initial recognition, have a minimal effect on cash flows or depend on the occurrence of exceptional or highly unlikely events (such as redemption by the issuer) do not prevent their classification in portfolios at amortised cost or at fair value through other comprehensive income.

SPPI assessment

When the business model involves holding assets in order to (i) collect contractual cash flows or (ii) collect contractual cash flows and sell these assets, the Bank assesses whether the cash flows of the financial instrument correspond solely to payments of principal and interest on the principal amount outstanding (SPPI test). In this assessment, the Bank considers whether the contractual cash flows are consistent with a basic loan agreement, that is, the interest includes only considerations regarding the time value of money, credit risk and a profit margin that is consistent with a basic loan agreement. When the contractual terms introduce exposure to risk or variability in cash flows that are inconsistent with a basic loan agreement, the financial instrument is classified and measured at fair value through profit or loss.

The financial assets with embedded derivatives are considered in their entirety, when determining whether the cash flows correspond solely to payments of principal and interest on the principal outstanding (SPPI test).

Financial liabilities at amortised cost

The Bank measures a financial asset at amortised cost if it complies, simultaneously, with the following characteristics and if it is not designated at FVTPL by option (use of the Fair Value Option):

- The financial asset is held in a business model whose main purpose is to hold the assets to collect its contractual cash flows (HTC – Held to collect); and
- Its contractual cash flows occur on specific dates and correspond solely to payments of principal and interest on the principal amount outstanding (SPPI).

These instruments are initially recorded at fair value and subsequently valued at amortised cost, based on the effective interest rate method, and are subject to impairment tests.

This category of Financial assets at amortised cost includes Other loans and advances to credit institutions, Loans and advances to customers, debt securities and other financial instruments (Investments at amortised cost) managed based on a business model whose objective is to receive its contractual cash flows.

Financial assets at fair value through other comprehensive income

The Bank measures a financial asset at fair value through other comprehensive if it complies, simultaneously, with the following characteristics and if it is not designated at FVTPL by option (use of the Fair Value Option):

- The financial asset is held in a business model whose objective is to hold the assets to collect its contractual cash flows and/or sell them (HTC and Sell – Held to collect and Sell); and
- Its contractual cash flows occur on specific dates and correspond solely to payments of principal and interest on the principal amount outstanding (SPPI).

On initial recognition of an equity instrument that is not held for trading, the Bank may irrevocably assign it to this category. This designation is made on a case-by-case, investment-by-investment basis and is only available for financial instruments that meet the definition of equity instruments under IAS 32 and may not be used for financial instruments classified as equity instruments at issuer level under the exceptions provided for in paragraphs 16A to 16D of IAS 32.

Financial assets at fair value through other comprehensive income are initially recorded at fair value. Gains and losses relating to subsequent changes in fair value are reflected in a specific item of equity (Reserves of financial assets at fair value through other comprehensive income) until they are sold, where they are reclassified to profit or loss for the period, except for equity instruments which are reclassified to retained

earnings. Additionally, they are subject, since their initial recognition, to calculation of impairment losses (debt instruments only).

Interest income is calculated in accordance with the effective interest rate method and recognized in the income statement under the caption Interest income and similar income. Income from variable-income securities is recognized in the income statement caption Income from equity instruments on the date when it is attributed. In accordance with this criterion, prepaid dividends are recorded as income in the year the distribution is decided.

As at December 31, 2025 and December 31, 2024, the Bank did not hold any financial assets recorded at fair value through other comprehensive income.

Financial assets at fair value through profit or loss

All financial assets that are not measured according to the methods described above are measured at fair value through profit or loss.

Debt instruments whose contractual cash flow characteristics do not meet the SPPI criterion, and which would otherwise be measured at amortised cost or at fair value through other comprehensive income, are required to be measured at fair value through profit or loss.

This category also includes assets acquired for the purpose of realizing gains from short-term fluctuations in market prices. This category also includes derivative financial instruments, excluding those that comply with hedge accounting requirements. By default, equity instruments are also classified at fair value through profit or loss, unless the entities opt for the irrevocable classification at fair value through other comprehensive income as referred to above.

In addition, at initial recognition, the Bank may irrevocably classify a financial asset, which otherwise meets the requirements to be measured at amortised cost or at fair value through other comprehensive income, as at fair value through profit or loss if the classification significantly eliminates the accounting mismatch that would otherwise exist (Fair Value Option).

Financial assets classified in this category are initially recognized at fair value. Gains and losses arising from subsequent valuation at fair value are recognized in the income statement. Income is reflected in the respective captions of Interest and similar income.

Equity instruments

Equity instruments are instruments that meet the definition of capital from the issuer's perspective, which means, instruments that do not contain a contractual payment obligation and that evidence a residual interest in the issuer's net assets. An example of equity instruments are ordinary shares.

Investments in equity instruments are an exception to the general measurement criteria described above. The Bank exercises the option, upon initial recognition, to designate investments in equity instruments as financial assets at fair value through other comprehensive income or as financial assets at fair value through profit or loss.

2.3.2. Classification of financial liabilities

An instrument is classified as a financial liability when there is a contractual obligation for its settlement to be realized through the delivery of cash or another financial asset, regardless of its legal form.

Financial liabilities are classified into the following categories:

I. Financial liabilities at amortised cost

Financial liabilities correspond essentially to Deposits from central banks and other credit institutions and Deposits from customers and other loans. These liabilities are initially measured at fair value, which normally corresponds to the consideration received, net of transaction costs, and are subsequently recorded at amortised cost, in accordance with the effective interest method.

II. Financial liabilities held for trading

This category includes derivative financial instruments with a negative fair value.

III. Financial liabilities at fair value through profit or loss (Fair Value Option)

The Bank designates, at initial recognition, certain financial liabilities at fair value through profit or loss (Fair Value Option) provided that at least one of the following requirements is met:

- the financial liabilities are managed, measured and analyzed internally based on their fair value;
- derivative operations are contracted to hedge these assets or liabilities economically, thus ensuring consistency in the measurement of the assets or liabilities and the derivatives (accounting mismatch); and
- the financial liabilities contain embedded derivatives.

2.3.3. Recognition and initial measurement of financial instruments

At the time of their initial recognition, all financial instruments are recorded at their fair value. For financial instruments that are not recorded at fair value through profit or loss, fair value is adjusted by adding or subtracting transaction costs directly attributable to their acquisition or issue. In the case of financial instruments at fair value through profit or loss, the directly attributable transaction costs are immediately recognized in the income statement.

Transaction costs are defined as expenses directly attributable to the acquisition or disposal of a financial asset, or to the issue or assumption of a financial liability, which would not have been incurred if the Bank had not carried out the transaction. These include, for example, commissions paid to intermediaries (such as promoters) and mortgage formalization expenses.

Financial assets are recognized in the balance sheet on the transaction date – the date on which the Bank commits to purchase the assets, unless there is a contractual stipulation or applicable legal figure that determines that the transfer of rights occurs at a later date.

At initial recognition, when the fair value of financial assets and liabilities differs from the transaction price, the entity should recognize this difference as follows:

- When the fair value is evidenced by a quotation on an active market of an equivalent asset or liability (that is, level 1 inputs) or based on a valuation technique that uses only observable market data, the difference is recognized as a gain or loss, and
- In the remaining cases, the difference is deferred, and the moment of initial recognition of the gain or loss is determined individually. This difference can then be (i) amortised over the life of the instrument, (ii) deferred until the fair value of the instrument can be determined using observable market data, or (iii) recognized through the liquidation of the asset or liability.

2.3.4. Subsequent measurement of financial instruments

After its initial recognition, the Bank measuresits financial assets at (i) amortised cost or at (ii) fair value through profit or loss.

Trade receivables from commercial operations that do not have a significant financing component and commercial loans and short-term debt instruments that are initially measured at the transaction price or by the principal outstanding, respectively, are valued at the aforementioned amount less impairment losses.

Immediately after initial recognition, an impairment is also recognized for expected credit losses (ECL), for financial assets measured at amortised cost, resulting in the recognition of a loss in results when the asset is originated.

Financial liabilities are initially recorded at fair value less transaction costs incurred and subsequently at amortised cost, based on the effective interest rate method, with the exception of financial liabilities designated at fair value through profit or loss, which are recorded at fair value.

The subsequent measurement of financial liabilities is generally performed at amortised cost. There are some exceptions to this measurement basis, namely:

- Financial liabilities that are held for trading or when fair value option is applied – the subsequent measurement consists of fair value through profit or loss.
- Financial guarantees – the subsequent measurement consists of the higher of the corresponding expected credit losses and the amount of the initial fee received less the amounts already recognized as revenue in accordance with IFRS 15.

2.3.5. Income and expenses of financial instruments

Income and expenses from financial instruments at amortised cost are recognized according to the following criteria:

I. Interest is recorded in the income statement under Interest and similar income and Interest and similar expense, using the effective interest rate of the transaction on the gross book value of the transaction (except for impaired assets (stage 3) where the interest is applied on the book value net of impairment) and the interest already recognized and unpaid relating to overdue loans for more than 90 days is reversed, being recognized only when received since it is considered that its recovery is remote, and recognized off balance sheet; and

II. The remaining changes in value will be recognized in the income statement as income, or expenses, when the financial instrument is derecognized from the balance sheet under Net gains/(losses) on investments at amortised cost, when it is reclassified, and in the case of financial assets, when there are impairment losses or gains through recovery, which are recorded under Impairment of loans and advances to customers net of reversals and recoveries, in the case of loans and advances to customers or under Impairment of other financial assets net of reversals and recoveries, in the case of other financial assets.

In order to determine the effective interest rate, the Bank estimates future cash flows considering all contractual terms of the financial instrument, without considering possible impairment losses. The calculation includes all fees paid or received considered as part of the effective interest rate, transaction costs and all other premiums or discounts directly related with the transaction, except for assets and liabilities at fair value through profit or loss.

Treasury Bonds issued in national currency indexed to the exchange rate of the United States Dollar (hereinafter US Dollar) are subject to exchange rate adjustments. The result of the exchange rate adjustments is reflected in the income statement for the period in which it occurs. The result of the exchange rate adjustment of the nominal value of the security is recorded in the caption Foreign exchange gains/(losses) and the result of the exchange rate adjustment of the discount and accrued interest is recorded under Net interest income – Interest and similar income.

Income and expenses from financial instruments at fair value through profit or loss are recognized according to the following criteria:

I. Changes in fair value are recorded directly in the income statement, separating the portion attributable to the instrument's income, which is recorded as interest or dividends according to its nature under the captions Interest and similar income and Income from equity instruments, respectively, and the remainder, which is recorded as results of financial operations under the caption Net gains/(losses) on financial assets and liabilities at fair value through profit or loss; and

II. Interest on debt instruments is recorded in the income statement under the caption Interest and similar income and is calculated using the effective interest rate method.

2.3.6. Reclassification between categories of financial instruments

Financial assets are not reclassified after their initial recognition, except in the period after the Bank changes its business model for managing financial assets. Financial assets are reclassified to other categories only if the business model used in their management is changed. In this case, all affected financial assets are reclassified. The reclassification is applied prospectively from the date of reclassification, and any previously recognized gains, losses (including those related to impairment) or interest are not restated. Financial assets, at the date of their reclassification, are measured at fair value.

The reclassification of investments in equity instruments measured at fair value through other comprehensive income, or financial instruments designated at fair value through profit or loss, is not allowed.

The reclassification of financial liabilities is not allowed.

During the period ended December 31, 2025, the Bank did not reclassify any financial instruments.

2.3.7. Fair value

In accordance with IFRS 13, financial instruments at fair value are measured according to the valuation levels described in Note 31.4.

2.3.8. Modification of loans and advances

The Bank occasionally renegotiates or modifies contractual cash flows from loans and advances to customers. In this situation, the Bank assesses whether the new terms of the contract are substantially different from the original terms. The Bank performs this analysis considering, among others, the following factors:

- If the debtor is in financial difficulty, whether the modification only reduces the contractual cash flows to an amount that the debtor is expected to be able to pay;
- If any significant new term has been introduced, such as profit-sharing or an equity-based return, which substantially affects credit risk;
- Significant extension of the maturity of the contract when the debtor is not in financial difficulties;
- Significant change in the interest rate;
- Change in the currency in which the loan was contracted; and
- Inclusion of a collateral, a guarantee or other improvement associated with the loan, which significantly affects the credit risk associated with the loan.

If the terms of the contract are significantly different, the Bank derecognizes the original financial asset and recognizes the new asset at fair value, calculating its new effective interest rate. The renegotiation date is considered the initial recognition date for the purpose of calculating the impairment, including for the purpose of assessing whether a significant increase in credit risk has occurred. However, the Bank also assesses whether the newly recognized financial asset is impaired at initial recognition, especially when the renegotiation is related to the fact that the debtor has not made the payments originally agreed. Differences in the book value are recognized in the income statement, as a derecognition gain or loss.

If the terms of the contract are not significantly different, the renegotiation, or modification, does not result in derecognition and the Bank recalculates the gross book value based on the revised cash flows of the financial asset and recognizes a gain or loss from this modification in the income statement.

The new gross book value is recalculated discounting the modified cash flows at the original effective interest rate (or adjusted effective interest rate for impaired financial assets, originated or acquired).

After the modification, the Bank can determine that the credit risk has improved significantly and that the assets have moved from Stage 3 to Stage 2 (lifetime ECL) or from Stage 2 to Stage 1 (12 month-ECL). This situation can only occur when the performance of the modified asset is in accordance with the new terms of the contract for a period of twelve consecutive months. Additionally, the Bank continues to monitor whether there has been a significant increase in the credit risk of these assets, applying specific models for modified assets.

2.3.9. Derecognition not resulting from a modification

Financial assets are derecognized when the associated cash flows are extinguished, collected or disposed of to third parties and (i) the Bank substantially transfers all risks and rewards of ownership of the asset, or (ii) the Bank neither transfers nor substantially holds all the risks and rewards of ownership of the asset and does not hold control over the asset. Gains and losses obtained from the definitive sale of loans and advances to customers are recorded under Other operating income/(expenses). These gains or losses correspond to the difference between the sales value set and the book value of those assets, net of impairment losses.

The guarantees granted by the Bank (shares and bonds) through repurchase agreements and securities lending operations are not derecognized because the Bank holds substantially all the risks and rewards based on the pre-established repurchase price, and therefore the derecognition criteria are not met (see Note 2.4.).

Financial liabilities are derecognized when the underlying obligation is settled, expires or is canceled.

2.3.10. Write-off policy

The Bank writes off financial assets, in part or in whole, when it concludes that there is no reasonable expectation of collection. The indicators that demonstrate that there is no reasonable expectation of collection are (i) the shutdown of the activity and (ii) the cases in which the recovery depends on the collection of a collateral, but in which the value of the collateral is so low that there is no reasonable expectation of fully recovering the asset.

The rules implemented for the selection of loans that may be written off from assets are as follows:

- The loans cannot be under a risk-sharing protocol;
- The loans must be past due for more than 210 days; and
- The loans cannot be marked as overdue renegotiated loans or be part of an active payment agreement.

2.3.11. Impairment of financial assets

The Bank determines impairment losses for debt instruments that are measured at amortised cost, as well as for other exposures that have an associated credit risk such as bank guarantees and commitments assumed.

The requirements of IFRS 9 aim to recognize expected losses from operations, assessed on an individual or collective basis, considering all reasonable, reliable, and duly substantiated information that is available, including information from a forward-looking perspective.

Impairment losses on debt instruments that are measured at amortised cost are recognized against an accumulated impairment caption in the balance sheet, which reduces the book value of the asset, while impairment of assets measured at fair value through other comprehensive income is recognized against other comprehensive income.

Impairment losses arising from the granting of loans and advances to customers are recognized in the income statement under the caption Impairment losses on loans and advances to customers, net of reversals and recoveries and those of the remaining financial assets under the caption Impairment losses on other financial assets, net of reversals and recoveries.

Impairment losses on exposures that have an associated credit risk and that are not positions recorded in assets are recorded as a provision under Provisions in liabilities, in the balance sheet. Charges for the period and reversals are recorded under the caption Provisions, net of reversals in the income statement.

Impairment model of loans and advances to customers

The methodology adopted by the Bank foresees, in a first stage, the identification of Economic Groups (and Retail customers, hereinafter "Retail") considered as individually significant. These are analyzed individually and the remainder collectively, according to homogeneous risk groups. The following criteria for selecting Groups (and Retail) that are individually significant are considered:

- Customers/economic groups with no signs of impairment with exposure greater than or equal to 0.1% of FPR;
- Customers/economic groups with signs of impairment with exposure greater than or equal to 0.02% of FPR; and
- Customers restructured due to financial difficulties with exposure above AOA 50 million.

Entities/economic groups in the “Financial Institutions” segment, regardless of whether they meet the criteria defined for Individual Impairment Analysis, will not be subject to individual assessment.

In the collective analysis methodology, the Bank groups customers into homogeneous risk segments, namely the following:

- Consumer credit
- Overdrafts
- Credit cards
- Car loans
- Mortgages
- Small and Medium-sized Businesses – Less Significant exposures
- Large Businesses – significant exposures
- State
- Credit institutions

The amount of impairment losses is determined according to whether there is a significant deterioration of the risk since initial recognition, and whether a default event occurs. Consequently, the Bank classifies financial instruments into three stages of impairment, as described below:

- **Stage 1:** Classification to be applied on initial recognition of the financial instruments or in the event of not meeting any of the classification criteria of the other impairment stages;
- **Stage 2:** Classification to be applied to financial instruments that show a significant increase in credit risk (SIRC) since their origin;
- **Stage 3:** All financial instruments that are in default according to the Bank's internal definition and in line with Instruction 8/2019 will be classified under this stage, issued by BNA.

The Stage 2 criteria for classification are as follows:

Classification

- Product contracts other than overdrafts, with credit more than 30 days overdue;
- Overdraft product contracts with credit more than 15 days overdue;
- Customer with at least one credit operation restructured due to financial difficulties in the last 6 months;
- Customers with an operation in litigation in the last 5 years;
- Customers with bounced checks and/or inhibited from using checks according to the information available at CIRC (Angolan Centralized Credit Register);
- Customers with unauthorized overdrafts;
- Customers with revolving operations (overdrafts, credit cards and escrow accounts) above the limit formally contracted, or revolving credit operations permanently used at, at least, 95% of the limit initially contracted in the last 6 months;
- Credit with a material decrease in the value of the collateral (greater than or equal to 20%) when this results in a funding-collateral ratio greater than 80%;

- Transactions restructured in default (stage 3 on the origination date) and which, on the reporting date, do not meet stage 3 classification criteria;
- Classification of Customer operations due to Significant Increase in Credit Risk (SICR), whenever the Customer's exposure to these criteria is greater than 20% of the Customer's total exposure;
- POCI (Purchased or Originated Credit Impaired) operations that do not have stage 3 classification criteria on the reporting date;
- Unrestructured operations that have not complied with the quarantine period in stage 2 (6 months after clearing default); and
- Restructured operations that have not been restructured in default but have not yet been cleared of restructuring due to financial difficulties.

For individually analyzed Customers the following additional criteria are considered:

- Customers with a credit operation in the financial system more than 90 days in arrears, principal or interest written off/canceled or in litigation;
- Customer subject to Special Recovery Programs;
- Customers with overdue debts to the Tax Administration and/or Social Security;
- Bank pledges or expectation of insolvency or subject to a financial and/or operational recovery/reorganization process; and
- Significant change in the Customer's operating results (Companies), for customers subject to Individual Analysis.

Propagation

- Propagation of all operations to Stage 2 if the total exposure of the operation in Stage 2 is greater than or equal to 20% of the Customer's exposure.

Applicable only to Stage 3 Customers, the default classification criteria are as follows, provided they have (i) Absolute Materiality: >= AOA 5,000 of overdue loans; (ii) Relative materiality: 1% Corporate and 2.5% Retail, of the Customer's asset exposure.

Classification of credit as default

- Contracts with overdue credit for more than 90 days;
- Restructured contracts with overdue credit for more than 30 days; and
- Restructurings with material loss or grace period of the principal or arising from contracts already at Stage 3.

For individually analyzed customers the following additional criteria are considered:

- Customers in bankruptcy/insolvency or with expectation of bankruptcy/insolvency.

Propagation

- Propagation of marking of default when the default exposure represents 20% of total customer exposure.

Declassification

- Contracts with overdue credit for more than 90 days: 12-month quarantine period (at least 6 months in Stage 3 and 6 months in Stage 2) with no default activation criteria; and
- Restructured credits: a quarantine period (at least 12 months) is applied with payment of principal and interest without overdue exposure for a period greater than 30 days.

In calculating collective impairment, the Bank considers the following credit risk parameters:

a) Exposure: the exposure at default (EAD) is the estimated amount outstanding in the event of default. This component is relevant for financial instruments that have a variable amortisation structure depending on the Customer use (credit current accounts, credit cards, in general any revolving product). The calculation of this estimate is based on the observation of historical data for debtors in respect of which default situations have been verified, relating the levels of use of the limits at the time of default with those in the previous 12 months. In this context, future levels of use are estimated according to the nature of the product, the current levels of use and the value of the cap.

b) Probability of default (PD): the Bank applies a methodology for calculating the probability of default forecast for each borrower for the entire loan portfolio and for each risk segment. This parameter is used directly to calculate the ECL of operations in Stage 1 and 2 of impairment. Thus, for stage 1, the period of 12 months should be considered and, for stage 2, the residual maturity of the operation.

c) Loss given default (LGD): is the percentage of debt that will not be recovered in the event of a Customer default. The calculation of the LGD is performed based on historical internal information, considering the cash flows associated with the contracts from the time of default until their settlement or until the moment when there are no relevant recovery expectations.

The parameters considered for determining impairment are generally based on the internal historical experience of defaults and recoveries of the Bank. The parameters are reviewed and updated periodically to reflect the economic position and to be representative of the current economic context at all times.

The models also incorporate prospects of future economic evolution (forward looking) to determine the expected loss considering the macroeconomic factors that are related to the probability of default and/or recoverability indicators of the Bank, namely:

- Real GDP
- Growth rate of non-oil GDP
- (Parallel) USD/AOA exchange rate – end of period
- Luanda Consumer Price Index
- Real Effective Exchange Rate (REER)

In the review processes, the necessary improvements will also be made as detected in the backtesting exercises.

Impairment model for other financial instruments (Deposits at other credit institutions and Investments at amortised cost)

The Bank classifies exposures into stages of impairment with regard to financial instruments measured at amortised cost.

Stage 1 – Financial assets with no significant increase in credit risk since initial recognition

Assets that do not have a significant increase in credit risk since initial recognition are classified in Stage 1. The calculation of impairment losses for these exposures with a maturity of 12 months.

In assessing the existence of a significant increase in the credit risk for the financial asset portfolio, an increase of more than two notches is considered for a significant increase in the credit risk, in accordance with the information published by the international rating agency Moody's.

Stage 2 – Financial assets with significant increase in credit risk since initial recognition

Whenever the existence of a significant increase in the counterparty's credit risk is determined, the exposure is classified as Stage 2.

For these exposures, the Bank measures the impairment losses over the respective residual maturity.

Stage 3 – Financial assets in default

This stage includes all financial instruments for which events of default have been verified for more than 90 days.

Impairment losses for debt securities, investments and cash and cash equivalents in other credit institutions are calculated based on the credit risk parameters (probability of default and loss given default) provided by the international rating agency Moody's.

2.4. Operations with repurchase or resale agreement

Securities sold under repurchase agreements (repos) at a fixed price or at a price equal to the sale price plus interest over the term of the transaction are not derecognized from the balance sheet and are revalued in accordance with the accounting policy of the category to which they belong. The corresponding liability is accounted for under Deposits from customers or Deposits from other credit institutions, as appropriate. The difference between the sale price and the repurchase price is treated as interest and is accrued over the life of the agreement using the effective rate method and recorded under Net interest income.

Securities purchased under resale agreements (reverse repos) at a fixed price or at a price equal to the purchase price plus interest over the term of the transaction, are not recognized in the balance sheet, and the purchase price is recorded under Investments at amortised cost or Other loans and advances to credit institutions, as appropriate. The difference between the purchase price and the resale price is treated as interest and is accrued over the life of the agreement using the effective interest rate method under Net interest income. The amounts receivable are collateralized by the associated securities.

2.5. Derivative financial instruments

The Bank can carry out derivative financial instrument operations, within the scope of its activity, to manage its own positions based on expectations of market developments or to meet the needs of its customers.

All derivative instruments are recorded on the trade date at fair value and changes in fair value are recognized in the income statement unless they qualify as cash flow hedges or net investments in foreign operating units. Derivatives are also recorded in off-balance sheet accounts at their reference value (notional value).

Derivative financial instruments are classified as hedging (provided that all designation conditions are met) or trading instruments, depending on their purpose.

Derivatives held for trading

Derivatives that are not considered in an accounting hedging relationship are considered as other financial instruments at fair value through profit or loss. When the fair value of the instruments is positive, they are presented under assets, when their fair value is negative, they are classified under liabilities, in both cases under financial assets or liabilities at fair value through profit or loss.

2.6. Investments in subsidiaries, associates and joint ventures

Investments in subsidiaries and associates are accounted in the Bank's financial statements at their historical cost less any impairment losses.

Subsidiaries are entities (including investment funds and securitization vehicles) controlled by the Bank. The Bank controls an entity when it is exposed to, or has rights to, the variability in returns arising from its involvement with that entity and can seize them through the power it has over the relevant activities of that entity (*de facto* control).

Associates are entities over which the Bank has significant influence but does not exercise control over their financial and operating policy. The Bank is presumed to have significant influence when it holds more than 20% of the voting rights of the associate. If the Bank holds, directly or indirectly, less than 20% of the voting rights, it is presumed that it does not have significant influence, except when that influence can be clearly demonstrated.

The existence of significant influence by the Bank is usually demonstrated in one or more of the following:

- Representation on the Board of Directors or equivalent governing body;
- Participation in policy-making processes, including participation in decisions about dividends or other distributions;
- Material transactions between the Bank and the investee;
- Interchange of management personnel; and
- Provision of essential technical information.

Impairment

The recoverable amount of investments in subsidiaries and associates is assessed whenever there are signs of impairment. Impairment losses are calculated based on the difference between the recoverable amount of investments in subsidiaries or associates and their book value. The identified impairment losses are recorded in the income statement and are subsequently reversed through profit or loss if there is a reduction in the estimated loss amount, in a subsequent period. The recoverable amount is determined based on the higher of the value in use of the assets and the fair value less costs to sell, calculated using valuation methodologies supported by discounted cash flow techniques, considering market conditions, time value of money and business risks.

2.7. Equity instruments

A financial instrument is classified as an equity instrument when it meets the definition of equity from the issuer's perspective, i.e., there is no contractual obligation for its settlement to be made by delivering cash or another financial asset to a third party, regardless of its legal form, evidencing a residual interest in the assets of the issuing entity after deducting all of its liabilities.

Transaction costs directly attributable to the issue of equity instruments are recorded against equity, as a deduction from the amount of the issue. The amounts paid and received for purchases and sales of equity instruments are recorded in equity, net of transaction costs.

Income from equity instruments (dividends) is recognized when the right to receive it is established and are deducted to equity.

2.8. Intangible assets and Property, plant and equipment

Intangible assets are only recognized when: i) they are identifiable; ii) it is probable that future economic benefits will flow from the asset and iii) the cost of the asset can be reliably measured.

The acquisition cost of intangible assets comprises: i) the purchase price, including costs with intellectual rights and fees and after deducting any discounts and ii) any cost directly attributable to the preparation of the asset for its intended use.

After the initial accounting, BFA measures its intangible assets according to the cost model.

Intangible assets, which correspond mainly to IT software, are recorded at acquisition costs, and are amortised on a straight-line basis over a three-year period.

Property, plant and equipment is recorded at acquisition cost less accrued amortisation and impairment losses. The cost includes expenditure that is directly attributable to the acquisition of the goods.

The acquisition cost of property, plant and equipment comprises the purchase price of the asset, expenses directly attributable to its acquisition and costs incurred in preparing the asset to be ready for its intended use. Financial costs incurred with loans obtained for the construction of qualifying tangible fixed assets are recognized as part of the construction cost of the asset.

Land is not depreciated.

Depreciation is calculated on a straight-line basis, according to the useful life estimated by the Bank, which corresponds to the following years of useful life:

	Years of useful life
Properties for own use (Buildings)	50
Work on rented buildings	10
Equipment:	
Furniture and material	10
IT equipment	3
Interior installations	10
Transport equipment	3 and 5
Machines and tools	6 and 7
Automatic data processing system (software)	3

As mentioned in Note 2.18., this caption includes right-of-use assets arising from lease agreements.

2.9. Non-current assets held for sale

Non-current assets are classified as non-current assets held for sale when their book value is intended to be realized mainly through a sale transaction rather than through their continued use in the Bank's activities.

The value of assets received as payment in kind is initially recorded at the lower of the fair value net of selling costs and the book value of the loan at the date the payment in kind was made.

When the valuation of the asset is higher than the outstanding amount of the credit operation, the Bank records the asset at the value of the credit at the time. When the valuation of the assets is lower than the book value of the loan operation, the difference must be recognized as a cost for the period.

Assets recorded under this caption are not amortised and are valued at the lower of book value and fair value. The fair value of these assets is determined based on periodic valuations performed by independent valuers. Whenever the value resulting from these valuations (net of costs to sell) is lower than the book value, impairment losses are recorded under Impairment of other assets, net of reversals and recoveries.

In addition, as these are assets whose fair value level in the IFRS 13 hierarchy corresponds mainly to level 3, given the subjectivity of some assumptions used in the valuations and the fact that there are external indications with alternative values, the Bank carries out internal analyses on the assumptions used, which may imply additional adjustments to their fair value.

2.10. Impairment of non-financial assets

When there are signs that an asset may be impaired, IAS 36 requires that its recoverable amount is estimated, and an impairment loss shall be recognized whenever the net book value of an asset exceeds its recoverable amount. Impairment losses are recognized in the income statement and are reversed in subsequent reporting periods, when the reasons that led to their initial recognition cease. For this purpo-

se, the new depreciated amount shall not exceed the book value that would be accounted, had no impairment losses been allocated to the asset, considering its depreciation.

The recoverable amount is determined as the higher of its fair value less costs to sell and its value in use, which is calculated based on the present value of the estimated future cash flows expected to be obtained from the continued use of the asset and its disposal at the end of its useful life.

On the date of derecognition of a non-financial asset, the gain or loss calculated as the difference between the fair value less costs to sell and the net book value is recognized in the income statement under Net gains/(losses) on sale of other assets.

2.11. Cash and cash equivalents

For the purposes of the cash flow statement, Cash and cash equivalents comprise balances with less than three months' maturity from the date of their initial recognition, including Cash and deposits at central banks and Deposits at other credit institutions (Notes 4 and 5), and do not include impairment losses.

2.12. Dividends

Dividends (income from equity instruments) are recognized in the income statement when the right to receive them is attributed. Dividends are recorded under Net gains/(losses) on financial operations, Net gains/(losses) on other financial instruments at fair value through profit or loss or other income, depending on the classification of the underlying instrument.

2.13. Commissions

Income from services and commissions is recognized as revenue from customer agreements to the extent that the performance obligations are satisfied:

- when they are obtained as the services are rendered, their recognition in profit or loss is made in the period to which they relate; and
- when they result from the rendering of services, their recognition is made when that service is completed.

When they are an integral part of the effective interest rate of a financial instrument, the income resulting from services and commissions are recorded in net interest income.

2.14. Employee benefits

Short-term benefits

Short-term benefits are reflected under Staff costs in the period to which it relates, in accordance with the accrual accounting principle.

The Bank grants variable remuneration to its employees and directors as a result of their performance (performance bonus). The Executive Committee of the Board of Directors is responsible for establishing the respective allocation criteria for each employee, and the Remuneration Committee is responsible for establishing the criteria at director level. The variable remuneration paid to employees and directors is recorded against profit or loss in the period to which they relate, although payable in the following year (Note 25).

In November 2022, Order 3923/22 ((Official Gazette) 123 of Series II) published the Addendum to the BFA Pension Fund and the New Pension Plan. The new Defined Contribution Pension Plan defines a mixed contribution system between the Associate (BFA) and the Employees and sets the Associate's rate at 7.5% on the pensionable salary, also setting a variable employee contribution of between 2.5% and 10% on the pensionable salary.

For defined-contribution plans, the liabilities related to the benefit attributable to the Bank's employees are recognized as an expense for the period when due (Note 25).

Long-term benefit

This type of long-term benefit is recognized when the Bank has a legal or constructive obligation to pay its employees long-term benefits.

The Bank grants variable remuneration to directors and 40% of this amount is paid over a 3-year period plus remuneration. In this respect, the remuneration is associated with the interest rate of Angolan treasury bonds, traded on the secondary market in the same currency and maturity as the deferral. The deferred charges are recorded under Interest and similar expense, and the principal is recorded under Staff costs, against Other liabilities.

Termination benefits

This type of benefit is recognized when the Bank terminates the employment contract before the employee reaches normal retirement date, or when an employee accepts the termination of employment in exchange for such benefit. The Bank recognizes a liability for termination benefits

on the earliest of the following dates: when the Bank is no longer able to withdraw the offer of benefits or when the Bank recognizes the costs of a restructuring, within the scope of the recognition of restructuring provisions. Benefits due more than 12 months after the end of the reporting period are discounted to their present value.

2.15. Income tax and other taxes

The total income tax recorded in the income statement includes current and deferred taxes.

Current tax

Current tax is calculated based on the taxable income for the period, which differs from the accounting income due to adjustments to the tax base resulting from expenses or income not relevant for tax purposes, or which will only be considered in future periods according to the applicable tax laws (Corporate Tax Code).

Deferred tax

Deferred tax corresponds to the impact on tax recoverable/payable in future periods resulting from deductible or taxable temporary differences between the balance sheet value of assets and liabilities and their tax base, used to determine taxable income. Deferred taxes are calculated based on the tax rate in force or substantially in force at the financial reporting date, and which is estimated to be applicable on the date of realization of deferred tax assets or on the date of payment of deferred tax liabilities.

Deferred tax liabilities are normally recorded for all taxable temporary differences, whereas deferred tax assets are only recognized up to the amount by which it is probable that future taxable income will exist, to allow for the use of the corresponding deductible temporary differences or tax losses carried forward. Additionally, deferred tax assets are not recorded in cases where their recoverability may be questionable due to other situations, including issues of interpretation of the tax legislation in force.

As at December 31, 2025 and December 31, 2024, the Bank has recorded deferred tax assets that offset the amount of deferred tax liabilities recorded, which are presented in the financial statements at their net value.

Corporate Tax

As at December 31, 2025, the Bank is subject to a Corporate Tax under the terms of the General Tax System. The taxation of its income is carried out under the terms of Law 26/20, of July 20 (which revoked Law 19/14, of October 22) and, currently, the applicable tax rate is 35%.

The income from public debt securities, resulting from Treasury Bonds and Treasury Bills issued by the Angolan State, whose issue is regulated by the Framework Law of Direct Public Debt (Law 16/02, of December 5) and by Regulatory Decrees 51/03 and 52/03, of July 8, as well as the other income obtained by the Bank subject to Capital Gains Tax (IAC), are exempt from Corporate Tax, in accordance with the provisions of Article 47(1)(b) of the Corporate Tax Code. This article expressly states that in order to determine the taxable amount, income or gains subject to IAC must be deducted from the net profit calculated under the terms of the previous articles.

Moreover, this law enshrined, among other changes, the eligibility for tax purposes of favorable and unfavorable exchange rate variations as accepted income and costs for tax purposes, respectively. Likewise, provisions/impairment on secured loans are no longer accepted as a cost, except for the part not covered.

In addition, the Corporate Tax is subject to provisional assessment in a single installment to be made by the end of August, calculated by applying a rate of 2% on the result derived from financial intermediation operations, ascertained in the first six months of the previous tax year, excluding income subject to capital gains tax (taxpayers who have presented losses in the previous year are exempt from the provisional assessment).

Tax returns are subject to review and correction by tax authorities for 5 (five) years, which may result in possible amendments to the taxable income for the years 2021 to 2025.

The recording of the tax impacts of the transactions carried out by the Bank corresponds to management's understanding of the tax treatment applicable under the legislation issued. In situations where the tax interpretation is questioned by the Tax Authorities (AGT), Management reassesses the probability (above or below 50%) that the adopted tax treatment will be accepted and consequently determines the most likely or expected amount of tax assets or liabilities to be recorded.

Capital Gains Tax (IAC)

The new IAC Code, approved by Presidential Legislative Decree 2/2014, of October 20, came into force on November 19, 2014.

The IAC is generally levied on income from the Bank's financial investments. The rate varies between 5% (in the case of interest received on debt securities which are admitted to trading on a regulated market and which have a maturity of three years or more) and 15%.

Notwithstanding the above, with respect to income from public debt securities, according to the understanding of the AGT and the Banco Nacional de Angola addressed to the Angolan Banks Association (in

Portuguese, *Associação Angolana de Bancos*) (letter from the Banco Nacional de Angola dated September 26, 2013), only income arising from securities issued on or after January 1, 2013 are subject to this tax.

This income from Treasury Bonds and Treasury Bills, issued by the Angolan State after January 1, 2013, is subject to IAC at the rate of 10% (5% in the case of debt securities admitted to trading on a regulated market and which have a maturity of three years or more).

On August 1, 2013, the automation process to withhold tax was initiated, by the BNA, in respect of IAC, in accordance with the provisions of Presidential Legislative Decree 5/11, of December 31.

IAC is generally levied on the income from the securities identified above and is withheld by the Bank. For these reasons, the Bank considers that the conditions to consider IAC as an income tax under IFRS are fulfilled.

Value Added Tax (VAT)

Law 7/19 introduced VAT, which has been in force since October 1, 2019, repealing the Consumption Tax Regulation (IC) and introducing relevant amendments to the Stamp Duty Code (IS).

Under the terms of the VAT Code approved by Law 7/19 and the amendments introduced by Law 17/19 of August 13, they are subject to this tax: (i) the transfer of goods and services carried out within national territory, for consideration, by a taxable person acting as such; and (ii) the import of goods.

Nevertheless, the VAT Code provides for the exemption of certain transactions, including the exemption applied to financial intermediation transactions, including those described in Annex III to this Code, except those which give rise to the payment of a specific and predetermined fee or consideration for their performance. This exemption does not entitle the taxable person to deduct the VAT incurred on the acquisition of goods and services connected with exempt transactions.

It should be noted that the VAT rate in force in Angola, applicable to transactions subject and not exempt from VAT, is 14%. Additionally, and in accordance with Article 21(2) of the VAT Code, commercial banks must withhold 50% of the tax included in the invoice or equivalent document issued by the taxpayer at the time of transfer of goods or rendering of services (except for the transfers of goods or services listed as excluded from this withholding tax). In this regard, the withholding of this tax must be made in the periodic VAT return for the month in which this tax becomes chargeable under the terms of Article 21(3) of the VAT Code (i.e., upon receipt of the respective invoice or equivalent document by the entities subject to the withholding VAT system).

However, Instruction 000003/DNP/DSIVA/AGT/2020, issued by the Angolan tax authorities, has clarified that transfers of goods to any withholding entities whose payment is made by debit in the account, with the exception of the State, are exempt from withhold. Examples of these situations are transfers of goods within the scope of banking and financial operations in which the Institutions debit the customer's account, namely: (i) the transfer of leased assets to the respective lessee when the stipulated purchase option is exercised, as well as (ii) the sale of point-of-sale (POS) systems as part of the institutions' provision of payment card acceptance services to their customers.

Under the terms of Article 10(1) of the VAT Code, for the purposes of this tax, and as a general rule, the rendering of services takes place within the national territory when the purchaser has domicile, head office or fixed establishment therein for which the services are acquired. In this context, Article 29(2) of the VAT Code, in conjunction with Article 2(1)(d) of the same tax compendium, provides for a reverse charge mechanism, whereby "whenever the purchaser is a taxable person, the tax is payable by that purchaser, in respect of services rendered within national territory, under Article 10 of the VAT Code, where the service provider is a non-resident taxable person and does not have a fixed establishment in national territory", i.e., the purchaser, a VAT taxpayer in Angola, must (self)assess the Angolan VAT due on the rendering of services in Angola, when these are rendered by non-resident suppliers.

Moreover, considering the Bank is a taxable person that carries out transactions which grant the right to deduct (i.e., transactions subject to VAT) and transactions which do not grant the right to deduct (i.e., transactions which are exempt from this tax under the aforementioned terms), the VAT incurred by the Bank on its purchases of goods and services is only partially deductible using the *pro rata* method.

Nevertheless, the Bank, as a taxable person subject to the general VAT system, may, under the terms of Article 27(2) of the VAT Code, adopt the actual allocation method regarding the VAT incurred on goods for sale. This method of deduction consists of the possibility of deducting all the

tax incurred in the acquisition of goods in transactions which give rise to a right to deduct but excludes the possibility of deducting the tax incurred in transactions which do not give rise to this right, under the terms of Articles 22 and 24 of the VAT Code. The goods whose tax may be deducted according to the actual use method are subject to prior authorization by the Tax Authorities. Additionally, Instruction 000003/DNP/DSIVA/AGT/2020, referred to below, established that credit institutions may adopt the actual allocation method to deduct the VAT incurred on the acquisition of goods and services "exclusively used" to carry out:

I. Financial lease operations;

II. Financial operations carried out by institutions without head office or permanent establishment in national territory ("correspondent banks") for Angolan institutions;

III. Operations covered by the provisions of Article 6(3) of the VAT Code, namely the re-invoicing of goods and/or services acquired by the institutions in their own name, but on behalf of third parties, to whom the respective goods and/or services are re-invoiced, with a view to obtaining a refund (cost recovery).

For the purposes of VAT deduction according to the mentioned method, credit institutions must prepare a letter addressed to the VAT Services Department (in Portuguese, *Direcção dos Serviços do IVA*), requesting the amendment of the statement on the commencement of operations, as well as the respective compliance with the obligations foreseen in the VAT Code regarding the accounting record of the operations, in order to allow the control of the operations whose tax was deducted according to the actual allocation method.

Moreover, the Bank is also required to comply with the invoicing rules under the Legal Regime of Invoices and Equivalent Documents (in Portuguese, *Regime Jurídico das Facturas e Documentos Equivalentes* (RJFDE)), in force since April 2019. Within this scope, the economic agents with a turnover equal or superior to kwanzas equivalent to USD 250 thousand must issue the invoices or equivalent documents through a certified invoicing system.

Property Tax

In accordance with the provisions of Law 20/20, published on July 9, which approved the new Property Tax Code and revoked the previous law, the Bank withholds Property Tax at a rate of 15% (considering that the taxable amount of these properties corresponds only to 60% of the value of the rents received during the year, since the applicable tax rate is 25%), on the payment or delivery of rents on rented property, with the exception of land for construction, for which Property Tax will be due at a rate of 0.6% of the asset value.

Property Tax will be due on non-rented property in accordance with the following ranges:

- A rate of 0.1% on the asset value, applicable to real estate with an asset value below AOA 5,000,000;
- A fixed value of AOA 5,000 for properties with an asset value above AOA 5,000,000 and below AOA 6,000,000;
- A rate of 0.5% on the asset value exceeding AOA 5,000,000, applicable to real estate with an asset value above AOA 6,000,000.

In the transfer with or without consideration of property, the taxable amount corresponds to the asset value as stated in the land registry at the date of transfer, the value determined by evaluation, in the case of an omitted building, or the declared value, whichever is greater. The transfer of real estate assets is subject to property tax at the rate of 2%, the charge and liability for settlement of which should fall on the Bank whenever it acts as purchaser.

Other taxes

The Bank is also subject to indirect taxes, namely customs duties, stamp duty, employment income tax, as well as other taxes, namely the Special Contribution on Foreign Exchange Transactions, which, in accordance with Law 15/23, of December 29, which came into force on January 1, 2024, is applicable to all transfers made with a national registered office or domicile, within the scope of contracts for the provision of services, technical assistance, consultancy and management, capital operations and unilateral transfers.

2.16. Provisions and contingent assets and liabilities

Provisions

A provision is set up when there is a present obligation (legal or constructive) as a result of a past event for which the future outflow of resources is probable and can be reliably measured. The provision amount corresponds to the best estimate of the amount to be disbursed to settle the liability, at the balance sheet date. Provisions are measured at the present value of the estimated costs to settle the obligation using a pre-tax interest rate, which reflects the market value, for the discount period and for the risk of the provision in question.

If the future expenditure of resources is not likely, it is a contingent liability, and is subject to the respective disclosure, in accordance with the requirements of IAS 37 – Provisions, contingent liabilities and contingent assets.

Provisions related to legal proceedings, opposing BFA to third parties, are constituted in accordance with internal risk assessments carried out by the Board of Directors, with the support and advice of its legal advisors.

Provisions for loan commitments and financial guarantees provided are measured according to the impairment model implemented, as described in Note 2.3.11.

Provisions are reviewed at each balance sheet date and adjusted to reflect the best estimate and are reversed against profit or loss in the proportion of the payments that are not probable.

Provisions are derecognized through their use for the obligations for which they were initially recognized or for the cases that the situations were no longer observed.

Contingent Assets

Contingent assets are not recognized in the financial statements, being disclosed when it is probable that there will be a future economic inflow of resources.

Contingent Liabilities

Contingent liabilities are not recognized in the financial statements but are covered by IAS 37 and disclosed whenever the possibility of an outflow of resources involving economic benefits is not remote. The Bank records a contingent liability when:

I. it is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not entirely within the Bank's control; or,

II. it is a present obligation that arises from past events, but is not recognized because:

   a) it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or,

   b) the amount of the obligation cannot be measured with sufficient reliability.

Identified contingent liabilities are subject to disclosure unless the possibility of an outflow of resources embodying economic benefits is remote.

2.17. Financial and performance guarantees

Financial guarantees

Financial guarantees are contracts that require the issuer to make payments in order to compensate the holder for losses incurred, as a result of breaches of the contractual terms of debt instruments, namely the payment of the respective principal and/or interest.

Financial guarantees issued are initially recognized at their fair value. Subsequently, these guarantees are measured at the higher (i) of the fair value initially recognized and (ii) the amount of any obligation arising from the guarantee contract, measured at the balance sheet date. Any change in the amount of the obligation associated with financial guarantees issued is recognized in the income statement.

Financial guarantees issued by the Bank usually have a defined maturity and a periodic fee charged in advance, which varies according to the counterparty risk, amount, and performance of the contract. On this basis, the fair value of the guarantees, on the date of their initial recognition, is approximately equivalent to the value of the initial commission received, considering that the agreed conditions are market conditions. Thus, the amount recognized on the contracting date equals the amount of the initial commission received, which is recognized in the income statement during the period to which it relates. Subsequent commissions are recognized in the income statement, in the period to which it relates.

Performance guarantees

Performance guarantees are contracts that result in one party being compensated if it fails to perform its contractual obligation. Performance guarantees are initially recognized at fair value, which is normally stated by the amount of commissions received over the life of contract. Upon breach of contract, the Bank has the right to revert the guarantee, with the amounts being recognized in Loans and advances to customers, following the transfer of the loss compensation to the guarantee beneficiary.

2.18. Leases

IFRS 16 sets out requirements regarding the scope, classification/recognition and measurement of leases:

- from the lessor's perspective, leases continue to be classified as finance leases or operating leases;
- from the lessee's perspective, the standard defines a single accounting model for lease agreements that results in the recognition of a right-of-use asset and a lease liability for all lease agreements except

for leases with a period of less than 12 months or for leases of low value assets in which cases the lessee may opt for the recognition exemption provided for in IFRS 16, and, in that case, should recognize the lease payments associated with those contracts as External supplies and services.

The Bank has opted not to apply this standard to short-term lease agreements of less than or equal to one year and to lease agreements where the underlying asset has low value, and the option of not applying this standard to leases of intangible assets has also been used.

Definition of a lease

A contract is or contains a lease if it conveys the right to control the use of an identified asset, that is, obtaining substantially all of the economic rewards of its use, and the right to direct the use of that identified asset, for a certain period of time in exchange for consideration.

Impacts from the lessee's perspective

The Bank recognizes for all leases, except for leases with a period of less than 12 months or for leases of low-value assets:

- a right-of-use asset, initially measured at cost, considering the Net Present Value (NPV) of the lease liability, plus payments made (fixed and/or variable) less lease incentives received, penalties for termination (if reasonably certain), as well as any cost estimates to be incurred by the lessee in dismantling and removing the underlying asset and/or restoring the location where it is located. Subsequently, it is measured according to the cost model (subject to depreciation/amortisation according to the lease term of each agreement and to impairment tests);
- a lease liability, initially recorded at the present value of the future lease cash flows (NPV), which includes:
  - fixed payments, less leasing incentives receivable;
  - variable lease payments that depend on an index or rate, initially measured using the index or rate at the start date of the agreement;
  - the amounts payable by the lessee as residual value guarantees;
  - the exercise price of a call-option, if the lessee is reasonably certain to exercise that option; and
  - sanction payments for the termination of the lease if the lease term reflects the exercise of a lease termination option by the lessee.

The Bank defines a reduced unit value as USD 5,000.

The lease liability is measured at amortised cost using the effective interest rate method.

Since the interest rate implicit in the lease cannot be readily determined (paragraph 26 of IFRS 16), the lease payments are discounted at the lessee's incremental borrowing rate which incorporates the risk-free interest rate curve (swap curve), plus a risk spread of the Bank, applied over the weighted average term of each lease agreement. For open-ended contracts, this date is considered to be the end date of the lease. For other open-ended contracts, the period within which the lease will be enforceable is assessed, as well as any economic penalties associated with the lease. When assessing enforceability, the specific clauses of the contracts are considered, as well as the legislation in force regarding Urban Leases.

Subsequently, the lease liability is measured as follows:

- by an increase in its carrying amount to reflect interest thereon;
- by a decrease in its carrying amount to reflect lease payments; and
- the carrying amount is remeasured to reflect any revaluations or changes in the lease, as well as to incorporate the revision of lease payments fixed in substance and the revision of the lease term.

The Bank remeasures a lease liability, and calculates the respective adjustment related to the right-of-use asset, whenever:

- there is a change in the lease term or in the assessment of a call-option over the underlying asset, in which case the lease liability is remeasured, discounting the revised lease payments and using a revised discount rate;
- there is a change in the amounts payable under a residual value guarantee, or in the future lease payments resulting from the change in an index or rate used to determine those payments, in which case the lease liability is remeasured by discounting the revised lease payments using an unchanged discount rate (unless the change in the lease payments results from a change in variable interest rates, in which case a revised discount rate should be used); and
- a lease agreement is changed, but such lease change is not accounted for as a separate lease, in which case the lease liability is remeasured, discounting the revised lease payments using a revised discount rate.

Right-of-use assets are depreciated from the lease start date until the end of the useful life of the underlying asset, or until the end of the lease term, whichever is earlier. If the lease transfers the ownership of the underlying asset, or if the cost of the right-of-use asset reflects the fact that the Bank will exercise a call-option, the right-of-use asset should be depreciated/amortised from the lease start date until the end of the useful life of the underlying asset.

The estimated useful life of the right-of-use assets is determined following the same principles as for Property, plant and equipment.

In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted by certain remeasurements of the lease liability.

Depreciation/amortisation begins on the date the lease takes effect.

Accounting for leases from the lessee's perspective in the Bank's financial statements is as follows:

In the income statement:

- the interest expense on lease liabilities is recorded under Net interest income;
- the amounts relating to short-term lease agreements and lease agreements for low-value assets are recorded under Other administrative expenses; and
- the cost of depreciation of right-of-use assets is recorded under Depreciation and amortisation for the period.

In the balance sheet:

- right-of-use assets recognized under Property, plant and equipment; and
- the value of lease liabilities recorded under Other liabilities.

Impact from the lessor's perspective

As at December 31, 2025 and December 31, 2024, the Bank has no lease agreements in which it is the lessor.

2.19. Earnings per share

Basic earnings per share are calculated by dividing the net income attributable to shareholders of the Bank by the weighted average number of ordinary shares outstanding, excluding the average number of own shares held by the Bank.

For the diluted earnings per share, the average number of ordinary shares outstanding is adjusted to reflect the effect of all potential ordinary shares treated as dilutive. Contingent or potential issues are treated as dilutive when their conversion into shares decreases earnings per share.

If earnings per share change as a result of an issue with a premium or discount or other event that changes the potential number of ordinary shares, or changes in accounting policies, the calculation of earnings per share for all periods presented is adjusted retrospectively (see Note 19).

2.20. Subsequent events

The Bank analyzes events that occur after the balance sheet date, i.e., favorable and/or unfavorable events that occur between the balance sheet date and the date on which the financial statements were authorized for issue. In this context, two types of events can be identified:

- those that provide evidence of conditions that existed at the balance sheet date (adjusting events after the balance sheet date); and
- those that are indicative of conditions that arose after the balance sheet date (non-adjusting events after the balance sheet date).

Events occurring after the date of the financial statements that are not considered as adjustable events, if material, are disclosed in the notes to the financial statements.

2.21. Segment reporting

The Bank has adopted IFRS 8 – Operating Segments for the purpose of disclosing financial information by operating segments whenever relevant. A business segment is a component of the Bank: (i) that engages in business activities from which it may earn revenues or incur expenses; (ii) whose operating results are regularly reviewed by the Bank's chief operating decision maker for the purposes of allocating resources to the segment and assessing its performance; and (iii) for which separate financial information is available.

3. Main Estimates and Uncertainties Associated with the Application of the Accounting Policies

IFRS establish several accounting treatments and require the Board of Directors to make judgments and prepare the necessary estimates to decide which accounting treatment is most appropriate. The main estimates and judgments used in the application of accounting principles by the Bank are presented in this Note, with the objective of improving the understanding of how their application affects the Bank's reported results and their disclosure. A broad description of the main accounting policies used by the Bank is presented in Note 2 to the financial statements.

Considering that, in many situations, there are alternatives to the accounting treatment adopted by the Board of Directors, the results reported by the Bank could be different should a different treatment be chosen. The Board of Directors considers that the choices made are appropriate and that the financial statements give a true and fair view of the Bank's financial position and the result of its operations in all material respects.

3.1. Impairment losses of financial assets at amortised cost

Determining impairment losses for financial instruments involves judgments and estimates regarding the following aspects, among others:

a) **Significant increase in credit risk:**
Impairment losses correspond to the expected losses in the event of a default over a 12-month time horizon, for Stage 1 assets, and to the expected losses considering the probability of a default event occurring at some point up to the financial instrument's maturity date, for Stage 2 and 3 assets. An asset is classified as Stage 2 whenever there is a significant increase in the respective credit risk since its initial recognition. In assessing the existence of a significant increase in credit risk, the Bank considers reasonable and sustainable qualitative and quantitative information.

b) **Definition of groups of assets with common credit risk characteristics:**
When expected credit losses are measured on a collective basis, financial instruments are grouped based on common risk characteristics. The Bank monitors the adequacy of the credit risk characteristics on a regular basis to assess whether they remain similar. This procedure is necessary to ensure that, in the event of a change in credit risk characteristics, the asset segmentation is revised. This revision may result in the creation of new portfolios or in the transfer of assets to existing portfolios which better reflect their credit risk characteristics.

c) **Probability of default:**
The probability of default represents a determining factor in measuring expected credit losses. The probability of default corresponds to an estimate of the probability of default in a given period, which is calculated based on historical data, assumptions, and expectations about future conditions.

d) **Loss given default:**
Corresponds to an estimate of loss in a default scenario. It is based on the difference between the contractual cash flows and those that the Bank expects to receive, either through the cash flows generated by the customer's business or loan collateral. The calculation of the estimated loss given the default is based, among other factors, on the different recovery scenarios and historical information.

This assessment is performed using internal and external information and includes the use of assumptions and judgments in its modeling, the change of which could determine different results.

Consequently, the use of different methodologies or different assumptions or judgments in measuring impairment could lead to different results from those reported and summarized in Notes 5, 6, 8, 9 and 31.

Finally, the Bank considers that the impairment determined based on this methodology allows an adequate reflection of the risk associated to its financial assets, considering the rules established by IFRS 9 – Financial Instruments.

3.2. Fair value of derivative financial instruments and other financial assets and liabilities measured at fair value

Fair value is based on market quotations, when available, and, in their absence, on the use of prices of similar recent transactions carried out under market conditions or based on valuation methodologies, using discounted cash flow techniques, applied to the future cash flows considering market conditions, the effect of time, the yield curve and volatility factors. These methodologies may require the use of assumptions or judgments in estimating fair value.

Consequently, the use of different methodologies or different assumptions or judgments in the application of a given model could give rise to different financial results from those reported in Notes 7 and 31.4.

AOA 181,070,815 thousand

Minimum reserve requirements in 2025

4. Cash and Deposits at Central Banks

As at December 31, 2025 and December 31, 2024, the caption Cash and deposits at Central Banks is detailed as follows:

AOA thousands

	31/12/2025	31/12/2024
Cash		
National banknotes and coins	**37,308,650**	27,043,910

In US Dollars	**3,241,214**	1,985,098
In Euro	**3,838,613**	1,884,802
In other currencies	**620,158**	440,620
	45,008,635	**31,354,430**
Deposits at the Central Bank		
Demand deposits at Banco Nacional de Angola (BNA)		
In national currency	**232,967,900**	200,328,275
In US Dollars	**384,204,845**	277,335,089
In Euros	**107,004,387**	131,074,984
	724,177,132	**608,738,348**
Total	**769,185,767**	**640,092,778**

Demand deposits at the BNA in national and foreign currency aim to comply with the provisions in force regarding the reserve requirement to be maintained and are not remunerated. As at December 31, 2025, the **minimum reserve requirements amounted to AOA 181,070,815 thousand** in national currency and AOA 280,644,473 thousand in foreign currency (2024: AOA 197,241,359 thousand and AOA 385,844,239 thousand, respectively).

As at December 31, 2025, the reserve requirements are calculated in accordance with the provisions of BNA Instruction 06/2024, of June 13, and Directive 07/2025, of July 28, 2025. As at December 31, 2024, the reserve requirements are calculated in accordance with the provisions of BNA Instruction 06/2024, of June 13, and Directive 09/2024, of December 20, 2024. The currencies for compliance with the minimum reserve requirements in Foreign Currency are the US Dollar, the Euro and the South African Rand, in accordance with Directive 03/DME/2023, of February 6, 2023.

As at December 31, 2025, the tax base for calculating reserve requirements in national currency (MN) and in foreign currency (ME) is monthly.

As at December 31, 2025, the reserve requirements ratio in national currency to be applied to the average monthly balances of items that comprise the reserve base, as defined in paragraph 2 of Instruction 06/24, of June 12, on Reserve Requirements, was set at 18%. The reserve requirements ratio in national currency to be applied to the average monthly balances of the accounts of local governments and municipal administrations was set at 18%.

As at December 31, 2025, the reserve requirements ratio in foreign currency to be applied to the average monthly balances of items that comprise the reserve base, as defined in paragraph 3 of Instruction 06/24, of June 12, on Reserve Requirements, was set at 22%. The reserve requirements ratio in foreign currency to be applied to the average monthly balances of the accounts of local governments and municipal administrations was set at 100%.

As at December 31, 2024, the tax base for calculating reserve requirements in national currency (MN) and in foreign currency (ME) is every two weeks.

As at December 31, 2024, the reserve requirement in national currency is set at 21% for items that comprise the reserve base, in accordance with Directive 09/2024, of December 20, and 21% for the balances of local governments and municipal administrations, to be applied to the average fortnightly balances of the reserve base.

As at December 31, 2024, the reserve requirement in foreign currency was set at 22%, to be applied to the average monthly balances of items that comprise the reserve base, as defined in paragraph 3 of Instruction 06/2024, of June 12, and at 100% for the balances of local governments and municipal administrations, to be applied to the daily balances of the accounts.

5. Loans and Advances to Other Credit Institutions

As at December 31, 2025 and December 31, 2024, the caption Loans and advances to credit institutions is detailed as follows:

AOA thousands

	31/12/2025	31/12/2024

In 2024 and 2025, BFA contracted a set of short-term reverse repo operations with the Angolan state, negotiated through BODIVA. Given the nature of the operations, the Board of Directors recognizes their classification under Investments at amortised cost. Impairment recognized follows the model already implemented for other similar credit exposures.

The breakdown of investments at amortised cost, by residual maturity, is disclosed in Note 31.2.

The fair value and the detail by fair value hierarchy of the investment portfolio at amortised cost are presented in Note 31.4.

As at December 31, 2025 and December 31, 2024, impairment losses for Treasury Bills, Treasury Bonds, Eurobonds and Corporate bonds were calculated based on the credit risk parameters provided by the international rating agency Moody's.

The credit quality of the investment portfolio at amortised cost is disclosed in Note 31.1.

A reconciliation of changes in the gross book value and impairment losses per stage of investments at amortised cost is presented as follows:

AOA thousands

	31/12/2025 Stage 1

In order to mitigate the credit risk, credit operations have associated guarantees, namely mortgages or pledges. The fair value of these guarantees is determined on the date the loan is granted and is periodically reassessed.

The loan-guarantee ratio of the corporate, construction and real estate development, and residential segments, has the following structure:

AOA thousands

	31/12/2025					
	Number of properties	Number of other real guarantees	Loans in Stage 1	Loans in Stage 2	Loans in Stage 3	Impairment

The risk factors associated with the impairment model, by segment, correspond to the following:

Segment	Impairment in December 2025 – Average parameters			
	PD		LGD	
	Stage 1	Stage 2	Stage 1 and 2	Stage 3
Credit cards	2.6%	15.8%	46.5%	66.5%
Consumer credit	2.2%	12.4%	45.8%	60.4%
Motor vehicle loans	2.4%	-	45.8%	-
Mortgages	1.6%	56.2%	34.2%	68.7%
Overdrafts	4.9%	23.8%	70.3%	70.9%
Corporate – less significant exposures	21.6%	62.7%	46.3%	67.0%
Corporate – significant exposures	3.8%	26.7%	32.4%	45.8%

Segment	Impairment in December 2024 – Average parameters			
	PD		LGD	
	Stage 1	Stage 2	Stage 1 and 2	Stage 3
Credit cards	1.8%	9.8%	47.7%	79.6%
Consumer credit	2.1%	11.8%	44.6%	60.9%
Motor vehicle loans	2.1%	41.2%	44.7%	-
Mortgages	1.8%	55.5%	39.4%	76.1%
Overdrafts	6.4%	17.7%	70.5%	72.4%
Corporate – less significant exposures	20.4%	63.3%	47.4%	52.6%
Corporate – significant exposures	4.0%	25.7%	34.4%	56.2%

As at December 31, 2025, the forward-looking information considered in determining the forward-looking adjustment of the collective analysis is as follows:

	%	2026	2027	2028
Real GDP				
Optimistic scenario	10.0%	3.9%	2.2%	3.6%
Base scenario	70.0%	3.8%	2.3%	3.5%
Pessimistic scenario	20.0%	4.3%	3.3%	3.3%
Non-oil GDP growth rate				
Optimistic scenario	10.0%	2.7%	5.2%	5.1%
Base scenario	70.0%	3.0%	5.1%	5.1%
Pessimistic scenario	20.0%	3.2%	5.1%	4.8%
Exchange rate variation				
Optimistic scenario	10.0%	3.0%	-8.8%	2.6%
Base scenario	70.0%	3.0%	-8.8%	2.6%
Pessimistic scenario	20.0%	3.0%	-8.8%	2.6%
Luanda Consumer Price Index				
Optimistic scenario	10.0%	1.1%	6.6%	6.0%
Base scenario	70.0%	1.5%	1.2%	1.2%
Pessimistic scenario	20.0%	1.4%	8.1%	7.0%
Real Effective Exchange Rate				
Optimistic scenario	10.0%	7.3%	16.9%	3.3%
Base scenario	70.0%	11.5%	22.3%	8.9%
Pessimistic scenario	20.0%	10.6%	18.6%	4.3%

10. Non-Current Assets Held for Sale

As at December 31, 2025 and December 31, 2024, this caption is detailed as follows:

AOA thousands

	31/12/2025	31/12/2024
Non-current assets held for sale		
Real Estate	**931,113**	888,998
Accumulated impairment losses (Note 17)	**(878,718)**	(718,212)
	52,395	**170,786**

As at December 31, 2025 and December 31, 2024, the amounts disclosed refer to 17 and 15 properties received as payment, respectively, which are not in use and are available for immediate sale.

As at December 31, 2025 and December 31, 2024, the Bank has set up 100% impairment for 14 and 8 of the properties held in its portfolio, respectively.

11. Investments in Subsidiaries, Associates and Joint Ventures

As at December 31, 2025 and December 31, 2024, Investments in subsidiaries, associates and joint ventures, are presented as follows:

AOA thousands

	31/12/2025

As at December 31, 2025, the increase in Furniture, tools, facilities and equipment mainly relates to the acquisition of IT equipment.

As at December 31, 2025, the increase in the Assets under construction caption is mainly due to construction work at the Bank's various branches.

As at December 31, 2025, the balance under Advances to suppliers mainly relates to the initial allocation for the construction contract and promise of purchase and sale of the Bank's new headquarters building.

In 2025, the total amount of Current tax liabilities was AOA 16,147,165 thousand, against AOA 14,093,647 thousand in 2024.

13. Current and Deferred Tax Assets and Liabilities

As at December 31, 2025 and December 31, 2024, the balances of current tax assets and liabilities were as follows:

AOA thousands

	31/12/2025	31/12/2024
Current tax assets	**253,841**	177,347
Total – Current tax assets	**253,841**	**177,347**
Current tax liabilities:		
On capital gains	**11,238,949**	9,946,970
CEOC	**219,213**	94,143
Other taxes	**4,689,003,**	4,052,534
Total – Current tax liabilities	**16,147,165**	**14,093,647**

In the periods ended December 31, 2025 and December 31, 2024, the income tax expense recognized in the income statement, as well as the tax burden, measured by the ratio between the tax assessed and the profit for the period before that assessment, can be summarized as follows:

AOA thousands

	31/12/2025	31/12/2024
Capital gains tax	**23,838,691,**	15,086,953,
Total tax recorded in profit or loss	**23,838,691,**	**15,086,953,**
Profit before tax	**254,460,816**	220,908,203
Tax burden	**9.37%**	6.83%

The reconciliation between the nominal tax rate and the tax charge, for the periods ended December 31, 2025 and December 31, 2024, can be analyzed as follows:

AOA thousands

	31/12/2025		31/12/2024	
	Tax rate	Amount	Tax rate	Amount
Profit before tax		**254,460,816**		220,908,203
Tax calculated using nominal tax rate	**35.00%**	**89,061,286**	35.00%	77,317,871
Income from public debt securities not subject to II (subject to IAC)	**-38.29%**	**(97,425,530)**	-33.71%	(74,472,373)
Provisions and impairment	**-0.87%**	**(2,220,972)**	-4.65%	(10,272,318)
Paid and unpaid exchange variations	**1.44%**	**3,653,881**	-13.34%	(29,475,963)
Capital Gains Tax (IAC)	**9.37%**	**23,838,691**	6.83%	15,086,953
Other permanent differences	**0.42%**	**1,076,057**	3.31%	7,320,890
Tax losses (used)/to be carried forward	**2.30%**	**5,855,279**	13.39%	29,581,894
Income tax	**9.37%**	**23,838,691**	**6.83%**	**15,086,953**

Corporate Tax

As mentioned in Note 2.15., the Bank is subject to Corporate Tax, and the applicable tax rate is 35% for the periods ended December 31, 2025 and December 31, 2024.

Deferred taxes

As at December 31, 2025 and December 31, 2024, deferred tax assets recognized in the balance sheet are composed as follows:

AOA thousands

	Assets		Liabilities		Net gains/(losses)	
	31/12/2025	31/12/2024	31/12/2025	31/12/2024	31/12/2025	31/12/2024
Tax losses carried forward	**35,565,478**	39,853,736	**-**	-	**35,565,478**	39,853,736
Potential exchange rate variations	**-**	-	**(35,565,478)**	(39,853,736)	**(35,565,478)**	(39,853,736)
Deferred tax asset/ (liability)	**35,565,478**	**39,853,736**	**(35,565,478)**	**(39,853,736)**	**-**	**-**

The Bank has recognized in its accounts deferred tax liabilities related to potential exchange rate variations and deferred tax assets on tax losses up to the amount of deferred tax liabilities.

As at December 31, 2025, tax losses declared for previous years in the respective Form 1 and the tax loss to be carried forward for the 2025 financial year, by year of expiry, are analyzed as follows:

AOA thousands

Year	Tax losses
2022	21,828,961
2023	154,477,132
2024	84,519,696
2025	**16,729,369**
	277,555,158

Of the tax losses carried forward, as at December 31, 2025, there remain unused tax losses amounting to AOA 175,891,102 thousand, for which no deferred tax asset was recorded, nor for non-accepted impairment losses amounting to AOA 64,212,170 thousand.

The Group does not recognize the remaining amount as deferred tax assets, as it considers that this amount will not be recoverable in the future.

AOA 24,265,504 thousand

	24,265,504	**31,449,627**

As at December 31, 2025 and December 31, 2024, Other taxes essentially represents taxes recoverable through the provisional assessment of Corporate Tax and other taxes awaiting tax credit from AGT. In 2025, an impairment loss of AOA 2,551,521 thousand was recognized as the Bank considered that the respective asset was not recoverable. This assessment is based on financial projections, which indicate that sufficient taxable income is not expected to be generated in the foreseeable future to allow for the full use of this amount.

As at December 31, 2024, Other amounts of a civil nature – Sundry debtors: Advances to fixed assets suppliers refers to advances made to suppliers of property, plant and equipment in the course of the Bank's business, relating to the acquisition of goods and services, namely the acquisition of vehicles, IT equipment and real estate. It should be noted that during 2025, the Bank reviewed the classification of these items to the caption Advances to suppliers under Property, plant and equipment (see Note 12). Consequently, as at December 31, 2025, Other amounts of a civil nature – Sundry debtors: Advances to fixed asset suppliers shows a zero balance.

As at December 31, 2025 and December 31, 2024, Other advances: BFA – Capital Markets, BFA – Pensions and BFA – SGOIC corresponds to amounts paid in advance by the Bank and yet to be paid by the Group's Subsidiaries.

15. Deposits from Central Banks and Other Credit Institutions

As at December 31, 2025 and December 31, 2024, this caption is detailed as follows:

AOA thousands

	31/12/2025	31/12/2024
Transactions in the Interbank Money Market		
Deposits from Credit Institutions in the country – loan (AOA)	**3,258,714**	39,411
Deposits from Credit Institutions abroad	**114,045,716**	5,130,065
Deposits from other entities

ATM transactions – to be settled	**19,552,975**	18,156,862
Other	**110,410**	335,662
	137,190,795	**23,915,168**

As at December 31, 2025, Deposits from credit institutions abroad included the amount of AOA 107,822,371 thousand, invested by BPI and remunerated at a rate of 12.75%, resulting from the financial settlement of the IPO (2024: AOA 1,514,068 thousand, remunerated at a rate of 12%). Interest accrued shall be added to this amount.

The breakdown of deposits from Other credit institutions, by residual maturity, is disclosed in Note 31.2.

As at December 31, 2025 and December 31, 2024, the balance under Deposits from other entities relates essentially to interbank clearing values, namely, certified checks, ATM transactions, Multicaixa network transactions which were settled in the first days of the following month and import letters of credit.

16. Deposits from Customers and Other Loans

As at December 31, 2025 and December 31, 2024, the caption Deposits from customers and other loans is detailed as follows:

AOA 116,418,451 thousand

Total amount of impairment and provisions in 2025

For the period ended December 31, 2025, the Bank increased impairment, on a net basis, in the amount of AOA 2,721,263 thousand for the portfolio of Impairment of other financial assets – Investments at amortised cost (2024: AOA 2,716,744 thousand) (see Note 8).

In terms of Loan impairment, the Bank increased impairment, on a net basis, in the amount of AOA 8,277,953 thousand (2024: AOA 9,182,976 thousand) (see Note 9).

In 2025 and 2024, the Bank wrote off a number of transactions, derecognizing impairment losses of AOA 866,891 thousand and AOA 1,912,781 thousand, respectively (see Note 9).

As at December 31, 2025, the caption Guarantees provided and undrawn credit facilities includes the impairment recognized for off-balance sheet captions of documentary credits, guarantees provided and undrawn limits included in the loan portfolio. The Bank reversed impairment, on a net basis, in the amount of AOA 54,408 thousand (2024: net reversal of AOA 119,837 thousand) (see Note 9). Consequently, the amount of provisions recognized in the financial statements is AOA 237,616 thousand (2024: AOA 294,132 thousand) (see Notes 9 and 28).

As at December 31, 2025, Impairment of Other Assets – Other Assets in the amount of AOA 2,551,521 thousand was recorded to address the value of the Other Assets caption, as the Bank considers that the respective balance is not recoverable. This assessment is based on financial projections, which indicate that sufficient taxable income is not expected to be generated in the foreseeable future to allow for the full use of this amount (see Note 14).

In 2018, the Bank created the Social Responsibility Department, which comprises the (i) monitoring of the "BFA Solidário" project and (ii) subsidies units and is responsible for the Bank's social activities until the process of setting up the BFA Foundation is completed.

Since it is the intention of the Bank's Board of Directors that the provision existing as at December 31, 2025, in the amount of AOA 13,661,422 thousand (2024: AOA 14,472,428 thousand) is used as a monetary endowment for the assets of the Fundação BFA, the Bank, in 2024, as decided by the Board of Directors of BFA, advanced the initial endowment of the Fundação BFA in the amount equivalent to 50%, which amounted to AOA 12,920,014 thousand. The process of establishing the Foundation has already been approved in accordance with Presidential Order 5918/25, dated July 23.

As at December 31, 2025 and December 31, 2024, the caption Provisions of an administrative and commercial nature in the amount of AOA 14,461,985 and AOA 27,460,289, respectively, consists of provisions to cover several contingencies, frauds, ongoing legal proceedings and other liabilities, corresponding to the best estimate of the costs that the Bank will bear in the future with these liabilities. In the year ended December 31, 2025, the Bank recorded a net reversal of provisions in the amount of AOA 9,570,388 thousand (2024: net reversal of AOA 631,602 thousand), reflecting developments in the inspection processes for which the Bank had set aside provisions to cover possible tax contingencies.

AOA 12,920,014 thousand

Initial endowment of Fundação BFA

The process of establishing the Foundation has already been approved in accordance with Presidential Order 5918/25, dated July 23.

18. Other Liabilities and Lease Liabilities

The balance of the caption "Taxes payable – withheld from third parties – On income" includes amounts to be settled with the Tax Administration in the month following the month to which they relate.

The balance of the caption Liabilities of a civil nature corresponds to invoices for services rendered that are outstanding to the Bank's suppliers. It should be noted that the variation in the balance between periods is mainly due to the settlement of amounts owed to the respective counterparties.

As at December 31, 2025 and December 31, 2024, the balance of the caption Liabilities of an administrative and marketing nature – Staff – Salaries and wages includes the amounts of holidays and holiday allowances, performance bonus and other staff costs.

On March 28, 2023, by Unanimous Written Resolution 3/2023 (and following the postponement of the decision taken at the General Meeting of March 30, 2023), the amount relating to 60% of the variable remuneration for 2022 was settled and 40% (AOA 1,035,229 thousand) of that amount deferred for a 3-year period, to be valued considering the interest rate of Angolan treasury bonds, traded on the secondary market, in the same currency and maturity as the deferral.

On April 1, 2024, the General Meeting decided to settle the amount relating to 60% of the variable remuneration for 2023 and to defer 40% (AOA 1,024,727 thousand) of that amount for a 3-year period, to be valued considering the interest rate of Angolan treasury bonds, traded on the secondary market, in the same currency and maturity as the deferral.

On March 19, 2025, the General Meeting decided to settle the amount relating to 60% of the variable remuneration for 2024 and to defer 40% (AOA 1,447,762 thousand) of that amount for a 3-year period, to be valued considering the interest rate of Angolan treasury bonds, traded on the secondary market, in the same currency and maturity as the deferral.

As at December 31, 2025, Liabilities of an administrative and marketing nature – Corporate Bodies – Deferred performance bonus includes the amount of AOA 345,076 thousand relating to 40% of the variable remuneration for 2022, the amount of AOA 683,151 thousand relating to variable remuneration for 2023 and the amount of AOA 1,447,762 thousand relating to variable remuneration for 2024, amounts added to the remuneration described above.

The caption Other administrative and marketing costs payable – Premium/Discount – Acquisition of securities in the amount of AOA 8,958,648 thousand (2024: AOA 11,961,483) refer to the amount to be deferred to the gain on day 1, for the acquisition of public debt securities, considering that the fair value calculated by the Bank at the time of acquisition does not derive from prices directly observed in the market (the operation was OTC), but based on internal models (level 3), it was concluded that the difference between the fair value of the security acquired and the acquisition price (P&L of day 1) should be accrued over the maturity of the securities and/or recognized in profit or loss at the time of derecognition.

The balance of the caption Other administrative and marketing costs payable – Accrued Costs includes the amount of AOA 5,504,461 thousand (2024: AOA 3,661,689 thousand) related to accrued costs with external supplies and services rendered and not yet invoiced by the suppliers.

The caption Other administrative and marketing costs payable – IAC accruals – Own portfolio refers to the IAC payable to the BNA on the interest on securities in the own portfolio.

As at December 31, 2025 and December 31, 2024, the caption Lease liabilities corresponds to the present value of lease payments to be settled over the lease term, recognized under IFRS 16.

The detail of the lease liabilities by maturity is presented below:

AOA thousands

	31/12/2025	31/12/2024
Lease liabilities		
Up to 1 year	**569,074**	2,981,097
1 to 5 years	**4,958,478**	3,187,364
More than 5 years	**889,160**	1,152,629
	6,416,712	**7,321,090**
Interest accrued on net interest income	**1,421,568**	2,020,897
	4,995,144	**5,300,193**

Lease liabilities relate to the lease agreements for branches and offices used by the Bank in the course of its business.

19. Equity

Share Capital

The Bank was incorporated with a share capital of AOA 1,305,561 thousand (equivalent to Euro 30,188,657 at the exchange rate in force on June 30, 2002), represented by 1,305,561 registered shares of one thousand kwanzas each, having been subscribed and paid-up by incorporation of all assets and liabilities, including property or real estate rights of any nature, as well as all the rights and obligations of the former BFE Branch.

At the end of the 2004, 2003 and 2002, the Bank increased its share capital by AOA 537,672 thousand, AOA 1,224,333 thousand and AOA 454,430 thousand, respectively, through the incorporation of the special reserve for the maintenance of own funds, in order to maintain the counter value in kwanzas of the initial capital endowment in foreign currency.

By Unanimous Resolution of the General Meeting, of October 4, 2018, it was decided to increase BFA's share capital by incorporating reserves recorded under the caption Other reserves and Retained earnings in the amount of AOA 11,478,004 thousand. This capital increase was carried out within the scope of Notice 02/2018 of the Banco Nacional de Angola, which defines that the minimum value of fully paid-up share capital in national currency is AOA 7,500,000 thousand.

On November 26, 2018, there was an increase in share capital which corresponded to an increase in the shareholding of each shareholder in proportion to their respective holdings in the share capital of the Bank at that date, with 13,694,439 shares having been issued with a par value of AOA 1,000. Accordingly, as at December 31, 2018, the Bank had a total of 15,000,000 ordinary shares outstanding.

On March 30, 2023, the General Shareholders' Meeting decided on a share capital increase by incorporating Free Reserves in the amount of AOA 30,000,000 thousand, remaining above the minimum set by the BNA stipulated in BNA Notice 3117/2022, raising the capital to AOA 45,000,000 thousand.

Following this resolution, Banco de Fomento Angola, S.A., in accordance with the Angolan Commercial Companies Code, registered the change in capital, which was registered after a public deed on August 22, 2023 and registered at the Commercial Registry Office on August 28, 2023. In addition, following a public deed on August 22, 2023 at the Commercial Registry Office, the General Shareholders' Meeting decided to regroup its shares representing its share capital by applying a regrouping ratio of 1:5, with each 5 shares prior to the regrouping corresponding to 1 share after the regrouping, with the regrouping applying to all shares in the same proportion. The Bank regrouped the 45,000,000 shares it had after increasing its capital by incorporating reserves into 9,000,000 shares with a nominal value of 5,000 each.

As at April 30, 2025, according to a unanimous written resolution by the shareholders, it was decided to increase BFA's capital by incorporating Free Reserves in the amount of AOA 45,000,000 thousand, with 6,000,000 shares being issued, which corresponded to the increase in each shareholder's holding in proportion to their respective holdings in the Bank's share capital on that date. This capital increase was recorded after the public deed dated June 5, 2025, and registration at the Commercial Registry Office on May 28, 2025.

Consequently, on December 31, 2025, the Bank's share capital amounts to AOA 90,000,000 thousand, represented by 15,000,000 registered shares of AOA 6,000 each (2024: share capital of AOA 45,000,000 thousand, represented by 9,000,000 registered shares of AOA 5,000 each).

According to the legislation in force for financial institutions based in Angola, disclosure to the market of qualifying holdings may only occur after the potential shareholder has notified the Banco Nacional de Angola and subsequent approval by the Regulator.

As at December 31, 2025 and December 31, 2024, the shareholder structure of the Bank is as follows:

AOA thousands

	31/12/2025		31/12/2024	
	Number of shares	%	Number of shares	%
Unitel, S.A.	**5,535,000**	**36.90%**	4,671,000	51.90%
Banco BPI, S.A.	**5,002,500**	**33.35%**	4,328,370	48.09%
Congolian Financial, S.A.	**1,141,500**	**7.61%**	-	0.00%
Other shareholders	**3,321,000**	**22.14%**	630	0.01%
	15,000,000	**100%**	**9,000,000**	**100%**

On October 7, 2016, Unitel, S.A. (Unitel) entered into an agreement with Banco BPI, S.A. (Banco BPI) for the purchase of 2% of the share capital of BFA, which led to an increase in Unitel's stake in BFA from 49.9% to 51.9%. On that same date, the new shareholders' agreement concerning BFA was also signed.

The completion of this operation was dependent on the verification of the following suspensive conditions:

- Authorization from the Banco Nacional de Angola (BNA) for the increase in the qualified shareholding already held by Unitel in BFA and authorization for the capital transactions necessary for the payment to Banco BPI and the transfer to Portugal of the agreed price of Euro 28 million;
- Authorization from the BNA to change the Articles of Association of BFA; and
- Approval of the operation by the General Shareholders' Meeting of Banco BPI.

On December 12, 2016, the Banco Nacional de Angola communicated that it did not object to the practice of the following acts:

I. Partial amendment of BFA's Articles of Association;

II. Increase in Unitel's qualified shareholding in the share capital of BFA through the acquisition from Banco BPI of 26,111 ordinary shares representative of 2% of share capital;

III. Indirect acquisition of the qualified shareholding representative of 48.10% of BFA's share capital, following the settlement of the general and mandatory initial public offer (IPO) launched by Caixabank for all the shares representative of Banco BPI's share capital.

The BNA established as a condition that the three operations referred to above are indivisible, i.e., it is assumed that they must occur simultaneously or almost simultaneously or, if it is not possible for any reason to ensure their simultaneity, the operation referred to in (ii) must precede the operations referred to in (i) and (iii).

On January 5, 2017, pursuant to the share purchase and sale agreement entered into in 2016, the sale by Banco BPI to Unitel of the shareholding representing 2% of the share capital of BFA was completed.

On November 26, 2018, a share capital increase took place which corresponded to an increase in the shareholding of each shareholder in proportion to their respective shareholdings in the Bank's share capital at that date, with 13,694,439 shares with a nominal value of AOA 1,000 having been issued. Accordingly, as at December 31, 2018, the Bank had a total of 15,000,000 ordinary shares outstanding.

On August 22, 2023, the Bank formalized a share capital increase by incorporation of Free Reserves in the amount of AOA 30,000,000 thousand, grouping its shares to the amount of 9,000,000 shares, with a nominal value of AOA 5,000.

On May 22, 2025, Banco Nacional de Angola announced that it did not oppose the transfer of BFA shares held by BPI Vida e Pensões (0.01%) to BPI.

On May 28, 2025, BFA increased its share capital by incorporating Free Reserves in the amount of AOA 45,000,000 thousand, with 6,000,000 shares being issued, which corresponded to the increase in each shareholder's holding in proportion to their respective holdings in the Bank's share capital on that date. Therefore, as at December 31, 2025, the Bank's share capital amounts to AOA 90,000,000 thousand, represented by 15,000,000 registered shares of AOA 6,000 each.

On August 15, 2025, following the decision of Unitel shareholders — taken on the basis of Presidential Order 194/24 of August 23, 2024, and Presidential Order 100/25 of March 31, 2025 — and Banco BPI, approval of the prospectus was obtained from the Capital Markets Commission, in the context of promoting a public offering for sale of a total of 4,462,500 ordinary shares, representing 29.75% of BFA's share capital. Of this total, 2,250,000 shares, corresponding to 15.00% of the share capital, were held by Unitel, and 2,212,500 shares, corresponding to 14.75% of the share capital, were held by Banco BPI.

On August 22, 2025, the Bank publicly announced the public offering and published the respective prospectus. Following the offering period, which ran from September 5 to September 25, 2025, and the setting of the price on September 26, 2025, BFA shares were admitted to trading on September 30, 2025.

As at December 31, 2025, as a result of trading on the regulated market, the shareholder Congolian Financial, S.A. holds 7.61% of the Bank's share capital, with the remaining 22.14% dispersed among minority shareholders.

Other reserves and Retained earnings

As at December 31, 2025 and December 31, 2024, this caption is detailed as follows:

Under current legislation, the Bank must set aside a legal reserve up to the amount of their capital. This legal reserve can only be used to cover accumulated losses when the remaining reserves have been exhausted.

As at December 31, 2024, as provided for in Article 165 of the Legal Framework for Financial Institutions, the **legal reserve** set up by the Bank amounts to its entire share capital, considering that, by resolution of the General Shareholders' Meeting, it was approved, on April 1, 2024, to increase the legal reserve by 4.05% of the profit achieved in 2023 (AOA 6,775,808 thousand to AOA 45,000,000 thousand). In addition, at the same General Shareholders' Meeting, it was also decided to transfer 45.95% of the profit for 2023 (AOA 76,978,998 thousand) to free reserves, resulting in a balance of other reserves, as at December 31, 2024, of AOA 393,771,206 thousand. The remaining 50% (AOA 83,754,806 thousand) was distributed to shareholders.

As at December 31, 2025, as a result of the share capital increase through the incorporation of Free Reserves in the amount of AOA 45,000,000 thousand, which was decided and formalized on a date subsequent to the date of the decision on the application of 2024 results (May 28, 2025, and March 19, 2025, respectively), the **legal reserve** established by the Bank amounts to 50% of the share capital. Accordingly, under the current legislation, the Bank will transfer a minimum of 10% of its net income to this reserve in future periods.

It should be noted that, pursuant to a resolution of the General Shareholders' Meeting, held on March 19, 2025, the allocation of 50.00% of the profit achieved in 2024 (AOA 102,910,625 thousand) to free reserves was approved. The remaining 50% (AOA 102,910,625 thousand) was distributed to shareholders, as disclosed in the section below.

Earnings and dividend per share

In the periods ended December 31, 2025 and December 31, 2024, the basic earnings per share and the dividend attributed, relating to the profit of the previous year, were as follows:

AOA thousands

	31/12/2025	31/12/2024 (IAS 33)	31/12/2024
Average number of ordinary shares issued	**11,938,356**	7,500,000	9,000,000
Net profit/(loss) for the period	**230,622,125**	205,821,250	205,821,250
Dividends distributed in the period relating to the previous period	**102,910,625**	83,754,806	83,754,806
Basic earnings per share	**19.318**	27.443	22.869
Diluted earnings per share	**19.318**	27.443	22.869
Dividend per share attributed during the period	**8.620**	11.167	9.306

In 2025, the dividends distributed for 2024, amounting to AOA 102,910,625 thousand, were paid in full, so that as at December 31, 2025, BFA has no liability for dividends attributed for previous years and not paid to its shareholders. In 2024, dividends distributed for 2023 were also paid out, amounting to AOA 83,754,806 thousand.

20. Net Interest Income

In the periods ended December 31, 2025 and December 31, 2024, this caption is detailed as follows:

AOA thousands

22. Foreign Exchange Gains/(Losses)

In the periods ended December 31, 2025 and December 31, 2024, this caption is detailed as follows:

AOA thousands

	31/12/2025	31/12/2024
Changes in exchange rates on assets and liabilities denominated in foreign currency	**898,133**	9,508,613
Foreign exchange spot and forward transactions	**3,069,817**	(8,103,631)
Foreign currency purchase and sale transactions	**68,990,149**	60,985,046
	72,958,099	**62,390,028**

The caption Changes in exchange rates on assets and liabilities denominated in foreign currency essentially refers to the foreign exchange gains/(losses) related to the exchange revaluation of the Bank's assets and liabilities in foreign currency on the reporting dates. The variation recorded between periods is essentially due to the stabilization of the Kwanza against the US Dollar in 2025.

The caption Foreign exchange spot and forward transactions essentially comprises gains and losses arising from spot and forward transactions.

In the period ended December 31, 2025, the Bank recorded an increase in foreign exchange gains/(losses) from foreign currency purchase and sale operations as a result of the volume effect and pricing associated with these transactions.

23. Net Gains/(Losses) on Sale of Other Assets

In the periods ended December 31, 2025 and December 31, 2024, this caption is detailed as follows:

AOA thousands

	31/12/2025	31/12/2024
Net gains/(losses) on sale of assets		
Gains on sale of property, plant and equipment	**274,675**	159,088
Losses on sale of property, plant and equipment	**-**	(5,122)
	274,675	**153,966**

24. Other Operating Income/(Expense)

In the periods ended December 31, 2025 and December 31, 2024, this caption is detailed as follows:

AOA thousands

	31/12/2025	31/12/2024
Other operating income:		
Recovery of administrative and commercial expenses	**10,782,012**	7,670,092

CEOC	**2,860,123**	1,918,662
Contribution to Deposits Guarantee Fund	**(1,757,418)**	(1,643,004)
Penalties applied by regulatory authorities	**(48,493)**	(159,504)
Contribution to the Resolution Fund	**(6,895,925)**	-
Other	**(487,224)**	(294,120)
	(22,117,061)	**(15,374,189)**
Total	**(8,809,061)**	**(6,420,359)**

In the periods ended December 31, 2025 and December 31, 2024, the caption Other operating income – Recovery of administrative and commercial expenses refers, essentially, to: (i) the reimbursement of communication and shipping expenses originally borne by the Bank, namely in execution of payment order operations and (ii) other miscellaneous income.

As at December 31, 2025 and December 31, 2024, the caption Other operating income – Gains on credit recovery refers to credit recoveries and interest previously written off or deducted from assets, in the amounts of AOA 1,112,435 thousand and AOA 449,212 thousand (Note 9).

In the periods ended December 31, 2025 and December 31, 2024, the caption Other operating expense – Taxes and fees not levied on income includes a balance for value added tax in the amount of AOA 8,671,856 thousand and AOA 9,797,042 thousand, respectively.

For the year ended December 31, 2025, Other operating expense – Contribution to Resolution Fund refers to the initial contribution to the Resolution Fund, as provided for in the combined terms of Article 303(1) and Article 304(1) all of Law 14/21, of May 19, Law on the General Regime of Financial Institutions, subparagraph f) of Article 31(1) and Article 98(1) of Law 24/21, of October 18, Law of the Banco Nacional de Angola. It should be noted that this contribution is determined by applying 1% to the amount of audited accounting equity for 2024.

25. Staff Costs

In the periods ended December 31, 2025 and December 31, 2024, this caption is detailed as follows:

AOA thousands

	31/12/2025	31/12/2024
Members of the Management and Supervisory Bodies		
Monthly remuneration	**4,619,860**	4,280,986

Monthly remuneration	**57,875,365**	48,022,403
Additional remuneration	**9,512,546**	7,671,310
Mandatory social charges	**4,909,406**	4,124,519
Optional social charges	**4,996,316**	4,554,811
Other	**632,108**	490,334
	77,925,741	**64,863,377**
Pension costs		
Supplementary pension plan	**3,488,286**	2,915,696
	3,488,286	**2,915,696**
Total	**91,498,188**	**75,239,579**

The caption Members of the Management and Supervisory Bodies – Additional Remuneration includes the variable remuneration awarded to the Bank's Board of Directors. In accordance with its remuneration policy for this body, the Bank defers the settlement of 40% of it for 3 years. The amounts not yet paid are shown under Other liabilities – Liabilities of an administrative and marketing nature - Corporate Bodies – Deferred performance bonus (see note 18).

Staff – Monthly remuneration includes the monthly remuneration paid to employees. The variation recorded between periods is essentially due to salary increases implemented by the Bank.

In 2013, with reference to the last day of the year, the Bank set up the BFA Pension Fund to cover the liabilities with retirement pensions for old age, disability and survival that the Bank granted to its Angolan employees registered with the Social Security, having used the provisions previously set up as an initial contribution to the BFA Pension Fund (defined contribution plan). In accordance with the contract for the set-up of the Fund, BFA will contribute annually with 10% of the salary subject to Angolan Social Security charges, applied on fourteen salaries.

In November 2022, Order 3923/22 ((Official Gazette) 123 of Series II) published the Addendum to the BFA Pension Fund and the New Pension Plan. The new Pension Plan defines a mixed contribution system between the Associate (BFA) and the Employees and establishes the associate's rate at 7.5% on the pensionable salary, also defining a variable employee contribution between 2.5% and 10% on the pensionable salary.

In the periods ended December 31, 2025 and December 31, 2024, the Bank's contribution to the BFA Pension Fund amounted to AOA 3,488,286 thousand and AOA 2,915,696 thousand, respectively.

In the periods ended December 31, 2025 and December 31, 2024, BFA Pensões – Sociedade Gestora de Fundos de Pensões, S.A. is responsible for managing the BFA Pension Fund.

The costs of remuneration and other benefits paid to the Bank's Board of Directors, General Meeting Board, and Supervisory Board during 2025 and 2024 are presented as follows:

AOA thousands

	31/12/2025			31/12/2024		
	Board of Directors	General Meeting Board	Supervisory Board	Board of Directors	General Meeting Board	Supervisory Board
Salaries and Wages	**5,164,547**	**74,849**	**142,092**	4,157,073	74,645	143,776
Other Remuneration	**4,927,318**	**-**	**-**	2,849,696	-	-
Post-employment benefit costs	**213,344**	**-**	**-**	144,448	-	-
Total	**10,305,209**	**74,849**	**142,092**	**7,151,217**	**74,645**	**143,776**

26. External Supplies and Services

In the periods ended December 31, 2025 and December 31, 2024, this caption is detailed as follows:

AOA thousands

	31/12/2025	31/12/2024
Audit, advisory and other specialized technical services	**30,244,031**	20,047,205
Safety, maintenance and repair	**12,973,936**	15,404,582
Sundry materials	**4,135,542**	3,053,527
Advertising and marketing	**4,377,411**	2,284,578
Transport, travel and accommodation	**4,019,397**	3,775,459
Communication	**2,646,692**	2,903,232
Water and energy	**1,041,460**	610,123
Insurance	**1,999,071**	939,605
Rentals	**260,413**	410,823
Other external supplies and services	**4,237,070**	743,254
Total	**65,935,023**	**50,172,388**

The variation in Audit, advisory and other specialized technical services is mainly due to the volume of services provided by external entities in the context of implementing strategic initiatives aimed at improving processes and automation, among others.

The fees for services rendered by the external auditor during 2025 and 2024 are detailed as follows:

AOA thousands

	31/12/2025	31/12/2024
External audit services	**508,067**	423,743
Other assurance services as part of the external auditor's duties	**129,548**	142,549
Total	**637,615**	**566,292**

27. Segment Reporting

As at December 31, 2025 and December 31, 2024, in compliance with the requirements of IFRS 8 – Operating segments, the Bank defined the following business segments:

- **Investment portfolio and foreign exchange transactions:** This segment includes banking activities related to the management of the Bank's own investment portfolio, including derivative financial instruments, as well as cash and deposits and resources at central banks and other credit institutions;
- **Retail and commercial banking:** This includes lending and raising funds from individuals and companies; and
- **Other:** Comprises all business segments not covered in the business lines described above.

31. Risk Management

BFA's activities are exposed to a variety of financial risk factors, including the effects of changes in market prices: foreign exchange risk, credit risk, liquidity risk and cash flow risks associated with interest rate risk, among others.

BFA's risk management is controlled by the Risk Management Department, in accordance with policies approved by the Board of Directors. Accordingly, the Board of Directors has defined, in writing, the fundamental principles of global risk management, as well as specific policies for some areas, such as interest rate risk, liquidity risk and credit risk.

The Board of Directors defines the principles for risk management as a whole and policies that cover specific areas, such as exchange risk, interest rate risk, credit risk, the use of derivatives and other non-derivative financial instruments, as well as the investment of excess liquidity.

Main Risk Categories

Credit – Credit risk is the uncertainty of recovery of an investment and its return, due to the debtor's inability (and that of his/her guarantor, if any) to fulfill its financial commitments, thus causing a financial loss to the creditor. Credit risk is reflected in debt securities or other receivables.

Market – Market risk reflects the potential loss that can be recorded by a given portfolio as a result of changes in rates (interest and exchange rates) and/or the prices of the different financial instruments that comprise it, considering both the correlations between them and the respective volatilities. Accordingly, Market Risk encompasses interest rate risk, exchange rate and other price risks.

Liquidity – Liquidity risk reflects the inability of the Bank to meet its liabilities associated with financial liabilities on each maturity date without incurring significant losses as a result of a deterioration in the conditions of access to financing (financing risk) and/or sale of its assets for amounts lower than the amounts usually practiced in the market (market liquidity risk).

Real Estate – Real estate risk is the probability of negative impacts on the Bank's income or capital level due to fluctuations in the market price of real estate assets.

Operational – Operational risk is the potential loss resulting from failures or inadequacies in internal processes, information systems, human behavior or external events.

31.1. Credit Risk

Credit risk corresponds to the risk of default by counterparties, with which the Bank maintains open positions in financial instruments, as a creditor. In accordance with the BFA's General Credit Regulations, the granting of credit in the Bank is based on the following fundamental principles:

Formulation of proposals

Loan operations, or guarantees, subject to the decision of BFA:

- Are adequately characterized in the Technical Data Sheet, containing all the essential and accessory elements necessary for the formalization of the operation;
- Respect the specific product sheet;
- Are accompanied by a duly substantiated credit risk analysis;
- Contain the signatures of the proposing bodies.

Credit risk analysis

In the credit risk analysis, the total exposure of the Bank to the customer, or to the group to which the customer belongs, is considered, according to the terms of the legislation applicable at any time. Exposures in respect of the same customer or economic group are classified, having as reference those that represent the greatest risk.

Currently, considering the regulations of the Banco Nacional de Angola:

- For a single customer, all its liabilities vis-à-vis the Bank, in force or potential, already contracted or committed, for financing and guarantees are considered (total exposure of the Bank to the customer);
- For a group of customers, the sum of the liabilities of each customer that comprises the group is considered (total exposure of the Bank to the group); and
- The existence of guarantees with State risk, or with immediate liquidity, has an impact on the calculation of the value of the Global Exposure.

Classification of Risk

The Bank classifies loan operations in ascending order of risk, according to the following grades:

Grade A: Minimum risk
Grade B: Very low risk
Grade C: Low risk
Grade D: Moderate risk
Grade E: High risk
Grade F: Very high risk
Grade G: Maximum risk

The individual classification of the exposure considers the characteristics and risks of the operation and of the borrower, and is initially classified based on the following criteria adopted by the Bank:

Grade A: operations that are:

I. assumed by the Angolan State, encompassing its central and provincial administrations;

II. assumed by central administrations, central banks of countries, included in group 1 (defined in Instruction 1/2015, of January 14, of the Banco Nacional de Angola), international organizations and multilateral development banks;

III. fully guaranteed by cash deposits, or certificates of deposit, constituted or issued by the lending institution, or by institutions in a controlling or group relationship with the lending institution and having their head office in Angola, or a country included in group 1, multilateral development banks and international organizations, provided that the exposure and the deposit or certificate are denominated in the same currency;

IV. fully guaranteed by cash deposits, or certificates of deposit, constituted or issued by the lending institution or by branches of the lending institution, not covered by the preceding paragraph, provided that the exposure and the deposit or certificate are denominated in the same currency;

V. fully guaranteed by securities or bonds issued by the Angolan State, or by the Banco Nacional de Angola.

Grade B and others: remaining loans.

The classification of exposures is revised whenever there are signs of impairment in late payments.

Within the scope of the regular review of loan operations, including loan operations overdue, BFA reclassifies overdue loan operations into those that are due, based on an analysis of the economic prospects of collectability, namely considering the existence of guarantees, the borrowers' or guarantors' assets and the existence of operations whose risk BFA equates to State risk, or even when the situation of delay results from the Bank's exclusive responsibility due to a one-off failure in its processes.

Association of Guarantees

When granting loans to Retail customers or small companies with a maturity of more than 36 months, in the absence of short-term financial investments, BFA requires, as a rule, the provision of a real guarantee on property.

Loan operations are associated with guarantees considered adequate to the risk of the borrower, the nature and term of the operation, which are duly substantiated, in terms of sufficiency and liquidity.

Real guarantees are assessed prior to the loan decision, and these assessments are periodically reviewed. Exceptions to this rule (with decisions being conditional on a subsequent assessment) imply that disbursement will only occur after the Bank has obtained the guarantee assessment.

The main types of collateral for loans and advances to customers are:

- Mortgages on residential properties;
- Encumbrances on Company assets, such as facilities, inventory or accounts receivable;
- Encumbrances on financial instruments, such as debt securities or shares; and
- Encumbrances on term deposits at the institution.

Long-term financing and loans to corporate entities usually have an associated guarantee. On the contrary, revolving credit products do not generally have an associated guarantee.

Collaterals obtained as a guarantee for financial assets, other than loans and advances to customers, always depends on the type of financial instrument. Debt instruments do not normally have an associated guarantee, with the exception of securitized instruments, which have portfolios of financial instruments as collateral. On the other hand, derivative instruments have associated guarantees.

The Bank's policies on collateral obtained as guarantee have not changed significantly during the reporting period, nor have there been any significant changes in the quality of the collateral held by the Bank since the previous period.

The Bank monitors collateral obtained as security for impaired loans and advances to customers as it becomes more likely that the Bank will take ownership of such collateral to mitigate possible credit losses. Loans to impaired customers (stage 3) and the collaterals obtained as guarantee are detailed as follows (on-balance sheet amounts):

Exclusions due to incidents

The Bank does not grant loans and advances to customers who have registered material incidents in the last 24 months known to BFA, nor to other companies that are part of a group with customers in that situation. The following are considered material incidents:

- Delays in making payments of principal or interest owed to a credit institution, social security, AGT, court or State Inspectorate for more than 90 days;
- Irregular use of means of payment for which that person or entity is responsible;
- Pending legal actions against that person or entity that have potential adverse effects on their economic or financial position.

Exceptions to these rules have specific decision rules under the Bank's general credit regulation, which are stricter.

Restructurings

In principle, BFA only formalizes ongoing loan restructuring operations, after assessing the customer's ability to comply with the new plan, if the following criteria are met:

- New guarantees (more liquid and/or more valuable) are presented for the new operation;
- Interest and late payment fees are paid in advance (in the event of a non-performing operation); and

- There is a significant partial settlement of the outstanding principal (performing and/or non-performing).

Exceptionally, and if none of the above assumptions are met, BFA admits formalizing the formal restructuring of Retail customers' debts, if it is verified that in the last 6 months, deposits were made of a minimum amount equal to the installment amount foreseen for the restructured operation.

Loan operations restructured due to the customer's financial difficulties are defined in the General Credit Regulation and comply with the regulator's specific regulations in this matter.

Restructuring operations are classified, for the purpose of increasing risk, and periodically monitored as to compliance with the established plan and are only unclassified when certain conditions of regularity in complying with the plan are met.

Operations subject to renegotiation are maintained at least at the same risk level in which they were classified in the month immediately prior to the renegotiation. Reclassification to a lower risk level only occurs if there is regular and significant repayment of the operation, payment of interest due and on arrears, or depending on the quality and value of new guarantees presented for the renegotiated operation.

Monitoring of non-performing loans

Non-performing loans are monitored by the commercial teams, as a rule until it is 60 days overdue, with monitoring being done by a specialized team. After 60 days of default, the management of the relationship is transferred to this specialized team, which has the mission of collaborating in loan recovery actions, being able to take over negotiations and restructuring proposals.

The restructuring negotiations follow the principles mentioned above.

This team is responsible for the management and relationship with the customer, with the aim of recovering the loan, resorting to the enforcement, through the courts, if necessary.

Impairment

BFA implemented a model to calculate impairment losses of the loan portfolio, in accordance with the requirements set out in IFRS 9.

BFA calculates the impairment losses of the loan portfolio monthly based on the implemented model, with the amount of impairment determined being approved by the Executive Committee of the Board of Directors.

The first application and the respective outcomes of this model were calculated with reference to January 1, 2018. Since that reference date, monthly calculations have been carried out. The half-yearly results are approved by the Board of Directors of the Bank.

Securities and bonds

As at December 31, 2025 and December 31, 2024, BFA's securities portfolio complies with the principle of the high credit quality of its issuers, consisting mainly of securities issued by the Angolan State and by the Banco Nacional de Angola.

Value of collateral in 2025

Non-performing loans are monitored by the commercial teams, as a rule until it is 60 days overdue, with monitoring being done by a specialized team.

As at December 31, 2025 and December 31, 2024, the maximum exposure to credit risk presents the following detail:

AOA thousands

	31/12/2025			31/12/2024		
	Gross book value	Impairment	Net book value	Gross book value	Impairment	Net book value

Off-balance sheet						
Guarantees provided, open documentary credits and undrawn facilities (Note 9)	**227,902,698**	**(237,616)**	**227,665,082**	273,344,167	(294,132)	273,050,035
Total	**4,439,688,158**	**(86,920,040)**	**4,352,768,118**	**4,143,882,932**	**(74,342,976)**	**4,069,539,956**

For financial assets recognized in the balance sheet, the maximum exposure to credit risk is represented by the book value net of impairment. For off-balance sheet items, the maximum exposure from guarantees is the maximum amount that the Bank would have to pay should the guarantees be forfeited and of loan and other credit-related commitments of an irrevocable nature is the total amount of commitments entered into.

As at December 31, 2025 and December 31, 2024, the credit quality of financial assets is as follows:

31.2. Liquidity risk

Liquidity risk corresponds to the risk of the Bank presenting difficulties in obtaining the financial resources it needs to meet its financial commitments when they become due. Liquidity risk may consist, for example, in the inability to sell a financial instrument quickly for an amount representative of its fair value, because of its large size, in relation to the volume normally traded, or because of some discontinuity in the market.

Within the scope of the Bank's internal policies with respect to exposure to liquidity risk, the respective follow-up and monitoring of the established principles and limits is ensured by the Risk Management Department.

As at December 31, 2025 and December 31, 2024, the contractual cash flows related to capital together with the respective accrued interest are detailed as follows:

31.3. Market risk

Market risk corresponds to the possible fluctuation of the fair value or future cash flows associated with a financial instrument, due to changes in market prices. Market risk encompasses interest rate risk and exchange rate risk.

Interest rate risk

The interest rate risk corresponds to the risk arising from adverse movements in interest rates resulting in a mismatch in the amount, maturities or interest-fixing dates observed in financial instruments with interest receivable and payable.

As at December 31, 2025 and December 31, 2024, financial instruments by exposure to interest rate risk were as follows:

Currency risk

Currency risk is the fluctuation of the fair value or future cash flows of a financial instrument due to changes in exchange rates.

The securities portfolio of the Bank is divided between securities denominated in national currency and in foreign currency, taking into consideration the overall structure of its balance sheet, in order to avoid incurring, in this manner, currency risk.

As at December 31, 2025 and December 31, 2024, financial instruments by currency are detailed as follows:

AOA thousands

31.4. Fair value of financial assets and liabilities

The Bank classified the financial instruments recorded in the balance sheet at fair value in accordance with the hierarchy established in IFRS 13.

Instruments listed in active markets (level 1)

This category includes financial instruments with available quoted prices in official markets and those in which there are entities that usually disclose prices of transactions for these instruments traded in liquid markets.

Priority in the prices used is given to those observed in official markets, in cases where there is more than one official market the option falls on the main market where these financial instruments are traded.

This category includes, among others, the following financial instruments: (i) derivatives traded on an organized market and (ii) listed shares.

Valuation methods with observable market parameters/prices (level 2)

This category includes financial instruments valued through internal models, namely discounted cash flow models, which require judgments that vary according to the complexity of the products being valued and use assumptions similar to those that an unrelated party would use in estimating the fair value of the same financial instrument. The Bank uses as inputs in its models variables provided by the market, such as interest rate curves and credit spreads. It also includes instruments whose valuation is obtained through quotations disclosed by independent entities but whose markets have the lowest liquidity.

This category includes, among others, the following financial instruments: (i) unlisted bonds; and (ii) over-the-counter (OTC) derivatives.

Valuation methods with non-observable parameters in the market (level 3)

This level includes the valuations determined by the use of internal valuation models or quotations provided by third parties but where the parameters used are not observable in the market. The bases and assumptions used in the calculation of the fair value are in accordance with the principles of IFRS 13.

This category includes, among others, the following financial instruments: (i) securities valued using inputs that are not observable in the market; (ii) unquoted shares; (iii) over-the-counter (OTC) market derivatives with quotes provided by third parties.

As at December 31, 2025 and December 31, 2024, the book value of financial instruments is detailed as follows:

The fair value of financial instruments should be estimated, whenever possible, using quotations on an active market. A market is considered active, and therefore liquid, when it is accessed by equally knowledgeable counterparties and where transactions are carried out on a regular basis. Almost all the financial instruments of the Bank are not listed on active markets.

In view of the absence of quotations on active markets, the valuation of financial instruments is performed in the following terms:

a) Financial instruments recorded in the balance sheet at fair value:

Non-readjustable Treasury Bonds in national currency issued by the Angolan State and held by the Bank for trading in the secondary market with other banks are revalued based on a discounted cash-flows model. The discount curve used can be viewed directly in the daily BODIVA report.

Currency forwards are revalued using a discounted cash-flows model. The amounts in foreign currency are updated with an interest rate curve directly observed from Bloomberg and the amounts in national currency are updated with a curve built with interbank money market yields and reference rates (Luibor) observed on the BNA website.

Since they are not listed on a stock exchange and provided that there is observable market data, the equity instruments, with the exception of Visa Incl, are valued by the equity method and the Participation Units by the quotation made available by the fund management company.

b) Financial instruments recorded in the balance sheet at amortised cost:

For financial instruments recorded in the balance sheet at amortised cost, the Bank calculates their fair value using valuation techniques based on the conditions applicable to similar transactions on the reference date of the financial statements, namely the value of the respective discounted cash flows based on the interest rates considered most appropriate, i.e.:

- Non-adjustable Treasury Bills and Treasury Bonds in national currency issued by the Angolan State are valued, for disclosure purposes, based on a discounted cash-flows model, using the curve provided by BODIVA – Official Bulletin for national currency. As at the reference date, the curve is as follows:

31/12/2025		31/12/2024	
Maturity	Current Yield	Maturity	Current Yield
3M	**16.01%**	3M	18.32%
6M	**16.75%**	6M	18.05%
1Y	**17.62%**	1Y	18.22%
2Y	**17.59%**	2Y	17.63%
3Y	**18.30%**	3Y	17.25%
4Y	**18.17%**	4Y	17.95%
5Y	**18.66%**	5Y	16.81%
6Y	**19.13%**	6Y	16.21%
7Y	**19.54%**	7Y	17.24%
8Y	**19.37%**	8Y	18.48%
9Y	**19.13%**	9Y	19.02%
10Y	**18.79%**	10Y	20.49%

- Treasury Bonds in US dollars issued by the Angolan State are valued, for disclosure purposes, based on a discounted cash-flow model, using the curve provided by BODIVA – Official Bulletin for US dollars. As at the reference date, the curve is as follows:

31/12/2025		31/12/2024	
Maturity	Current Yield	Maturity	Current Yield
3M	**3.18%**	3M	0.79%
6M	**4.12%**	6M	3.43%
1Y	**4.68%**	1Y	2.75%
2Y	**4.59%**	2Y	3.76%
3Y	**6.24%**	3Y	5.80%
4Y	**7.38%**	4Y	7.28%

- For disclosure purposes, Eurobonds and corporate bonds denominated in foreign currencies are valued using the bid price on Bloomberg on the reference date (instruments listed on an active market - level 1 in the fair value hierarchy);

- Reverse repos measured under Investments at amortised cost in the financial statements, as they are essentially short-term transactions, were considered to have a book value that represents a reasonable approximation of their fair value;

- For customer credit operations, the interest rates applied by the Bank in the periods ended December 31, 2025 and December 31, 2024, respectively, were used for operations with similar characteristics, less the amount of accumulated impairment losses; and

- Regarding Cash and deposits at central banks, Loans and advances to other credit institutions repayable on demand, Other loans and advances to central banks and credit institutions, Deposits from central banks and Deposits from other credit institutions and Deposits from customers and other loans, as they are essentially short-term investments, the balance sheet value was considered a reasonable approximation of their fair value.

It should be noted that the fair value presented does not correspond to the realization value of these financial instruments in a sale or liquidation scenario and was not calculated for that purpose.

As at December 31, 2025 and December 31, 2024, the fair value of financial instruments recorded in the balance sheet at fair value presents the following detail by valuation methodology:

AOA thousands

	31/12/2025

Fair value of financial instruments recorded at amortised cost

As at December 31, 2025 and December 31, 2024, the fair value hierarchy of the financial instruments recorded in the balance sheet at amortised cost is analyzed as follows. These were estimated based on the main methodologies and assumptions described below:

AOA thousands

	31/12/2025				
		Fair value			
	Book value	Level 1 Prices on the active market	Level 2 Observable market inputs	Level 3 Other valuation techniques	Total fair value

Cash and deposits at central banks and other demand deposits, Other loans and advances to credit institutions and Deposits from central banks

These assets and liabilities are very short-term, and therefore the balance sheet value is a reasonable estimate of their fair value.

Securities at amortised cost

The fair value of securities recorded at amortised cost is estimated in accordance with the methodologies followed for valuing securities that are recorded at fair value, as described at the beginning of this Note.

Loans and advances to customers

The fair value of loans and advances to customers is estimated based on the discounted expected cash flows of principal and interest, considering that the installments are paid on the contractually agreed dates. Discount rates used are the current rates for loans with similar characteristics. For stage 2 loans via the individual analysis model, the fair value considered is the balance sheet value.

For stage 3 loans, for which recovery is via foreclosure of the collateral, the Balance Sheet value was considered.

Deposits from customers

The fair value of deposits from customers and other loans is short--term, and therefore the balance sheet value is a reasonable estimate of fair value.

30.5. Capital management

As at December 31, 2025 and December 31, 2024, the Bank's capital and the regulatory capital ratio (solvency) are determined in accordance with the applicable regulatory standards, namely with Notice 8/2021.

Angolan credit institutions should hold a level of capital compatible with the nature and scale of operations, duly weighted by the risks inherent to the operations, with a minimum regulatory capital ratio of 8%, a minimum Tier 1 (T1) capital ratio of 6% and a minimum Common Equity Tier 1 (CET1) capital ratio of 4.5%.

Regulatory capital ratio comprises:

1. Tier 1 capital – comprises: i) Paid-up share capital; ii) Positive retained earnings from previous periods; iii) Legal, statutory and other reserves arising from non-distributed profits, or set up to increase capital; iv) Net profit of the previous period; v) Provisional net profit of the current period; vi) Equity instruments; and, vii) Share premium.

2. The negative elements of Tier 1 capital – comprise: (i) Own shares in the portfolio, at book value in the balance sheet; (ii) Losses carried forward from previous periods; (iii) Net loss of the previous period; (iv) Provisional net loss of the current period; (v) Intangible assets net of amortisation, including goodwill included in the valuation of significant investments of the institution; vi) Expenses with deferred costs related to pension liabilities; vii) Deferred tax assets depending on future profitability; viii) Adjustments on impairment losses on financial instruments in relation to that determined by the Banco Nacional de Angola in the prudential supervision; ix) Positive revaluation differences arising from the application of the equity method; x) Actuarial losses not recognized in profit and loss; xi) The amount of the items that need to be deducted from additional Tier 1 capital items that exceed the Institution's additional Tier 1 capital items; xii) The exposure value of incomplete transactions; (xiii) The applicable amount of Common Equity Tier 1 instruments of credit institutions held directly, indirectly and synthetically with which the Institution has cross-holdings that the Banco Nacional de Angola considers to have been set up to artificially inflate the Institution's capital; (xiv) The applicable amount of Common Equity Tier 1 instruments of credit institutions held by the Institution directly, indirectly and synthetically where the Institution does not have a significant investment in such entities; (xv) The applicable amount of Common Equity Tier 1 instruments of credit institutions held by the Institution directly, indirectly and synthetically where the Institution has a significant investment in such entities, excluding underwriting positions held for a period of five (5) business days or less (xvi) Any tax on Common Equity Tier 1 items that is foreseeable at the time it is calculated, except where the Institution appropriately adjusts the amount of Common Equity Tier 1 items to the extent that such tax reduces the amount by which those items may be used to hedge risks or losses.

3. Additional Tier 1 capital – comprises (i) Preference shares; ii) Hybrid and/or convertible instruments; iii) Other instruments whose issue conditions have been previously approved by the Banco Nacional de Angola; and iv) Share premium relating to the items included in the previous sub-paragraphs.

4. The negative elements of additional Tier 1 capital – comprise: i) Additional Tier 1 instruments held directly, indirectly and synthetically,

including additional Tier 1 instruments that the Institution may be required to acquire as a result of existing contractual obligations; ii) Additional Tier 1 instruments of credit institutions held directly, indirectly and synthetically, with which the Institution has cross-holdings that the Banco Nacional de Angola considers to have been set up to artificially inflate the Institution's capital; iii) The applicable amount of additional Tier 1 instruments of credit institutions held directly, indirectly and synthetically, where the Institution does not have a significant investment in those credit institutions; (iv) The applicable amount of additional Tier 1 capital instruments of credit institutions held directly, indirectly and synthetically by the Institution, where the institution has a significant investment in such credit institutions, excluding underwriting positions held for a period of five (5) business days or less; (v) The amount of items required to be deducted from Tier 2 capital items in excess of the Institution's Tier 2 capital items; and, (vi) Any tax on additional Tier 1 capital items that is foreseeable at the time it is calculated, except where the Institution appropriately adjusts the amount of additional Tier 1 capital items to the extent that such tax reduces the amount by which those items may be used to hedge risks or losses.

5. Tier 2 capital – comprises: i) Redeemable preference shares; ii) Reserves from the revaluation of real estate for own use; iii) Subordinated debt, in the form of loans or bonds issued, whose issue conditions were previously approved by the Banco Nacional de Angola; iv) Other instruments whose issue conditions were previously approved by the Banco Nacional de Angola; and, v) Share premium relating to the items included in the previous points.

6. The negative elements of Tier 2 capital – comprise: i) Common Equity Tier 2 instruments held directly, indirectly and synthetically, including Tier 2 instruments that the Institution may be required to acquire as a result of existing contractual obligations; ii) Tier 2 instruments of directly, indirectly and synthetically held credit institutions with which the Institution has cross-holdings that the Banco Nacional de Angola considers to have been set up to artificially inflate the Institution's capital; (iii) The applicable amount of Tier 2 instruments of credit institutions held directly, indirectly and synthetically, where the Institution does not have a significant investment in such credit institutions; and, (iv) Tier 2 instruments of credit institutions held directly, indirectly and synthetically by the Institution, where the Institution has a significant investment in such entities, excluding underwriting positions held for a period of five (5) business days or less.

Net profit for the previous period and for the current period referred to in the previous paragraphs can only be considered whenever they are certified by the expert accountant who is a member of the supervisory body or single auditor and by the external auditor.

The following table shows the capital and the solvency ratio as at December 31, 2025 and December 31, 2024:

AOA thousands

	31/12/2025	31/12/2024

Total	**141,748,662**	**112,572,893**
Regulatory own funds ratio	**38.77%**	40.68%

32. Recently Issued Accounting Standards and Interpretations

The recently issued accounting standards and interpretations that have come into effect and that the Bank has applied in preparing its financial statements are as follows:

Amendments to IAS 21 – The Effects of Changes in Foreign Exchange Rates: Lack of Exchangeability

On August 15, 2023, the International Accounting Standards Board (IASB) issued Lack of Exchangeability (Amendments to IAS 21 – The Effects of Changes in Foreign Exchange Rates) (the amendments).

The amendments clarify how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking.

An entity assesses whether a currency is exchangeable into another currency at a measurement date and for a specified purpose. When a currency is not exchangeable, the entity has to estimate a spot exchange rate.

According to the amendments, entities will have to provide new disclosures to help users assess the impact of using an estimated exchange rate on financial statements. These disclosures may include:

- the nature and financial effects of the currency not being exchangeable into the other currency;
- the spot exchange rate(s) used;
- the estimation process; and
- the risks for the company arising from the currency being convertible.

The amendments apply for annual reporting periods beginning on or after January 1, 2025. Early adoption is permitted.

The Bank has not recorded any significant changes in the adoption of this amendment.

The Bank has decided not to apply the following standards and/or interpretations early:

Annual improvements

On July 18, 2024, the International Accounting Standards Board (IASB) issued limited amendments to the IFRS and respective guidelines, resulting from the regular maintenance carried out on the Standards.

The amendments include clarifications, simplifications, corrections and modifications made with the aim of improving the consistency of various IFRS.

The IASB amended:

- IFRS 1 First-time Adoption of International Financial Reporting Standards, to clarify certain aspects related to the application of hedge accounting by an entity that is preparing financial statements in accordance with IFRS for the first time;
- IFRS 7 Financial Instruments: Disclosures and the respective Implementation Guidance, in order to clarify:
  - The application guidance, regarding Gain and loss on derecognition; and
  - The implementation guidance, namely its Introduction, Fair value paragraph (disclosures regarding the difference between fair value and transaction price) and Credit risk disclosure.
- IFRS 9 Financial Instruments to:
  - Require companies to initially measure a receivable without a significant financing component at the amount determined by applying IFRS 15, and
  - Clarify that when a lease liability is derecognized, the derecognition is accounted for under IFRS 9. However, when a lease liability is modified, the modification is accounted for under IFRS 16 Leases. The amendment establishes that when lease liabilities are derecognized under IFRS 9, the difference between the carrying amount and the consideration paid is recognized in profit or loss.
- IFRS 10 Consolidated Financial Statements, clarification on the determination of a "*de facto* agent"; and
- IAS 7 Cash Flow Statements, amendment of detail in the paragraph relating to Investments in subsidiaries, associates and joint ventures.

The amendments are effective for annual reporting periods beginning on or after January 1, 2026. Early adoption is permitted.

The Bank is currently assessing the impact that the changes will have on its financial statements.

Amendments to IFRS 9 and IFRS 7 – Nature-dependent electricity contracts

On December 18, 2024, the International Accounting Standards Board (IASB) issued amendments to help companies better report the financial effects of nature-dependent electricity contracts, which are often structured as power purchase agreements (PPA).

Nature-dependent electricity contracts help companies to secure their electricity supply from sources such as wind and solar power. The amount of electricity generated under these contracts can vary based on uncontrollable factors such as weather conditions. Current accounting requirements may not adequately capture how these contracts affect a company's performance.

To allow companies to better reflect these contracts in the financial statements, the IASB has made targeted amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures. The amendments include:

- Clarifying the application of the 'own-use' requirements;
- Permitting hedge accounting if these contracts are used as hedging instruments; and
- Adding new disclosure requirements to enable investors to understand the effect of these contracts on a company's financial performance and cash flows.

This amendment is effective for periods after January 1, 2026. Early adoption is permitted.

The Bank is currently assessing the impact that the changes will have on its financial statements.

Amendments to the Classification and Measurement of Financial Instruments

On May 30, 2024, the International Accounting Standards Board (the IASB or the Board) issued amendments to the classification and measurement requirements of IFRS 9 – Financial Instruments. The changes aim to resolve the diversity in the application of the standard, making the requirements more understandable and consistent.

The amendments:

- Clarify the classification of financial assets with environmental, social and governance (ESG)-linked features and other similar features, since these features in loans can affect whether loans are measured at amortised cost or fair value. In order to resolve any potential diversity in practice, the amendments clarify how to assess the contractual cash flows of loans.
- Clarify the date on which a financial asset or financial liability is derecognized when it is settled through electronic payment systems. There is an accounting policy option that allows the derecognition of a financial liability before delivering the cash on the settlement date, if certain criteria are met.
- Improve the description of the term "non-recourse". According to the amendments, a financial asset has non-recourse features if the ultimate contractual right to receive cash flows from an entity is limited to the cash flows generated by specified assets. The presence of non-recourse features does not necessarily exclude the financial asset from complying with the SPPI (solely payment of principal and interest) requirement, but its features need to be carefully analyzed.
- Clarify the treatment of contractually linked instruments (CLI). CLI must feature a waterfall payment structure that creates concentration of credit risk by allocating losses disproportionately between different tranches. The underlying pool can include financial instruments not in the scope of IFRS 9 classification and measurement (*e.g.*, lease receivables), but must have cash flows that are equivalent to SPPI criterion.

The IASB has also introduced additional disclosure requirements relating to equity instruments classified at fair value through other comprehensive income (FVOCI) and financial instruments with contingent features, for example features linked to ESG targets.

This amendment is effective for periods after January 1, 2026. Early adoption is permitted.

The Bank is currently assessing the impact that the changes will have on its financial statements.

IFRS 18 Presentation and Disclosure in Financial Statements

On April 9, 2024, the International Accounting Standards Board (the IASB or Board) issued the new standard, IFRS 18 Presentation and Disclosure in Financial Statements.

The main amendments to this standard are:

- Providing a more structured income statement. Specifically, it introduces a new subtotal "operating profit or loss" (as well as its definition) and the requirement that all income and expenses be classified into three new separate categories based on an entity's main business activities: Operating, Investing and Financing.

- Requirement for entities to analyze their operating expenses directly on the face of the income statement – either by nature, by function or in combination.

- Requirement for some of the "non-GAAP" measures that the Bank uses to be reported in the financial statements. IFRS 18 defines management-defined performance measure (MPM or non-GAAP Performance Measures) as a subtotal of income and expenses that an Entity uses:

  - in public communications outside financial statements; and

  - to communicate management's view of the financial performance.

  IFRS 18 requires entities to disclose information about all its MPMs in a single note to the financial statements. These include: how the measure is calculated; how it provides useful information; and a reconciliation to a value determined in accordance with IFRS.

- Introduction of improved guidelines on how entities group information in financial statements. It provides guidance on whether material information should be included in the primary financial statements or in the notes.

IFRS 18 is effective for annual reporting periods beginning on or after January 1, 2027. The standard is applied retrospectively. Early adoption is permitted.

The Bank is currently assessing the impact that the Standard will have on its financial statements.

Changes for converting financial information from a non-hyperinflationary currency to a hyperinflationary currency

On November 13, 2025, the International Accounting Standards Board (IASB) issued amendments to IAS 21 – The Effects of Changes in Foreign Exchange Rates, which clarifies how companies should translate financial statements from a non-hyperinflationary currency to a hyperinflationary currency.

The amendment applies to annual reporting periods beginning on or after January 1, 2027, and applies retrospectively. Early adoption is permitted.

The Bank is currently assessing the impact that the amendment will have on its financial statements.

33. Subsequent Events

There are no known events after December 31, 2025 that require adjustments or disclosures to the financial statements reported on that date.

34. Explanation Added for Translation

These financial statements are a translation of the financial statements originally issued in Portuguese. In the event of discrepancies, the Portuguese language version shall prevail.

EXTERNAL AUDITORS' REPORT
(Free translation from a report originally issued in Portuguese language. In case of doubt the Portuguese version will always prevail.)

To the Shareholders of
Banco de Fomento Angola S.A.

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

Opinion

For the purposes of the provisions of the Securities Code, approved by Law 22/15 of August 31 (hereinafter referred to as CódVM) and Regulation 1/22 of February 9 on External Auditors, we have audited the accompanying individual financial statements of **Banco de Fomento Angola S.A.** (the Bank), which comprise the Individual Balance Sheet as at December 31, 2025 (showing total assets of AOA 4,278,401,327 thousand and total equity of AOA 817,303,956 thousand, including a net profit of AOA 230,622,125 thousand), the Individual Income Statement and the Individual Statement of Other Comprehensive Income, the Individual Statement of Changes in Equity and the Individual Cash Flow Statement for the year ending on that date and the notes to the individual financial statements, including material information on the accounting policy.

In our opinion, the accompanying individual financial statements present fairly, in all material respects, the individual financial position of **Banco de Fomento Angola, S.A.** as at December 31, 2025 and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

Basis for opinion

Our audit was conducted in accordance with International Standards on Auditing (ISA), Instruction 04/CMC/12-25 on the Models of Reports to be Prepared by External Auditors Registered with the Capital Markets Commission ("CMC"), as well as the other Technical Standards of the Angolan Institute of Accountants ("OCPCA"). Our responsibilities under those standards are further described in the "Auditors' Responsibilities for the Audit of the Financial Statements" section below. We are independent from the Entity under the terms of the law and comply with the other ethical requirements set forth in the OCPCA Code of Ethics.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Audit-relevant matters

The relevant audit matters are those that, in our professional judgment, were most significant in the audit of the current year's individual financial statements.

KPMG

These matters were considered in the context of our audit of the individual financial statements as a whole, and in forming our opinion, and we have not issued a separate opinion on these matters.

Description of the most significant risks of material misstatement identified	Summary of the response to the risks of material misstatement analyzed
Credit impairment and provisions for issued guarantees and unused credit lines (AOA 65,545,195 thousand) see notes 2.3, 3.1, 9, 17 and 31 – credit risk	
Impairment losses for loans to customers measured at amortized cost and provisions for issued guarantees and unused credit lines represent the Bank's Board of Directors' estimate of expected losses at the reporting date of the financial statements in accordance with IFRS requirements, namely IFRS 9 – Financial Instruments. For purposes of determining impairment, the loans to customers balance, as well as issued guarantees and unused credit lines, are classified into three categories (Stage 1, 2, or 3), taking into consideration whether there has been a significant increase in credit risk since initial recognition or whether the assets are in default. This classification is influenced by a set of subjective factors which, if incorrectly applied, may generate material impacts. For this reason, determining the stage is a relevant process for the Bank, as it influences the associated levels of Expected Credit Loss ('ECL'). Impairment and provisions for issued guarantees and unused credit lines are calculated based on the expected loss estimated by the Bank on both an individual and collective basis. The individual analysis is based on the criteria defined in accounting policy 2.3.11. This analysis is based on assessing the existence of impairment losses through a case-by-case review, considering the total exposure of a given customer,	Our audit procedures included, among other aspects, those described below: - We assessed the design and implementation of the key controls defined by the Bank over the process for identifying and determining impairment losses. - We assessed the alignment of the accounting policies with the requirements set out in the applicable standards. - We analyzed the process and performed substantive testing over the classification of financial assets based on their credit risk (Stage 1, 2, and 3). - We assessed the impairment model, which includes the provision for issued guarantees and unused credit lines, developed by the Bank, including an assessment of its main assumptions and the forward-looking information considered in the estimation of the ECL, with the involvement of our specialists in this area. - We assessed a selection of individual loans, including both direct and indirect credit exposures, regarding the assumptions underlying the identification and measurement of impairment, including (i) the assessment of existing collateral, and (ii) the recovery estimates in the event of default. For this purpose, we selected a sample of customers for whom we assessed the reasonableness of the impairment loss estimate based on the analysis of the judgments

the expected evolution of their business performance, the market value of the associated collateral, and the expected evolution of future macroeconomic conditions. The determination of impairment losses on an individual basis involves a degree of judgment by the Bank, as it requires evaluating the information available in determining the recoverable amount, which includes assumptions that may not materialize as expected.

Exposures subject to individual analysis for which no individual impairment has been recognized are transferred to the collective analysis.

The collective analysis is based on estimates and assumptions for determining the ECL that take into consideration (i) the historical loss experience of credit portfolios with similar risk characteristics, determined according to the type of credit to which they are allocated, and (ii) the knowledge of the economic and credit environment and its influence on the level of historical and future (forward-looking) losses, the latter being particularly relevant given the uncertain economic environment.

The process for assessing impairment for loans to customers and for provisions for issued guarantees and unused credit lines is highly complex in its design and implementation and involves estimates and judgments by the Bank. This process takes into consideration factors such as the probability of default, risk ratings, the value of collateral associated with each transaction, recovery rates, and the estimates of both future cash flows and the timing of their receipt.

On this basis, given the uncertainty, complexity, and judgment involved in calculating the estimate, impairment for loans to customers was considered a relevant audit matter.

made by the Bank regarding the information related to the customers' economic and financial position, the valuation of collateral, and the prospects for the evolution of their activity.

- For credits whose impairment losses are determined on a collective basis, we tested, with the support of our specialists in this area, the underlying models, including their approval and validation process, as well as the determination of the impairment recognized in loans to customers and provisions for issued guarantees and unused credit lines.

  Additionally, we tested the adequacy and accuracy of the significant assumptions used by the model, including the key attributes.

- We assessed the appropriateness of the related disclosures in the financial statements in accordance with the applicable accounting framework.

Management's Responsibility for the Financial Statements

Management is responsible for:

- the preparation and fair presentation of these individual financial statements and of the financial position, financial performance and cash flows of the Bank in accordance with International Financial Reporting Standards (IFRS);
- designing and maintaining an appropriate internal control system to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error;
- preparing the Management Report and the Corporate Governance Report, in accordance with legal and regulatory requirements;
- adopting appropriate accounting policies and criteria, taking into consideration the circumstances; and
- assessing the Bank's ability to continue as a going concern, disclosing, where applicable, any matters that may cast significant doubt on this matter.

The supervisory body is responsible for supervising the process of preparing and disclosing the Bank's financial information.

Auditors' responsibilities for the audit of the financial statements

Our responsibility is to obtain reasonable assurance about whether the individual financial statements as a whole are free from material misstatements whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these individual financial statements.

As part of an audit in accordance with the ISA, we make professional judgments and maintain professional skepticism during the audit and also:

- identify and assess the risks of material misstatement of the individual financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control;

- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management;
- conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the individual financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Bank to discontinue its activities;
- we assess the overall presentation, structure and content of the individual financial statements, including the disclosures, and whether these individual financial statements represent the underlying transactions and events in a manner that achieves fair presentation;
- we communicate with those charged with governance, including the supervisory body, among other matters, the planned scope and timing of the audit, and the significant findings of the audit including any significant deficiencies in internal control identified during the audit;
- from the matters we communicate to those charged with governance, including the supervisory body, we determine those that were the most significant in the audit of the individual financial statements of the current year and that constitute the relevant audit matters. We describe these matters in our report, except when law or regulation prohibits their public disclosure; and
- we declare to the supervisory body that we have complied with the relevant ethical requirements regarding independence and communicate all relationships and other matters that may be perceived as threats to our independence and, when applicable, the measures taken to eliminate those threats or the safeguards applied.

Our examination also included verifying:

i) The consistency of the financial information included in the Management Report with the other accounting documents; and,

ii) Compliance with the mandatory elements of the Corporate Governance Report set out in Article 17 of Regulation 6/16 of June 7 issued by the Capital Markets Commission, in accordance with Article 145 of the Securities Code.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

Regarding the Management Report

In compliance with the applicable legal requirements, we are of the opinion that the Management Report was prepared in accordance with the applicable legal and regulatory requirements, that the information contained therein is consistent with the audited individual financial statements, and, based on our knowledge and assessment of the Bank, we did not identify any material misstatements.

Regarding the Corporate Governance Report

In compliance with the applicable legal requirements, namely those set out in (c)(iv) of Instruction 02/CMC/03-23, we are of the opinion that the Corporate Governance Report was prepared in accordance with the applicable legal and regulatory requirements in force, that the information contained therein is consistent with the audited individual financial statements, and, based on our knowledge and assessment of the Bank, we did not identify any material misstatements.

Luanda, February 20, 2026

KPMG Angola – Audit, Tax, Advisory,
Represented by Maria
Inês Rebelo Filipe
(Registered Auditor with certificate no. 20140081)

Report of the Supervisory Board on the Annual Report and Financial Statements for 2025

(Individual Financial Statements)

In compliance with the applicable legal and regulatory provisions, namely paragraph g) of Article 441 of Law no. 1/04 of 13 February – Commercial Companies Law, paragraph 2 of Article 71 of Law no. 14/21 of 19 May, which approves the General Framework for Financial Institutions, read in conjunction with paragraph d) of paragraph 1 of Article 15 of Notice no. 1/22 of 28 January – Corporate Governance Code for Financial Institutions, paragraph 5 of Article 6 of Notice no. 5/19 of 30 August, on the Accounting Standardisation and Harmonisation Process for the Angolan Banking Sector, and paragraph 8.1 of Article 8 of the Supervisory Board Regulations of Banco de Fomento Angola, S.A., approved on 23 December 2025, the Supervisory Board is responsible for issuing an opinion on the Annual Individual Financial Statements of Banco de Fomento Angola, S.A. for the financial year 2025, as presented by the Board of Directors.

During the financial year, the Supervisory Board monitored the Bank's activities through various actions, of which the following should be highlighted:

- We carried out, with the depth and scope deemed appropriate, the analyses inherent to our supervisory function.
- We participated in the meetings of the Board of Directors that approved the Financial Statements, as well as in the meetings of the Audit and Internal Control Committee.
- We held meetings with the Accounting, Internal Audit and Inspection, and Compliance Departments.
- We reviewed the processes for granting credit to related parties and issued the respective opinions.
- We reviewed proposals for services to be provided by the External Auditor, in order to assess potential exposure to conflicts of interest.
- We reviewed the Bank's Corporate Governance and Internal Control System Report and issued the corresponding opinion, in accordance with paragraph 3 of Article 46 of Notice no. 1/2022 of 28 January of the Banco Nacional de Angola.
- We reviewed and issued an opinion on the adequacy of the Internal Control System for the Prevention and Combat of Money Laundering, Terrorist Financing and Proliferation of Weapons of Mass Destruction, for the purposes set out in paragraph c) of paragraph 4 of Article 43 of Notice no. 2/24 of 22 March of the Banco Nacional de Angola.
- We held regular meetings with the Independent Auditor (KPMG) to monitor its activities.

The Supervisory Board, within the scope of its duties, reviewed the Annual Individual Financial Statements, comprising the Statement of Financial Position, the Statement of Profit or Loss and Other Comprehensive Income, the Statement of Cash Flows and the Statement of Changes in Equity as at 31 December 2025. The Statement of Financial Position reported total assets of AOA 4,278,401,327 thousand, total liabilities of AOA 3,461,097,371 thousand, total equity of AOA 817,303,956 thousand and net profit for the year of AOA 230,622,125 thousand.

The Supervisory Board, in the performance of its duties, did not identify any matters that were not in compliance with the applicable legal requirements, International Financial Reporting Standards and applicable accounting practices and considers that the financial statements present fairly, in all material respects, the financial position of the Bank and the results of its operations.

The Supervisory Board has taken note of the Independent Auditor's Report on the Financial Statements, which includes a section entitled Key Audit Matters, highlighting those matters that, in the auditor's judgement, were

of most significance in the audit, including a description of the most significant risks of material misstatement identified, as well as a summary of the responses to those risks in terms of the procedures performed to assess their potential impact.

In the conclusion of the audit performed, the Independent Auditor expressed its opinion stating that "the individual financial statements present fairly, in all material respects, the financial position of Banco de Fomento Angola, S.A. as at 31 December 2025, and its financial performance and cash flows for the year then ended, in accordance with International Financial Reporting Standards (IFRS)".

Accordingly, the Supervisory Board is of the opinion that the Annual Individual Financial Statements as at 31 December 2025 and the proposal for the appropriation of net profit for the financial year 2025 should be approved.

In addition, the Supervisory Board reviewed the proposal for the appropriation of results prepared by the Board of Directors and is of the opinion that it should be approved.

In compliance with the applicable legal provisions, namely Instruction no. 02/CMC/03-23 of the Capital Markets Commission, the Supervisory Board is of the opinion that the Bank's Corporate Governance Report has been prepared in accordance with the applicable legal and regulatory requirements in force and is consistent with the Bank's Financial Statements as at 31 December 2025.

In conclusion, we would like to express our appreciation to the Board of Directors and to all the Bank's employees for their cooperation.

The Supervisory Board of Banco de Fomento Angola, S.A.
Luanda, 20 February 2026

1. Introduction

Banco de Fomento Angola, S.A. | Sociedade Aberta (hereinafter also referred to as Bank or BFA), was incorporated by Public Deed on August 26, 2002, following the transformation of the Angolan Branch of Banco BPI, S.A. into a bank under local law, and is fully owned by BPI.

In 2008, BPI sold 49.9% of its stake in the Bank to Unitel, S.A.

On January 5, 2017, pursuant to the share purchase and sale agreement entered into in 2016, the sale by Banco BPI to Unitel of the shareholding representing 2% of the share capital of BFA was completed. Thus, BFA was majority held by Unitel, S.A., with a stake of 51.9%.

As indicated in Note 18, on December 31, 2025, following the admission to trading of the Bank's shares, as part of a public offering of 29.75% of the share capital, BFA's share capital was held 36.9% by Unitel, S.A., 33.35% by Banco BPI, and 7.61% by Congolian Financial, S.A., with the remaining 22.14% dispersed among minority shareholders.

The Bank is engaged in obtaining funds from third parties in the form of deposits or other funds, which it invests, together with its own funds, in the granting of loans, deposits in the Banco Nacional de Angola ("BNA"), investments in credit institutions and acquisition of securities or other assets, for which it is duly authorized. It also provides other banking services and performs various types of operations in foreign currency, having for this purpose, as at December 31, 2025, a national network of 154 branches, 12 investment centers, 7 large corporate centers, 4 Oil & Gas and Public Sector centers, 11 medium corporate centers, 1 Private Banking center and 1 Customer service center.

As at December 31, 2025, the individual financial information of the companies that comprise the BFA Group is as follows:

Following Instruction 05/CMC/03.23 on the Transfer of Securities and Derivatives Investment Services and Activities, BFA Capital Markets started operating on June 8, 2023, with a share capital of AOA 200 million, focusing its activity on securities trading and custody.

With a view to equipping the Group with pension fund management capabilities, on May 10, 2023, ARSEG granted a license certificate to BFA Fundos de Pensões, with an initial share capital of AOA 876,960 thousand. In early 2025, the Bank proceeded with a capital increase for this company in the amount of AOA 450,000 thousand.

BFA – GA is a management company for collective investment undertakings under Angolan private law, registered with the CMC since December 2016, providing services for the establishment, management, and consulting of collective investment undertakings in the form of investment funds.

2. Basis of Presentation and Summay of Main Accounting Policies

2.1. Basis of presentation

The Group's financial statements have been prepared on the going concern assumption and in accordance with International Financial Reporting Standards (IFRS), pursuant to Notice 5/2019, of August 30, of the Banco Nacional de Angola IFRS includes accounting standards, issued by the International Accounting Standards Board (IASB) and interpretations issued by the International Financial Reporting Interpretation Committee (IFRIC).

The Group's financial statements now presented relate to the period ended December 31, 2025.

The accounting policies used by the Group in the preparation are consistent with those used in the preparation of the financial statements as at December 31, 2024, except for the new standards issued, where applicable.

The Group's financial statements are stated in thousands of kwanzas, rounded to the nearest thousand. The consolidated financial statements were prepared in accordance with the historical cost principle, modified by the application of the fair value to derivative financial instruments and financial assets and liabilities recognized at fair value through profit or loss. Other financial assets and liabilities and other non-financial assets and liabilities are recorded at amortised cost or historical cost.

The preparation of the consolidated financial statements in accordance with IAS/IFRS requires the Group to make judgments and estimates and uses assumptions which affect the application of accounting policies and the amounts of income, expenses, assets and liabilities. Changes or differences between such assumptions and reality may have impacts on the actual estimates and judgments. The areas involving a higher degree of judgment or complexity, or areas where significant assumptions and estimates are made in preparing the financial statements are discussed in Note 3.

The consolidated financial statements for the period ended December 31, 2025 were approved at the meeting of the Group's Board of Directors on February 19, 2026.

The recently issued accounting standards and interpretations that have not yet come into force and that the Group has not yet applied in the preparation of its consolidated financial statements can be analyzed in Note 31.

2.2. Scope of Consolidation

These consolidated financial statements present the assets, liabilities, income, expenses, other comprehensive income and cash flows of Banco de Fomento Angola, S.A. and its subsidiaries.

The accounting policies were applied consistently by all the Bank's subsidiaries for the periods covered by these consolidated financial statements.

Subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed or has rights, to variable returns from its involvement with that entity, being able to seize those returns through the power it has over the entity (de facto control) and having the ability to affect those variable returns through its power over the relevant activities of the entity.

As established in IFRS 10, the Group analyzes the purpose and structure of the way in which an entity's operations are carried out when assessing control over it.

Subsidiaries are fully consolidated from the date the Group obtains control of their activities until that control ceases.

Third-party shareholdings in these companies are disclosed under Non-controlling interests. The accumulated losses of a subsidiary are attributed to non-controlling interests in the proportions held, which may lead to the recognition of negative non-controlling interests. Gains or losses arising from the dilution or sale of part of the shareholding in a subsidiary, with loss of control, are recognized by the Group in the income statement.

Balances and transactions eliminated in consolidation

Balances and transactions between Group companies, including any unrealized gains or losses resulting from intra-group operations, are eliminated in the consolidation process, except in cases where unrealized losses suggest impairment that should be recognized in the consolidated financial statements.

2.3. Transactions in foreign currency

Transactions in foreign currency are translated into the functional currency (Kwanza) at the exchange rate prevailing on the transaction date.

Foreign currency transactions are recorded in accordance with the principles of the multi-currency system, with each transaction being recorded according to the respective denomination currencies. Assets and liabilities stated in foreign currency are translated into kwanzas at the exchange rate published by the Banco Nacional de Angola as at the balance sheet date. Non-monetary assets and liabilities recorded at fair value are translated into the functional currency at the exchange rate published by the Banco Nacional de Angola on the date the fair value is determined and recognized against profit or loss. Income and expenses related to exchange rate differences, whether realized or potential, are recorded in the income statement in the period in which they occur under Foreign exchange gains/(losses). The "forward currency position" transactions relate to currency forward contracts, and the related income and expenses are recorded under the caption Net gains/(losses) on financial assets and liabilities at fair value through profit or loss in the income statement.

As at December 31, 2025 and December 31, 2024, the exchange rates of the Kwanza (AOA) against the United States Dollar (USD) and the Euro (EUR) were as follows:

	12/31/2025	12/31/2024
1 USD	**912.286**	912.000
1 EUR	**1,069.522**	949.483

Forward currency position

The forward currency position corresponds to the net balance of forward transactions pending settlement. All contracts related to these transactions are revalued at market forward exchange rates.

The difference between the equivalent in kwanzas at the forward revaluation rates applied, and the equivalent at the contracted rates, is recorded under assets or liabilities, against income or expenses, respectively.

2.4. Financial instruments

2.4.1. Classification of financial assets

In accordance with IFRS 9 – Financial Instruments, financial assets can be classified into three categories with different measurement criteria:

- Amortised cost;
- Fair value through other comprehensive income (FVOCI); and
- Fair value through profit or loss (FVTPL).

The classification of financial assets depends on the business model and the contractual cash flow characteristics (SPPI criterion).

Business model

The business models foreseen in the standard are as follows:

- Business model whose objective is achieved by holding the asset to maturity to collect the contractual cash flows therefrom (Held to collect);
- Business model whose objective is achieved both by collecting the contractual cash flows from the asset and selling it (Held to collect and sell); and
- Other business models (*e.g.*, trading).

Evaluation of the business model

The business model reflects the way the Group manages its assets from a cash-flow generation standpoint. Thus, it is important to understand whether the objective of the Group is only to receive the contractual cash flows from the assets or whether it intends to receive the contractual cash flows and the cash flows resulting from the sale of the assets. If none of these situations apply (*e.g.*, financial assets are held for trading), the financial assets are classified as part of "other business models" and recognized at fair value through profit or loss.

The factors considered by the Group in identifying the business model for a set of assets include past experience with respect to the way (i) cash flows are received, (ii) asset performance is assessed and reported to management, (iii) risks are assessed and managed and (iv) directors are remunerated.

Financial assets at fair value through profit or loss are held essentially for the purpose of being sold in the short term, or to form part of a portfolio of jointly-managed financial instruments, for which there is clear evidence of a recent pattern of short-term gains. These assets are classified under "other business models" and recognized at fair value through profit or loss.

The evaluation of the business model does not depend on the intentions for an individual instrument, but for a set of instruments, and considers the frequency, the value, the sales calendar in previous periods, the reasons for the referred sales and the expectations regarding future sales. Sales that are infrequent, or insignificant, or close to the maturity of the asset and those motivated by an increase in the credit risk of the financial assets, or to manage concentration risk, among others, may be compatible with the model of holding assets to receive contractual cash flows.

If a financial asset contains a contractual clause that can modify the timing or the amount of the contractual cash flows (such as early amortisation or extension of term clauses), the Group determines whether the cash flows that will be generated during the life of the instrument, due to the exercise of that contractual clause, are solely payments of principal and interest on the principal amount outstanding.

In the event that a financial asset includes a periodic interest rate adjustment, but the frequency of such adjustment does not coincide with the benchmark interest rate (for example, the interest rate is adjusted every three months), the Group assesses, at the time of the initial recognition, this inconsistency in the interest component to determine whether the contractual cash flows represent solely payments of principal and interest on the principal amount outstanding.

Contractual conditions that, at the time of the initial recognition, have a minimal effect on cash flows or depend on the occurrence of exceptional or highly unlikely events (such as redemption by the issuer) do not prevent their classification in portfolios at amortised cost or at fair value through other comprehensive income.

SPPI assessment

When the business model involves holding assets in order to (i) collect contractual cash flows or (ii) collect contractual cash flows and sell these assets, the Group assesses whether the cash flows of the financial instrument correspond solely to payments of principal and interest on the principal amount outstanding (SPPI test). In this assessment, the Group considers whether the contractual cash flows are consistent with a basic loan agreement, that is, the interest includes only considerations regarding the time value of money, credit risk and a profit margin that is consistent with a basic loan agreement. When the contractual terms introduce exposure to risk or variability in cash flows that are inconsistent with a basic loan agreement, the financial instrument is classified and measured at fair value through profit or loss.

The financial assets with embedded derivatives are considered in their entirety, when determining whether the cash flows correspond solely to payments of principal and interest on the principal outstanding (SPPI test).

Financial liabilities at amortised cost

The Group measures a financial asset at amortised cost if it complies, simultaneously, with the following characteristics and if it is not designated at FVTPL by option (use of the Fair Value Option):

- The financial asset is held in a business model whose main purpose is to hold the assets to collect its contractual cash flows (HTC – Held to collect); and
- Its contractual cash flows occur on specific dates and correspond solely to payments of principal and interest on the principal amount outstanding (SPPI).

These instruments are initially recorded at fair value and subsequently valued at amortised cost, based on the effective interest rate method, and are subject to impairment tests.

This category of Financial assets at amortised cost includes Other loans and advances to credit institutions, Loans and advances to Customers, debt securities and other financial instruments (Investments at amortised cost) managed based on a business model whose objective is to receive its contractual cash flows.

Financial assets at fair value through other comprehensive income

The Group measures a financial asset at fair value through other comprehensive income if it complies, simultaneously, with the following characteristics and if it is not designated at FVTPL by option (use of the Fair Value Option):

- The financial asset is held in a business model whose objective is to hold the assets to collect its contractual cash flows and/or sell them (HTC and Sell – Held to collect and Sell); and

- Its contractual cash flows occur on specific dates and correspond solely to payments of principal and interest on the principal amount outstanding (SPPI).

On initial recognition of an equity instrument that is not held for trading, the Group may irrevocably assign it to this category. This designation is made on a case-by-case, investment-by-investment basis and is only available for financial instruments that meet the definition of equity instruments under IAS 32 and may not be used for financial instruments classified as equity instruments at issuer level under the exceptions provided for in paragraphs 16A to 16D of IAS 32.

Financial assets at fair value through other comprehensive income are initially recorded at fair value. Gains and losses relating to subsequent changes in fair value are reflected in a specific item of equity (Reserves of financial assets at fair value through other comprehensive income) until they are sold, where they are reclassified to profit or loss for the period, except for equity instruments which are reclassified to retained earnings. Additionally, they are subject, since their initial recognition, to calculation of impairment losses (debt instruments only).

Interest income is calculated in accordance with the effective interest rate method and recognized in the income statement under the caption Interest income and similar income. Income from variable-income securities is recognized in the income statement caption Income from equity instruments on the date when it is attributed. In accordance with this criterion, prepaid dividends are recorded as income in the year the distribution is decided.

As at December 31, 2025 and December 31, 2024, the Group did not hold any financial assets recorded at fair value through other comprehensive income.

Financial assets at fair value through profit or loss

All financial assets that are not measured according to the methods described above are measured at fair value through profit or loss.

Debt instruments whose contractual cash flow characteristics do not meet the SPPI criterion, and which would otherwise be measured at amortised cost or at fair value through other comprehensive income, are required to be measured at fair value through profit or loss.

This category also includes assets acquired for the purpose of realizing gains from short-term fluctuations in market prices. This category also includes derivative financial instruments, excluding those that comply with hedge accounting requirements. By default, equity instruments are also classified at fair value through profit or loss, unless the entities opt for the irrevocable classification at fair value through other comprehensive income as referred to above.

In addition, at initial recognition, the Group may irrevocably classify a financial asset, which otherwise meets the requirements to be measured at amortised cost or at fair value through other comprehensive income, as at fair value through profit or loss if the classification significantly eliminates the accounting mismatch that would otherwise exist (Fair Value Option).

Financial assets classified in this category are initially recognized at fair value. Gains and losses arising from subsequent valuation at fair value are recognized in the income statement. Income is reflected in the respective captions of Interest and similar income.

Equity instruments

Equity instruments are instruments that meet the definition of capital from the issuer's perspective, which means, instruments that do not contain a contractual payment obligation and that evidence a residual interest in the issuer's net assets. An example of equity instruments are ordinary shares.

Investments in equity instruments are an exception to the general measurement criteria described above. The Group exercises the option, upon initial recognition, to designate investments in equity instruments as financial assets at fair value through other comprehensive income or as financial assets at fair value through profit or loss.

2.4.2. Classification of financial liabilities

An instrument is classified as a financial liability when there is a contractual obligation for its settlement to be realized through the delivery of cash or another financial asset, regardless of its legal form.

Financial liabilities are classified into the following categories:

I. Financial liabilities at amortised cost

Financial liabilities correspond essentially to Deposits from central banks and other credit institutions and Deposits from Customers and other loans. These liabilities are initially measured at fair value, which normally corresponds to the consideration received, net of transaction costs, and are subsequently recorded at amortised cost, in accordance with the effective interest method.

II. Financial liabilities held for trading

This category includes derivative financial instruments with a negative fair value.

III. Financial liabilities at fair value through profit or loss (Fair Value Option)

The Group designates, at initial recognition, certain financial liabilities at fair value through profit or loss (Fair Value Option) provided that at least one of the following requirements is met:

- The financial liabilities are managed, measured and analyzed internally based on their fair value;
- Derivative operations are contracted to hedge these assets or liabilities economically, thus ensuring consistency in the measurement of the assets or liabilities and the derivatives (accounting mismatch); and
- The financial liabilities contain embedded derivatives.

2.4.3. Recognition and initial measurement of financial instruments

At the time of their initial recognition, all financial instruments are recorded at their fair value. For financial instruments that are not recorded at fair value through profit or loss, fair value is adjusted by adding or subtracting transaction costs directly attributable to their acquisition or issue. In the case of financial instruments at fair value through profit or loss, the directly attributable transaction costs are immediately recognized in the income statement.

Transaction costs are defined as expenses directly attributable to the acquisition or disposal of a financial asset, or to the issue or assumption of a financial liability, which would not have been incurred if the Group had not carried out the transaction. These include, for example, commissions paid to intermediaries (such as promoters) and mortgage formalization expenses.

Financial assets are recognized in the balance sheet on the transaction date – the date on which the Group commits to purchase the assets, unless there is a contractual stipulation or applicable legal figure that determines that the transfer of rights occurs at a later date.

At initial recognition, when the fair value of financial assets and liabilities differs from the transaction price, the Group should recognize this difference as follows:

- When the fair value is evidenced by a quotation on an active market of an equivalent asset or liability (that is, level 1 inputs) or based on a valuation technique that uses only observable market data, the difference is recognized as a gain or loss, and
- In the remaining cases, the difference is deferred, and the moment of initial recognition of the gain or loss is determined individually. This difference can then be (i) amortised over the life of the instrument, (ii) deferred until the fair value of the instrument can be determined using observable market data, or (iii) recognized through the liquidation of the asset or liability.

2.4.4. Subsequent measurement of financial instruments

After its initial recognition, the Group measures its financial assets at (i) amortised cost or at (ii) fair value through profit or loss.

Trade receivables from commercial operations that do not have a significant financing component and commercial loans and short-term debt instruments that are initially measured at the transaction price or by the principal outstanding, respectively, are valued at the aforementioned amount less impairment losses.

Immediately after initial recognition, an impairment is also recognized for expected credit losses (ECL), for financial assets measured at amortised cost, resulting in the recognition of a loss in results when the asset is originated.

Financial liabilities are initially recorded at fair value less transaction costs incurred and subsequently at amortised cost, based on the effective interest rate method, with the exception of financial liabilities designated at fair value through profit or loss, which are recorded at fair value.

The subsequent measurement of financial liabilities is generally performed at amortised cost. There are some exceptions to this measurement basis, namely:

- Financial liabilities that are held for trading or when fair value option is applied – the subsequent measurement consists of fair value through profit or loss.

- Financial guarantees – the subsequent measurement consists of the higher of the corresponding expected credit losses and the amount of the initial fee received less the amounts already recognized as revenue in accordance with IFRS 15.

2.4.5. Income and expenses of financial instruments

Income and expenses from financial instruments at amortised cost are recognized according to the following criteria:

I. Interest is recorded in the income statement under Interest and similar income and Interest and similar expense, using the effective interest rate of the transaction on the gross book value of the transaction (except for impaired assets (stage 3) where the interest is applied on the book value net of impairment) and the interest already recognized and unpaid relating to overdue loans for more than 90 days is reversed, being recognized only when received since it is considered that its recovery is remote, and recognized off balance sheet; and

II. The remaining changes in value will be recognized in the income statement as income, or expenses, when the financial instrument is derecognized from the balance sheet under Net gains/(losses) on investments at amortised cost, when it is reclassified, and in the case of financial assets, when there are impairment losses or gains through recovery, which are recorded under Impairment of loans and advances to Customers net of reversals and recoveries, in the case of loans and advances to Customers or under Impairment of other financial assets net of reversals and recoveries, in the case of other financial assets.

In order to determine the effective interest rate, the Group estimates future cash flows considering all contractual terms of the financial instrument, without considering possible impairment losses. The calculation includes all fees paid or received considered as part of the effective interest rate, transaction costs and all other premiums or discounts directly related with the transaction, except for assets and liabilities at fair value through profit or loss.

Treasury Bonds issued in national currency indexed to the exchange rate of the United States Dollar (hereinafter US Dollar) are subject to exchange rate adjustments. The result of the exchange rate adjustments is reflected in the income statement for the period in which it occurs. The result of the exchange rate adjustment of the nominal value of the security is recorded in the caption Foreign exchange gains/(losses) and the result of the exchange rate adjustment of the discount and accrued interest is recorded under Net interest income – Interest and similar income.

Income and expenses from financial instruments at fair value through profit or loss are recognized according to the following criteria:

I. Changes in fair value are recorded directly in the income statement, separating the portion attributable to the instrument's income, which is recorded as interest or dividends according to its nature under the captions Interest and similar income and Income from equity instruments, respectively, and the remainder, which is recorded as results of financial operations under the caption Net gains/(losses) on financial assets and liabilities at fair value through profit or loss; and and

II. Interest on debt instruments is recorded in the income statement under the caption Interest and similar income and is calculated using the effective interest rate method.

2.4.6. Reclassification between categories of financial instruments

Financial assets are not reclassified after their initial recognition, except in the period after the Group changes its business model for managing financial assets. Financial assets are reclassified to other categories only if the business model used in their management is changed. In this case, all affected financial assets are reclassified. The reclassification is applied prospectively from the date of reclassification, and any previously recognized gains, losses (including those related to impairment) or interest are not restated. Financial assets, at the date of their reclassification, are measured at fair value.

The reclassification of investments in equity instruments measured at fair value through other comprehensive income, or financial instruments designated at fair value through profit or loss, is not allowed.

The reclassification of financial liabilities is not allowed.

During the period ended December 31, 2025, the Bank did not reclassify any financial instruments.

2.4.7. Fair value

In accordance with IFRS 13, financial instruments at fair value are measured according to the valuation levels described in Note 30.4.

2.4.8. Modification of loans and advances

The Group occasionally renegotiates or modifies contractual cash flows from loans and advances to Customers. In this situation, the Group assesses whether the new terms of the contract are substantially different from the original terms. The Group performs this analysis considering, among others, the following factors:

- If the debtor is in financial difficulty, whether the modification only reduces the contractual cash flows to an amount that the debtor is expected to be able to pay;
- If any significant new term has been introduced, such as profit-sharing or an equity-based return, which substantially affects credit risk;
- Significant extension of the maturity of the contract when the debtor is not in financial difficulties;
- Significant change in the interest rate;
- Change in the currency in which the loan was contracted; and
- Inclusion of a collateral, a guarantee or other improvement associated with the loan, which significantly affects the credit risk associated with the loan.

If the terms of the contract are significantly different, the Group derecognizes the original financial asset and recognizes the new asset at fair value, calculating its new effective interest rate. The renegotiation date is considered the initial recognition date for the purpose of calculating the impairment, including for the purpose of assessing whether a significant increase in credit risk has occurred. However, the Group also assesses whether the newly recognized financial asset is impaired at initial recognition, especially when the renegotiation is related to the fact that the debtor has not made the payments originally agreed. Differences in the book value are recognized in the income statement, as a derecognition gain or loss.

If the terms of the contract are not significantly different, the renegotiation, or modification, does not result in derecognition and the Group recalculates the gross book value based on the revised cash flows of the financial asset and recognizes a gain or loss from this modification in the income statement.

The new gross book value is recalculated discounting the modified cash flows at the original effective interest rate (or adjusted effective interest rate for impaired financial assets, originated or acquired).

After the modification, the Group can determine that the credit risk has improved significantly and that the assets have moved from Stage 3 to Stage 2 (lifetime ECL) or from Stage 2 to Stage 1 (12 month-ECL). This situation can only occur when the performance of the modified asset is in accordance with the new terms of the contract for a period of twelve consecutive months. Additionally, the Group continues to monitor whether there has been a significant increase in the credit risk of these assets, applying specific models for modified assets.

2.4.9. Derecognition not resulting from a modification

Financial assets are derecognized when the associated cash flows are extinguished, collected or disposed of to third parties and (i) the Group substantially transfers all risks and rewards of ownership of the asset, or (ii) the Group neither transfers nor substantially holds all the risks and rewards of ownership of the asset and does not hold control over the asset. Gains and losses obtained from the definitive sale of loans and advances to Customers are recorded under Other operating income/(expenses). These gains or losses correspond to the difference between the sales value set and the book value of those assets, net of impairment losses.

The guarantees granted by the Group (shares and bonds) through repurchase agreements and securities lending operations are not derecognized because the Group holds substantially all the risks and rewards based on the pre-established repurchase price, and therefore the derecognition criteria are not met (see Note 2.5.).

Financial liabilities are derecognized when the underlying obligation is settled, expires, or is canceled.

2.4.10. Write-off policy

The Group writes off financial assets, in part or in whole, when it concludes that there is no reasonable expectation of collection. The indicators that demonstrate that there is no reasonable expectation of collection are (i) the shutdown of the activity and (ii) the cases in which the recovery depends on the collection of a collateral, but in which the value of the collateral is so low that there is no reasonable expectation of fully recovering the asset.

The rules implemented for the selection of loans that may be written off from assets are as follows:

- The loans cannot be under a risk-sharing protocol;
- The loans must be past due for more than 210 days; and
- The loans cannot be marked as overdue renegotiated loans or be part of an active payment agreement.

2.4.11. Impairment of financial assets

The Group determines impairment losses for debt instruments that are measured at amortised cost, as well as for other exposures that have an associated credit risk such as bank guarantees and commitments assumed.

The requirements of IFRS 9 aim to recognize expected losses from operations, assessed on an individual or collective basis, considering all reasonable, reliable, and duly substantiated information that is available, including information from a forward-looking perspective.

Impairment losses on debt instruments that are measured at amortised cost are recognized against an accumulated impairment caption in the balance sheet, which reduces the book value of the asset, while impairment of assets measured at fair value through other comprehensive income is recognized against other comprehensive income.

Impairment losses arising from the granting of loans and advances to Customers are recognized in the income statement under the caption Impairment losses on loans and advances to Customers, net of reversals and recoveries and those of the remaining financial assets under the caption Impairment losses on other financial assets, net of reversals and recoveries.

Impairment losses on exposures that have an associated credit risk and that are not positions recorded in assets are recorded as a provision under Provisions in liabilities, in the balance sheet. Charges for the period and reversals are recorded under the caption Provisions, net of reversals in the income statement.

Impairment model of loans and advances to Customers

The methodology adopted by the Group foresees, in a first stage, the identification of Economic Groups (and Retail Customers, hereinafter Retail) considered as individually significant. These are analyzed individually and the remainder collectively, according to homogeneous risk groups. The following criteria for selecting Groups (and Retail) that are individually significant are considered:

- Customers/economic groups with no signs of impairment with exposure greater than or equal to 0.1% of FPR;
- Customers/economic groups with signs of impairment with exposure greater than or equal to 0.02% of FPR; and
- Customers restructured due to financial difficulties with exposure above AOA 50 million.

Entities/economic groups in the "Financial Institutions" segment, regardless of whether they meet the criteria defined for Individual Impairment Analysis, will not be subject to individual assessment.

In the collective analysis methodology, the Group groups Customers into homogeneous risk segments, namely the following:

- Consumer credit;
- Overdrafts;
- Credit cards;
- Car loans;
- Mortgages;
- Small and Medium-sized Businesses – Less significant exposures;
- Large Businesses – Significant exposures;
- State;
- Credit institutions.

The amount of impairment losses is determined according to whether there is a significant deterioration of the risk since initial recognition, and whether a default event occurs. Consequently, the Group classifies financial instruments into three stages of impairment, as described below:

- **Stage 1**: Classification to be applied on initial recognition of the financial instruments or in the event of not meeting any of the classification criteria of the other impairment stages;
- **Stage 2**: Classification to be applied to financial instruments that show a significant increase in credit risk (SIRC) since their origin;
- **Stage 3**: All financial instruments that are in default according to the Group's internal definition and in line with Instruction 8/2019 will be classified under this stage, issued by BNA.

The Stage 2 criteria for classification are as follows:

Classification

- Product contracts other than overdrafts, with credit more than 30 days overdue;
- Overdraft product contracts with credit more than 15 days overdue;
- Customer with at least one credit operation restructured due to financial difficulties in the last 6 months;
- Customers with an operation in litigation in the last 5 years;
- Customers with bounced checks and/or inhibited from using checks according to the information available at CIRC (Angolan Centralized Credit Register);
- Customers with unauthorized overdrafts;
- Customers with revolving operations (overdrafts, credit cards and escrow accounts) above the limit formally contracted, or revolving credit operations permanently used at, at least, 95% of the limit initially contracted in the last 6 months;
- Credit with a material decrease in the value of the collateral (greater than or equal to 20%) when this results in a funding-collateral ratio greater than 80%;
- Transactions restructured in default (stage 3 on the origination date) and which, on the reporting date, do not meet stage 3 classification criteria;
- Classification of Customer operations due to Significant Increase in Credit Risk (SICR), whenever the Customer's exposure to these criteria is greater than 20% of the Customer's total exposure;
- POCI (Purchased or Originated Credit Impaired) operations that do not have stage 3 classification criteria on the reporting date;
- Unrestructured operations that have not complied with the quarantine period in Stage 2 (6 months after clearing default); and
- Restructured operations that have not been restructured in default but have not yet been cleared of restructuring due to financial difficulties.

For individually analyzed Customers the following additional criteria are considered:

- Customers with a credit operation in the financial system more than 90 days in arrears, principal or interest written off/canceled or in litigation;
- Customer subject to Special Recovery Programs;
- Customers with overdue debts to the Tax Administration and/or Social Security;
- Bank pledges or expectation of insolvency or subject to a financial and/or operational recovery/reorganization process; and
- Significant change in the Customer's operating results (Companies), for Customers subject to Individual Analysis.

Propagation

- Propagation of all operations to Stage 2 if the total exposure of the operation in Stage 2 is greater than or equal to 20% of the Customer's exposure.

Applicable only to Stage 3 Customers, the default classification criteria are as follows, provided they have (i) Absolute Materiality: >= AOA 5,000 of overdue loans; (ii) Relative materiality: 1% Corporate and 2.5% Retail, of the Customer's asset exposure.

Classification of credit as default

- Contracts with overdue credit for more than 90 days;

- Restructured contracts with overdue credit for more than 30 days; and
- Restructurings with material loss or grace period of the principal or arising from contracts already at Stage 3.

For individually analyzed Customers the following additional criteria are considered:

- Customers in bankruptcy/insolvency or with expectation of bankruptcy/insolvency.

Propagation

- Propagation of marking of default when the default exposure represents 20% of total Customer exposure.

Declassification

- Contracts with overdue credit for more than 90 days: 12-month quarantine period (at least 6 months in Stage 3 and 6 months in Stage 2) with no default activation criteria; and
- Restructured credits: a quarantine period (at least 12 months) is applied with payment of principal and interest without overdue exposure for a period greater than 30 days.

In calculating collective impairment, the Bank considers the following credit risk parameters:

a) Exposure: The exposure at default (EAD) is the estimated amount outstanding in the event of default. This component is relevant for financial instruments that have a variable amortisation structure depending on the Customer use (credit current accounts, credit cards, in general any revolving product). The calculation of this estimate is based on the observation of historical data for debtors in respect of which default situations have been verified, relating the levels of use of the limits at the time of default with those in the previous 12 months. In this context, future levels of use are estimated according to the nature of the product, the current levels of use and the value of the cap.

b) Probability of default (PD): the Group applies a methodology for calculating the probability of default forecast for each borrower for the entire loan portfolio and for each risk segment. This parameter is used directly to calculate the ECL of operations in Stage 1 and 2 of impairment. Thus, for stage 1, the period of 12 months should be considered and, for stage 2, the residual maturity of the operation.

c) Loss given default (LGD): is the percentage of debt that will not be recovered in the event of a Customer default. The calculation of the LGD is performed based on historical internal information, considering the cash flows associated with the contracts from the time of default until their settlement or until the moment when there are no relevant recovery expectations.

The parameters considered for determining impairment are generally based on the internal historical experience of defaults and recoveries of the Group. The parameters are reviewed and updated periodically to reflect the economic position and to be representative of the current economic context at all times.

The models also incorporate prospects of future economic evolution (forward looking) to determine the expected loss considering the macroeconomic factors that are related to the probability of default and/or recoverability indicators of the Group, namely:

- Real GDP;
- Growth rate of non-oil GDP;
- (Parallel) USD/AOA exchange rate – end of period;
- Luanda Consumer Price Index;
- Real Effective Exchange Rate (REER).

In the review processes, the necessary improvements will also be made as detected in the backtesting exercises.

Impairment model for other financial instruments (Deposits at other credit institutions and Investments at amortised cost)

The Bank classifies exposures into stages of impairment with regard to financial instruments measured at amortised cost.

Stage 1 – Financial assets with no significant increase in credit risk since initial recognition

Assets that do not have a significant increase in credit risk since initial recognition are classified in Stage 1. The calculation of impairment losses for these exposures with a maturity of 12 months.

In assessing the existence of a significant increase in the credit risk for the financial asset portfolio, an increase of more than two notches is considered for a significant increase in the credit risk, in accordance with the information published by the international rating agency Moody's.

Stage 2 – Financial assets with significant increase in credit risk since initial recognition
Whenever the existence of a significant increase in the counterparty's credit risk is determined, the exposure is classified as Stage 2.

For these exposures, the Group measures the impairment losses over the respective residual maturity.

Stage 3 – Financial assets in default
This stage includes all financial instruments for which events of default have been verified for more than 90 days.

Impairment losses for debt securities, investments and cash and cash equivalents in other credit institutions are calculated based on the credit risk parameters (probability of default and loss given default) provided by the international rating agency Moody's.

2.5. Operations with repurchase or resale agreement

Securities sold under repurchase agreements (repos) at a fixed price or at a price equal to the sale price plus interest over the term of the transaction are not derecognized from the balance sheet and are revalued in accordance with the accounting policy of the category to which they belong. The corresponding liability is accounted for under Deposits from Customers or Deposits from other credit institutions, as appropriate. The difference between the sale price and the repurchase price is treated as interest and is accrued over the life of the agreement using the effective rate method and recorded under Net interest income.

Securities purchased under resale agreements (reverse repos) at a fixed price or at a price equal to the purchase price plus interest over the term of the transaction, are not recognized in the balance sheet, and the purchase price is recorded under Investments at amortised cost or Other loans and advances to credit institutions, as appropriate. The difference between the purchase price and the resale price is treated as interest and is accrued over the life of the agreement using the effective interest rate method under Net interest income. The amounts receivable are collateralized by the associated securities.

2.6. Derivative financial instruments

The Group can carry out derivative financial instrument operations, within the scope of its activity, to manage its own positions based on expectations of market developments or to meet the needs of its Customers.

All derivative instruments are recorded on the trade date at fair value and changes in fair value are recognized in the income statement unless they qualify as cash flow hedges or net investments in foreign operating units. Derivatives are also recorded in off-balance sheet accounts at their reference value (notional value).

Derivative financial instruments are classified as hedging (provided that all designation conditions are met) or trading instruments, depending on their purpose.

Derivatives held for trading

Derivatives that are not considered in an accounting hedging relationship are considered as other financial instruments at fair value through profit or loss. When the fair value of the instruments is positive, they are presented under assets, when their fair value is negative, they are classified under liabilities, in both cases under financial assets or liabilities at fair value through profit or loss.

2.7. Equity instruments

A financial instrument is classified as an equity instrument when it meets the definition of equity from the issuer's perspective, *i.e.*, there is no contractual obligation for its settlement to be made by delivering cash or another financial asset to a third party, regardless of its legal form, evidencing a residual interest in the assets of the issuing entity after deducting all of its liabilities.

Transaction costs directly attributable to the issue of equity instruments are recorded against equity, as a deduction from the amount of the issue. The amounts paid and received for purchases and sales of equity instruments are recorded in equity, net of transaction costs.

Income from equity instruments (dividends) is recognized when the right to receive it is established and are deducted to equity.

2.8. Intangible assets and Property, plant and equipment

Intangible assets are only recognized when: i) they are identifiable; ii) it is probable that future economic benefits will flow from the asset and iii) the cost of the asset can be reliably measured.

The acquisition cost of intangible assets comprises: i) the purchase price, including costs with intellectual rights and fees and after deducting any discounts and ii) any cost directly attributable to the preparation of the asset for its intended use.

After the initial accounting, the Group measures its intangible assets according to the cost model.

Intangible assets, which correspond mainly to IT software, are recorded at acquisition cost, and are amortised on a straight-line basis over a three-year period.

Property, plant and equipment is recorded at acquisition cost less accrued amortisation and impairment losses. The cost includes expenditure that is directly attributable to the acquisition of the goods.

The acquisition cost of property, plant and equipment comprises the purchase price of the asset, expenses directly attributable to its acquisition and costs incurred in preparing the asset to be ready for its intended use. Financial costs incurred with loans obtained for the construction of qualifying tangible fixed assets are recognized as part of the construction cost of the asset.

Land is not depreciated.

Depreciation is calculated on a straight-line basis, according to the useful life estimated by the Group, which corresponds to the following years of useful life:

	Years of useful life
Real Estate for own use (Buildings)	50
Improvements in leased buildings	10
Equipment:	
Furniture and material	10
IT equipment	3
Indoor facilities	10
Transport equipment	3 and 5
Machines and tools	6 and 7
Automatic data processing system (Software)	3

As mentioned in Note 2.18., this caption includes right-of-use assets arising from lease agreements.

2.9. Non-current assets held for sale

Non-current assets are classified as non-current assets held for sale when their book value is intended to be realized mainly through a sale transaction rather than through their continued use in the Group's activities.

The value of assets received as payment in kind is initially recorded at the lower of the fair value net of selling costs and the book value of the loan at the date the payment in kind was made.

When the valuation of the asset is higher than the outstanding amount of the credit operation, the Group records the asset at the value of the credit at the time. When the valuation of the assets is lower than the book value of the loan operation, the difference must be recognized as a cost for the period.

Assets recorded under this caption are not amortised and are valued at the lower of book value and fair value. The fair value of these assets is determined based on periodic valuations performed by independent valuers. Whenever the value resulting from these valuations (net of costs to sell) is lower than the book value, impairment losses are recorded under Impairment of other assets, net of reversals and recoveries.

In addition, as these are assets whose fair value level in the IFRS 13 hierarchy corresponds mainly to level 3, given the subjectivity of some assumptions used in the valuations and the fact that there are external indications with alternative values, the Group carries out internal analyses on the assumptions used, which may imply additional adjustments to their fair value.

2.10. Impairment of non-financial assets

When there are signs that an asset may be impaired, IAS 36 requires that its recoverable amount is estimated, and an impairment loss shall be recognized whenever the net book value of an asset exceeds its recoverable amount. Impairment losses are recognized in the income statement and are reversed in subsequent reporting periods, when the reasons that led to their initial recognition cease. For this purpose, the new depreciated amount shall not exceed the book value that would be accounted, had no impairment losses been allocated to the asset, considering its depreciation.

The recoverable amount is determined as the higher of its fair value less costs to sell and its value in use, which is calculated based on the present value of the estimated future cash flows expected to be obtained from the continued use of the asset and its disposal at the end of its useful life.

On the date of derecognition of a non-financial asset, the gain or loss calculated as the difference between the fair value less costs to sell and the net book value is recognized in the income statement under Net gains/(losses) on sale of other assets.

2.11. Cash and cash equivalents

For the purposes of the cash flow statement, Cash and cash equivalents comprise balances with less than three months' maturity from the date of their initial recognition, including Cash and deposits at central banks and Deposits at other credit institutions (Notes 4 and 5), and do not include impairment losses.

2.12. Dividends

Dividends (income from equity instruments) are recognized in the income statement when the right to receive them is attributed. Dividends are recorded under Net gains/(losses) on financial operations, Net gains/(losses) on other financial instruments at fair value through profit or loss or other income, depending on the classification of the underlying instrument.

2.13. Commissions

Income from services and commissions is recognized as revenue from Customer agreements to the extent that the performance obligations are satisfied:

- When they are obtained as the services are rendered, their recognition in profit or loss is made in the period to which they relate; and
- When they result from the rendering of services, their recognition is made when that service is completed.

When they are an integral part of the effective interest rate of a financial instrument, the income resulting from services and commissions are recorded in net interest income.

2.14. Employee benefits

Short-term benefits

Short-term benefits are reflected under Staff costs in the period to which it relates, in accordance with the accrual accounting principle.

The Group grants variable remuneration to its employees and directors as a result of their performance (performance bonus). The Executive Committee of the Board of Directors is responsible for establishing the respective allocation criteria for each employee, and the Remuneration Committee is responsible for establishing the criteria at director level. The variable remuneration paid to employees and directors is recorded against profit or loss in the period to which they relate, although payable in the following year (Note 24).

In November 2022, Order 3923/22 ((Official Gazette) 123 of Series II) published the Addendum to the BFA Pension Fund and the New Pension Plan. The new Defined Contribution Pension Plan defines a mixed contribution system between the Associate (BFA) and the Employees and sets the Associate's rate at 7.5% on the pensionable salary, also setting a variable employee contribution of between 2.5% and 10% on the pensionable salary.

For defined-contribution plans, the liabilities related to the benefit attributable to the Group's employees are recognized as an expense for the period when due (Note 24).

Long-term benefit

This type of long-term benefit is recognized when the Group has a legal or constructive obligation to pay its employees long-term benefits.

The Group grants variable remuneration to directors and 40% of this amount is paid over a 3-year period plus remuneration. In this respect, the remuneration is associated with the interest rate of Angolan treasury bonds, traded on the secondary market in the same currency and maturity as the deferral. The deferred charges are recorded under Interest and similar expense, and the principal is recorded under Staff costs, against Other liabilities.

Termination benefits

This type of benefit is recognized when the Group terminates the employment contract before the employee reaches normal retirement date, or when an employee accepts the termination of employment in exchange for such benefit. The Group recognizes a liability for termination benefits on the earliest of the following dates: when the Group is no longer able to withdraw the offer of benefits or when the Group recognizes the costs of a restructuring, within the scope of the recognition of restructuring provisions. Benefits due more than 12 months after the end of the reporting period are discounted to their present value.

2.15. Income tax and other taxes

The total income tax recorded in the income statement includes current and deferred taxes.

Current tax

Current tax is calculated based on the taxable income for the period, which differs from the accounting income due to adjustments to the tax base resulting from expenses or income not relevant for tax purposes, or which will only be considered in future periods according to the applicable tax laws (Corporate Tax Code).

Deferred tax

Deferred tax corresponds to the impact on tax recoverable/payable in future periods resulting from deductible or taxable temporary differences between the balance sheet value of assets and liabilities and their tax base, used to determine taxable income. Deferred taxes are calculated based on the tax rate in force or substantially in force at the financial reporting date, and which is estimated to be applicable on the date of realization of deferred tax assets or on the date of payment of deferred tax liabilities.

Deferred tax liabilities are normally recorded for all taxable temporary differences, whereas deferred tax assets are only recognized up to the amount by which it is probable that future taxable income will exist, to allow for the use of the corresponding deductible temporary differences or tax losses carried forward. Additionally, deferred tax assets are not recorded in cases where their recoverability may be questionable due to other situations, including issues of interpretation of the tax legislation in force.

As at December 31, 2025 and December 31, 2024, the Group has recorded deferred tax assets that offset the amount of deferred tax liabilities recorded, which are presented in the financial statements at their net value.

Corporate Tax

As at December 31, 2025, the Group is subject to a Corporate Tax under the terms of the General Tax System. The taxation of its income is carried out under the terms of Law 26/20, of July 20 (which revoked Law 19/14, of October 22) and, currently, the applicable tax rate is 35%.

The income from public debt securities, resulting from Treasury Bonds and Treasury Bills issued by the Angolan State, whose issue is regulated by the Framework Law of Direct Public Debt (Law 16/02, of December 5) and by Regulatory Decrees 51/03 and 52/03, of July 8, as well as the other income obtained by the Group subject to Capital Gains Tax (IAC), are exempt from Corporate Tax, in accordance with the provisions of Article 47(1)(b) of the Corporate Tax Code. This article expressly states that in order to determine the taxable amount, income or gains subject to IAC must be deducted from the net profit calculated under the terms of the previous articles.

Moreover, this law enshrined, among other changes, the eligibility for tax purposes of favorable and unfavorable exchange rate variations as accepted income and costs for tax purposes, respectively. Likewise, provisions/impairment on secured loans are no longer accepted as a cost, except for the part not covered.

In addition, the Corporate Tax is subject to provisional assessment in a single installment to be made by the end of August, calculated by applying a rate of 2% on the result derived from financial intermediation operations, ascertained in the first six months of the previous tax year, excluding income subject to capital gains tax (taxpayers who have presented losses in the previous year are exempt from the provisional assessment).

Tax returns are subject to review and correction by tax authorities for 5 (five) years, which may result in possible amendments to the taxable income for the years 2021 to 2025.

The recording of the tax impacts of the transactions carried out by the Group corresponds to management's understanding of the tax treatment applicable under the legislation issued. In situations where the tax interpretation is questioned by the Tax Authorities (AGT), Management reassesses the probability (above or below 50%) that the adopted tax treatment will be accepted and consequently determines the most likely or expected amount of tax assets or liabilities to be recorded.

Capital Gains Tax (IAC)

The new IAC Code, approved by Presidential Legislative Decree 2/2014, of October 20, came into force on November 19, 2014.

The IAC is generally levied on income from the Group's financial investments. The rate varies between 5% (in the case of interest received on debt securities which are admitted to trading on a regulated market and which have a maturity of three years or more) and 15%.

Notwithstanding the above, with respect to income from public debt securities, according to the understanding of the AGT and the Banco Nacional de Angola addressed to the Angolan Banks Association (in

Portuguese, Associação Angolana de Bancos) (letter from the Banco Nacional de Angola dated September 26, 2013), only income arising from securities issued on or after January 1, 2013 are subject to this tax.

This income from Treasury Bonds and Treasury Bills, issued by the Angolan State after January 1, 2013, is subject to IAC at the rate of 10% (5% in the case of debt securities admitted to trading on a regulated market and which have a maturity of three years or more).

On August 1, 2013, the automation process to withhold tax was initiated, by the BNA, in respect of IAC, in accordance with the provisions of Presidential Legislative Decree 5/11, of December 31.

IAC is generally levied on the income from the securities identified above and is withheld by the Group. For these reasons, the Group considers that the conditions to consider IAC as an income tax under IFRS are fulfilled.

Value Added Tax (VAT)

Law 7/19 introduced VAT, which has been in force since October 1, 2019, repealing the Consumption Tax Regulation (IC) and introducing relevant amendments to the Stamp Duty Code (IS).

Under the terms of the VAT Code approved by Law 7/19 and the amendments introduced by Law 17/19 of August 13, they are subject to this tax: (i) the transfer of goods and services carried out within national territory, for consideration, by a taxable person acting as such; and (ii) the import of goods.

Nevertheless, the VAT Code provides for the exemption of certain transactions, including the exemption applied to financial intermediation transactions, including those described in Annex III to this Code, except those which give rise to the payment of a specific and predetermined fee or consideration for their performance. This exemption does not entitle the taxable person to deduct the VAT incurred on the acquisition of goods and services connected with exempt transactions.

It should be noted that the VAT rate in force in Angola, applicable to transactions subject and not exempt from VAT, is 14%. Additionally, and in accordance with Article 21(2) of the VAT Code, commercial banks must withhold 50% of the tax included in the invoice or equivalent document issued by the taxpayer at the time of transfer of goods or rendering of services (except for the transfers of goods or services listed as excluded from this withholding tax). In this regard, the withholding of this tax must be made in the periodic VAT return for the month in which this tax becomes chargeable under the terms of Article 21(3) of the VAT Code (*i.e.*, upon receipt of the respective invoice or equivalent document by the entities subject to the withholding VAT system).

However, Instruction 000003/DNP/DSIVA/AGT/2020, issued by the Angolan tax authorities, has clarified that transfers of goods to any withholding entities whose payment is made by debit in the account, with the exception of the State, are exempt from withhold. Examples of these situations are transfers of goods within the scope of banking and financial operations in which the Institutions debit the Customer's account, namely: (i) the transfer of leased assets to the respective lessee when the stipulated purchase option is exercised, as well as (ii) the sale of point-of-sale (POS) systems as part of the institutions' provision of payment card acceptance services to their Customers.

Under the terms of Article 10(1) of the VAT Code, for the purposes of this tax, and as a general rule, the rendering of services takes place within the national territory when the purchaser has domicile, head office or fixed establishment therein for which the services are acquired. In this context, Article 29(2) of the VAT Code, in conjunction with Article 2(1)(d) of the same tax compendium, provides for a reverse charge mechanism, whereby "whenever the purchaser is a taxable person, the tax is payable by that purchaser, in respect of services rendered within national territory, under Article 10 of the VAT Code, where the service provider is a non-resident taxable person and does not have a fixed establishment in national territory", *i.e.*, the purchaser, a VAT taxpayer in Angola, must (self)assess the Angolan VAT due on the rendering of services in Angola, when these are rendered by non-resident suppliers.

Moreover, considering the Group is a taxable person that carries out transactions which grant the right to deduct (*i.e.*, transactions subject to VAT) and transactions which do not grant the right to deduct (*i.e.*, transactions which are exempt from this tax under the aforementioned terms), the VAT incurred by the Group on its purchases of goods and services is only partially deductible using the *pro rata* method.

Nevertheless, the Group, as a taxable person subject to the general VAT system, may, under the terms of Article 27(2) of the VAT Code, adopt the actual allocation method regarding the VAT incurred on goods for sale. This method of deduction consists of the possibility of deducting all the tax incurred in the acquisition of goods in transactions which give rise to a right to deduct but excludes the possibility of deducting the tax incurred in transactions which do not give rise to this right, under the terms of Articles 22 and 24 of the VAT Code. The goods whose tax may be deducted according to the actual use method are subject to prior authorization by the Tax Authorities.

Additionally, Instruction 000003/DNP/DSIVA/AGT/2020, referred to below, established that credit institutions may adopt the actual allocation method to deduct the VAT incurred on the acquisition of goods and services "exclusively used" to carry out:

I. Financial lease operations;

II. Financial operations carried out by institutions without head office or permanent establishment in national territory ("correspondent banks") for Angolan institutions;

III. Operations covered by the provisions of Article 6(3) of the VAT Code, namely the re-invoicing of goods and/or services acquired by the institutions in their own name, but on behalf of third parties, to whom the respective goods and/or services are re-invoiced, with a view to obtaining a refund (cost recovery).

For the purposes of VAT deduction according to the mentioned method, credit institutions must prepare a letter addressed to the VAT Services Department (in Portuguese, *Direcção dos Serviços do IVA*), requesting the amendment of the statement on the commencement of operations, as well as the respective compliance with the obligations foreseen in the VAT Code regarding the accounting record of the operations, in order to allow the control of the operations whose tax was deducted according to the actual allocation method.

Moreover, the Group is also required to comply with the invoicing rules under the Legal Regime of Invoices and Equivalent Documents (in Portuguese, *Regime Jurídico das Facturas e Documentos Equivalentes* (RJFDE)), in force since April 2019. Within this scope, the economic agents with a turnover equal or superior to kwanzas equivalent to USD 250 thousand must issue the invoices or equivalent documents through a certified invoicing system.

Property Tax

In accordance with the provisions of Law 20/20, published on July 9, which approved the new Property Tax Code and revoked the previous law, the Group withholds Property Tax at a rate of 15% (considering that the taxable amount of these properties corresponds only to 60% of the value of the rents received during the year, since the applicable tax rate is 25%), on the payment or delivery of rents on rented property, with the exception of land for construction, for which Property Tax will be due at a rate of 0.6% of the asset value.

Property Tax will be due on non-rented property in accordance with the following ranges:

- A rate of 0.1% on the asset value, applicable to real estate with an asset value below AOA 5,000,000;
- A fixed value of AOA 5,000 for properties with an asset value above AOA 5,000,000 and below AOA 6,000,000;
- A rate of 0.5% on the asset value exceeding AOA 5,000,000, applicable to real estate with an asset value above AOA 6,000,000.

In the transfer with or without consideration of property, the taxable amount corresponds to the asset value as stated in the land registry at the date of transfer, the value determined by evaluation, in the case of an omitted building, or the declared value, whichever is greater. The transfer of real estate assets is subject to property tax at the rate of 2%, the charge and liability for settlement of which should fall on the Group whenever it acts as purchaser.

Other taxes

The Group is also subject to indirect taxes, namely customs duties, stamp duty, employment income tax, as well as other taxes, namely the Special Contribution on Foreign Exchange Transactions, which, in accordance with Law 15/23 of December 29, which came into force on January 1, 2024, is applicable to all transfers made with a national registered office or domicile, within the scope of contracts for the provision of services, technical assistance, consultancy and management, capital operations and unilateral transfers.

2.16. Provisions and contingent assets and liabilities

Provisions

A provision is set up when there is a present obligation (legal or constructive) as a result of a past event for which the future outflow of resources is probable and can be reliably measured. The provision amount corresponds to the best estimate of the amount to be disbursed to settle the liability, at the balance sheet date. Provisions are measured at the present value of the estimated costs to settle the obligation using a pre-tax interest rate, which reflects the market value, for the discount period and for the risk of the provision in question.

If the future expenditure of resources is not likely, it is a contingent liability, and is subject to the respective disclosure, in accordance with the requirements of IAS 37 – Provisions, contingent liabilities and contingent assets.

Provisions related to legal proceedings, opposing the Group to third parties, are constituted in accordance with internal risk assessments carried out by the Board of Directors, with the support and advice of its legal advisors.

Provisions for loan commitments and financial guarantees provided are measured according to the impairment model implemented as described in Note 2.4.11.

Provisions are reviewed at each balance sheet date and adjusted to reflect the best estimate and are reversed against profit or loss in the proportion of the payments that are not probable.

Provisions are derecognized through their use for the obligations for which they were initially recognized or for the cases that the situations were no longer observed.

Contingent Assets

Contingent assets are not recognized in the financial statements, being disclosed when it is probable that there will be a future economic inflow of resources.

Contingent Liabilities

Contingent liabilities are not recognized in the financial statements but are covered by IAS 37 and disclosed whenever the possibility of an outflow of resources involving economic benefits is not remote. The Group records a contingent liability when:

I. It is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not entirely within the Group's control; or,

II. It is a present obligation that arises from past events, but is not recognized because:

   a) It is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or,

   b) The amount of the obligation cannot be measured with sufficient reliability.

Identified contingent liabilities are subject to disclosure unless the possibility of an outflow of resources embodying economic benefits is remote.

2.17. Financial and performance guarantees

Financial guarantees

Financial guarantees are contracts that require the issuer to make payments in order to compensate the holder for losses incurred, as a result of breaches of the contractual terms of debt instruments, namely the payment of the respective principal and/or interest.

Financial guarantees issued are initially recognized at their fair value. Subsequently, these guarantees are measured at the higher (i) of the fair value initially recognized and (ii) the amount of any obligation arising from the guarantee contract, measured at the balance sheet date. Any change in the amount of the obligation associated with financial guarantees issued is recognized in the income statement.

Financial guarantees issued by the Group usually have a defined maturity and a periodic fee charged in advance, which varies according to the counterparty risk, amount, and performance of the contract. On this basis, the fair value of the guarantees, on the date of their initial recognition, is approximately equivalent to the value of the initial commission received, considering that the agreed conditions are market conditions. Thus, the amount recognized on the contracting date equals the amount of the initial commission received, which is recognized in the income statement during the period to which it relates. Subsequent commissions are recognized in the income statement, in the period to which it relates.

Performance guarantees

Performance guarantees are contracts that result in one party being compensated if it fails to perform its contractual obligation. Performance guarantees are initially recognized at fair value, which is normally stated by the amount of commissions received over the life of contract. Upon breach of contract, the Group has the right to revert the guarantee, with the amounts being recognized in Loans and advances to Customers, following the transfer of the loss compensation to the guarantee beneficiary.

2.18. Leases

IFRS 16 sets out requirements regarding the scope, classification/recognition and measurement of leases:

- from the lessor's perspective, leases continue to be classified as finance leases or operating leases;

- from the lessee's perspective, the standard defines a single accounting model for lease agreements that results in the recognition of a right-of-use asset and a lease liability for all lease agreements except for leases with a period of less than 12 months or for leases of low value assets in which cases the lessee may opt for the recognition exemption provided for in IFRS 16, and, in that case, should recognize the lease payments associated with those contracts as External supplies and services.

The Group has opted not to apply this standard to short-term lease agreements of less than or equal to one year and to lease agreements where the underlying asset has low value, and the option of not applying this standard to leases of intangible assets has also been used.

Definition of a lease

A contract is or contains a lease if it conveys the right to control the use of an identified asset, that is, obtaining substantially all of the economic rewards of its use, and the right to direct the use of that identified asset, for a certain period of time in exchange for consideration.

Impacts from the lessee's perspective

The Group recognizes for all leases, except for leases with a period of less than 12 months or for leases of low-value assets:

- a right-of-use asset, initially measured at cost, considering the Net Present Value (NPV) of the lease liability, plus payments made (fixed and/or variable) less lease incentives received, penalties for termination (if reasonably certain), as well as any cost estimates to be incurred by the lessee in dismantling and removing the underlying asset and/or restoring the location where it is located. Subsequently, it is measured according to the cost model (subject to depreciation/amortisation according to the lease term of each agreement and to impairment tests);
- a lease liability, initially recorded at the present value of the future lease cash flows (NPV), which includes:
  - fixed payments, less leasing incentives receivable;
  - variable lease payments that depend on an index or rate, initially measured using the index or rate at the start date of the agreement;
  - the amounts payable by the lessee as residual value guarantees;
  - the exercise price of a call-option, if the lessee is reasonably certain to exercise that option; and
  - sanction payments for the termination of the lease if the lease term reflects the exercise of a lease termination option by the lessee.

The Group defines a reduced unit value as USD 5,000.

The lease liability is measured at amortised cost using the effective interest rate method.

Since the interest rate implicit in the lease cannot be readily determined (paragraph 26 of IFRS 16), the lease payments are discounted at the lessee's incremental borrowing rate which incorporates the risk-free interest rate curve (swap curve), plus a risk spread of the Group, applied over the weighted average term of each lease agreement. For open-ended contracts, this date is considered to be the end date of the lease. For other open-ended contracts, the period within which the lease will be enforceable is assessed, as well as any economic penalties associated with the lease. When assessing enforceability, the specific clauses of the contracts are considered, as well as the legislation in force regarding Urban Leases.

Subsequently, the lease liability is measured as follows:

- by an increase in its carrying amount to reflect interest thereon;
- by a decrease in its carrying amount to reflect lease payments; and
- the carrying amount is remeasured to reflect any revaluations or changes in the lease, as well as to incorporate the revision of lease payments fixed in substance and the revision of the lease term.

The Group remeasures a lease liability, and calculates the respective adjustment related to the right-of-use asset whenever:

- there is a change in the lease term or in the assessment of a call-option over the underlying asset, in which case the lease liability is remeasured, discounting the revised lease payments and using a revised discount rate;
- there is a change in the amounts payable under a residual value guarantee, or in the future lease payments resulting from the change in an index or rate used to determine those payments, in which case the lease liability is remeasured by discounting the revised lease payments using an unchanged discount rate (unless the change in the lease payments results from a change in variable interest rates, in which case a revised discount rate should be used); and

- A lease agreement is changed, but such lease change is not accounted for as a separate lease, in which case the lease liability is remeasured, discounting the revised lease payments using a revised discount rate.

Right-of-use assets are depreciated from the lease start date until the end of the useful life of the underlying asset, or until the end of the lease term, whichever is earlier. If the lease transfers the ownership of the underlying asset, or if the cost of the right-of-use asset reflects the fact that the Group will exercise a call-option, the right-of-use asset should be depreciated/amortised from the lease start date until the end of the useful life of the underlying asset.

The estimated useful life of the right-of-use assets is determined following the same principles as for Property, plant and equipment.

In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted by certain remeasurements of the lease liability.

Depreciation/amortisation begins on the date the lease takes effect.

Accounting for leases from the lessee's perspective in the Group's financial statements is as follows:

In the income statement:

- the interest expense on lease liabilities is recorded under Net interest income;
- the amounts relating to short-term lease agreements and lease agreements for low-value assets are recorded under Other administrative expenses; and
- the cost of depreciation of right-of-use assets is recorded under Depreciation and amortisation for the period.

In the balance sheet:

- right-of-use assets recognized under Property, plant and equipment; and
- the value of lease liabilities recorded under Other liabilities.

Impact from the lessor's perspective

As at December 31, 2025 and December 31, 2024, the Group has no lease agreements in which it is the lessor.

2.19. Earnings per share

Basic earnings per share are calculated by dividing the net income attributable to shareholders of the Group by the weighted average number of ordinary shares outstanding, excluding the average number of own shares held by the Group.

For the diluted earnings per share, the average number of ordinary shares outstanding is adjusted to reflect the effect of all potential ordinary shares treated as dilutive. Contingent or potential issues are treated as dilutive when their conversion into shares decreases earnings per share.

If earnings per share change as a result of an issue with a premium or discount or other event that changes the potential number of ordinary shares, or changes in accounting policies, the calculation of earnings per share for all periods presented is adjusted retrospectively (see Note 18).

2.20. Subsequent events

The Group analyzes events that occur after the balance sheet date, *i.e.*, favorable and/or unfavorable events that occur between the balance sheet date and the date on which the financial statements were authorized for issue. In this context, two types of events can be identified:

- those that provide evidence of conditions that existed at the balance sheet date (adjusting events after the balance sheet date); and
- those that are indicative of conditions that arose after the balance sheet date (non-adjusting events after the balance sheet date).

Events occurring after the date of the financial statements that are not considered as adjustable events, if material, are disclosed in the notes to the financial statements.

2.21. Segment reporting

The Group has adopted IFRS 8 – Operating Segments for the purpose of disclosing financial information by operating segments whenever relevant. A business segment is a component of the Group: (i) that engages in business activities from which it may earn revenues or incur expenses; (ii) whose operating results are regularly reviewed by the Group's chief

operating decision maker for the purposes of allocating resources to the segment and assessing its performance; and (iii) for which separate financial information is available.

3. Main Estimates and Uncertainties Associated with the Application of the Accounting Policiess

IFRS establish several accounting treatments and require the Board of Directors to make judgments and prepare the necessary estimates to decide which accounting treatment is most appropriate. The main estimates and judgments used in the application of accounting principles by the Group are presented in this Note, with the objective of improving the understanding of how their application affects the Group's reported results and their disclosure. A broad description of the main accounting policies used by the Group is presented in Note 2 to the financial statements.

Considering that, in many situations, there are alternatives to the accounting treatment adopted by the Board of Directors, the results reported by the Group could be different should a different treatment be chosen. The Board of Directors considers that the choices made are appropriate and that the financial statements give a true and fair view of the Group's financial position and the result of its operations in all material respects.

3.1. Impairment losses of financial assets at amortised cost

Determining impairment losses for financial instruments involves judgments and estimates regarding the following aspects, among others:

a) **Significant increase in credit risk**
Impairment losses correspond to the expected losses in the event of a default over a 12-month time horizon, for Stage 1 assets, and to the expected losses considering the probability of a default event occurring at some point up to the financial instrument's maturity date, for Stage 2 and 3 assets. An asset is classified as Stage 2 whenever there is a significant increase in the respective credit risk since its initial recognition. In assessing the existence of a significant increase in credit risk, the Group considers reasonable and sustainable qualitative and quantitative information.

b) **Definition of groups of assets with common credit risk characteristics:**
When expected credit losses are measured on a collective basis, financial instruments are grouped based on common risk characteristics. The Group monitors the adequacy of the credit risk characteristics on a regular basis to assess whether they remain similar. This procedure is necessary to ensure that, in the event of a change in credit risk characteristics, the asset segmentation is revised. This revision may result in the creation of new portfolios or in the transfer of assets to existing portfolios which better reflect their credit risk characteristics.

c) **Probability of default:**
The probability of default represents a determining factor in measuring expected credit losses. The probability of default corresponds to an estimate of the probability of default in a given period, which is calculated based on historical data, assumptions, and expectations about future conditions.

d) **Loss given default:**
Corresponds to an estimate of loss in a default scenario. It is based on the difference between the contractual cash flows and those that the Group expects to receive, either through the cash flows generated by the Customer's business or loan collateral. The calculation of the estimated loss given the default is based, among other factors, on the different recovery scenarios and historical information.

This assessment is performed using internal and external information and includes the use of assumptions and judgments in its modeling, the change of which could determine different results.

Consequently, the use of different methodologies or different assumptions or judgments in measuring impairment could lead to different results from those reported and summarized in Notes 5, 6, 8, 9 and 30.

Finally, the Group considers that the impairment determined based on this methodology allows an adequate reflection of the risk associated to its financial assets, considering the rules established by IFRS 9 – Financial Instruments.

3.2. Fair value of derivative financial instruments and other financial assets and liabilities measured at fair value

Fair value is based on market quotations, when available, and, in their absence, on the use of prices of similar recent transactions carried out under market conditions or based on valuation methodologies, using discounted cash flow techniques, applied to the future cash flows considering market conditions, the effect of time, the yield curve and volatility factors. These methodologies may require the use of assumptions or judgments in estimating fair value.

Consequently, the use of different methodologies or different assumptions or judgments in the application of a given model could give rise to different financial results from those reported in Notes 7 and 30.4.

	45,008,635	**31,354,430**
Deposits at the Central Bank		
Demand deposits at the Banco Nacional de Angola (BNA)		
In national currency	**232,967,900**	200,328,275
In United States Dollar	**384,204,845**	277,335,089
In Euro	**107,004,387**	131,074,984
	724,177,132	**608,738,348**
Total	**769,185,767**	**640,092,778**

Demand deposits at the BNA in national and foreign currency aim to comply with the provisions in force regarding the reserve requirement to be maintained and are not remunerated. As at December 31, 2025, the minimum reserve requirements amounted to AOA 181,070,815 thousand in national currency and AOA 280,644,473 thousand in foreign currency (2024: AOA 197,241,359 thousand and AOA 385,844,239 thousand, respectively).

As at December 31, 2025, the reserve requirements are calculated in accordance with the provisions of BNA Instruction 06/2024 of June 13 and Directive 07/2025 of July 28, 2025, respectively. As at December 31, 2024, the reserve requirements are calculated in accordance with the provisions of BNA Instruction 06/2024 of June 13 and Directive 09/2024 of December 20, 2024, respectively. The currencies for compliance with the minimum reserve requirements in Foreign Currency are the US Dollar, the Euro and the South African Rand, in accordance with Directive 03/DME/2023 of February 6, 2023.

As at December 31, 2025, the tax base for calculating reserve requirements in national currency (MN) and in foreign currency (ME) is monthly.

As at December 31, 2025, the reserve requirements ratio in national currency to be applied to the average monthly balances of items that comprise the reserve base, as defined in paragraph 2 of Instruction 06/24 of June 12 on Reserve Requirements, was set at 18%. The reserve requirements ratio in national currency to be applied to the average monthly balances of the accounts of local governments and municipal administrations was set at 18%.

As at December 31, 2025, the reserve requirements ratio in foreign currency to be applied to the average monthly balances of items that comprise the reserve base, as defined in paragraph 3 of Instruction 06/24 of June 12 on Reserve Requirements, was set at 22%. The reserve requirements ratio in foreign currency to be applied to the average monthly balances of the accounts of local governments and municipal administrations was set at 100%.

As at December 31, 2024, the tax base for calculating reserve requirements in national currency (MN) and in foreign currency (ME) is every two weeks.

As at December 31, 2024, the reserve requirement in national currency is set at 21% for items that comprise the reserve base, in accordance with Directive 09/2024 of December 20, and 21% for the balances of local governments and municipal administrations, to be applied to the average fortnightly balances of the reserve base.

As at December 31, 2024, the reserve requirement in foreign currency was set at 22%, to be applied to the average monthly balances of items that comprise the reserve base, as defined in paragraph 3 of Instruction 06/2024 of June 12, and at 100% for the balances of local governments and municipal administrations, to be applied to the daily balances of the accounts.

Loans and Advances to other Credit Institution in 2025

5. Loans and Advances to other Credit Institutions

As at December 31, 2025 and December 31, 2024, the caption Loans and advances to credit institutions is detailed as follows:

AOA thousands

	12/31/2025	12/31/2024
Demand deposits	**88,275,565**	50,880,305
Accumulated impairment losses (Note 16)	**(5,316)**	(4,230)
	88,270,249	**50,876,075**

The reconciliation of changes in the gross book value and impairment losses per stage of impairment of Loans and advances to credit institutions is presented below:

AOA thousands

	12/31/2025 Stage 1	
	Book value	Impairment losses
Balance as at January 1, 2025	**50,880,305**	**4,230**
Originated or acquired financial assets	35,543,473	874
Changes in exchange rates and other movements	1,851,787	212
Balance as at December 31, 2025	**88,275,565**	**5,316**

AOA thousands

	12/31/2024 Stage 1	
	Book value	Impairment losses
Balance as at January 1, 2024	**41,635,446**	**4,180**
Originated or acquired financial assets	9,919,871	(45)
Changes in exchange rates and other movements	(675,012)	95
Balance as at December 31, 2024	**50,880,305**	**4,230**

As at December 31, 2025 and December 31, 2024, the balance, net of impairment, by currency under Loans and advances to credit institutions is detailed as follows:

AOA thousands

	12/31/2025	12/31/2024
In Dollars	**59,409,070**	30,455,635
In Euros	**24,720,329**	15,262,432
In other currencies	**4,140,850**	5,158,008
	88,270,249	**50,876,075**

6. Other Loans and Advances to Central Banks and Credit Institutions

As at December 31, 2025 and December 31, 2024, the caption Other loans and advances to central banks and credit institutions is detailed as follows:

AOA thousands

	12/31/2025	12/31/2024
Other loans and advances to credit institutions abroad:		
In United States Dollars	**106,281,319**	256,396,662
In Euro	**98,235,596**	115,567,273
In Pound Sterling	**3,673,488**	6,861,342
	208,190,403	**378,825,277**
Other loans and advances to central banks:		
In Kwanzas	**319,483,820**	312,818,616
	319,483,820	**312,818,616**
Other loans and advances to credit institutions in Angola:		
In Kwanzas	**24,500,045**	-
	24,500,045	**-**
	552,174,268	**691,643,893**
Income receivable	**2,841,065**	38,877,208
	555,015,333	**730,521,101**
Accumulated impairment losses (Note 16)	**(24,129)**	(147,327)
	554,991,204	**730,373,774**

The reduction under Other Loans and Advances to Central Banks and Credit Institutions is in line with the Group's investment strategy, reflecting the reallocation of liquidity to other captions in the Financial Statements, which grew between financial years.

As at December 31, 2025 and December 31, 2024, the residual maturities of Other loans and advances to credit institutions abroad were as follows:

AOA thousands

	12/31/2025	12/31/2024
Up to 3 months	**552,174,268**	527,749,094
3 to 6 months	**-**	95,294,799
More than six months	**-**	68,600,000
	552,174,268	**691,643,893**

Other loans and advances to central banks include reverse repos, which are accounted for in accordance with the accounting policy described in Note 2.5.

As at December 31, 2025 and December 31, 2024, Other loans and advances to credit institutions earned interest at the following annual weighted average rates:

	12/31/2025	12/31/2024
In United States Dollars	**3.73%**	4.29%
In Euros	**1.88%**	2.78%
In Kwanzas	**15.68%**	17.39%
In Pound Sterling	**3.25%**	4.25%

The reconciliation of the changes in the book value and stage impairment losses of Other loans and advances to central banks and credit institutions is presented below:

Debt securities

As at December 31, 2025 and December 31, 2024, the Group holds Treasury Bonds issued by the Angolan State to be traded on the secondary market with banks, or with its Customers.

Equity instruments

As at December 31, 2025, the equity securities portfolio recorded at fair value through profit or loss, refers to:

Shares

- 13,896 Class C (Series I) shares of Visa Inc. (2024: 13,896 shares);
- shareholding in EMIS – Empresa Interbancária de Serviços, S.A.R.L. (20.00%) (2024: 20.00%); and
- shareholding in IMC – Instituto de Mercado de Capitais (2%) (2024: 2%).

Participation Units in Funds as at December 31, 2025:

- 50,000 (4.10%) participation units in Fundo BFA Confiança no Futuro;
- 85,000 (0.52%) participation units in Fundo BFA Oportunidades XXI;
- 60,991 (2.03%) participation units in Fundo BFA Futuro; and
- 225,000 (9.00%) units in the BFA Rendimento Flex Fund – Special Open-Ended Securities Investment Fund.

Participation Units in Funds as at December 31, 2024:

- 50,000 (4.10%) participation units in Fundo BFA Confiança no Futuro;
- 34,795 (0.19%) participation units in Fundo BFA Oportunidades XXI; and
- 100,000 (1.52%) participation units in Fundo BFA Fundo Tesouraria.

EMIS

As at December 31, 2025 and December 31, 2024, the shareholding corresponded to 20.00% of the share capital of EMIS. EMIS was set up in Angola to manage electronic means of payment and complementary services.

In the periods ended December 31, 2025 and December 31, 2024 this Company did not distribute any dividends.

Derivatives

As at December 31, 2025 and December 31, 2024, this caption is detailed as follows:

AOA thousands

In 2024 and 2025, the Group contracted a set of short-term reverse repo operations with the Angolan state, negotiated through BODIVA.

Given the nature of the operations, the Board of Directors recognizes their classification under Investments at amortised cost. Impairment recognized follows the model already implemented for other similar credit exposures.

The breakdown of investments at amortised cost, by residual maturity, is disclosed in Note 30.2.

The fair value and the detail by fair value hierarchy of the investment portfolio at amortised cost are presented in Note 30.4.

As at December 31, 2025 and December 31, 2024, impairment losses for Treasury Bills, Treasury Bonds, Eurobonds and Corporate bonds were calculated based on the credit risk parameters provided by the international rating agency Moody's.

The credit quality of the investment portfolio at amortised cost is disclosed in Note 30.1.

A reconciliation of changes in the gross book value and impairment losses per stage of investments at amortised cost is presented below:

AOA thousands

	12/31/2025 Stage 1	
	Book value	Impairment Losses
Balance as at January 1, 2025	**1,544,543,071**	**16,071,268**
Impact on profit or loss		
Financial assets purchased in the period/changes in credit risk	879,309,740	8,585,297
Derecognized financial assets	(700,994,226)	(3,932,955)
Other financial assets/changes in credit risk	-	(1,931,079)
Subtotal	**1,722,858,585**	**18,792,531**
Changes in exchange rates and other movements	6,530,102	1,348
Balance as at December 31, 2025	**1,729,388,687**	**18,793,879**

AOA thousands

	12/31/2024 Stage 1	
	Book value	Impairment Losses
Balance as at January 1, 2024	**1,424,989,897**	**13,048,771**
Impact on profit or loss		
Financial assets acquired in the period/changes in credit risk	705,523,768	3,657,149
Other financial assets/changes in credit risk	(603,338,411)	(1,955,276)
Derecognized financial assets	-	1,014,871
Subtotal	**1,527,175,254**	**15,765,515**
Changes in exchange rates and other movements	17,367,817	305,753
Balance as at December 31, 2024	**1,544,543,071**	**16,071,268**

As at December 31, 2025 and December 31, 2024, the impairment of investments at amortised cost is AOA 18,793,879 thousand and AOA 16,071,268 thousand, respectively (see Note 16).

9. Loans and Advances to Customers

As at December 31, 2025 and December 31, 2024, this caption is detailed as follows:

AOA thousands

	12/31/2025	12/31/2024
Loans falling due		
Credit cards	**3,652,149**	1,999,005
Consumer credit	**122,368,725**	94,154,925
Motor vehicle loans	**1,332,177**	481,670
Mortgages	**23,756,212**	23,192,475
Overdrafts	**639,758**	960,304
Corporate - less significant exposures	**3,220,205**	3,026,747
Corporate - significant exposures	**395,069,429**	382,341,673
State	**372,848,630**	256,628,854
Total loans falling due	**922,887,285**	**762,785,653**
Loans and interest overdue		
Credit cards	**1,208,214**	613,024
Consumer credit	**3,492,750**	3,456,090
Motor vehicle loans	**887**	395
Mortgages	**361,318**	343,315
Overdrafts	**327,750**	164,183
Corporate - less Significant exposures	**189,484**	230,465
Corporate - significant exposures	**8,381,381**	7,217,666
Total loans and interest overdue	**13,961,784**	**12,025,138**
Total loans granted	**936,849,069**	**774,810,791**
Income receivable from loans granted	**23,034,038**	**15,496,316**
	959,883,107	**790,307,107**
Deferred commissions	**(3,563,680)**	(2,070,822)
Impairment for loans and advances (Note 16)	**(65,307,579)**	(57,826,019)
	891,011,848	**730,410,266**

As at December 31, 2025 and December 31, 2024, Loans and advances to Customers earned interest at the following weighted average annual rates:

	12/31/2025	12/31/2024
In Kwanzas	**16.40%**	16.57%
In United States Dollars	**9.85%**	11.96%
In Euros	**7.00%**	7.00%
Other currencies	**-**	1.00%

As at December 31, 2025 and December 31, 2024, the group of ten largest debtors represents 61.54% and 64.07%, respectively, of the total loan portfolio (excluding guarantees provided and documentary credits).

In the periods ended December 31, 2025 and December 31, 2024, loans were written off in the amount of AOA 866,891 thousand and AOA 1,912,781 thousand (Note 16), respectively, in accordance with the criteria defined by the Group.

In the periods ended December 31, 2025 and December 31, 2024, there were recoveries of loans and interest previously written off or written down from assets, in the amounts of AOA 1,112,435 thousand and AOA 449,212 thousand (Note 23), respectively.

The loan portfolio, by segment, presents the following structure:

AOA thousands

12/31/2025	Exposure												Impairment

In order to mitigate the credit risk, credit operations have associated guarantees, namely mortgages or pledges. The fair value of these guarantees is determined on the date the loan is granted and is periodically reassessed.

The loan-guarantee ratio of the corporate, construction and real estate development, and residential segments has the following structure:

AOA thousands

Corporate - significant exposures	3.8%	26.7%	32.4%	45.8%

	Impairment in December 2024 - Average parameters			
	PD		LGD	
Segment	Stage 1	Stage 2	Stage 1 and 2	Stage 3
Credit cards	1.8%	9.8%	47.7%	79.6%
Consumer credit	2.1%	11.8%	44.6%	60.9%
Motor vehicle loans	2.1%	41.2%	44.7%	-
Mortgages	1.8%	55.5%	39.4%	76.1%
Overdrafts	6.4%	17.7%	70.5%	72.4%
Corporate - less significant exposures	20.4%	63.3%	47.4%	52.6%
Corporate - significant exposures	4.0%	25.7%	34.4%	56.2%

As at December 31, 2025, the forward-looking information considered in determining the forward-looking adjustment of the collective analysis is as follows:

Indicator	%	2026	2027	2028
Real GDP				
Optimistic scenario	10.0%	3.9%	2.2%	3.6%
Base scenario	70.0%	3.8%	2.3%	3.5%
Pessimistic scenario	20.0%	4.3%	3.3%	3.3%
Non-oil GDP growth rate				
Optimistic scenario	10.0%	2.7%	5.2%	5.1%
Base scenario	70.0%	3.0%	5.1%	5.1%
Pessimistic scenario	20.0%	3.2%	5.1%	4.8%
Exchange rate variation rate				
Optimistic scenario	10.0%	3.0%	-8.8%	2.6%
Base scenario	70.0%	3.0%	-8.8%	2.6%
Pessimistic scenario	20.0%	3.0%	-8.8%	2.6%
Luanda Consumer Price Index				
Optimistic scenario	10.0%	1.1%	6.6%	6.0%
Base scenario	70.0%	1.5%	1.2%	1.2%
Pessimistic scenario	20.0%	1.4%	8.1%	7.0%
Real Effective Exchange Rate				
Optimistic scenario	10.0%	7.3%	16.9%	3.3%
Base scenario	70.0%	11.5%	22.3%	8.9%
Pessimistic scenario	20.0%	10.6%	18.6%	4.3%

10. Non-Current Assets Held for Sale

As at December 31, 2025 and December 31, 2024, this caption is detailed as follows:

AOA thousands

	12/31/2025	12/31/2024
Non-current assets held for sale		
Real Estate	**931,113**	888,998
Accumulated impairment losses (Note 16)	**(878,718)**	(718,212)
	52,395	**170,786**

As at December 31, 2025 and December 31, 2024, the amounts disclosed refer to 17 and 15 properties received as payment, respectively, which are not in use and are available for immediate sale.

As at December 31, 2025 and December 31, 2024, the Group has set up 100% impairment for 14 and 8 of the properties held in its portfolio, respectively.

AOA 52,395 thousand

Non-Current Assets Held for Sale

11. Property, Plant and Equipment and Intangible Assets

During the periods ended December 31, 2025 and December 31, 2024, the captions Property, plant and equipment and Intangible assets presented the following movement:

As at December 31, 2025, the increase in furniture, tools, facilities and equipment mainly relates to the acquisition of IT equipment.

As at December 31, 2025, the increase in the Assets under construction caption is mainly due to construction work at the Group's various branches.

As at December 31, 2025, the balance under Advances to suppliers mainly relates to the initial allocation for the construction contract and promise of purchase and sale of the Bank's new headquarters building.

12. Current and Deferred Tax Assets and Liabilities

As at December 31, 2025 and December 31, 2024, the balances of current tax assets and liabilities were as follows:

AOA thousands

	12/31/2025	12/31/2024
Current tax assets	**496,540**	177,347
Total - Current tax assets	**496,540**	**177,347**
Current tax liabilities:		
On capital gains	**11,274,810**	10,022,320
CEOC	**219,213**	94,143
Other taxes	**5,624,703**	4,546,130
Total - Current tax liabilities	**17,118,726**	**14,662,593**

In the periods ended December 31, 2025 and December 31, 2024, the income tax expense recognized in the income statement, as well as the tax burden, measured by the ratio between the tax assessed and the profit for the period before that assessment, can be summarized as follows:

AOA thousands

	12/31/2025	12/31/2024
Corporate tax	**755,006**	411,226
Capital gains tax	**23,966,027**	15,147,330
Total tax recorded in profit or loss	**24,721,033**	**15,558,556**
Profit before tax	**257,862,949**	223,355,233
Tax burden	**9.59%**	6.97%

The reconciliation between the nominal tax rate and the tax charge for the periods ended December 31, 2025 and December 31, 2024, can be analyzed as follows:

AOA thousands

	12/31/2025		12/31/2024	
	Tax rate	Amount	Tax rate	Amount
Profit before tax		**257,862,949**		223,355,233
Tax calculated using nominal tax rate	**35.00%**	**90,252,032**	35.00%	78,174,332
Income from public debt securities not subject to II (Subject to IAC)	**-38.24%**	**(98,616,276)**	-33.34%	(74,472,373)
Provisions and impairment	**-0.86%**	**(2,220,972)**	-4.60%	(10,272,318)
Paid and unpaid exchange variations	**1.42%**	**3,653,881**	-13.20%	(29,475,963)
Corporate Income Tax	**0.29%**	**755,006**	0.18%	411,226
Capital Gains Tax (IAC)	**9.29%**	**23,966,027**	6.78%	15,147,330
Other permanent differences	**0.42%**	**1,076,056**	2.89%	6,464,429
Tax losses (used)/to be carried forward	**2.27%**	**5,855,279**	13.24%	29,581,894
Income tax	**9.59%**	**24,721,033**	**6.97%**	**15,558,556**

Corporate Tax

As mentioned in Note 2.15, the Group is subject to Corporate Tax, and the applicable tax rate is 35% for the periods ended December 31, 2025 and December 31, 2024.

Deferred taxes

As at December 31, 2025 and December 31, 2024, deferred tax assets recognized in the balance sheet are composed as follows:

AOA thousands

	Assets		Liabilities		Net gains/(losses)	
	12/31/2025	12/31/2024	**12/31/2025**	12/31/2024	**12/31/2025**	12/31/2024
Tax losses carried forward	**35,565,478**	39,853,736	**-**	-	**35,565,478**	39,853,736
Potential exchange rate variations	**-**	-	**(35,565,478)**	(39,853,736)	**(35,565,478)**	(39,853,736)
Deferred tax asset/(liability)	**35,565,478**	**39,853,736**	**(35,565,478)**	**(39,853,736)**	**-**	**-**

The Group has recognized in its accounts deferred tax liabilities related to potential exchange rate variations and deferred tax assets on tax losses up to the amount of deferred tax liabilities.

As at December 31, 2025, tax losses declared for previous years in the respective Form 1 and the tax loss to be carried forward for the 2025 financial year, by year of expiry, are analyzed as follows:

AOA thousands

Year	Tax losses
2022	21,838,961
2023	154,477,132
2024	84,519,696
2025	16,729,369
	277,565,158

Of the tax losses carried forward, as at December 31, 2025, there remain unused tax losses amounting to AOA 175,891,102 thousand, for which no deferred tax asset was recorded, nor for non-accepted impairment losses amounting to AOA 64,212,170 thousand. The Group does not recognize the remaining amount as deferred tax assets, as it considers that this amount will not be recoverable in the future.

13. Other Assets

As at December 31, 2025 and December 31, 2024, this caption is detailed as follows:

AOA thousands

	12/31/2025	12/31/2024
Other assets of a tax nature

Other advances		
Cash shortfalls	**61,815**	25,493
Active transactions pending settlement	**252,990**	47,488
Other	**488,049**	305,101
	802,854	**378,082**
Impairment for other assets (Note 16)	**(2,551,521)**	
	17,451,888	**28,172,649**

As at December 31, 2025 and December 31, 2024, Other taxes essentially represents taxes recoverable through the provisional assessment of Corporate Tax and other taxes awaiting tax credit from AGT. In 2025, an impairment loss of AOA 2,551,521 thousand was recognized as the Group considered that the respective asset was not recoverable. This assessment is based on financial projections, which indicate that sufficient taxable income is not expected to be generated in the foreseeable future to allow for the full use of this amount.

As at December 31, 2024, Other amounts of a civil nature – Sundry debtors: Advances to fixed assets suppliers refers to advances made to suppliers of property, plant and equipment in the course of the Group's business, relating to the acquisition of goods and services, namely the acquisition of vehicles, IT equipment and real estate. It should be noted that during 2025, the Group reviewed the classification of these items to the caption Advances to suppliers under Property, plant and equipment (see Note 11). Consequently, as at December 31, 2025, Other amounts of a civil nature – Sundry debtors: Advances to fixed asset suppliers shows a zero balance.

14. Deposits from Central Banks and Other Credit Institutions

As at December 31, 2025 and December 31, 2024, this caption is detailed as follows:

AOA thousands

	12/31/2025	12/31/2024
Transactions in the Interbank Money Market		
Deposits from Credit Institutions in the country - Loan (AOA)	**3,258,714**	39,411
Deposits from Credit Institutions abroad	**114,045,716**	5,130,065
Deposits from other entities		
Certified checks	**222,980**	253,168
ATM transactions - to be settled	**19,552,975**	18,156,862
Other	**110,410**	335,662
	137,190,795	**23,915,168**

As at December 31, 2025, Deposits from credit institutions abroad included the amount of AOA 107,822,371 thousand, invested by BPI and remunerated at a rate of 12.75%, resulting from the financial settlement of the IPO (2024: AOA 1,514,068 thousand, remunerated at a rate of 12%). Interest accrued shall be added to this amount.

The breakdown of deposits from Other credit institutions, by residual maturity, is disclosed in Note 30.2.

As at December 31, 2025 and December 31, 2024, the balance under Deposits from other entities relates essentially to interbank clearing values, namely, certified checks, ATM transactions, Multicaixa network transactions which were settled in the first days of the following month and import letters of credit.

15. Deposits from Customers and Other Loans

As at December 31, 2025 and December 31, 2024, the caption Deposits from Customers and other loans is detailed as follows:

AOA thousands

	12/31/2025	12/31/2024
Demand deposits from residents		
In national currency	**1,021,137,299**	891,072,230

Total deposits	**3,208,402,187**	**3,011,827,561**

In the period ended December 31, 2025, in accordance with its strategic plan, the Group continued to implement its vision of growth by raising deposits from Customers (the Group's main source of funding), having raised a significant amount of funds.

As at December 31, 2025 and December 31, 2024, term deposits from Customers have the following structure, according to the residual maturity of the operations:

AOA thousands

	12/31/2025	12/31/2024
Up to 1 month	**284,991,587**	256,001,528
1 to 3 months	**580,701,966**	500,673,017
3 to 6 months	**546,819,804**	550,871,234
6 to 12 months	**296,897,143**	389,221,184
1 to 3 years	**29,530,456**	29,409,300
	1,738,940,956	**1,726,176,263**

As at December 31, 2025 and December 31, 2024, interest on Customer term deposits earned interest at the following annual weighted average rates:

	12/31/2025	12/31/2024
In Kwanzas	**10.76%**	11.02%
In US Dollars	**1.51%**	1.59%
In Pound Sterling	**1.19%**	1.15%
In Euros	**1.62%**	1.48%

As at December 31, 2025 and December 31, 2024, demand and term deposits, by type of Customer, presented the following structure:

AOA thousands

	12/31/2025	12/31/2024
Demand deposits

For the period ended December 31, 2025, the Group increased impairment, on a net basis, in the amount of AOA 2,721,263 thousand for the portfolio of Impairment of other financial assets – Investments at amortised cost (2024: AOA 2,716,744 thousand) (see Note 8).

In terms of Loan impairment, the Group increased impairment, on a net basis, in the amount of AOA 8,277,953 thousand (2024: AOA 9,182,976 thousand) (see Note 9).

In 2025 and 2024, the Group wrote off a number of transactions, derecognizing impairment losses of AOA 866,891 thousand and AOA 1,912,781 thousand, respectively (see Note 9).

As at December 31, 2025, the caption Guarantees provided and undrawn credit facilities includes the impairment recognized for off-balance sheet captions of documentary credits, guarantees provided and undrawn limits included in the loan portfolio. The Group reversed impairment, on a net basis, in the amount of AOA 54,408 thousand (2024: net reversal of AOA 119,837 thousand) (see Note 9). Consequently, the amount of provisions recognized in the financial statements is AOA 237,616 thousand (2024: AOA 294,132 thousand) (see Note 9 and 27).

As at December 31, 2025, Impairment of Other Assets – Other Assets in the amount of AOA 2,551,521 thousand was recorded to address the value of the Other Assets caption, as the Group considers that the respective balance is not recoverable. This assessment is based on financial projections, which indicate that sufficient taxable income is not expected to be generated in the foreseeable future to allow for the full use of this amount (see Note 13).

In 2018, the Group created the Social Responsibility Department, which comprises the (i) monitoring of the "BFA Solidário" project and (ii) subsidies units and is responsible for the Group's social activities until the process of setting up the BFA Foundation is completed.

Since it is the intention of the Group's Board of Directors that the provision existing as at December 31, 2025 in the amount of AOA 13,661,422 thousand (2024: AOA 14,472,428 thousand) is used as a monetary endowment for the assets of the Fundação BFA, the Group, in 2024, as decided by the Board of Directors, advanced the initial endowment of the Fundação BFA in the amount equivalent to 50%, which amounted to AOA 12,920,014 thousand. The process of establishing the Foundation has already been approved in accordance with Presidential Order 5918/25, dated July 23.

As at December 31, 2025 and December 31, 2024, the caption Provisions of an administrative and commercial nature in the amount of AOA 14,461,985 and AOA 27,460,289, respectively, consists of provisions to cover several contingencies, frauds, ongoing legal proceedings and other liabilities, corresponding to the best estimate of the costs that the Group will bear in the future with these liabilities. In the year ended December 31, 2025, the Group recorded a net reversal of provisions in the amount of AOA 9,570,388 thousand (2024: net reversal of AOA 631,602 thousand), reflecting developments in the inspection processes for which the Bank had set aside provisions to cover possible tax contingencies.

For the period ended December 31 2025, the Group increased impairment, on a net basis, in the amount of AOA 2,721,263 thousand (2024: AOA 2,716,744 thousand).

17. Other Liabilities and Lease Liabilities

The balance of the caption "Taxes payable – withheld from third parties – On income" includes amounts to be settled with the Tax Administration in the month following the month to which they relate.

The balance of the caption Liabilities of a civil nature corresponds to invoices for services rendered that are outstanding to the Group's suppliers. It should be noted that the variation in the balance between periods is mainly due to the settlement of amounts owed to the respective counterparties.

As at December 31, 2025 and December 31, 2024, the balance of the caption Liabilities of an administrative and commercial nature – Staff – Salaries and wages includes the amounts of holidays and holiday allowances, performance bonus and other staff costs.

On March 28, 2023, by Unanimous Written Resolution 3/2023 (and following the postponement of the decision taken at the General Meeting of March 30, 2023), the amount relating to 60% of the variable remuneration for 2022 was settled and 40% (AOA 1,035,229 thousand) of that amount deferred for a 3-year period, to be valued considering the interest rate of Angolan treasury bonds, traded on the secondary market, in the same currency and maturity as the deferral.

On April 1, 2024, the General Meeting decided to settle the amount relating to 60% of the variable remuneration for 2023 and to defer 40% (AOA 1,024,727 thousand) of that amount for a 3-year period, to be valued considering the interest rate of Angolan treasury bonds, traded on the secondary market, in the same currency and maturity as the deferral.

On March 19, 2025, the General Meeting decided to settle the amount relating to 60% of the variable remuneration for 2024 and to defer 40% (AOA 1,447,762 thousand) of that amount for a 3-year period, to be valued considering the interest rate of Angolan treasury bonds, traded on the secondary market, in the same currency and maturity as the deferral.

As at December 31, 2025, Liabilities of an administrative and commercial nature - Corporate Bodies - Deferred performance bonus includes the amount of AOA 345,076 thousand relating to 40% of the variable remuneration for 2022, the amount of AOA 683,151 thousand relating to variable remuneration for 2023 and the amount of AOA 1,447,762 thousand relating to variable remuneration for 2024, amounts added to the remuneration described above.

The caption Other administrative and commercial costs payable – Premium/Discount – Acquisition of securities in the amount of AOA 8,958,648 thousand (2024: AOA 11,961,483) refer to the amount to be deferred to the gain on day 1, for the acquisition of public debt securities, considering that the fair value calculated by the Group at the time of acquisition does not derive from prices directly observed in the market (the operation was OTC), but based on internal models (level 3), it was concluded that the difference between the fair value of the security acquired and the acquisition price (P&L of day 1) should be accrued over the maturity of the securities and/or recognized in profit or loss at the time of derecognition.

The balance of the caption Other administrative and commercial costs payable - Accrued Costs includes the amount of AOA 6,196,363 thousand (2024: AOA 3,739,421 thousand) related to accrued costs with external supplies and services rendered and not yet invoiced by the suppliers.

The caption Other administrative and commercial costs payable – IAC accrual – Own portfolio refers to the IAC payable to the BNA on the interest on securities in the own portfolio.

As at December 31, 2025 and December 31, 2024, the caption Lease liabilities corresponds to the present value of lease payments to be settled over the lease term, recognized under IFRS 16.

The detail of the lease liabilities by maturity is presented below:

AOA thousands

	12/31/2025	12/31/2024
Lease liabilities		
Up to 1 year	**569,074**	2,981,097
1 to 5 years	**4,958,478**	3,187,364
More than 5 years	**889,160**	1,152,629
	6,416,712	**7,321,090**
Interest accrued on net interest income	**1,421,568**	2,020,897
	4,995,144	**5,300,193**

Lease liabilities relate to the lease agreements for branches and offices used by the Group in the course of its business.

18. Equity

Share Capital

The Bank was incorporated with a share capital of AOA 1,305,561 thousand (equivalent to Euro 30,188,657 at the exchange rate in force on June 30, 2002), represented by 1,305,561 registered shares of one thousand kwanzas each, having been subscribed and paid-up by incorporation of all assets and liabilities, including property or real estate rights of any nature, as well as all the rights and obligations of the former BFE Branch.

At the end of 2004, 2003 and 2002, the Bank increased its share capital by AOA 537,672 thousand, AOA 1,224,333 thousand and AOA 454,430 thousand, respectively, through the incorporation of the special reserve for the maintenance of own funds, in order to maintain the counter value in kwanzas of the initial capital endowment in foreign currency.

By Unanimous Resolution of the General Meeting, of October 4, 2018, it was decided to increase BFA's share capital by incorporating reserves recorded under the caption Other reserves and Retained earnings in the amount of AOA 11,478,004 thousand. This capital increase was carried out within the scope of Notice 02/2018 of the Banco Nacional de Angola, which defines that the minimum value of fully paid-up share capital in national currency is AOA 7,500,000 thousand.

On November 26, 2018, there was an increase in share capital which corresponded to an increase in the shareholding of each shareholder in proportion to their respective holdings in the share capital of the Bank at that date, with 13,694,439 shares having been issued with a par value of AOA 1,000. Accordingly, as at December 31, 2018, the Bank had a total of 15,000,000 ordinary shares outstanding.

On March 30, 2023, the General Shareholders' Meeting decided on a share capital increase by incorporating Free Reserves in the amount of AOA 30,000,000 thousand, remaining above the minimum set by the BNA stipulated in BNA Notice 17/2022, raising the capital to AOA 45,000,000 thousand.

Following this resolution, Banco de Fomento Angola, S.A., in accordance with the Angolan Commercial Companies Code, registered the change in capital, which was registered after a public deed on August 22, 2023 and registered at the Commercial Registry Office on August 28, 2023. In addition, following a public deed on August 22, 2023 at the Commercial Registry Office, the General Shareholders' Meeting decided to regroup its shares representing its share capital by applying a regrouping ratio of 1:5, with each 5 shares prior to the regrouping corresponding to 1 share after the regrouping, with the regrouping applying to all shares in the same proportion. The Bank regrouped the 45,000,000 shares it had after increasing its capital by incorporating reserves into 9,000,000 shares with a nominal value of 5,000 each.

As at April 30, 2025, according to a unanimous written resolution by the shareholders, it was decided to increase BFA's capital by incorporating Free Reserves in the amount of AOA 45,000,000 thousand, with 6,000,000 shares being issued, which corresponded to the increase in each shareholder's holding in proportion to their respective holdings in the Bank's share capital on that date. This capital increase was recorded after the public deed dated June 5, 2025, and registration at the Commercial Registry Office on May 28, 2025.

Consequently, on December 31, 2025, the Group's share capital amounts to AOA 90,000,000 thousand, represented by 15,000,000 registered shares of AOA 6,000 each (2024: share capital of AOA 45,000,000 thousand, represented by 9,000,000 registered shares of AOA 5,000 each).

According to the legislation in force for financial institutions based in Angola, disclosure to the market of qualifying holdings may only occur after the potential shareholder has notified the Banco Nacional de Angola and subsequent approval by the Regulator.

AOA 90,000,000 thousand

The Group's Share Capital in 2025

As at December 31, 2025 and December 31, 2024, the shareholder structure of the Group is as follows:

	12/31/2025		12/31/2024	
	Number of shares	%	Number of shares	%
Unitel, S.A.	**5,535,000**	**36.90%**	4,671,000	51.90%
Banco BPI, S.A.	**5,002,500**	**33.35%**	4,328,370	48.09%
Congolian Financial, S.A.	**1,141,500**	**7.61%**	-	0.00%
Other shareholders	**3,321,000**	**22.14%**	630	0.01%
	15,000,000	**100%**	**9,000,000**	**100%**

On October 7, 2016, Unitel, S.A. (Unitel) entered into an agreement with Banco BPI, S.A. (Banco BPI) for the purchase of 2% of the share capital of BFA, which led to an increase in Unitel's stake in BFA from 49.9% to 51.9%. On that same date, the new shareholders' agreement concerning BFA was also signed.

The completion of this operation was dependent on the verification of the following suspensive conditions:

- Authorization from the Banco Nacional de Angola (BNA) for the increase in the qualified shareholding already held by Unitel in BFA and authorization for the capital transactions necessary for the payment to Banco BPI and the transfer to Portugal of the agreed price of Euro 28 million;
- Authorization from the BNA to change the Articles of Association of BFA; and
- Approval of the operation by the General Shareholders' Meeting of Banco BPI.

On December 12, 2016, the Banco Nacional de Angola communicated that it did not object to the practice of the following acts:

I. Partial amendment of BFA's Articles of Association;

II. Increase in Unitel's qualified shareholding in the share capital of BFA through the acquisition from Banco BPI of 26,111 ordinary shares representative of 2% of share capital;

III. Indirect acquisition of the qualified shareholding representative of 48.10% of BFA's share capital, following the settlement of the general and mandatory initial public offer (IPO) launched by Caixabank for all the shares representative of Banco BPI's share capital.

The BNA established as a condition that the three operations referred to above are indivisible, i.e., it is assumed that they must occur simultaneously or almost simultaneously or, if it is not possible for any reason to ensure their simultaneity, the operation referred to in (ii) must precede the operations referred to in (i) and (iii).

On January 5, 2017, pursuant to the share purchase and sale agreement entered into in 2016, the sale by Banco BPI to Unitel of the shareholding representing 2% of the share capital of BFA was completed.

On November 26, 2018, a share capital increase took place which corresponded to an increase in the shareholding of each shareholder in proportion to their respective shareholdings in the Bank's share capital at that date, with 13,694,439 shares with a nominal value of AOA 1,000 having been issued. Accordingly, as at December 31, 2018, the Bank had a total of 15,000,000 ordinary shares outstanding.

On August 22, 2023, the Bank formalized a share capital increase by incorporation of Free Reserves in the amount of AOA 30,000,000 thousand, grouping its shares to the amount of 9,000,000 shares, with a nominal value of AOA 5,000.

On May 22, 2025, Banco Nacional de Angola announced that it did not oppose the transfer of BFA shares held by BPI Vida e Pensões (0.01%) to BPI.

On May 28, 2025, BFA increased its share capital by incorporating Free Reserves in the amount of AOA 45,000,000 thousand, with 6,000,000 shares being issued, which corresponded to the increase in each shareholder's holding in proportion to their respective holdings in the Bank's share capital on that date. Therefore, as at December 31, 2025, the Group's share capital amounts to AOA 90,000,000 thousand, represented by 15,000,000 registered shares of AOA 6,000 each.

On August 15, 2025, following the decision of Unitel shareholders — taken on the basis of Presidential Order 194/24 of August 23, 2024, and Presidential Order 100/25 of March 31, 2025 — and Banco BPI, approval of the prospectus was obtained from the Capital Markets Commission, in the context of promoting a public offering for sale of a total of 4,462,500 ordinary shares, representing 29.75% of BFA's share capital. Of this total, 2,250,000 shares, corresponding to 15.00% of the share capital, were held by Unitel, and 2,212,500 shares, corresponding to 14.75% of the share capital, were held by Banco BPI.

On August 22, 2025, the Bank publicly announced the public offering and published the respective prospectus. Following the offering period, which ran from September 5 to September 25, 2025, and the setting of the price on September 26, 2025, BFA shares were admitted to trading on September 30, 2025.

As at December 31, 2025, as a result of trading on the regulated market, the shareholder Congolian Financial, S.A. holds 7.61% of the Group's share capital, with the remaining 22.14% dispersed among minority shareholders.

Other reserves and Retained earnings

As at December 31, 2025 and December 31, 2024, this caption is detailed as follows:

AOA thousands

	12/31/2025	Increases	Decreases	12/31/2024
Legal reserve, other reserves and retained earnings				
Legal reserve	**45,480,450**	200,000	-	45,280,450
Other reserves and retained earnings	**455,219,396**	104,688,807	(45,000,000)	395,530,589
	500,699,846	**104,888,807**	**(45,000,000)**	**440,811,039**

AOA thousands

	12/31/2024	Increases	Decreases	31/12/2023
Legal reserve, other reserves and retained earnings				
Legal reserve	45,280,450	6,835,808	-	38,444,642
Other reserves and retained earnings	395,530,589	77,261,923	-	318,268,666
	440,811,039	**84,097,731**	**-**	**356,713,308**

Under current legislation, the Bank must set aside a legal reserve up to the amount of their capital. This legal reserve can only be used to cover accumulated losses when the remaining reserves have been exhausted.

As at December 31, 2024, as provided for in Article 165 of the Legal Framework for Financial Institutions, the **legal reserve** set up by the Bank amounts to its entire share capital, considering that, by resolution of the General Shareholders' Meeting, it was approved, on April 1, 2024, to increase the legal reserve by 4.05% of the profit achieved in 2023 (AOA 6,775,808 thousand to AOA 45,000,000 thousand). In addition, at the same General Shareholders' Meeting, it was also decided to transfer 45.95% of the profit for 2023 (AOA 76,978,998 thousand) to free reserves, resulting in a balance of other reserves, as at December 31, 2024, of AOA 393,771,206 thousand. The remaining 50% (AOA 83,754,806 thousand) was distributed to shareholders. Consequently, as at December 31, 2024, the value of the Group's legal reserve, other reserves and retained earnings amounts to AOA 45,280,450 and AOA 395,530,589 thousand, respectively.

As at December 31, 2025, as a result of the share capital increase through the incorporation of Free Reserves in the amount of AOA 45,000,000 thousand, which was decided and formalized on a date subsequent to the date of the decision on the application of 2024 results (May 28, 2025, and March 19, 2025, respectively), the **legal reserve** established by the Bank amounts to 50% of the share capital. Accordingly, under the current legislation, the Bank will transfer a minimum of 10% of its net income to this reserve in future periods.

As of December 31 2025, as a result of the share capital increase through the incorporation of Free Reserves in the amount of AOA 45,000,000 thousand, the legal reserve established by the Bank amounts to 50% of the share capital.

It should be noted that, pursuant to a resolution of the General Shareholders' Meeting, held on March 19, 2025, the allocation of 50.00% of the profit achieved in 2024 (AOA 102,910,625 thousand) to free reserves was approved. The remaining 50% (AOA 102,910,625 thousand) was distributed to shareholders, as disclosed in the section below. Consequently, as at December 31, 2025, the value of the Group's legal reserve, other reserves and retained earnings amounts to AOA 45,480,450 and AOA 455,219,396 thousand, respectively.

Earnings and dividend per share

In the periods ended December 31, 2025 and December 31, 2024, the basic earnings per share and the dividend attributed, relating to the profit of the previous year, were as follows:

AOA thousands

	12/31/2025	12/31/2024 (IAS 33 effect)	12/31/2024
Average number of ordinary shares issued	**11,938,356**	7,500,000	9,000,000
Net profit/(loss) for the period	**233,140,197**	207,795,360	207,795,360
Dividends distributed in the period relating to the previous period	**102,910,625**	83,754,806	83,754,806
Basic earnings per share	**19.529**	27.706	23.088
Diluted earnings per share	**19.529**	27.706	23.088
Dividend per share attributed during the period	**8.620**	11.167	9.306

In 2025, the dividends distributed for 2024, amounting to AOA 102,910,625 thousand, were paid in full, so that as at December 31, 2025, the Group has no liability for dividends attributed for previous years and not paid to its shareholders. In 2024, dividends distributed for 2023 were also paid out, amounting to AOA 83,754,806 thousand.

19. Net Interest Income

In the periods ended December 31, 2025 and December 31, 2024, this caption is detailed as follows:

21. Foreign Exchange Gains/(Losses)

In the periods ended December 31, 2025 and December 31, 2024, this caption is detailed as follows:

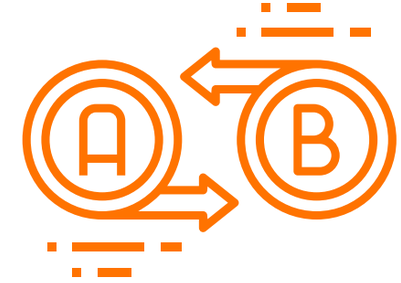

AOA thousands

	12/31/2025	12/31/2024
Changes in exchange rates on assets and liabilities		
Denominated in foreign currency	**891,465**	9,507,444
Foreign exchange spot and forward transactions	**3,069,817**	(8,103,631)
Foreign currency purchase and sale transactions	**68,992,757**	60,984,435
	72,954,039	**62,388,248**

The caption Changes in exchange rates on assets and liabilities denominated in foreign currency essentially refers to the foreign exchange gains/(losses) related to the exchange revaluation of the Group's assets and liabilities in foreign currency on the reporting dates. The variation recorded between periods is essentially due to the stabilization of the Kwanza against the US Dollar in 2025.

The caption Foreign exchange spot and forward transactions essentially comprises gains and losses arising from spot and forward transactions.

In the period ended December 31, 2025, the Group recorded an increase in foreign exchange gains/(losses) from foreign currency purchase and sale operations as a result of the volume effect and pricing associated with these transactions.

22. Net Gains/(Losses) on Sale of Other Assets

In the periods ended December 31, 2025 and December 31, 2024, this caption is detailed as follows:

AOA thousands

	12/31/2025	12/31/2024

CEOC	**(2,860,123)**	(1,918,662)
Contribution to Deposits Guarantee Fund	**(1,757,418)**	(1,643,004)
Penalties applied by regulatory authorities	**(48,493)**	(159,504)
Contribution to the Resolution Fund	**(6,895,925)**	-
Other	**(487,224)**	(300,402)
	(22,519,056)	**(15,449,750)**
	(8,679,122)	**(6,445,920)**

In the periods ended December 31, 2025 and December 31, 2024, the caption Other operating income – Recovery of administrative and commercial expenses refers, essentially, to: (i) the reimbursement of communication and shipping expenses originally borne by the Bank, namely in execution of payment order operations and (ii) other miscellaneous income.

As at December 31, 2025, and December 31, 2024, the caption Other operating income – Gains on credit recovery refers to credit recoveries and interest previously written off or deducted from assets, in the amounts of AOA 1,112,435 thousand and AOA 449,212 thousand (Note 9).

In the periods ended December 31, 2025 and December 31, 2024, the caption Other operating expense – Taxes and fees not levied on income includes a balance for value added tax in the amount of AOA 9,073,851 thousand and AOA 9,833,069 thousand, respectively.

For the year ended December 31, 2025, Other operating expense – Contribution to Resolution Fund refers to the initial contribution to the Resolution Fund, as provided for in the combined terms of Article 303(1) and Article 304(1) all of Law 14/21, of May 19, Law on the General Regime of Financial Institutions, subparagraph f) of Article 31(1) and Article 98(1) of Law 24/21, of October 18, Law of the Banco Nacional de Angola. It should be noted that this contribution is determined by applying 1% to the amount of audited accounting equity for 2024.

24. Staff Costs

In the periods ended December 31, 2025 and December 31, 2024, this caption is detailed as follows:

AOA thousands

	12/31/2025	12/31/2024
Members of the Management and Supervisory Bodies		
Monthly remuneration	**4,669,712**	4,399,849
Additional remuneration	**6,092,133**	3,478,093
Mandatory social charges	**870,467**	681,733
	11,632,312	**8,559,675**
Staff		
Monthly remuneration	**59,343,061**	49,226,837
Additional remuneration	**9,982,319**	7,907,710
Mandatory social charges	**5,056,645**	4,183,925
Optional social charges	**4,996,316**	4,554,811
Other	**794,051**	623,514
	80,172,392	**66,496,797**
Pension costs		
Supplementary pension plan	**3,488,286**	2,915,696
	3,488,286	**2,915,696**
	95,292,990	**77,972,168**

The caption Members of the Management and Supervisory Bodies – Additional Remuneration includes the variable remuneration awarded to the Bank's Board of Directors. In accordance with its remuneration policy for this body, the Bank defers the settlement of 40% of it for 3 years. The amounts not yet paid are shown under Other liabilities - Liabilities of an administrative and commercial nature - Corporate Bodies - Deferred performance bonus (see note 17).

Staff – Monthly remuneration includes the monthly remuneration paid to employees. The variation recorded between periods is essentially due to salary increases implemented by the Group.

In 2013, with reference to the last day of the year, the Group set up the BFA Pension Fund to cover the liabilities with retirement pensions for old age, disability and survival that the Group granted to its Angolan employees registered with the Social Security, having used the provisions previously set up as an initial contribution to the BFA Pension Fund (defined contribution plan). In accordance with the contract for the set-up of the Fund, the Group will contribute annually with 10% of the salary subject to Angolan Social Security charges, applied on fourteen salaries.

In November 2022, Order 3923/22 ([Official Gazette]) 123 of Series II) published the Addendum to the BFA Pension Fund and the New Pension Plan. The new Pension Plan defines a mixed contribution system between the Associate (BFA) and the Employees and establishes the associate's rate at 7.5% on the pensionable salary, also defining a variable employee contribution between 2.5% and 10% on the pensionable salary.

In the periods ended December 31, 2025 and December 31, 2024, the Group's contribution to the BFA Pension Fund amounted to AOA 3,488,286 thousand and AOA 2,915,696 thousand, respectively.

In the periods ended December 31, 2025 and December 31, 2024, BFA Pensões – Sociedade Gestora de Fundos de Pensões, S.A. is responsible for managing the BFA Pension Fund.

The costs of remuneration and other benefits paid to the Group's Board of Directors, General Meeting Board, and Supervisory Board during 2025 and 2024 are presented as follows:

AOA thousands

	12/31/2025			12/31/2024		
	Board of Directors	General Meeting Board	Supervisory Board	Board of Directors	General Meeting Board	Supervisory Board
Salaries and Wages	**6,528,574**	**188,564**	**185,254**	5,340,306	176,432	185,387
Other Remuneration	**5,161,309**	**-**	**-**	3,094,446	-	-
Post-employment benefit costs	**275,277**	**-**	**-**	196,807	-	-
Total	**11,965,110**	**188,564**	**185,254**	**8,631,559**	**176,432**	**185,387**

25. External Supplies and Services

In the periods ended December 31, 2025 and December 31, 2024, this caption is detailed as follows:

AOA thousands

	12/31/2025	12/31/2024
Audit, advisory and other specialised technical services	**30,916,030**	20,338,378
Safety, maintenance and repair	**12,986,588**	15,405,474
Sundry materials	**4,146,619**	3,115,484
Advertising and marketing	**4,624,014**	2,410,352
Transport, travel and accommodation	**4,075,486**	3,880,819
Communication	**2,651,698**	2,919,157
Water and energy	**1,044,859**	610,745
Insurance	**1,999,071**	939,605
Rentals	**575,368**	680,239
Other external supplies and services	**4,865,808**	1,221,891
	67,885,541	**51,522,144**

The variation in Audit, advisory and other specialized technical services is mainly due to the volume of services provided by external entities in the context of implementing strategic initiatives aimed at improving processes and automation, among others.

The fees for services rendered by the external auditor during 2025 and 2024 are detailed as follows:

AOA thousands

	12/31/2025	12/31/2024
External audit services	**565,069**	459,585
Other assurance services as part of the external auditor's duties	**145,094**	142,549
	710,163	**602,134**

26. Segment Reporting

As at December 31, 2025 and December 31, 2024, in compliance with the requirements of IFRS 8 – Operating segments, the Group defined the following business segments:

- **Investment portfolio and foreign exchange transactions:** This segment includes banking activities related to the management of the Bank's own investment portfolio, including derivative financial instruments, as well as cash and deposits and resources at central banks and other credit institutions;
- **Retail and commercial banking:** This includes lending and raising funds from individuals and companies; and
- **Other:** Comprises all business segments not covered in the business lines described above.

As at December 31, 2025 and December 31, 2024, the Group has set up provisions to cover the credit risk assumed on the granting of guarantees, documentary credits and irrevocable credit facilities (Undrawn limits), in the amounts of AOA 237,616 and AOA 294,132 thousand, respectively (Notes 9 and 16).

As at December 31, 2025, there are no derivative financial instruments. As at December 31, 2024, the notional amounts of forwards are recorded under off-balance sheet items, in the amount of AOA 3,444,221 thousand (Note 7).

As at December 31, 2025 and December 31, 2024, the caption Safekeeping of securities refers essentially to securities of Customers in the custody of the Bank and BFA Capital Markets.

28. Related Parties

In accordance with IAS 24, the following are considered entities related to the Group:

- the entities that exercise, directly or indirectly, a significant influence over the management and financial policy of the Group – Shareholders;
- those over which the Group exercises, directly or indirectly, a significant influence over their financial management and policy – Pensions Fund;
- key management personnel of the Group, considering for this purpose executive and non-executive members of the Board of Directors and companies in which the members of the Board of Directors have control or joint control;
- subsidiaries, joint ventures or associates of the shareholder holding control over the Group;
- key personnel of the shareholder with control over the Group (executive and non-executive members of the Board of Directors); and
- entities controlled or jointly controlled by key personnel of the shareholder with control over the Group.

In the periods ended December 31, 2025 and in the period ended December 31, 2024, the Group's related parties with which it had balances or transactions are as follows:

Qualified Group shareholders:

- BPI Group;
- UNITEL;
- Congolian Financial, S.A.

Other Group shareholders:

- Nelson Fidel Candumbo Carrinho;
- Rui Alves Candumbo Carrinho.

30. Risk Management

The Group's activities are exposed to a variety of financial risk factors, including the effects of changes in market prices: foreign exchange risk, credit risk, liquidity risk and cash flow risks associated with interest rate risk, among others.

The Group's risk management is controlled by the Risk Management Department, in accordance with policies approved by the Board of Directors. Accordingly, the Board of Directors has defined, in writing, the fundamental principles of global risk management, as well as specific policies for some areas, such as interest rate risk, liquidity risk and credit risk.

The Board of Directors defines the principles for risk management as a whole and policies that cover specific areas, such as exchange risk, interest rate risk, credit risk, the use of derivatives and other non-derivative financial instruments, as well as the investment of excess liquidity.

Main Risk Categories

Credit – Credit risk is the uncertainty of recovery of an investment and its return, due to the debtor's inability (and that of his/her guarantor, if any) to fulfill its financial commitments, thus causing a financial loss to the creditor. Credit risk is reflected in debt securities or other receivables.

Market – Market risk reflects the potential loss that can be recorded by a given portfolio as a result of changes in rates (interest and exchange rates) and/or the prices of the different financial instruments that comprise it, considering both the correlations between them and the respective volatilities. Accordingly, Market Risk encompasses interest rate risk, exchange rate and other price risks.

Liquidity – Liquidity risk reflects the inability of the Group to meet its liabilities associated with financial liabilities on each maturity date without incurring significant losses as a result of a deterioration in the conditions of access to financing (financing risk) and/or sale of its assets for amounts lower than the amounts usually practiced in the market (market liquidity risk).

Real Estate – Real estate risk is the probability of negative impacts on the Group's income or capital level due to fluctuations in the market price of real estate assets.

Operational – Operational risk is the potential loss resulting from failures or inadequacies in internal processes, information systems, human behavior or external events.

30.1.Credit Risk

Credit risk corresponds to the risk of default by counterparties, with which the Group maintains open positions in financial instruments, as a creditor. In accordance with the Group's General Credit Regulations, the granting of credit in the Group is based on the following fundamental principles:

Formulation of proposals

Loan operations, or guarantees, subject to the decision of the Group:

- Are adequately characterized in the Technical Data Sheet, containing all the essential and accessory elements necessary for the formalization of the operation;
- Respect the specific product sheet;
- Are accompanied by a duly substantiated credit risk analysis;
- Contain the signatures of the proposing bodies.

Credit risk analysis

In the credit risk analysis, the total exposure of the Group to the Customer, or to the group to which the Customer belongs, is considered, according to the terms of the legislation applicable at any time. Exposures in respect of the same Customer or economic group are classified, having as reference those that represent the greatest risk.

Currently, considering the regulations of the Banco Nacional de Angola:

- For a single Customer, all its liabilities *vis-à-vis* the Group, in force or potential, already contracted or committed, for financing and guarantees are considered (total exposure of the Group to the Customer);
- For a group of Customers, the sum of the liabilities of each Customer that comprises the Group is considered (total exposure of the Group to the group); and
- The existence of guarantees with State risk, or with immediate liquidity, has an impact on the calculation of the value of the Global Exposure.

Classification of Risk

The Group classifies loan operations in ascending order of risk, according to the following grades:

Grade A: Minimum risk
Grade B: Very low risk
Grade C: Low risk
Grade D: Moderate risk
Grade E: High risk
Grade F: Very high risk
Grade G: Maximum risk

The individual classification of the exposure considers the characteristics and risks of the operation and of the borrower, and is initially classified based on the following criteria adopted by the Group:

Grade A: operations that are:

I. assumed by the Angolan State, encompassing its central and provincial administrations

II. assumed by central administrations, central banks of countries, included in group 1 (defined in Instruction 1/2015, of January 14, of the Banco Nacional de Angola), international organizations and multilateral development banks;

III. fully guaranteed by cash deposits, or certificates of deposit, constituted or issued by the lending institution, or by institutions in a controlling or group relationship with the lending institution and having their head office in Angola, or a country included in group 1, multilateral development banks and international organizations, provided that the exposure and the deposit or certificate are denominated in the same currency;

IV. fully guaranteed by cash deposits or certificates of deposit constituted or issued by the lending institution or by branches of the lending institution, not covered by the preceding paragraph, provided that the exposure and the deposit or certificate are denominated in the same currency;

V. fully guaranteed by securities or bonds issued by the Angolan State, or by the Banco Nacional de Angola.

Grade B and others: remaining loans.

The classification of exposures is revised whenever there are signs of impairment in late payments.

Within the scope of the regular review of loan operations, including loan operations overdue, the Group reclassifies overdue loan operations into those that are due, based on an analysis of the economic prospects of collectability, namely considering the existence of guarantees, the borrowers' or guarantors' assets and the existence of operations whose risk the Group equates to State risk, or even when the situation of delay results from the Group's exclusive responsibility due to a one-off failure in its processes.

Association of Guarantees

When granting loans to Retail Customers or small companies with a maturity of more than 36 months, in the absence of short-term financial investments, the Group requires, as a rule, the provision of a real guarantee on property.

Loan operations are associated with guarantees considered adequate to the risk of the borrower, the nature and term of the operation, which are duly substantiated, in terms of sufficiency and liquidity.

Real guarantees are assessed prior to the loan decision, and these assessments are periodically reviewed. Exceptions to this rule (with decisions being conditional on a subsequent assessment) imply that disbursement will only occur after the Group has obtained the guarantee assessment.

The main types of collateral for loans and advances to Customers are:

- Mortgages on residential properties;
- Encumbrances on Company assets, such as facilities, inventory or accounts receivable;
- Encumbrances on financial instruments, such as debt securities or shares; and
- Encumbrances on term deposits at the institution.

Long-term financing and loans to corporate entities usually have an associated guarantee. On the contrary, revolving credit products do not generally have an associated guarantee.

Collaterals obtained as a guarantee for financial assets, other than loans and advances to Customers, always depends on the type of financial instrument. Debt instruments do not normally have an associated guarantee, with the exception of securitized instruments, which have portfolios of financial instruments as collateral. On the other hand, derivative instruments have associated guarantees.

The Group's policies on collateral obtained as guarantee have not changed significantly during the reporting period, nor have there been any significant changes in the quality of the collateral held by the Group since the previous period.

The Group monitors collateral obtained as security for impaired loans and advances to Customers as it becomes more likely that the Group will take ownership of such collateral to mitigate possible credit losses. Loans to impaired Customers (stage 3) and the collaterals obtained as guarantee are detailed as follows (on-balance sheet amounts):

Exclusions due to incidents

The Group does not grant loans and advances to Customers who have registered material incidents in the last 24 months known to the Group, nor to other companies that are part of a group with Customers in that situation. The following are considered material incidents:

- Delays in making payments of principal or interest owed to a credit institution, social security, AGT, court or State Inspectorate for more than 90 days; ;
- Irregular use of means of payment for which that person or entity is responsible;
- Pending legal actions against that person or entity that have potential adverse effects on their economic or financial position.

Exceptions to these rules have specific decision rules under the Group's general credit regulation, which are stricter.

Restructurings

In principle, the Group only formalizes ongoing loan restructuring operations, after assessing the Customer's ability to comply with the new plan, if the following criteria are met:

- New guarantees (more liquid and/or more valuable) are presented for the new operation;
- Interest and late payment fees are paid in advance (in the event of a non-performing operation); and
- There is a significant partial settlement of the outstanding principal (performing and/or non-performing).

Exceptionally, and if none of the above assumptions are met, the Group admits formalizing the formal restructuring of Retail Customers' debts, if it is verified that in the last 6 months, deposits were made of a minimum amount equal to the installment amount foreseen for the restructured operation.

Loan operations restructured due to the Customer's financial difficulties are defined in the General Credit Regulation and comply with the regulator's specific regulations in this matter.

Restructuring operations are classified, for the purpose of increasing risk, and periodically monitored as to compliance with the established plan and are only unclassified when certain conditions of regularity in complying with the plan are met.

Operations subject to renegotiation are maintained at least at the same risk level in which they were classified in the month immediately prior to the renegotiation. Reclassification to a lower risk level only occurs if there is regular and significant repayment of the operation, payment of interest due and on arrears, or depending on the quality and value of new guarantees presented for the renegotiated operation.

Monitoring of non-performing loans

Non-performing loans are monitored by the commercial teams, as a rule until it is 60 days overdue, with monitoring being done by a specialized team. After 60 days of default, the management of the relationship is transferred to this specialized team, which has the mission of collaborating in loan recovery actions, being able to take over negotiations and restructuring proposals.

The restructuring negotiations follow the principles mentioned above.

This team is responsible for the management and relationship with the Customer, with the aim of recovering the loan, resorting to the enforcement, through the courts, if necessary.

Impairment

The Group implemented a model to calculate impairment losses of the loan portfolio, in accordance with the requirements set out in IFRS 9.

The Group calculates the impairment losses of the loan portfolio monthly based on the implemented model, with the amount of impairment determined being approved by the Executive Committee of the Board of Directors.

The first application and the respective outcomes of this model were calculated with reference to January 1, 2018. Since that reference date, monthly calculations have been carried out. The half-yearly results are approved by the Board of Directors.

Securities and bonds

As at December 31, 2025 and December 31, 2024, the Group's securities portfolio complies with the principle of the high credit quality of its issuers, consisting mainly of securities issued by the Angolan State and by the Banco Nacional de Angola.

As at December 31, 2025 and December 31, 2024, the maximum exposure to credit risk presents the following detail:

AOA thousands

Loans and advances to customers (Note 9)	**956,319,427**	**(65,307,579)**	**891,011,848**	788,236,285	(57,826,019)	730,410,266
Other assets (Note 13)	**20,003,409**	**(2,551,521)**	**17,451,888**	28,172,649	-	28,172,649
	4,219,048,699	**(86,682,424)**	**4,132,366,275**	**3,869,978,090**	**(74,048,844)**	**3,795,929,246**
Off-balance sheet						
Guarantees provided, open documentary credits and undrawn facilities (Note 9)	**227,902,698**	**(237,616)**	**227,665,082**	273,344,167	(294,132)	273,050,035
Total	**4,446,951,397**	**(86,920,040)**	**4,360,031,357**	**4,143,322,257**	**(74,342,976)**	**4,068,979,281**

For financial assets recognized in the balance sheet, the maximum exposure to credit risk is represented by the book value net of impairment. For off-balance sheet items, the maximum exposure from guarantees is the maximum amount that the Group would have to pay should the guarantees be forfeited and of loan and other credit-related commitments of an irrevocable nature is the total amount of commitments entered into.

As at December 31, 2025 and December 31, 2024, the credit quality of financial assets is as follows:

30.2. Liquidity Risk

Liquidity risk corresponds to the risk of the Group presenting difficulties in obtaining the financial resources it needs to meet its financial commitments when they become due. Liquidity risk may consist, for example, in the inability to sell a financial instrument quickly for an amount representative of its fair value, because of its large size, in relation to the volume normally traded, or because of some discontinuity in the market.

Within the scope of the Group's internal policies with respect to exposure to liquidity risk, the respective follow-up and monitoring of the established principles and limits is ensured by the Risk Management Department.

As at December 31, 2025 and December 31, 2024, the contractual cash flows related to capital together with the respective accrued interest are detailed as follows:

30.3. Market Risk

Market risk corresponds to the possible fluctuation of the fair value or future cash flows associated with a financial instrument, due to changes in market prices. Market risk encompasses interest rate risk and exchange rate risk.

Interest rate risk

The interest rate risk corresponds to the risk arising from adverse movements in interest rates resulting in a mismatch in the amount, maturities or interest-fixing dates observed in financial instruments with interest receivable and payable.

As at December 31, 2025 and December 31, 2024, financial instruments by exposure to interest rate risk were as follows:

Currency risk

Currency risk is the fluctuation of the fair value or future cash flows of a financial instrument due to changes in exchange rates.

The securities portfolio of the Group is divided between securities denominated in national currency and in foreign currency, taking into consideration the overall structure of its balance sheet, in order to avoid incurring, in this manner, currency risk.

As at December 31, 2025 and December 31, 2024, financial instruments by currency are detailed as follows:

AOA thousands

30.4. Fair value of financial assets and liabilities

The Group classified the financial instruments recorded in the balance sheet at fair value in accordance with the hierarchy established in IFRS 13.

Instruments listed in active markets (level 1)

This category includes financial instruments with available quoted prices in official markets and those in which there are entities that usually disclose prices of transactions for these instruments traded in liquid markets.

Priority in the prices used is given to those observed in official markets, in cases where there is more than one official market the option falls on the main market where these financial instruments are traded.

This category includes, among others, the following financial instruments: (i) derivatives traded on an organized market and (ii) listed shares.

Valuation methods with observable market parameters/prices (level 2)

This category includes financial instruments valued through internal models, namely discounted cash flow models, which require judgments that vary according to the complexity of the products being valued and use assumptions similar to those that an unrelated party would use in estimating the fair value of the same financial instrument. The Group uses as inputs in its models variables provided by the market, such as interest rate curves and credit spreads. It also includes instruments whose valuation is obtained through quotations disclosed by independent entities but whose markets have the lowest liquidity.

This category includes, among others, the following financial instruments: (i) unlisted bonds; and (ii) over-the-counter (OTC) derivatives.

Valuation methods with non-observable parameters in the market (level 3)

This level includes the valuations determined by the use of internal valuation models or quotations provided by third parties but where the parameters used are not observable in the market. The bases and assumptions used in the calculation of the fair value are in accordance with the principles of IFRS 13.

This category includes, among others, the following financial instruments: (i) securities valued using inputs that are not observable in the market; (ii) unquoted shares; (iii) over-the-counter (OTC) market derivatives with quotes provided by third parties.

As at December 31, 2025 and December 31, 2024, the book value of financial instruments is detailed as follows:

As at December 31, 2025 and December 31, 2024, the book value of financial instruments totalled AOA 3,345,592,982 thousand.

The fair value of financial instruments should be estimated, whenever possible, using quotations on an active market. A market is considered active, and therefore liquid, when it is accessed by equally knowledgeable counterparties and where transactions are carried out on a regular basis. Almost all the financial instruments of the Group are not listed on active markets.

In view of the absence of quotations on active markets, the valuation of financial instruments is performed in the following terms:

a) Financial instruments recorded in the balance sheet at fair value:

Non-readjustable Treasury Bonds in national currency issued by the Angolan State and held by the Group for trading in the secondary market with other banks are revalued based on a discounted cash-flows model. The discount curve used can be viewed directly in the daily BODIVA report.

Currency forwards are revalued using a discounted cash-flows model. The amounts in foreign currency are updated with an interest rate curve directly observed from Bloomberg and the amounts in national currency are updated with a curve built with interbank money market yields and reference rates (Luibor) observed on the BNA website.

Since they are not listed on a stock exchange and provided that there is observable market data, the equity instruments, with the exception of Visa Incl, are valued by the equity method and the Participation Units by the quotation made available by the fund management company.

b) Financial instruments recorded in the balance sheet at amortised cost:

For financial instruments recorded in the balance sheet at amortised cost, the Group calculates their fair value using valuation techniques based on the conditions applicable to similar transactions on the reference date of the financial statements, namely the value of the respective discounted cash flows based on the interest rates considered most appropriate, *i.e.*:

- Non-adjustable Treasury Bills and Treasury Bonds in national currency issued by the Angolan State are valued, for disclosure purposes, based on a discounted cash-flows model, using the curve provided by BODIVA – Official Bulletin for national currency. As at the reference date, the curve is as follows:

12/31/2025		12/31/2024	
Maturity	**Current Yield**	**Maturity**	**Current Yield**
3M	**16.01%**	3M	18.32%
6M	**16.75%**	6M	18.05%
1Y	**17.62%**	1Y	18.22%
2Y	**17.59%**	2Y	17.63%
3Y	**18.30%**	3Y	17.25%
4Y	**18.17%**	4Y	17.95%
5Y	**18.66%**	5Y	16.81%
6Y	**19.13%**	6Y	16.21%
7Y	**19.54%**	7Y	17.24%
8Y	**19.37%**	8Y	18.48%
9Y	**19.13%**	9Y	19.02%
10Y	**18.79%**	10Y	20.49%

- Treasury Bonds in US dollars issued by the Angolan State are valued, for disclosure purposes, based on a discounted cash-flow model, using the curve provided by BODIVA – Official Bulletin for US dollars. As at the reference date, the curve is as follows:

12/31/2025		12/31/2024	
Maturity	**Current Yield**	**Maturity**	**Current Yield**
3M	**3.18%**	3M	0.79%
6M	**4.12%**	6M	3.43%
1Y	**4.68%**	1Y	2.75%
2Y	**4.59%**	2Y	3.76%
3Y	**6.24%**	3Y	5.80%
4Y	**7.38%**	4Y	7.29%

- For disclosure purposes, Eurobonds and corporate bonds denominated in foreign currencies are valued using the bid price on Bloomberg on the reference date (instruments listed on an active market – level 1 in the fair value hierarchy).

- Reverse repos measured under Investments at amortised cost in the financial statements, as they are essentially short-term transactions, were considered to have a book value that represents a reasonable approximation of their fair value;

- For Customer credit operations, the interest rates applied by the Group in the periods ended December 31, 2025, and December 31, 2024, respectively, were used for operations with similar characteristics, less the amount of accumulated impairment losses; and

- Regarding Cash and deposits at central banks, Loans and advances to other credit institutions repayable on demand, Other loans and advances to central banks and credit institutions, Deposits from central banks and Deposits from other credit institutions and Deposits from Customers and other loans, as they are essentially short-term investments, the balance sheet value was considered a reasonable approximation of their fair value.

It should be noted that the fair value presented does not correspond to the realization value of these financial instruments in a sale or liquidation scenario and was not calculated for that purpose.

As at December 31, 2025, and December 31, 2024, the fair value of financial instruments recorded in the balance sheet at fair value presents the following detail by valuation methodology:

Fair value of financial instruments recorded at amortised cost

As at December 31, 2025, and December 31, 2024, the fair value hierarchy of the financial instruments recorded in the balance sheet at amortised cost is analyzed as follows. These were estimated based on the main methodologies and assumptions described below:

AOA thousands

	12/31/2025				
		Fair Value			
	Book value	Level 1 Prices on the active market	Level 2 Observable market inputs	Level 3 Other valuation techniques	Total fair value
Assets					
Cash and deposits at central banks	769,185,767	-	769,185,767	-	769,185,767

Cash and deposits at central banks and other demand deposits, Other loans and advances to credit institutions and Deposits from central banks

These assets and liabilities are very short-term, and therefore the balance sheet value is a reasonable estimate of their fair value.

Securities at amortised cost

The fair value of securities recorded at amortised cost is estimated in accordance with the methodologies followed for valuing securities that are recorded at fair value, as described at the beginning of this Note.

Loans and advances to Customers

The fair value of loans and advances to Customers is estimated based on the discounted expected cash flows of principal and interest, considering that the installments are paid on the contractually agreed dates. Discount rates used are the current rates for loans with similar characteristics. For stage 2 loans via the individual analysis model, the fair value considered is the balance sheet value. For stage 3 loans, for which recovery is via foreclosure of the collateral, the Balance Sheet value was considered.

Deposits from Customers

The fair value of deposits from Customers and other loans is short-term, and therefore the balance sheet value is a reasonable estimate of fair value.

30.5. Capital management

As at December 31, 2025 and December 31, 2024, the Bank's capital and the regulatory capital ratio (solvency) are determined in accordance with the applicable regulatory standards, namely with Notice 8/2021.

Angolan credit institutions should hold a level of capital compatible with the nature and scale of operations, duly weighted by the risks inherent to the operations, with a minimum regulatory capital ratio of 8%, a minimum Tier 1 (T1) capital ratio of 6% and a minimum Common Equity Tier 1 (CET1) capital ratio of 4.5%.

Regulatory capital ratio comprises:

1. Tier 1 capital – comprises: i) Paid-up share capital; ii) Positive retained earnings from previous periods; iii) Legal, statutory and other reserves arising from non-distributed profits, or set up to increase capital; iv) Net profit of the previous period; v) Provisional net profit of the current period; vi) Equity instruments; and, vii) Share premium.

2. The negative elements of Tier 1 capital – comprise: (i) Own shares in the portfolio, at book value in the balance sheet; (ii) Losses carried forward from previous periods; (iii) Net loss of the previous period; (iv) Provisional net loss of the current period; (v) Intangible assets net of amortisation, including goodwill included in the valuation of significant investments of the institution; vi) Expenses with deferred costs related to pension liabilities; vii) Deferred tax assets depending on future profitability; viii) Adjustments on impairment losses on financial instruments in relation to that determined by the Banco Nacional de Angola in the prudential supervision; ix) Positive revaluation differences arising from the application of the equity method; x) Actuarial losses not recognized in profit and loss; xi) The amount of the items that need to be deducted from additional Tier 1 capital items that exceed the Institution's additional Tier 1 capital items; xii) The exposure value of incomplete transactions; (xiii) The applicable amount of Common Equity Tier 1 instruments of credit institutions held directly, indirectly and synthetically with which the Institution has cross-holdings that the Banco Nacional de Angola considers to have been set up to artificially inflate the Institution's capital; (xiv) The applicable amount of Common Equity Tier 1 instruments of credit institutions held by the Institution directly, indirectly and synthetically where the Institution does not have a significant investment in such entities; (xv) The applicable amount of Common Equity Tier 1 instruments of credit institutions held by the Institution directly, indirectly and synthetically where the Institution has a significant investment in such entities, excluding underwriting positions held for a period of five (5) business days or less (xvi) Any tax on Common Equity Tier 1 items that is foreseeable at the time it is calculated, except where the Institution appropriately adjusts the amount of Common Equity Tier 1 items to the extent that such tax reduces the amount by which those items may be used to hedge risks or losses.

3. Additional Tier 1 capital – comprises (i) Preference shares; ii) Hybrid and/or convertible instruments; iii) Other instruments whose issue conditions have been previously approved by the Banco Nacional de Angola; and iv) Share premium relating to the items included in the previous sub-paragraphs.

4. The negative elements of additional Tier 1 capital – comprise: i) Additional Tier 1 instruments held directly, indirectly and synthetically, including additional Tier 1 instruments that the Institution may be required to acquire as a result of existing contractual obligations; ii) Additional Tier 1 instruments of credit institutions held directly, indirectly and synthetically, with which the Institution has cross-holdings that the Banco Nacional de Angola considers to have been set up to artificially inflate the Institution's capital; iii) The applicable amount of additional Tier 1 instruments of credit institutions held directly, indirectly and synthetically, where the Institution does not have a significant investment in those credit institutions; (iv) The applicable amount of additional Tier 1 capital instruments of credit institutions held directly, indirectly and synthetically by the Institution, where the institution has a significant investment in such credit institutions, excluding underwriting positions held for a period of five (5) business days or less; (v) The amount of items required to be deducted from Tier 2 capital items in excess of the Institution's Tier 2 capital items; and, (vi) Any tax on additional Tier 1 capital items that is foreseeable at the time it is calculated, except where the Institution appropriately adjusts the amount of additional Tier 1 capital items to the extent that such tax reduces the amount by which those items may be used to hedge risks or losses.

5. Tier 2 capital – comprises: i) Redeemable preference shares; ii) Reserves from the revaluation of real estate for own use; iii) Subordinated debt, in the form of loans or bonds issued, whose issue conditions were previously approved by the Banco Nacional de Angola; iv) Other instruments whose issue conditions were previously approved by the Banco Nacional de Angola; and, v) Share premium relating to the items included in the previous points.

6. The negative elements of Tier 2 capital – comprise: i) Common Equity Tier 2 instruments held directly, indirectly and synthetically, including Tier 2 instruments that the Institution may be required to acquire as a result of existing contractual obligations; ii) Tier 2 instruments of directly, indirectly and synthetically held credit institutions with which the Institution has cross-holdings that the Banco Nacional de Angola considers to have been set up to artificially inflate the Institution's capital; (iii) The applicable amount of Tier 2 instruments of credit institutions held directly, indirectly and synthetically, where the Institution does not have a significant investment in such credit institutions; and, (iv) Tier 2 instruments of credit institutions held directly, indirectly and synthetically by the Institution, where the Institution has a significant investment in such entities, excluding underwriting positions held for a period of five (5) business days or less.

Net profit for the previous period and for the current period referred to in the previous paragraphs can only be considered whenever they are certified by the expert accountant who is a member of the supervisory body or single auditor and by the external auditor.

The following table shows the capital and the solvency ratio as at December 31, 2025 and December 31, 2024:

AOA thousands

	12/31/2025	12/31/2024

Excesses of prudential limits for large exposures	**459,817**	188
Total	**141,748,662**	**112,572,893**
Regulatory Solvency Ratio	**38.77%**	**40.68%**

31. Recently Issued Accounting Standards and Interpretations

The recently issued accounting standards and interpretations that have come into effect and that the Group has applied in preparing its financial statements are as follows:

Amendments to IAS 21 – The Effects of Changes in Foreign Exchange Rates: Lack of Exchangeability

On August 15, 2023, the International Accounting Standards Board (IASB) issued Lack of Exchangeability (Amendments to IAS 21 – The Effects of Changes in Foreign Exchange Rates) (the amendments).

The amendments clarify how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking.

An entity assesses whether a currency is exchangeable into another currency at a measurement date and for a specified purpose. When a currency is not exchangeable, the entity has to estimate a spot exchange rate.

According to the amendments, entities will have to provide new disclosures to help users assess the impact of using an estimated exchange rate on financial statements. These disclosures may include:

- The nature and financial effects of the currency not being exchangeable into the other currency;
- The spot exchange rate(s) used;
- The estimation process; and
- The risks for the company arising from the currency being convertible.

The amendments apply for annual reporting periods beginning on or after January 1, 2025. Early adoption is permitted.

The Group has not recorded any significant changes in the adoption of this amendment.

The Group has decided not to apply the following standards and/or interpretations early:

Annual improvements

On July 18, 2024, the International Accounting Standards Board (IASB) issued limited amendments to the IFRS and respective guidelines, resulting from the regular maintenance carried out on the Standards.

The amendments include clarifications, simplifications, corrections and modifications made with the aim of improving the consistency of various IFRS.

The IASB amended:

- IFRS 1 First-time Adoption of International Financial Reporting Standards, to clarify certain aspects related to the application of hedge accounting by an entity that is preparing financial statements in accordance with IFRS for the first time;
- IFRS 7 Financial Instruments: Disclosures and the respective Implementation Guidance, in order to clarify:
  - The application guidance, regarding Gain and loss on derecognition; and
  - The implementation guidance, namely its Introduction, Fair value paragraph (disclosures regarding the difference between fair value and transaction price) and Credit risk disclosure.
- IFRS 9 Financial Instruments to:
  - Require companies to initially measure a receivable without a significant financing component at the amount determined by applying IFRS 15, and
  - Clarify that when a lease liability is derecognized, the derecognition is accounted for under IFRS 9. However, when a lease liability is modified, the modification is accounted for under IFRS 16 Leases. The amendment establishes that when lease liabilities are derecognized under IFRS 9, the difference between the carrying amount and the consideration paid is recognized in profit or loss.
  - IFRS 10 Consolidated Financial Statements, clarification on the determination of a “de facto agent”; and
  - IAS 7 Cash Flow Statements, amendment of detail in the paragraph relating to Investments in subsidiaries, associates and joint ventures.

The amendments are effective for annual reporting periods beginning on or after January 1, 2026. Early adoption is permitted.

The Group is currently assessing the impact that the changes will have on its financial statements.

Amendments to IFRS 9 and IFRS 7 – Nature-dependent electricity contracts

On December 18, 2024, the International Accounting Standards Board (IASB) issued amendments to help companies better report the financial effects of nature-dependent electricity contracts, which are often structured as power purchase agreements (PPAs).

Nature-dependent electricity contracts help companies to secure their electricity supply from sources such as wind and solar power. The amount of electricity generated under these contracts can vary based on uncontrollable factors such as weather conditions. Current accounting requirements may not adequately capture how these contracts affect a company's performance.

To allow companies to better reflect these contracts in the financial statements, the IASB has made targeted amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures. The amendments include:

- Clarifying the application of the 'own-use' requirements;
- Permitting hedge accounting if these contracts are used as hedging instruments; and
- Adding new disclosure requirements to enable investors to understand the effect of these contracts on a company's financial performance and cash flows.

This amendment is effective for periods after January 1, 2026. Early adoption is permitted.

The Group is currently assessing the impact that the changes will have on its financial statements.

Amendments to the Classification and Measurement of Financial Instruments

On May 30, 2024, the International Accounting Standards Board (the IASB or the Board) issued amendments to the classification and measurement requirements of IFRS 9 – Financial Instruments. The changes aim to resolve the diversity in the application of the standard, making the requirements more understandable and consistent.

The amendments:

- Clarify the classification of financial assets with environmental, social and governance (ESG)-linked features and other similar features, since these features in loans can affect whether loans are measured at amortised cost or fair value. In order to resolve any potential diversity in practice, the amendments clarify how to assess the contractual cash flows of loans.
- Clarify the date on which a financial asset or financial liability is derecognized when it is settled through electronic payment systems. There is an accounting policy option that allows the derecognition of a financial liability before delivering the cash on the settlement date, if certain criteria are met.
- Improve the description of the term "non-recourse". According to the amendments, a financial asset has non-recourse features if the ultimate contractual right to receive cash flows from an entity is limited to the cash flows generated by specified assets. The presence of non-recourse features does not necessarily exclude the financial asset from complying with the SPPI (solely payment of principal and interest) requirement, but its features need to be carefully analyzed.
- Clarify the treatment of contractually linked instruments (CLI). CLI must feature a waterfall payment structure that creates concentration of credit risk by allocating losses disproportionately between different tranches. The underlying pool can include financial instruments not in the scope of IFRS 9 classification and measurement (*e.g.*, lease receivables), but must have cash flows that are equivalent to SPPI criterion.

The IASB has also introduced additional disclosure requirements relating to equity instruments classified at fair value through other comprehensive income (FVOCI) and financial instruments with contingent features, for example features linked to ESG targets.

This amendment is effective for periods after January 1, 2026. Early adoption is permitted.

The Group is currently assessing the impact that the changes will have on its financial statements.

IFRS 18 Presentation and Disclosure in Financial Statements

On April 9, 2024, the International Accounting Standards Board (the IASB or Board) issued the new standard, IFRS 18 Presentation and Disclosure in Financial Statements.

The main amendments to this standard are:

- Providing a more structured income statement. Specifically, it introduces a new subtotal "operating profit or loss" (as well as its definition) and the requirement that all income and expenses be classified into three new separate categories based on an entity's main business activities: Operating, Investing and Financing.
- Requirement for entities to analyze their operating expenses directly on the face of the income statement – either by nature, by function or in combination.
- Requirement for some of the "non-GAAP" measures that the Group uses to be reported in the financial statements. IFRS 18 defines management-defined performance measure (MPM or non-GAAP Performance Measures) as a subtotal of income and expenses that an Entity uses:
  - in public communications outside financial statements; and
  - to communicate management's view of the financial performance.

  IFRS 18 requires entities to disclose information about all its MPMs in a single note to the financial statements. These include: how the measure is calculated; how it provides useful information; and a reconciliation to a value determined in accordance with IFRS.
- Introduction of improved guidelines on how entities group information in financial statements. It provides guidance on whether material information should be included in the primary financial statements or in the notes.

IFRS 18 is effective for annual reporting periods beginning on or after January 1, 2027. The standard is applied retrospectively. Early adoption is permitted.

The Group is currently assessing the impact that the changes will have on its financial statements.

Changes for converting financial information from a non-hyperinflationary currency to a hyperinflationary currency

On November 13, 2025, the International Accounting Standards Board (IASB) issued amendments to IAS 21 – The Effects of Changes in Foreign Exchange Rates, which clarifies how companies should translate financial statements from a non-hyperinflationary currency to a hyperinflationary currency.

The amendment applies to annual reporting periods beginning on or after January 1, 2027, and applies retrospectively. Early adoption is permitted.

The Group is currently assessing the impact that the changes will have on its financial statements.

32. Subsequent Events

There are no known events after December 31, 2025 that require adjustments or disclosures to the financial statements reported on that date.

EXTERNAL AUDITORS' REPORT
(Free translation from a report originally issued in Portuguese language. In case of doubt the Portuguese version will always prevail.)

To the Shareholders of
Banco de Fomento Angola S.A.

REPORT ON THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Opinion

For the purposes of the provisions of the Securities Code, approved by Law 22/15 of August 31 (hereinafter referred to as CódVM) and Regulation 1/22 of February 9 on External Auditors, we have audited the accompanying consolidated financial statements of **Banco de Fomento Angola S.A.** (the Bank), and its subsidiaries (the Group), which comprise the Consolidated Balance Sheet as at December 31, 2025 (showing total assets of AOA 4,285,199,282 thousand and total equity attributable to the Bank's shareholders of AOA 823,840,043 thousand, including a net profit attributable to the Bank's shareholders of AOA 233,140,197 thousand), the Consolidated Income Statement and the Consolidated Statement of Other Comprehensive Income, the Consolidated Statement of Changes in Equity and the Consolidated Cash Flow Statement for the year ending on that date and the notes to the consolidated financial statements, including material information on the accounting policy.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of **Banco de Fomento Angola, S.A.** as at December 31, 2025 and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

Basis for opinion

Our audit was conducted in accordance with International Standards on Auditing (ISA), Instruction 04/CMC/12-25 on the Models of Reports to be Prepared by External Auditors Registered with the Capital Markets Commission ("CMC"), as well as the other Technical Standards of the Angolan Institute of Accountants ("OCPCA"). Our responsibilities under those standards are further described in the "Auditors' responsibilities for the audit of the consolidated financial statements" section below. We are independent from the entities that comprise the Group under the terms of the law and comply with the other ethical requirements set forth in the OCPCA Code of Ethics.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Audit-relevant matters

The relevant audit matters are those that, in our professional judgment, were most significant in the audit of the current year's consolidated financial statements. These matters were considered in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion, and we have not issued a separate opinion on these matters.

Description of the most significant risks of material misstatement identified	Summary of the response to the risks of material misstatement analyzed
Credit impairment and provisions for issued guarantees and unused credit lines (AOA 65,545,196 thousand) see notes 2.4, 3.1, 9, 16 and 30 – credit risk	
Impairment losses for loans to customers measured at amortized cost and provisions for issued guarantees and unused credit lines represent the Group's Board of Directors' estimate of expected losses at the reporting date of the financial statements in accordance with IFRS requirements, namely IFRS 9 – Financial Instruments. For purposes of determining impairment, the loans to customers balance, as well as issued guarantees and unused credit lines, are classified into three categories (Stage 1, 2, or 3), taking into consideration whether there has been a significant increase in credit risk since initial recognition or whether the assets are in default. This classification is influenced by a set of subjective factors which, if incorrectly applied, may generate material impacts. For this reason, determining the stage is a relevant process for the Group, as it influences the associated levels of Expected Credit Loss ('ECL'). Impairment and provisions for issued guarantees and unused credit lines are calculated based on the expected loss estimated by the Group on both an individual and collective basis.	Our audit procedures included, among other aspects, those described below: - We assessed the design and implementation of the key controls defined by the Group over the process for identifying and determining impairment losses. - We assessed the alignment of the accounting policies with the requirements set out in the applicable standards. - We analyzed the process and performed substantive testing over the classification of financial assets based on their credit risk (Stage 1, 2, and 3). - We assessed the impairment model, which includes the provision for issued guarantees and unused credit lines, developed by the Group, including an assessment of its main assumptions and the forward-looking information considered in the estimation of the ECL, with the involvement of our specialists in this area. - We assessed a selection of individual loans, including both direct and indirect credit exposures, regarding the assumptions underlying the identification and measurement of impairment, including (i) the assessment of existing collateral, and (ii) the recovery estimates in the event of default.

The individual analysis is based on the criteria defined in accounting policy 2.4.11. This analysis is based on assessing the existence of impairment losses through a case-by-case review, considering the total exposure of a given customer, the expected evolution of their business performance, the market value of the associated collateral, and the expected evolution of future macroeconomic conditions. The determination of impairment losses on an individual basis involves a degree of judgment by the Group, as it requires evaluating the information available in determining the recoverable amount, which includes assumptions that may not materialize as expected. Exposures subject to individual analysis for which no individual impairment has been recognized are transferred to the collective analysis. The collective analysis is based on estimates and assumptions for determining the ECL that take into consideration (i) the historical loss experience of credit portfolios with similar risk characteristics, determined according to the type of credit to which they are allocated, and (ii) the knowledge of the economic and credit environment and its influence on the level of historical and future (forward-looking) losses, the latter being particularly relevant given the uncertain economic environment. The process for assessing impairment for loans to customers and for provisions for issued guarantees and unused credit lines is highly complex in its design and implementation and involves estimates and judgments by the Group. This process takes into consideration factors such as the probability of default, risk ratings, the value of collateral associated with each transaction, recovery rates, and the estimates of both future cash flows and the timing of their receipt. On this basis, given the uncertainty, complexity, and judgment involved in calculating the estimate, impairment for loans to customers was considered a relevant audit matter.	For this purpose, we selected a sample of customers for whom we assessed the reasonableness of the impairment loss estimate based on the analysis of the judgments made by the Group regarding the information related to the customers' economic and financial position, the valuation of collateral, and the prospects for the evolution of their activity. - For credits whose impairment losses are determined on a collective basis, we tested, with the support of our specialists in this area, the underlying models, including their approval and validation process, as well as the determination of the impairment recognized in loans to customers and provisions for issued guarantees and unused credit lines. Additionally, we tested the adequacy and accuracy of the significant assumptions used by the model, including the key attributes. - We assessed the appropriateness of the related disclosures in the financial statements in accordance with the applicable accounting framework.

Management's responsibility for the consolidated financial statements

Management is responsible for:

- the preparation and fair presentation of these consolidated financial statements and of the financial position, financial performance and cash flows of the Group in accordance with International Financial Reporting Standards (IFRS);
- designing and maintaining an appropriate internal control system to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error;
- preparing the Management Report and the Corporate Governance Report, in accordance with legal and regulatory requirements;
- adopting appropriate accounting policies and criteria, taking into consideration the circumstances; and,
- assessment of the Group's ability to continue as a going concern, disclosing, where applicable, any matters that may cast significant doubt on this matter.

The supervisory body is responsible for supervising the process of preparing and disclosing the Group's financial information.

Auditor's Responsibility for the Audit of the Consolidated Financial Statements

Our responsibility is to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatements whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the ISA, we make professional judgments and maintain professional skepticism during the audit and also:

- identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control;

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management;
- conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to discontinue its activities;
- we assess the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether these financial statements represent the underlying transactions and events in a manner that achieves fair presentation;
- obtain sufficient appropriate audit evidence regarding the financial information of the entities or activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the work carried out for the purposes of the Group audit and are ultimately responsible for our audit opinion;
- we communicate with those charged with governance, including the supervisory body, among other matters, the planned scope and timing of the audit, and the significant findings of the audit including any significant deficiencies in internal control identified during the audit;
- from the matters we communicate to those charged with governance, including the supervisory body, we determine those that were the most significant in the audit of the consolidated financial statements of the current year and that constitute the relevant audit matters. We describe these matters in our report, except when law or regulation prohibits their public disclosure; and,
- we declare to the supervisory body that we have complied with the relevant ethical requirements regarding independence and communicate all relationships and other matters that may be perceived as threats to our independence and, when applicable, the measures taken to eliminate those threats or the safeguards applied.

Our examination also included verifying:

i) The consistency of the financial information included in the Management Report with the other accounting documents; and

ii) Compliance with the mandatory elements of the Corporate Governance Report set out in Article 17 of Regulation 6/16 of June 7 issued by the Capital Markets Commission, in accordance with Article 145 of the Securities Code.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

Regarding the Management Report

In compliance with the applicable legal requirements, we are of the opinion that the Management Report was prepared in accordance with the applicable legal and regulatory requirements, that the information contained therein is consistent with the audited consolidated financial statements, and, based on our knowledge and assessment of the Group, we did not identify any material misstatements.

Regarding the Corporate Governance Report

In compliance with the applicable legal requirements, namely those set out in (c)(iv) of Instruction 02/CMC/03-23, we are of the opinion that the Corporate Governance Report was prepared in accordance with the applicable legal and regulatory requirements in force, that the information contained therein is consistent with the audited consolidated financial statements, and, based on our knowledge and assessment of the Group, we did not identify any material misstatements.

Inês Rebelo Filipe
(Registered Auditor with certificate no. 20140081)

Report of the Supervisory Board on the Annual Report and Financial Statements for 2025

(Consolidated Financial Statements)

In compliance with the applicable legal and regulatory provisions, namely paragraph g) of Article 441 of Law no. 1/04 of 13 February – Companies Law, paragraph 2 of Article 71 of Law no. 14/21 of 19 May, which approves the General Framework for Financial Institutions, in conjunction with paragraph d) of Article 15(1) of Notice no. 1/22 of 28 January – Corporate Governance Code for Financial Institutions, paragraph 5 of Article 6 of Notice no. 5/19 of 30 August on the Accounting Standardisation and Harmonisation Process for the Angolan Banking Sector, and paragraph 8.1 of Article 8 of the Supervisory Board Regulations of Banco de Fomento Angola, S.A., approved on 23 December 2025, the Supervisory Board is required to issue an opinion on the Consolidated Annual Financial Statements of Banco de Fomento Angola, S.A. for the financial year 2025, as presented by the Board of Directors.

The Supervisory Board, within the scope of its duties, reviewed the Consolidated Annual Financial Statements of Banco de Fomento Angola, S.A. and its subsidiaries, namely the Consolidated Statement of Financial Position, the Consolidated Statement of Profit or Loss and Other Comprehensive Income, the Consolidated Statement of Cash Flows and the Consolidated Statement of Changes in Equity as at 31 December 2025. The Consolidated Statement of Financial Position reported total assets of AOA 4,285,199,282 million, total liabilities of AOA 3,461,353,762 million, total equity attributable to the Bank's shareholders of AOA 823,840,043 million and net profit attributable to the Bank's shareholders of AOA 233,140,197 million.

The Supervisory Board, in the performance of its duties, did not identify any matters that were not in compliance with the applicable legal requirements, International Financial Reporting Standards and applicable accounting practices and, therefore, considers that the Consolidated Financial Statements present fairly, in all material respects, the consolidated financial position and the performance of the BFA Group.

The Supervisory Board has taken note of the Independent Auditor's Report on the Financial Statements, which includes a section entitled Key Audit Matters, highlighting those matters that, in the auditor's professional judgement, were of most significance in the audit performed, including a description of the most significant risks of material misstatement identified, as well as a summary of the responses to those risks, in terms of the procedures performed to assess their potential impact.

In the conclusion of the audit performed, the Independent Auditor expressed its opinion stating that "the consolidated financial statements present fairly, in all material respects, the consolidated financial position of Banco de Fomento Angola, S.A. as at 31 December 2025, and its financial performance and cash flows for the year then ended, in accordance with International Financial Reporting Standards (IFRS)".

Accordingly, the Supervisory Board is of the opinion that the Management Report of the Board of Directors and the Consolidated Financial Statements for the financial year 2025 should be approved, as nothing has come to its attention that would indicate the existence of any fact or event that could compromise the going concern of the BFA Group, S.A.

In compliance with the applicable legal provisions, namely Instruction no. 02/CMC/03-23 of the Capital Markets Commission, the Supervisory Board is of the opinion that the Bank's Corporate Governance Report has been prepared in accordance with the applicable legal and regulatory requirements in force and is consistent with the Bank's Financial Statements as at 31 December 2025.

In conclusion, we would like to express our appreciation to the Board of Directors and to all the Bank's employees with whom we have interacted for their cooperation.

The Supervisory Board of Banco de Fomento Angola, S.A. Luanda, 20 February 2026

ANNEXES

Glossary

- **Assets** – The aggregate of goods and rights held by an organisation, which have economic value and can be converted into liquidity.
- **Real Estate Assets** – The aggregate of real rights over real estate properties for commercial, residential or industrial leasing purposes.
- **ADPP** – Ajuda de Desenvolvimento de Povo para Povo (ADPP) is an Angolan Non-Governmental Organisation (NGO). The organisation operates in the areas of education, health, agriculture, environment and integrated community development.
- **Amortisation** – A charge that reduces the carrying amount of a company's fixed assets on the balance sheet, reflecting their use and wear, or their economic useful life.
- **ATM (Automated Teller Machine)** – Equipment that allows authorised users (typically holders of valid cards for financial transactions within a given system) to access financial and other services, including cash withdrawals.
- **Investments in Securities** – Investments in fixed-income assets issued by the National Treasury to finance the national public debt.
- **Trade Balance** – Corresponds to the difference between the value of goods and services exported by a country and those imported.
- **Current Account Balance** – The result of the trade balance and financial flows, namely interest paid to foreign holders of the country's debt and dividends paid to foreign investors.
- **Capital Account Balance** – Corresponds to the net balance between capital invested in the country by foreign entities and, conversely, investments made and credit held by the country abroad.
- **Balance of Payments** – Reflects the totality of a country's payments made abroad and all income received from foreign sources. It is divided into the Current Account Balance and the Capital Account Balance.
- **Balance Sheet** – An accounting statement consisting of a summary table of assets (fixed assets, receivables, cash and cash equivalents) and liabilities (equity and debt).
- **ML/TF & PF** – Risk of money laundering, terrorist financing and proliferation of weapons of mass destruction.
- **Treasury Bills (T-Bills)** – Short-term public debt securities issued by the Treasury, with a maturity of less than one year. They are issued at a discount and redeemed at face value upon maturity.
- **Equity** – Funds that belong to the company itself, as opposed to those obtained through borrowing.
- **Cash Flow for the Year** – Corresponds to annual net profit plus amortisation and provisions. It represents the company's ability to generate funds for investment without resorting to external financing.
- **Operating Cash Flow** – Corresponds to the cash generated from operating income, excluding administrative expenses.
- **Commodities** – Tradable goods, such as agricultural products and natural resources. In international trade, the term refers to a specific type of raw material or primary product of commercial significance.
- **Cost-to-Income Ratio** – A financial metric that indicates a company's costs as a percentage of its income.
- **Deposit** – A banking operation for raising funds.
- **Time Deposit** – A placement of funds in a bank account for a fixed period (one month, three months, six months, one year), remunerated at a predetermined interest rate.
- **Downtime** – The period during which a system, machine, equipment or process is inactive or unavailable for normal use.
- **EMIS** – An Angolan company that provides banks with a range of services related to the use of bank cards. It manages the shared networks of Automated Teller Machines (ATMs) and Point of Sale (POS) terminals.
- **eMudar@BFA** – A system implemented by BFA, consisting of a front-end deployed across branches, Corporate Centres and Investment Centres, which introduced mechanisms based on standardised workflow methodologies for processing various branch banking activities, enabling their dematerialisation, enhancing efficiency and mitigating operational risk levels.
- **EMV** – Chip technology for payment cards that generates a unique transaction code for each transaction, thereby reducing the risk of card fraud.
- **Euribor** – Acronym for Euro Interbank Offered Rate. Euribor is calculated daily as the average of the interest rates submitted by a panel of major banks in the euro area and reflects the cost at which these banks lend funds to one another.
- **MT940 Statements** – A SWIFT standard format used internationally for the electronic transmission of bank account transactions and daily balances.
- **PSX Files** – A bulk payment processing file format, enabling the execution of external payments (primarily used for payroll processing and recurring supplier payments).

- **MT101 Format** – A SWIFT standard file format that enables fund transfers between two accounts held at banks, which may, in some cases, be located in different countries.
- **H2H (Host-to-Host)** – A channel that enables bank customers, through internet banking and mobile banking platforms provided by their banks, to access service payment functionalities available on the MULTICAIXA network.
- **Inflation** – A concept, generally expressed as a percentage, that reflects the average increase in the overall price level.
- **Financial Institution** – A commercial entity whose business consists of entering into financial contracts and which is therefore subject to prudential regulation and supervision.
- **Financial Instruments** – Investment instruments that include securities, financial derivatives and money market instruments.
- **Financial Assets** – A contractual right to receive cash or another financial asset from another entity (e.g. securities, receivables).
- **Financial Liabilities** – A contractual obligation to deliver cash or another financial asset to another entity.
- **Complementary Margin** – The sum of net fees and commissions, results from financial operations and other operating income.
- **Net Interest Margin** – The difference between interest charged on loans granted (calculated using the lending interest rate) and interest paid to depositors on the funds entrusted to banks (calculated using the deposit interest rate).
- **Operating Margin** – Determined by dividing operating profit by revenue and multiplying by one hundred. It is an indicator used to measure a company's operating profitability over a given period.
- **Interbank Money Market** – The market where banks borrow and lend funds among themselves, depending on their liquidity needs.
- **Minimum Viable Product (MVP)** – An initial version of a credit product with essential features, designed to assess viability and meet customers' needs.
- **SLA (Service Level Agreement) Control Model** – A set of guidelines and metrics used to monitor and ensure compliance with agreed service levels between a service provider and its customers.
- **Treasury Bonds (T-Bonds)** – Public debt securities issued by the Treasury, with periodic coupon interest payments and redemption at face value.
- **Liabilities** – The total debts and obligations of an organisation. They represent the counterpart to assets, which reflect the total resources owned by the company.
- **Interest-Bearing Liabilities** – Liabilities that require the payment of interest, such as bank loans and corporate bonds.
- **Monetary Policy** – A set of measures adopted to control the supply of money and credit and, consequently, interest rates within a given economy. The Central Bank is responsible for implementing the country's monetary policy.
- **Operating Income** – The aggregate income earned by a financial institution, including fees and commissions, interest, trading results and interbank operations.
- **Gross Domestic Product (GDP)** – The total value of all goods and services produced within a country over a given period of time, usually one year.
- **Financial Income** – Interest charged on loans granted, calculated using the lending interest rate.
- **Past-Due Credit Ratio** – The ratio between the outstanding balance of loans to customers with overdue principal or interest instalments and total loans to customers.
- **Solvency Ratio** – Measures the relative proportion of a company's assets financed by equity versus liabilities. It indicates the degree of a company's financial stability.
- **Regulatory Capital Ratio** – Corresponds to the ratio between Regulatory Own Funds and the value of risk-weighted assets arising from the operations carried out by credit cooperatives.
- **Loan-to-Deposit Ratio** – The ratio between total loans to customers, net of accumulated impairment on customer loans (balance sheet value), and customer deposits.
- **Return on Assets (ROA)** – An indicator, expressed as a percentage, that compares net profit with the company's net assets, i.e. after deducting accumulated amortisation. It measures the profit generated per monetary unit of assets.
- **Return on Equity (ROE)** – Measures a company's efficiency in generating profits from its net assets (equity), indicating the percentage of profit generated from shareholders' capital.
- **Dormant Company** – A company that remains inactive, with no significant accounting transactions and no apparent reason justifying its closure; in many cases, it may not even have commenced operations.
- **SOFR (Secured Overnight Financing Rate)** – A daily reference interest rate that replaced USD LIBOR in financial markets, providing a secured overnight funding rate.
- **SPI** – An international payment system that includes VISA credit and prepaid cards.

- **Spread** – The difference between the price offered by buyers and the price requested by sellers, within the framework of supply and demand in financial markets.
- **SPTR (Real-Time Gross Settlement System – Angola)** – Angola's real-time payment system, operated, managed and owned by the National Bank of Angola (BNA).
- **STC (Credit Transfer Subsystem)** – A subsystem for processing credit transfers.
- **Stress Test** – A procedure in which various scenarios are tested in order to analyse the behaviour of an investment portfolio under different conditions. It involves assessing the value of the portfolio under atypical or adverse scenarios.
- **SWIFT (Society for Worldwide Interbank Financial Telecommunication)** – A global network that provides interbank communication services. Its services are used in foreign exchange, money and securities markets for confirmation and payment messaging.
- **Banking Penetration Rate** – The rate of usage of financial services by a country's population.
- **Funds Transfer Rate** – The rate at which a country's central bank buys or sells its currency in order to stabilise its value.
- **Policy Rates** – Interest rates set by central banks that serve as a benchmark for interest rates in an economy.
- **Interest Rate** – The price of money that a borrower must pay to the lender for the use of capital over a given period of time, expressed as a percentage.
- **Main Refinancing Rate** – The minimum rate applied to liquidity-providing operations conducted through weekly auctions, with a maturity of two weeks.
- **POS Terminal (Point of Sale Terminal)** – A banking network terminal that allows customers to carry out various types of transactions on a self-service basis, without the need to visit bank branches.
- **NPV (Net Present Value)** – The present value of expected future cash flows arising from operations.
- **Write-offs** – The removal of overdue loans recorded as assets that are fully provisioned and for which there are no prospects of recovery. Such write-offs are offset against provisions and therefore have no impact on the income statement.
- **Yields** – A key indicator in the real estate investment market. It should be viewed as a measure of risk and expected future return: the higher the yield, the higher the price, the greater the associated risk and the greater the potential for future returns.
