Our Integrated Report

GRI 2-1, 2-2, 2-3, 2-4, 2-5, 2-14

We present our Integrated Report for fiscal year 2025, fully aware of the importance of transparent reporting and of our ongoing efforts to address the impacts of our operations.

This report presents the results of our environmental, social, and governance (ESG) management, along with Banamex's key financial performance.

We confirm that the scope of the information presented in this document regarding policies, actions, and results covers all entities of Grupo Financiero Banamex, S.A. de C.V., included in the financial report, as detailed below:

Grupo Financiero Banamex S.A. de C.V.

Banco Nacional de México, S.A.
Tarjetas Banamex S.A. de C.V.
Afore Banamex, S.A. de C.V., a member of Grupo Financiero Banamex.
Seguros Banamex, S.A. de C.V., a member of Grupo Financiero Banamex
Pensiones Banamex, S.A. de C.V., a member of Grupo Financiero Banamex
Fomento Social Banamex, A.C.*
Fomento Cultural Banamex, A.C.*

* Not consolidated

This report has been prepared in accordance with the International Integrated Reporting Framework of the IFRS Foundation. It also aligns with the Global Reporting Initiative (GRI) and the Sustainability Accounting Standards Board (SASB) and incorporates the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD).

In addition, it includes our progress against the Ten Principles of the United Nations Global Compact and our contribution to the Sustainable Development Goals (SDGs).

A double materiality approach is applied to assess both financial and non-financial impacts, identifying the issues most relevant to the organization and the associated risks and opportunities across its operations, value chain, and stakeholder groups.[1]

To facilitate navigation, each section includes references to the relevant reporting frameworks, beginning with their respective abbreviations (e.g., GRI and SASB). A comprehensive index of all frameworks used is provided at the end of the report, aligned with the Sustainable Development Goals and the principles of the United Nations Global Compact. The Board of Directors has delegated responsibility for the review and approval of this report to the Head of the ESG Office and the relevant business areas across Grupo Financiero Banamex. KPMG México has externally assured this report.

For comments or questions, please contact Marité Chavira Mendoza, Head of ESG, or Berenice Sánchez García, Corporate Citizenship Manager.

[1] Details on the materiality assessment process and its results are provided in the "Materiality and Strategic Approach – Materiality Analysis" section.

CEO Message

GRI 2-22

In 2025, Banamex began a new chapter, defined by decisive actions that position the institution for the future. It was a year that reaffirmed our strength, sharpened our focus, and deepened our commitment to Mexico, its businesses, and its people.

As reflected throughout this report, we continue to advance toward a simpler, more modern, and more costumer-centered organization focused on delivering long-term value to our costumers, our communities, and the country we serve.

The year began with the relaunch of the Banamex brand—more streamlined and accessible—reflecting our ambition to be a bank that is clear, transparent, and consistently close to its costumers. This transformation enables a more direct and seamless relationship with our costumers—one built on clarity, trust, and proximity. It is our way of reaffirming that we are: Here. For you. Always.

Significant progress was made in sustainability, advancing our transformation with discipline and accountability.

Energy consumption decreased by 4.5%, with 36% of the energy sourced from clean energy. Water usage declined by 10% year over year, reflecting a more efficient and sustainable operation. Across the organization, 53% of employees are women, more than 17,900 participated in volunteer initiatives, and 1.47 million hours of training were delivered—reinforcing the importance of talent as a key driver of long-term competitiveness.

Governance was further strengthened through the creation of the ESG Forum, 94% participation, targeted Board training, and the addition of a sustainability expert to the Board, enhancing decision-making and reinforcing a modern, responsible, and transparent governance framework.

Our supply chain continues to reflect a commitment to more inclusive growth. We reaffirmed our goal of increasing the number of women-led suppliers—currently 19—representing 1.2 trillion pesos in spending. We also maintain relationships with suppliers certified under Mexico's Equality and Non-Discrimination standard (NMX-R-025), with spending totaling 2.1 trillion pesos. In addition, 1.6 million pesos was allocated to cultural and social programs that support minority suppliers—efforts that will continue to expand, creating tangible opportunities for thousands of people.

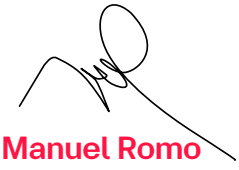

Our digital transformation continues to gain momentum. Today, we serve more than 9.4 million digital customers through our mobile app and BancaNet—a milestone that underscores strong demand for simple, agile, and secure solutions and reinforces the importance of continued investment in technology and the customer experience as core drivers of our transformation. The creation of the Modernization Office marks a critical step in further simplifying, automating, and strengthening our processes, as we continue to build a more modern and efficient bank.

In parallel, and in line with Citi's divestment process at Banamex, we closed 2025 with the successful completion of a 25% equity investment by Mexican entrepreneur Fernando Chico Pardo. He has thus become Banamex's reference shareholder and Chairman of the Board of Directors of Grupo Financiero Banamex. This transaction reflects strong confidence in Banamex, including its strategy, execution capabilities, and future, and reinforces our conviction in the opportunities ahead.

Together, these developments bring us closer to our vision of establishing Banamex as the undisputed leader of Mexico's financial system. We are better positioned than ever to accelerate growth, expand our businesses, drive efficiencies, and further strengthen a culture centered on performance, transformation, and talent. We will do so as we always have with deep conviction in our country, in our people, and in Mexico's extraordinary potential.

I thank our employees, our costumers, and all those who place their trust in us each day and contribute to Banamex's continued strength as a proudly Mexican institution with a clear focus on the future. Together, we will continue to build a renewed Banamex—one that meets the expectations of all Mexicans.

> With that same clarity and conviction, I reaffirm to every Mexican that we are: Here. For you. Always.

Manuel Romo
Chief Executive Officer
Grupo Financiero Banamex

Message from the Chairman of the Board of Directors of Grupo Financiero Banamex

GRI 2-22

On December 15, 2025, I assumed the role of Chairman of the Board of Directors of Grupo Financiero Banamex, following the acquisition of a 25% stake in Banamex from Citi. This transaction, together with my personal decision to invest in Banamex, reflects our confidence in Mexico and in its government.

I have the privilege of leading this new chapter for Banamex—one defined by its return to Mexican ownership—and of working to sustain and strengthen its role as one of the country's key drivers of development, always in partnership with Citi.

I chose to invest in Banamex because I recognized a unique opportunity to make a positive impact on our employees and, of course, on our country. Throughout my career, the companies, and projects I have led have shared a common foundation: confidence in Mexico and a deep conviction that the best investment is here, driven by its potential and, above all, by its people.

Companies play a fundamental role in development. We have a responsibility to promote the well-being of our employees so they can reach their full potential, while also contributing to the environments in which we operate and to the communities we serve. This is an organization defined by passion, talent, and a strong human foundation—one we are proud to lead.

For 2026, our priorities are clear. We will continue to advance the strategic plan already in place while strengthening execution. Our goal is excellence: to position Banamex as a national benchmark, the bank of choice for entrepreneurs and younger generations. Achieving leadership in digital banking is central to that ambition.

We will rebuild and strengthen the businesses that, following the separation, remain with Citi, particularly Corporate and Investment Banking, so that Banamex can support its costumers across their full range of needs. At the same time, the separation of Banamex from Citi remains both a priority and an urgent undertaking. In 2026, we will move forward decisively in a pivotal year of transition.

We will also continue to strengthen our organizational culture. We want every employee to feel proud to be part of this institution and to work together to build the future of Banamex. We will remain focused on our costumers, placing them at the center of everything we do and reinforcing their confidence that this is the best bank for them.

We will expand our social programs, enhancing both their quality and their reach, while increasing access to Banamex's art and cultural heritage. We will also continue to lead by example as an environmentally responsible institution, promoting sustainable financing and encouraging our costumers and employees to adopt practices that support environmental stewardship.

My commitment, and that of Banamex, is to drive development across the country. We will make every effort to support sustainable growth. Mexico is a country of opportunity, and it is up to all of us to help turn those opportunities into reality.

> And as we say at Banamex, we want all Mexicans to know: We are here. For you. Always.

Fernando Chico Pardo

Chairman of the Board of Directors of Grupo Financiero Banamex

We are Banamex

01. Key Highlights of the Year

GRI 2-9,2-12,2-13,3-3

Figures in this report are presented in Mexican pesos.

1.1 Financial Results 08
1.2 ESG Evolution 12
1.3 Sustainability Achievements 13
1.4 Rankings and Awards 14

Financial Capital

We present our most relevant financial results for 2025, reflecting the strength of Banamex's operations and the disciplined execution of its strategy. These results reinforce our position within the Mexican financial system and support continued responsible growth, strengthening trust among our costumers, employees, and communities while creating new development opportunities across the country.

1.1 Corporate Performance

At Banamex, 2025 was a year of meaningful transformation, driven by our commitment to staying closer to Mexico and to our costumers through innovation, relevant financial solutions, and a value proposition that strengthens the relationship between our clients and the bank.

It was also a year of solid performance, reflecting our strengths, adaptability, and, above all, the trust our costumers place in us.

Following the separation of Citibanamex's businesses in Mexico, 2025 marked Banamex's return with a renewed presence and a clear value proposition: serving individuals through consumer banking, supporting businesses through commercial and institutional banking, and expanding our offering in retirement savings and insurance. We relaunched the iconic Banamex brand to continue supporting Mexican families and businesses with innovation and service excellence, building on more than 140 years of experience. As a result, the Banamex brand remains firmly positioned among the most recognized banking brands in Mexico, ranking second in the market.

During the year, Banamex delivered strong growth while maintaining its leadership in the banking sector. It further strengthened its position as a leading consumer bank, managing the second-largest credit card portfolio in the market (24% market share) and ranking second in open-market demand deposits (13% share). The bank also maintained its fourth-place position in total assets, which reached 1.1 trillion pesos as of December 2025.

In the retirement fund management business, Afore Banamex maintained its fourth-place position in the market, with assets under management of 1.286 billion pesos, representing a 22% increase and serving more than 9 million customers. Afore Banamex also delivered strong investment returns, rising to fifth place in the Afore system based on the Net Return Indicator (IRN), which stood at 7.7% in 2025.

Seguros Banamex further strengthened its position as the second-largest insurer in the life segment. Through Plan Patrimonial Banamex, costumer investments totaled 205 billion pesos at year-end, supported by a broad range of insurance products offered through the bank (bancassurance products). Building on our experience and leadership in supporting Mexico's development through financial strength and stability, we launched annuity management in the second half of the year through Pensiones Banamex. This expansion allows us to offer greater benefits

to policyholders and pensioners, who can continue to rely on Banamex for comprehensive financial solutions that support their long-term well-being.

Building on this performance, Grupo Financiero Banamex remained the second-largest financial group in Mexico in 2025 by costumer assets under management, serving more than 20 million individuals, companies, and SMEs. The Group also operates the most extensive and robust banking infrastructure network in the country, with more than 9,100 ATMs available 24/7 and over 1,260 branches nationwide. Continuous access to digital banking services through the Banamex App remains a key strength, with more than 9 million customers using it regularly to carry out transactions and access products and services, allowing them to bank wherever they go.

Banamex continues to support its costumers in building and growing their wealth and businesses. The loan portfolio outpaced the broader Mexican banking system in 2025, reaching 521 billion pesos at year-end. Commercial lending, focused on companies and SMEs, grew 11% during the period. Consumer lending totaled 265 billion pesos and recorded double-digit growth well above market levels, where expansion slowed over the course of the year, in contrast to Banamex's continued portfolio growth.

Among individual customers, Banamex remained closely engaged in supporting the financing decisions of Mexican households. Its credit card portfolio grew 17% in 2025, to 171 billion pesos, supported by strong commercial activity, including promotions, rewards, and attractive financing plans. Banamex also introduced new products, such as the Switch digital account, which saw strong adoption among younger customers. Building on its leadership in Mexico's entertainment sector, the bank launched the LineUp credit card, offering enhanced benefits for customers seeking exclusive access to entertainment experiences. In unsecured lending, payroll loan and personal loan portfolios grew 12% and 18%, respectively. Mortgage lending for home purchases increased 13% during the year, to 67 billion pesos.

Costumer confidence, a hallmark of Banamex, remained evident in 2025. Customer deposits grew 11% to 789 billion pesos. Assets invested through mutual funds distributed via the bank's network increased 15% to 698 billion pesos, while life insurance policy reserves totaled 205 billion pesos, reflecting 17% annual growth. These results underscore customer loyalty and continued preference for Banamex as their financial institution.

The Group's net income for 2025 totaled 22.18 billion pesos, a strong result for an institution focused primarily on consumer banking and small- and mid-sized business services. Of this total, the bank generated 16.15 billion pesos (68%), the insurance business 3.59 billion pesos (18%), and Afore Banamex 2.44 billion pesos (14%).

Total operating revenue was 132.68 billion pesos, including 104.48 billion pesos in net interest income, 41.28 billion pesos in fees and commissions, and 9.11 billion pesos in trading income. The provision for credit losses totaled 26.90 billion pesos, consistent with the bank's ongoing growth in its credit portfolio.

Administrative and promotional expenses totaled 75.05 billion pesos and include investments related to the bank's transformation and ongoing improvements in operational performance. Initiatives implemented during the year supported the funding of new strategic projects.

Grupo Financiero Banamex maintains strong financial fundamentals. The non-performing loan ratio remained low at 3.0%, reflecting conservative risk management and underwriting standards. Loan loss reserves covered 1.8 times the non-performing portfolio. Banco Nacional de México reported a capital base of 181 billion pesos, with a capital adequacy ratio of 20.8%, one of the highest among banks operating in Mexico, and a liquidity coverage ratio of 239%.

The following provides a summary of the most significant items in the consolidated balance sheet and income statement of Grupo Financiero Banamex and its subsidiaries.

Balance Sheet
(millions of Mexican pesos)

Assets	2024	2025
Cash and cash equivalents	85,988	81,988

02.
Corporate Profile

GRI 2-1,2-6

Figures in this report are presented in Mexican pesos.
Where other currencies are used, this is clearly indicated.

2.1	Our Purpose	17
2.2	Our History	18
2.3	Corporate Structure	20
2.4	Our Businesses	23

We share who we are, our institutional purpose, and the legacy that has supported us for more than 140 years. This section highlights Banamex's evolution, its commitment to Mexico, and how our values, business model, and service driven approach position us to address today's challenges with a forward-looking perspective.

2.1
Our Purpose

To be with you, transforming tomorrow.

At Banamex, “being there” is more than a phrase; it is the commitment that has defined us for more than 140 years. It means standing by our costumers every step of the way, evolving with them, and building authentic relationships that go beyond traditional banking services. We have reaffirmed this commitment by strengthening our sustainability strategy and integrating environmental, social, and governance (ESG) criteria into our business strategy.

In a year of transformation for our institution, we continued to advance toward a more resilient, human, and sustainable model. Listening to our costumers, employees, and communities has been key to shaping our actions and delivering financial solutions that are accessible, responsible, and aligned with today’s challenges.

We work with companies across industries to support their day-to-day operations, whether by addressing working capital needs, payroll, or export financing. We provide loans to businesses of all sizes, enabling them to grow, create jobs, and contribute to the development of households across the country. We also provide financing and support to governments at all levels for the development of essential infrastructure, including housing, transportation, education, and other critical public works.

The trust placed in us drives us to continue evolving. We are therefore redoubling our efforts to generate positive impact—not only for those who are part of Banamex today, but also for future generations. Because we believe in a Banamex that begins with you, grows with you, and builds a better future for all, together.

2.2
Our History

GRI 2-1

Banco Nacional de México was founded on June 2, 1884, through the merger of Banco Mercantil Mexicano and Banco Nacional Mexicano. Since then, it has played a key role in supporting the growth of Mexico, its businesses, and its families across different stages of development.

The Bank's ownership structure has evolved over time, while it has consistently remained at the forefront of innovation, technology, and service. In 1982, it became a national credit institution under federal government control. In 1991, it was reprivatized, and Grupo Financiero Banamex-Accival (Banacci) was established. That same year, its shares were listed on the Mexican Stock Exchange (BMV). In the years that followed, various subsidiaries were incorporated into Banacci, including Afore Banamex and Seguros Banamex.

In 2001, Banacci was acquired by Citigroup with a 99.99% stake. It was subsequently merged with Citigroup's subsidiaries in Mexico, forming a financial group that, in 2016, was renamed Grupo Financiero Citibanamex.

On January 12, 2022, Citi announced, as part of its global strategy, its intention to divest Banamex's Consumer Banking and Corporate Banking businesses. This marked the beginning of a separation process that was successfully completed on December 1, 2024, resulting in the creation of two systemically important institutions: Grupo Financiero Banamex and Grupo Financiero Citi México. This milestone marked the beginning of a new chapter in the more than 140-year history of Banco Nacional de México.

In early March 2025, the new Banamex brand was launched, capturing the institution's transformation. A lighter, simpler, and more dynamic brand designed to strengthen its connection with costumers. The bank also focused on launching new products, benefits, and functionalities with a costumer-centered approach.

On September 24, 2025, the sale of a 25% stake in Grupo Financiero Banamex to a company owned by Mexican businessman Fernando Chico Pardo was announced. The transaction was completed on December 15 of the same year, following receipt of all required regulatory and antitrust approvals.

> In this new phase, Banamex has focused its resources and investments on accelerating its digital agenda, strengthening its end-to-end operations, actively engaging the younger segment, deepening its regional presence, and supporting entrepreneurs nationwide.

Banamex has long been characterized by its commitment to financial development in Mexico, supporting opportunities for companies and individuals through its range of financial products and services. It has implemented a model aligned with the Principles for Responsible Banking and the Principles for Responsible Investment, enhancing accessibility while promoting responsible social and environmental practices under a strong corporate governance framework.

In addition, true to a tradition established since its founding, Banamex has continued to promote culture, education, the preservation of natural heritage, and improvements in quality of life as key areas of focus (see the chapter on Commitment to Communities).

2.3 Corporate Structure

GRI 2-1,2-6

We operate under a universal banking model centered on our costumers, which allows us to offer a broad range of products.

In accordance with the Credit Institutions Act (LIC) of México and the regulations issued by the Bank of México (BANXICO), we are authorized to carry out a range of financial activities, including asset custody, lending, payment processing, and access to capital markets on behalf of our costumers. We serve individuals and legal entities across the corporate and public sectors.

- Insurance products.
- Mortgages.
- Personal loans.
- Credit cards, among others.
- Team of certified, highly qualified professionals.
- Personalized service.
- Comprehensive offering of products and services across local and international markets.
- Preferential terms that support effective wealth management and our clients' banking and transactional needs.

2.4 Our Businesses

GRI 2-1,2-6

2.4.1 Banamex

Consumer Banking

Within Commercial Banking, part of Consumer Banking, we offer traditional deposit products such as demand and time deposits, as well as investment funds, and personal loans through payroll loan programs and open-market channels.

Commercial Banking is responsible for operating Banamex's mass-market channels and for distributing products from other Group subsidiaries through its branch network.

As of year-end 2025, we highlight several milestones that strengthened our payroll loan and personal loan portfolios, including:

Payroll Loans

The payroll lending business is focused on individuals over the age of 21 who receive payroll deposits through Banamex. The loan is a revolving, unsecured loan with a fixed interest rate throughout its term. Loan proceeds are deposited into the customer's payroll account. Terms range from 3 to 72 months, depending on the customer's profile. This product is designed to help customers better manage short-term cash needs. The loan can be easily originated and accessed through the Banamex App, BancaNet, ATMs, or branches. The product offers several benefits, including no origination fee, complimentary debt cancellation insurance, promotions, and discounts with a range of commercial partners.

- Launch of the "Account Opening" process for lending products.
- Launch of the "Crédito a tu medida" (Tailored Credit) campaign.
- Increase in the maximum line of credit (up to MXN 1.5 million).

Personal Loans

The personal lending business is aimed at individuals aged 18 to 80, offering loans of up to MXN 750,000 with a fixed interest rate over the life of the loan, terms ranging from 24 to 60 months, and no restrictions on use. Funds are deposited into the customer's account.

Banamex personal loans offer a broad range of features tailored to customers' needs and preferences, including no origination fee and complimentary debt cancellation insurance. Targeted strategies and promotions have strengthened our lending offering and driven business growth.

- Launch of the "Account Opening" process for lending products.
- Expansion of digital channel offers to 1.3 million customers.
- Launch of payments via CLABE account for personal loans.
- Scheduled launch of the Personal Unsecured Loan (PIL) Reuse feature in March 2026.

Credit Cards

The credit card business focuses on individuals over 18 and offers revolving lines of credit.

Revolving lines of credit through cards for purchases in stores and online, as well as cash withdrawals at ATMs and branches. Banamex credit cards offer a wide range of features tailored to customers' needs and preferences. Targeted strategies and promotions have strengthened customer relationships and enhanced brand perception, driving business growth.

During the year, we launched several key initiatives, including:

- Two new co-branded cards: "La Comer" and "LineUp."
- Contactless payments via Google Pay.
- Credit card rebranding.
- The Disponible Banamex product exceeded its 2025 placement target by 50%.

Mortgage Banking

Meeting our customers' housing needs in a professional and responsible manner is the core objective of Mortgage Banking. To support this, we have strengthened our offering by considering down payment levels, credit quality, customer segment (salaried or self-employed), and loan amount.

These variables help determine interest rates and other key attributes that define our mortgage offering, including home purchase and refinancing solutions, as well as a range of terms and life and property insurance options with enhanced benefits. As a result, our mortgage business has delivered consistent growth.

The portfolio grew 15% in 2025 compared to 2024, reflecting our strong position in Mexico's housing market.

Key mortgage initiatives during 2025 included:

- A mortgage refinancing solution designed to improve liquidity.
- Implementation of Belvo IMSS (Mexican Social Security Institute.) to increase approval rates and expand credit lines for salaried customers.
- Automated underwriting, enabling instant approval at branches for customers with Banamex payroll accounts.
- A dedicated channel for housing developments.

Wealth Management and Private Banking

This business unit specializes in comprehensive investment management for high-net-worth costumers, supported by a team of certified professionals and a globally integrated analytical platform.

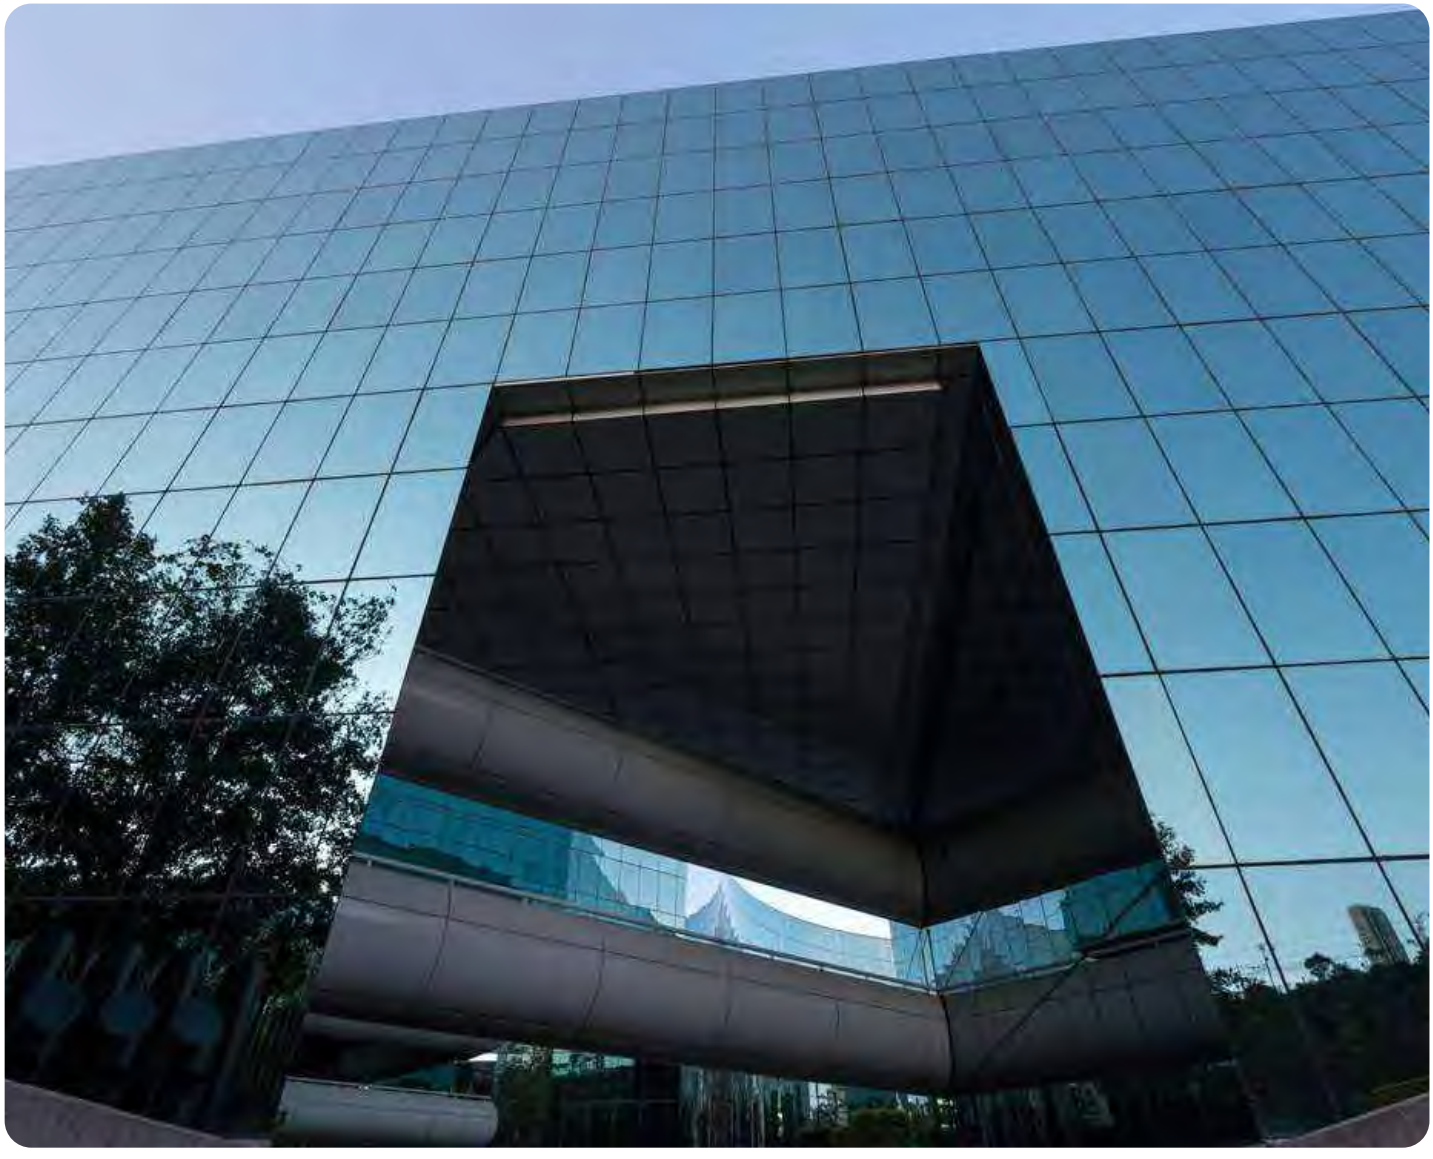

We offer investment solutions structured in line with institutional standards, with a focus on strength, diversification, and consistent performance.

A key differentiator is our strategic partnership with BlackRock, the world's largest asset manager, which enables our costumers to access global products supported by advanced asset management, analytics, and risk management capabilities, offering a broad range of investment funds.

Our offering is complemented by wealth solutions, investment funds, money markets, equity markets, structured products, and transactional services, all designed to ensure efficient, transparent management aligned with each costumers financial objectives.

We also benefit from in-house macroeconomic analysis specialists, continuous training programs for our bankers, and the depth of experience built over our history.

Given the nature of our business, no material climate-related impacts have been identified that would significantly affect our costumers transactional activities. We continue to monitor emerging sustainability trends, risks, and best practices.

Commercial, Government, and Institutional Banking

Commercial, Government, and Institutional Banking focuses on meeting the financial needs of larger and more complex organizations, including mid-sized businesses, regional and multinational corporations, and local governments.

Our offer is designed to provide specialized, tailored solutions to address these clients' needs, including working capital financing, expansion projects, debt consolidation, cash management and treasury solutions, and international trade services.

Commercial, Government, and Institutional Banking has established a strong position in the Mexican market, supported by a large-scale, client-focused approach, a nationwide presence with regional coverage, deep market expertise built over years of experience, and the strength of the Banamex brand. This has translated into a steady increase in market share across multiple products.

In 2025, market share grew as follows (Dec. 2025 vs. Dec. 2024): loans* increased from 3.0% to 3.15%, deposits* from 3.8% to 4.1%, and investment funds* from 14.4% to 15.3%. These gains were accompanied by double-digit growth, including a 13% increase in lending over the past year and 18% growth in total resources.

*Sources: CNBV and AMIB.

Small and Medium-Sized Enterprises (SMEs)

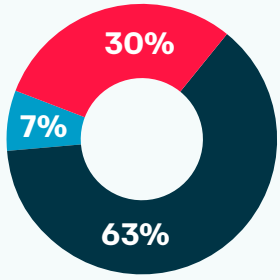

Through our SME segment, we offer comprehensive financial solutions for micro, small, and medium-sized enterprises in Mexico, including no-fee checking accounts, working capital and asset acquisition financing, payment terminals, and online banking (BancaNet Empresarial). Our objective is to streamline our customers' operations, support payroll disbursement, and enable business growth through personalized service.

In lending, Banamex SME ranks as the fifth-largest competitor in the market, with a net loan portfolio of 43 billion pesos as of December 2025 and a market share of 8.1% (up 0.6 percentage points compared to December 2024), representing year-over-year growth of 16.1%.

The SME segment also established agreements and partnerships with the states of Baja California, Durango, Guanajuato, Oaxaca, and Yucatán, among others, as well as with various municipalities.

Markets

Markets (Sales & Trading) serves as the primary intermediary between the bank, its institutional costumers, and local and global financial markets, trading a wide range of financial instruments. Its core activities include:

1. **Interest rate and liquidity risk management:** Managing the bank's exposure by transacting directly with financial institutions, banks, institutional costumers, and the central bank.
2. **Costumer risk management solutions:** Designing and offering derivative products—such as futures, options, and swaps—that enable companies to hedge financial risks.
3. **Product structuring:** Developing tailored financial solutions for costumers with specific needs. These structured products combine different asset classes to deliver unique risk-return profiles not available in standard markets.
4. **Sales & Trading**
   - **Sales:** The sales team manages direct relationships with institutional costumers (pension funds, asset managers, insurance companies, large corporations, and other institutional investors), identifying their needs, proposing investment ideas, and executing buy and sell orders.
   - **Trading:** Traders execute costumer transactions and manage the risk assumed by the bank in doing so. Their objective is to generate margins on each transaction, known as the spread.

This area is a significant source of revenue and enables the bank to offer a comprehensive range of services to its clients. It provides end-to-end solutions to corporate costumers, from capital raising (Investment Banking) to risk management and liquidity management (Markets).

It provides market intelligence. Through its direct, continuous interaction with financial markets, it serves as the bank's primary source of insight into economic trends, price movements, and investor sentiment.

It also plays a key role in the broader economy by facilitating the purchase and sale of assets and channeling savings into investment. It is fundamental to the financing of companies and governments, contributing to economic growth.

Risk Management

Banamex's risk management approach is based on an end-to-end risk management lifecycle, encompassing processes to identify, measure, monitor, control, and report risks. These lifecycle activities are applied individually and/or collectively, as described in: (i) risk category policies; (ii) Grupo Financiero Banamex policies; and (iii) other risk management policies, procedures, and standards.

The Group's primary objective is to serve its customers and the broader community, generate value for shareholders, and preserve the bank's stability and solvency, in line with applicable regulations and sound practices. Effective financial management enhances the profitability of earning assets, supports appropriate liquidity levels, and helps manage exposure to losses.

Culture

Culture is shaped by the beliefs and behaviors of our employees. The leadership of Grupo Financiero Banamex (GFB) serves as its primary catalyst, reinforced by behaviors, policies, compensation frameworks, and decision-making across the organization. Our Mission, Value Proposition, Leadership Principles, and other key GFB processes support our commitment to building a strong risk management and control environment.

All employees of Grupo Financiero Banamex and its consolidated subsidiaries, as well as third parties engaged under contract or other arrangements, share responsibility for risk management and are expected to promptly identify, escalate, and address activities that exceed established risk limits.

Governance and Control

Our risk and control culture is strengthened by our governance structure, which clearly defines the groups involved in the risk and control framework and their respective roles and responsibilities. Executive and Board committees play a key role in this function and are responsible for reviewing, challenging, resolving, or escalating key issues across all risk categories.

Banamex's Comprehensive Risk Management Unit (UAIR) comprises the heads of independent risk management functions for credit, market, liquidity, operational, strategic, compliance, and reputational risks, all of whom report to the Head of UAIR. UAIR is a specialized risk function focused on identifying, measuring, overseeing, monitoring, and reporting the risks faced by the organization.

Risk Management Framework

Banamex maintains a Comprehensive Risk Management Manual (MAIR) that defines the governance standards, principles, and requirements needed to consistently support the identification, measurement, monitoring, control, and reporting of the risks to which we are exposed. The manual applies across all business lines, functions, and entities.

Lines of Defense

Grupo Financiero Banamex uses a three-lines-of-defense model to structure its risk management function. This model enables risk-taking, oversight, and independent assurance activities to operate within a single, coordinated framework.

The lines of defense model plays a key role in the review, effective challenge, approval, and oversight of our business activities, helping ensure a balanced approach to risk in decision-making. The lines of defense are further supported by centralized functions such as Legal and Human Resources.

1st Line of Defense

Responsible for managing the risks and controls associated with business activities, including identifying, measuring, monitoring, controlling, and reporting risks in line with the Group's strategy, mission, value proposition, leadership principles, and risk appetite. Its activities are subject to oversight and effective challenge by the second line of defense.

2nd Line of Defense

Establishes risk and control policies and actively oversees all risk categories across the bank, including cross-cutting risks such as concentration risk. The organizational units that make up the second line of defense include Independent Risk Management and Compliance Risk.

3th Line of Defense

The objectives, authority, and responsibilities of the internal audit function are defined in the Internal Audit Charter. Internal Audit is an independent function that supports the organization's business objectives and evaluates the effectiveness of risk management, control, and governance processes.

Risk Categories

Risk	Description
Credit Risk	Credit risk is defined as the potential for losses arising from a deterioration in the credit quality of a borrower, counterparty, third party, or issuer, or from the failure to meet financial or contractual obligations as agreed. This risk is inherent to banking activities, and its effective management is critical to the institution's financial stability.
Market Risk	Market risk refers to exposure to adverse movements in market factors that may affect the value of positions in financial instruments. These include interest rates, exchange rates, implied volatility, and credit spreads, among others.
Balance Sheet and Liquidity Risk	This risk represents the inability to meet cash flow and collateral requirements under both normal and stressed market conditions, without adversely affecting operations, solvency, or financial condition.
Operational Risk	Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes, people, and systems, or from external events. It includes legal risk, defined as the risk of loss (including litigation costs, settlements, and regulatory fines) resulting from non-compliance with applicable laws and regulations, regulatory actions, or internal policies. It also includes technological risk, defined as the potential for loss arising from damage, disruption, failure, or misuse of hardware, software, systems, applications, networks, or other information channels used in delivering banking services to customers.
Strategic Risk	Strategic risk is the risk of a sustained (rather than episodic) impact on core strategic objectives measured through its effect on expected earnings, market capitalization, or capital, arising from external factors affecting the operating environment, as well as risks associated with strategic decision-making.
Compliance Risk	Compliance risk arises from violations of laws, rules, or regulations, or from failure to adhere to prescribed practices, internal policies and procedures, or ethical standards. It may affect the institution's financial condition and resilience.
Reputational Risk	Reputational risk refers to the potential impact of negative stakeholder perceptions on the institution's current or projected financial condition and resilience. This risk may impair the Group's competitiveness by affecting its ability to establish new relationships or services, or to maintain existing ones. To operate within risk appetite, early identification, escalation, and active management of issues are promoted. This approach includes assessing reputational risk in new activities and products, partnerships with third parties, and the expansion of existing activities into new markets.

Comprehensive risk management requires implementing processes, policies, and methodologies aligned with the principles established by international bodies and regulators, as well as the best global practices. Banamex's methodological framework is built on four core pillars:

Identification:

Timely identification of all exposures and their underlying risk factors.

Measurement:

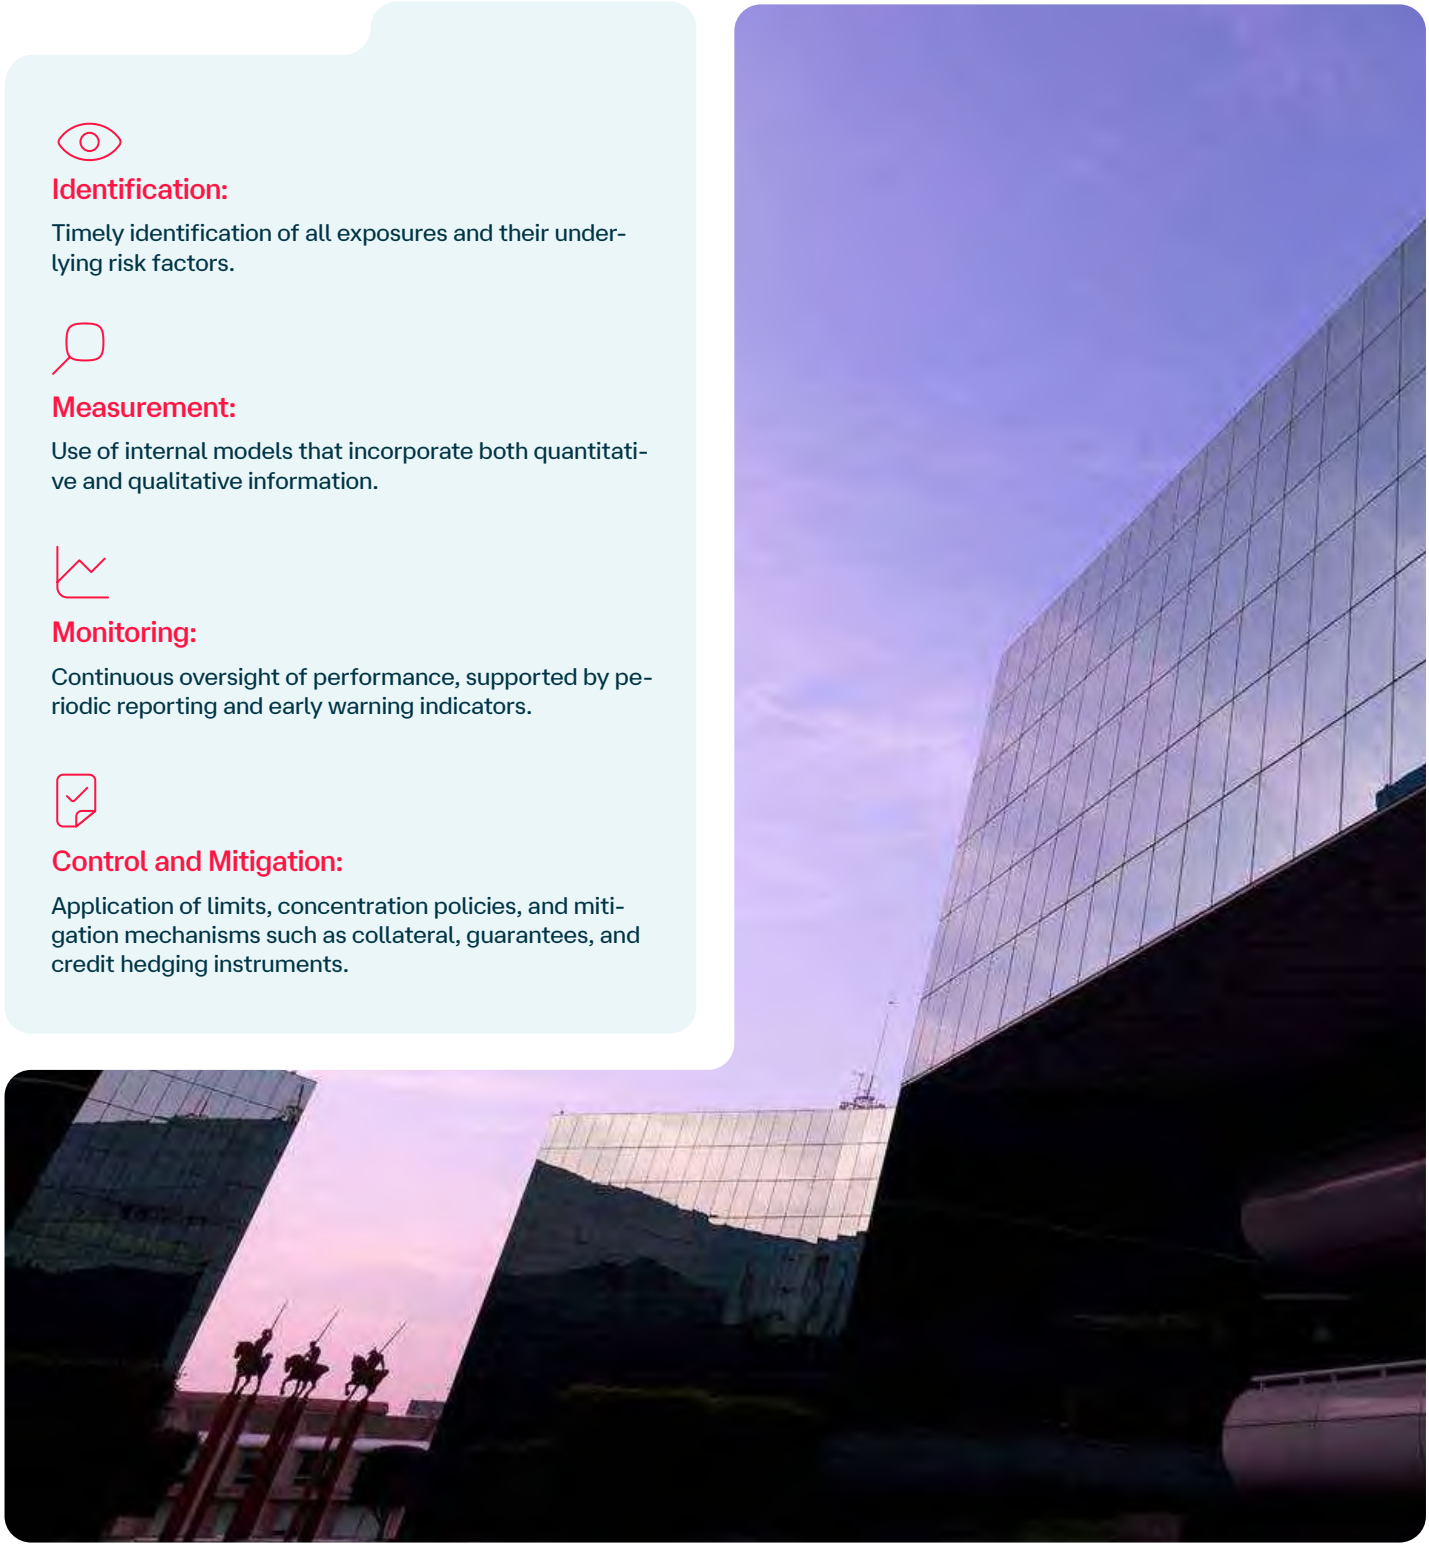

Use of internal models that incorporate both quantitative and qualitative information.

Monitoring:

Continuous oversight of performance, supported by periodic reporting and early warning indicators.

Control and Mitigation:

Application of limits, concentration policies, and mitigation mechanisms such as collateral, guarantees, and credit hedging instruments.

2.4.2 Afore Banamex

With more than 27 years of experience, Afore Banamex has established itself as a leading institution in Mexico's retirement savings industry. Our mission is to be the most trusted and leading Afore in the country, supporting our customers throughout their lives by providing expert guidance and high-quality retirement-planning services to help them achieve the best possible pension outcomes.

Afore Banamex takes a customer-centric approach, designing strategies that respond to evolving needs and strengthen relationships, loyalty, and overall experience. Synergies with Grupo Financiero Banamex also enable us to expand our product range nationwide, reinforcing our competitive advantages.

Our History

1997	Afore Banamex begins operations.
1999	Alliance with AEGON.
2001	Merger with Garante.
2002	Becomes the largest Afore in the industry by assets under management and customers.
2011	Pioneer in transfer processes using iPad technology.
2012	Pioneer in derivatives operations.
2013	Opening of the first CARE center.
2014	First Afore to invest internationally.
2018	Launch of our mobile app.
2019	Highest-rated Afore by Fitch.
2021	Launch of the new e.afore 2.0 sales model.
2023	First Afore to establish a senior care protocol. Second Afore to obtain SIA Compliant certification.
2024	Reaches 1 trillion pesos in assets under management. Citi México and Grupo Financiero Banamex are established, with Afore Banamex becoming a subsidiary of the latter
2025	Climate Risk Training for Board Directors.

Strategy

Afore Banamex's strategy is built on three core pillars:

- Retirement Advisory and Service
- Investment Strategy
- Digital Strategy, Culture, and Talent

Retirement Advisory and Service

Afore Banamex is a founding member of Mexico's Retirement Savings System and is backed by Grupo Financiero Banamex.

Through our retirement advisory and service strategy, we support our customers throughout their working lives and into retirement. To achieve this, we maintain one of the most extensive service networks in the industry:

- More than 100 Retirement Service Centers, where customers and prospects receive personalized advisory services.
- More than 600 Banamex branches, as well as on-site services at companies and government entities nationwide.
- More than 1,700 Certified Retirement Advisors registered with SAR's National Commission.(CONSAR), providing personalized guidance.

We continuously work to position ourselves among the leading retirement fund administrators in customer service.

As part of this strategy, we are committed to maintaining a highly qualified advisory team that delivers high-quality guidance to our customers. We continually improve our processes to ensure a streamlined, effective service experience. We offer three nationwide channels for scheduling appointments:

- Call Center (CAT).
- Afore Móvil Banamex app.
- Afore online portal.

In 2025, we delivered an average of 272,179 services per month, with an average of 19 transactions handled per advisor per day and an average service time of 14:57 minutes per customer, compared to 17:12 minutes in 2024. Our rejection rate for submitted transactions was 0.52%.

In terms of customer experience, our Net Promoter Score (NPS) exceeded 90% as of December 2025.[3] We were also recognized as the second Afore with the lowest number of complaints per 100,000 affiliated workers as of Q3 2025, and ranked second in the industry in the IDATU, with a score of 9.99 for customer service (Nation Commission for the Protection and Defense of Financial Services Users. - CONDUSEF)[4].

[3] https://www.gob.mx/consar/articulos/28-nivel-de-satisfaccion-de-los-usuarios-atendidos-en-alguna-sucursal
[4] https://www.buro.gob.mx/

On September 30, CONSAR released the first results of the AFORE Monitor, a new tool used to assess the quality, effectiveness, and efficiency of Afore services. Banamex ranked fourth out of 10 Afores, with a score of 8.81. The tool evaluates 31 performance indicators, including 18 operational and 13 service metrics.[5]

Through the Afore Móvil Banamex app, customers can access account information, make contributions, process withdrawals, and use other services without the need to visit a branch.

Voluntary Savings

Afore Banamex also promotes additional retirement savings by offering a range of options tailored to different needs, including:

- Complementary Retirement Contributions (ACR).
- Voluntary Contributions in Basic SIEFORES* (Short-Term).
- Long-Term Savings Contributions (ALP).
- Voluntary Contributions with a Long-Term Investment Focus.

To make saving as flexible as possible, we offer the following options:

- Start saving through the Afore Móvil Banamex app from anywhere.
- Choose the contribution frequency (weekly, biweekly, monthly, or one-time).

Afore Banamex in Numbers[6]

1st Place

First Afore to renew the senior care service protocol with the National Commission for the Protection and Defense of Financial Services Users (CONDUSEF).[7].

2nd Place

Total customers: 8.6 million, representing a 15% market share.

Active customers (those with at least one contribution to IMSS in the previous two-month period): 3.9 million, representing 17%.

Ranked second in the User Service Performance Index (IDATU), scoring 9.99, as published by CONDUSEF (Q3 2025)[8].

3rd Place

Worker contributions continue to play a significant role in supporting growth in assets under management.

Highest returns in the industry over the past 12 months (as of December 2025): 17%.

4th Place

Total assets under management reached 1 trillion pesos (3.7% of GDP) as of July 2024, with double-digit year-over-year growth.[9]

Signatory to the Principles for Responsible Investment (PRI) since 2021; our second progress report on responsible investment practices was published in 2025[10].

> 90% Net Promoter Score (NPS)

*Specialized Retirement Fund Investment Companies.

Investment Strategy

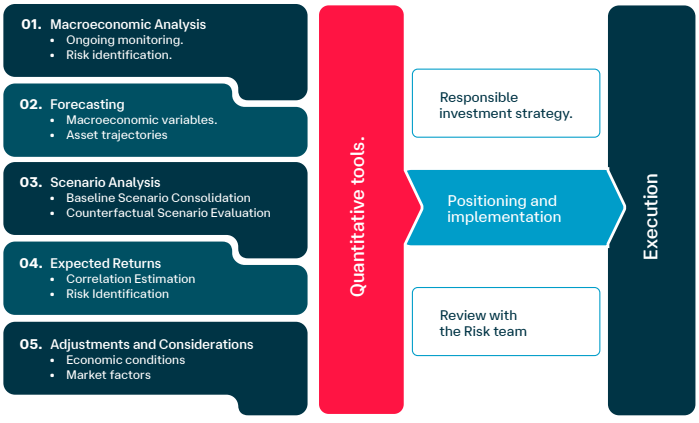

In Mexico, Afores are regulated by CONSAR. Afore Banamex operates in full compliance with the Retirement Savings Systems Act, the General Financial Provisions (CUF), the Investment Regime Provisions, and other applicable regulatory frameworks.

Investment Process and Risk Management

Afore Banamex stands out for its ability to make broad use of the investment regime, with authorization to invest in securitized instruments, equities, foreign securities, structured instruments, FIBRAs, foreign exchange, derivatives (only six administrators in the industry hold this authorization), and commodities (only three administrators in the industry hold this authorization).

We have developed a comprehensive investment process structured across multiple stages and interrelated components, supported by control mechanisms that enhance its consistency and robustness. The process is supported by, among other elements:

- Quantitative tools subject to continuous review and enhancement.
- Economic and market analysis, both internal and from external sources.
- Responsible investment strategy.
- Specialized analysis conducted by the teams involved in the process.
- Ongoing discussions and feedback.

Our SIEFORES are rated AAA (Excellent) by Fitch, reflecting the quality of our investment and risk management practices, as well as our customer service.

Fitch Ratings: https://www.fitchratings.com/research/es/fund-asset-managers/fitch-takes-actions-on-siefores-ratings-managed-by-citibanamex-afore-12-05-2023

Risk Identification and Management – Afore Banamex

The risk function plays a critical role in managing the risks associated with investing workers' funds, ensuring sound oversight aligned with the principles of prudence, objectivity, and sustainability.

Comprehensive Risk Management Framework

The Comprehensive Risk Management Unit (UAIR) follows an end-to-end financial risk management lifecycle, which includes identifying, measuring (assessing probability and impact), mitigating (avoiding or accepting risk), and monitoring risks over time for each investment vehicle. Risks are reported periodically to the Financial Risk Committee, the Investment Committee, the Afore's Chief Executive Officer, and the Chief Compliance Officer.

The management structure is based on a three-lines-of-defense model:

- First Line of Defense: Business management.
- Second Line of Defense: Independent Risk Management and Compliance Risk Management.
- Third Line of Defense: Internal Audit.

Afore Banamex manages a range of risks and works collaboratively across functions to address them. The primary risk categories include:

- Credit risk.
- Market risk.
- Liquidity risk.
- Operational risk.
- Legal risk.
- Technology risk.
- Climate risk.

The comprehensive risk management framework is based on the principles of accuracy, representativeness, objectivity, verifiability, sufficiency, and timeliness, in line with CONSAR guidelines.

Digital Strategy, Culture, and Talent

Digital Strategy

Our digital strategy is focused on strengthening customer relationships through technology-driven solutions that simplify the customer experience, improve operational efficiency, and create value.

We are advancing digital transformation through three core pillars:

For more information on the asset class integration process, please refer to: https://www.aforebanamex.com.mx/portal-afore-api/zonaabierta/c/pdf/Guia_de Inversion_Responsable.pdf

Customer Experience

We offer intuitive digital channels that enable customers to learn more about Afore Banamex and complete all account-related transactions without the need to visit a branch.

Operational Efficiency

We optimize internal processes through task automation and data analytics, enabling us to enhance our marketing campaigns for customers and prospects continuously.

Continuous Innovation

We promote a digital culture among our customers by continuously improving our services. We also encourage internal teams to actively promote our offerings, acting as digital ambassadors for Afore Banamex.

Culture and Talent

At Afore Banamex, our Culture and Talent strategy reflects Grupo Financiero Banamex's commitment to human development, diversity, and a healthy, inclusive workplace. Through a consistent set of policies, practices, and initiatives, we foster an environment that promotes collaboration, innovation, and a strong sense of purpose—one where individuals can grow, contribute, and reach their full potential.

We believe our people are the driving force behind our organization. We promote a performance-driven culture focused on continuous growth, recognizing that human capital development is essential to achieving our strategic objectives. Through structured processes for evaluation, feedback, and training, we strengthen capabilities, develop leadership, and support internal mobility, creating opportunities for employees to realize their potential and contribute to organizational performance.

We also work to ensure our employees build strong, trust-based relationships with our customers and serve as trusted partners in their retirement planning journey. We believe that staying closely connected to our people is the foundation for building meaningful, lasting relationships with our customers. Accordingly, all activities related to human capital management are conducted in full compliance with applicable labor laws and regulations.

2.4.3 Seguros Banamex

Seguros Banamex has complemented Grupo Financiero Banamex's offering for more than 31 years, providing customers with a broad range of products, particularly life insurance. These products feature streamlined enrollment processes and are designed to be accessible to a broad customer base. The offer has been structured to eliminate the need for application forms across all sales channels and to ensure that beneficiary designation is simple and secure.

Seguros Banamex products are distributed through 1,261 branches, telemarketing, and digital channels. They are also integrated with other banking products for borrowers and account holders, including mortgage loans, SME loans, credit cards, personal loans, and deposit products (checking, payroll, and debit accounts).

In 2025, we recorded 27,334 life insurance claims totaling 3.273 billion pesos, with an average customer service time of 3.9 days, representing an improvement of 29.8% compared to 2024 and 74.9% compared to 2022.

In addition, we remained one of the leading bancassurance providers in the Mexican insurance market by premium volume, with total written premiums of 51.948 billion pesos as of December 31, 2025.

Seguros Banamex is committed to protecting its customers, their assets, and their beneficiaries

Branches	Minimum SI: MXN 500,000 Maximum SI: MXN 5,000,000 Average monthly premium: MXN 220

In 2025, as part of our commitment to delivering the strongest value proposition to our customers, we launched three insurance products tailored to different segments, enabling us to protect more families and strengthen the insurance culture in Mexico. Our Vida Contigo Esencial, Avanzado, and Titanio products were designed to address the diverse needs of Grupo Financiero Banamex customers.

In 2025, Grupo Financiero Banamex relaunched its social security pension business, further expanding its offering.

This initiative reflects our commitment to providing secure, accessible, and reliable options for social security beneficiaries approaching retirement. The annuity market has gained relevance in recent years, driven by the growth of the retirement-age population and the need to expand the range of pension providers within the insurance market to ensure a steady income stream for retirees.

According to the National Population Council (CONAPO), life expectancy in Mexico has increased from 58 to 75.5 years over the past 50 years. In 2024, the population aged 60 and over was estimated at 16.5 million and is projected to reach 28 million by 2040.

Against this backdrop, our pension insurer is positioned not only as a financial solution but also as a commitment to providing peace of mind for individuals entering retirement. Through this offering, we aim to play an active role in strengthening and advancing the pension system, while increasing confidence in formal savings and retirement mechanisms.

The reinstatement of Pensiones Banamex reflects a comprehensive strategy to expand our service portfolio and offer social security beneficiaries a reliable alternative that ensures consistent monthly pension payments. Through this initiative, we reaffirm our role as a financial partner for individuals at this stage of their lives.

The reactivation of the pensions business—at a time when competition among insurers and financial education are key to improving outcomes for retirees in Mexico—underscores our commitment to the financial security of Mexican families. It also positions us as a strong option when individuals choose their pension provider, helping them achieve a secure and dignified retirement.

Strategy

Seguros Banamex and Pensiones Banamex continue to advance their strategic priorities in alignment with the Grupo Financiero Banamex 2025 agenda. Our purpose is embedded in our DNA: to deliver the strongest value proposition to our customers, strengthen our position in the insurance market, and generate value for the Group.

We continue to focus on enhancing the profitability of our life insurance business by developing new products, improving our existing offers to deliver the best customer experience, strengthening our digital capabilities, and expanding our distribution channels. We prioritize the growth of our Plan Patrimonial Banamex (PPB), both in premiums and assets under management (AUM), and in expanding our individual life customer base.

Execution of this strategy is supported by deeper penetration among the bank's customers, leveraging bancassurance advantages to attract new customers and strengthen retention and loyalty.

Our efforts are focused on expanding digital channels and call center capabilities for traditional products, strengthening branch-based sales, and extending our reach across additional distribution channels.

At the same time, strengthening our governance capabilities remains a key pillar of execution, with a continued focus on inclusion, diversity, and equal opportunity for our employees.

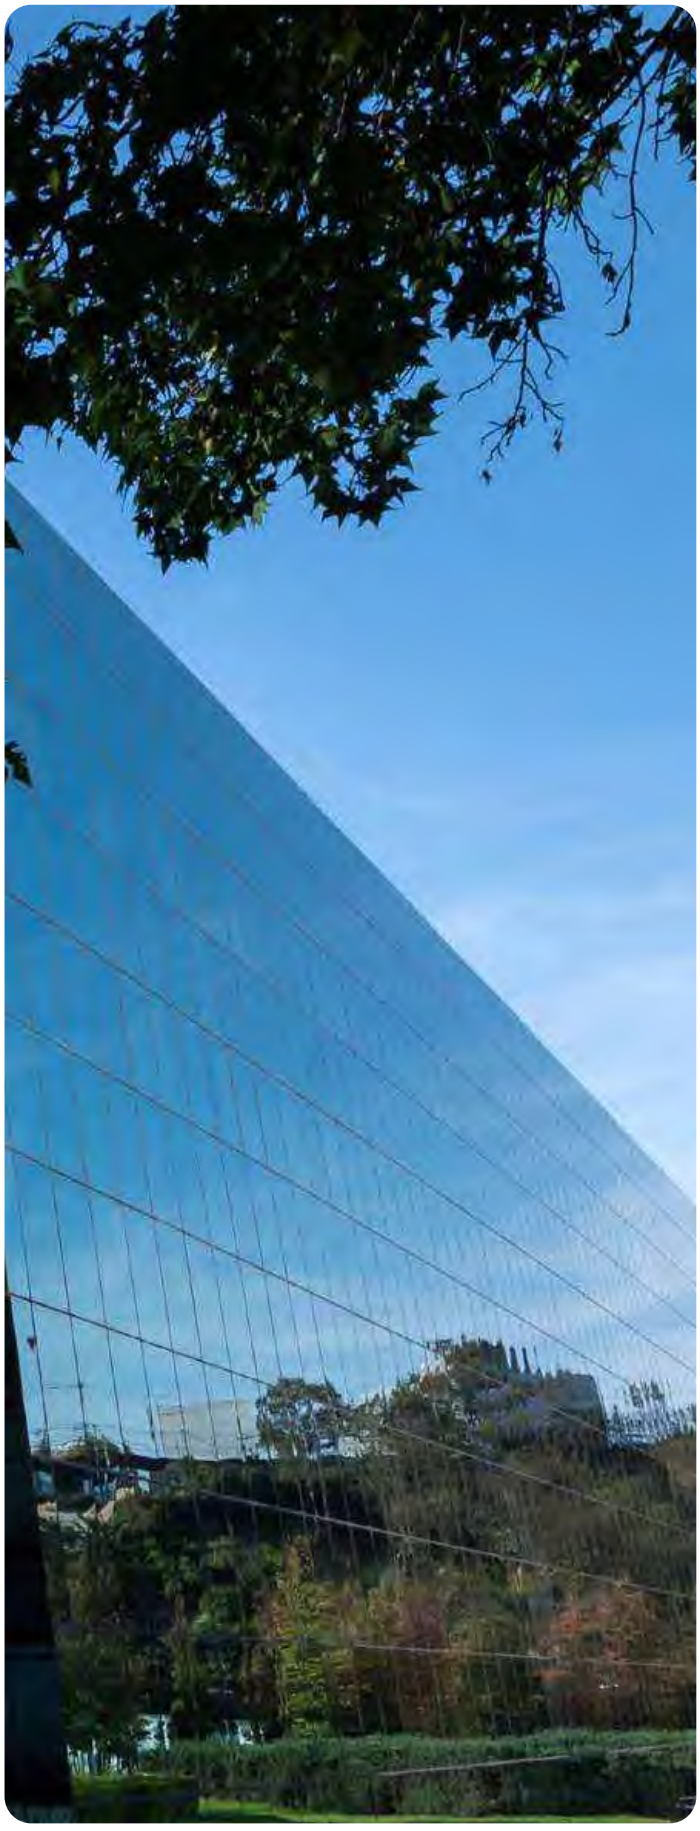

Insurance and Community

We are committed to delivering strong financial performance while contributing meaningfully to society.

We participate in Insurance Week, organized by the Mexican Association of Insurance Institutions (AMIS), as part of our commitment to promoting financial awareness and protection in Mexico and supporting a more informed and financially resilient society.

We also actively participate in Financial Education Week, helping raise awareness about the importance of insurance in Mexico and promoting greater financial literacy.

Risk Management System – Seguros Banamex

We identify, assess, monitor, control, mitigate, and report to the Board of Directors on the risks the institution is exposed to, including those that are not fully quantifiable.

We ensure that our operations comply with the limits, objectives, policies, and procedures of the comprehensive risk management framework approved by the Board of Directors.

To support effective capital monitoring, we calculate the Solvency Capital Requirement (SCR) monthly through a regulatory stress-testing exercise covering the key risks the company faces, including market risk, liquidity and asset-liability mismatch risk, counterparty risk, reserve adequacy risk, and operational risk. This allows us to maintain an appropriate level of eligible own funds to cover potential stress scenarios, with a Solvency Ratio (SR) above 1. It is important to note that Management aims to maintain an SR above 4x.

We conduct the Dynamic Solvency Test annually—and more frequently if needed—to assess the company's solvency and capitalization under a range of regulatory and ad hoc scenarios, focusing on events that could affect profitability and capital levels. This analysis provides insight into the volatility of the company's assets and liabilities.

We have prioritized the most critical moment in the insurance experience: claims reporting and handling. Over the past year, we conducted an end-to-end review of our claims process, identified areas for improvement, and implemented sustainable enhancements. As a result, we reduced the time to final claims determination by 67%, resolved 100% of claims within 30 days, and reduced customer complaints by 34%.

According to the latest results of the User Service Performance Index (IDATU) for the third quarter of 2025, we ranked as the second-best insurer in the industry, with a score of 9.7, 0.5 points above the industry average.

3.1	Governance Bodies	40
3.2	Afore Corporate Governance	52
3.3	Seguros Corporate Governance	53

This section outlines the structure, functions, and principles that guide our most important decisions. Banamex's corporate governance framework is grounded in ethics, transparency, and accountability, fostering responsibility, reliability, and long-term management.

3.1 Governance Bodies

GRI 2-9, 2-10, 2-11, 2-12, 2-13, 2-15, 2-16, 2-23, 3-3, 206-1, 207-2, 405-1

Banamex's results reflect the strength of its corporate practices, which are aligned with the highest ethical standards.

These results are communicated with transparency and accuracy, in compliance with applicable laws and regulations.

Information on Banamex's financial[3] and sustainability[4] performance, as well as on its committees, policies, and the functioning of its highest governing body[5], including the corporate governance best practices questionnaire, is available at El Banco Nacional de México | Banamex.

We are committed to delivering strong results through leading corporate practices. To achieve this, we operate under the highest standards of ethics, culture, and conduct, and report performance outcomes accurately and transparently, in compliance with applicable laws, rules, and regulations.

Shareholder's Meeting

The Shareholders' Meeting is the highest governing body of Grupo Financiero Banamex and Banco Nacional de México. It meets at least once a year, within the first four months following the close of each fiscal year.

Its responsibilities include approving matters related to the appointment and compensation of board members and statutory auditors, amendments to the bylaws, dividend payments, and capital increases or reductions, whether in ordinary or extraordinary sessions, as applicable.

Boards of Directors

Both Grupo Financiero Banamex and Banco Nacional de México have a Board of Directors. In accordance with applicable law, each Board of Directors must be composed of at least 5 and no more than 15 directors, at least 25% of whom must be independent.

The Chair of each Board has a casting vote in the event of a tie. Each director must be appointed from among individuals with extensive experience in financial, legal, or administrative matters and must meet creditworthiness and integrity standards. The Boards of Directors must meet at least once per quarter and submit an annual report to the shareholders' meeting.

[3] Corporate Financial Information | Banamex
[4] Social Commitment, Corporate Citizenship, and Sustainability Report
[5] Corporate Financial Information | Banamex

Members of the Boards of Directors are elected at least annually and may be ratified or re-elected, subject to applicable legal requirements. A robust selection process is in place to ensure that members are chosen based on their experience, integrity, and expertise, among other criteria.

Specific guidelines govern the selection process, including the Legal Entity Standard, which helps ensure a fair and consistent appointment process.

Key Responsibilities:

01.

Approve, on a quarterly basis, the financial statements; related-party transactions; the risk appetite framework and risk tolerance limits for Banamex; the organizational structure up to the second management level; the Code of Conduct and key policies; and the appointment of internal and external auditors.

02.

Ensure the establishment, ongoing effectiveness, and oversight of the internal control system, internal audit frameworks, and compensation structures.

03.

Evaluate the performance of the Chief Executive Officer and the Audit Committee.

04.

Oversee compliance with approved risk limits and review any deviations in the internal control system.

05.

Review the results of internal audits.

06.

Implement self-correction programs.

07.

Ensure compliance with applicable sales practice regulations.

Regulatory Committees

Audit Committee

The Audit Committee supports the Board of Directors in defining and updating the objectives of the Internal Control System, as well as the guidelines for its implementation and evaluation. It meets at least once per quarter.

Members of the Audit Committee are selected for their experience, recognized expertise, and professional standing. At least one member must have extensive experience in financial matters or in auditing and internal control, as demonstrated by their professional experience.

The Committee is composed exclusively of independent directors, who may serve as either primary or alternate directors. It is composed of at least three members, appointed by the Board of Directors upon the Chair's recommendation.

The Audit Committee has a Secretary and an Assistant Secretary, appointed by its Chair, who are responsible for preparing the minutes of its meetings. They may or may not be members of the Committee and may participate in its proceedings with voice but no vote.

Audit Committee Members as of December 31, 2025:

- María Isabel Goiri Lartitegui (Chair)
- Rafael Alfonso Mac Gregor Anciola
- Ricardo Enrique Moreno García
- Jennifer Taylor
- Felipe Chico Hernández

All members are independent directors.

Risk Committee

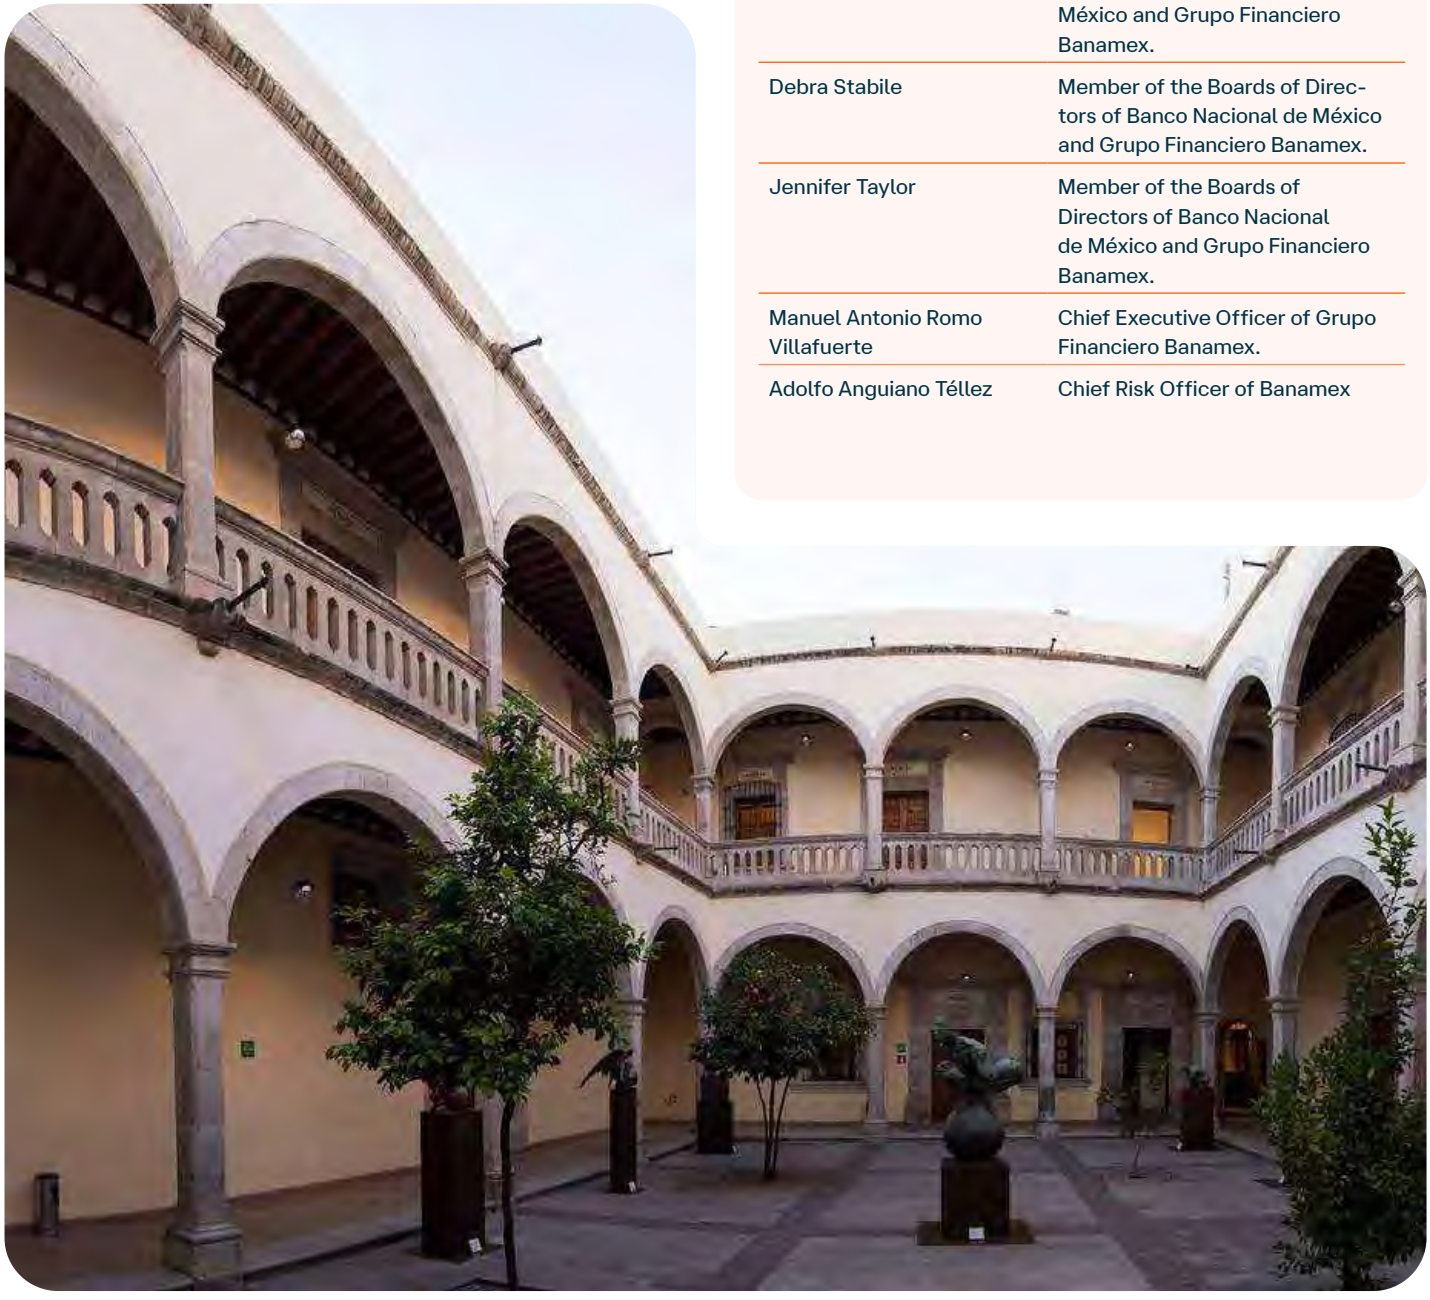

The Risk Committee supports the Board of Directors in establishing risk management policies and procedures. It identifies, measures, monitors, and assesses risks and their impact on operations, and oversees their effects on capital and earnings. It also defines the overall risk exposure limits approved by the Board of Directors of Banamex, as well as risk tolerance levels and compliance with those limits. It is responsible for managing the risks to which Banco Nacional de México is exposed.

The Risk Committee is composed of nine members:

- At least two directors, one of whom serves as Chair of the Risk Committee.
- The Chief Executive Officer of the Bank.
- The head of the Comprehensive Risk Management Unit.
- The Bank's Internal Auditor and other invited participants, who may participate with voice but no vote.

Risk Committee Members as of December 31, 2025:

Director	Role
Ignacio Deschamps González	Chairman of the Board of Directors of Banamex.
Rafael Alfonso Mac Gregor Anciola	Member of the Boards of Directors of Banco Nacional de México and Grupo Financiero Banamex.
María Isabel Goiri Latitegui	Member of the Boards of Directors of Banco Nacional de México and Grupo Financiero Banamex.
Andrés Chico Hernández	Member of the Boards of Directors of Banco Nacional de México and Grupo Financiero Banamex.
Debra Stabile	Member of the Boards of Directors of Banco Nacional de México and Grupo Financiero Banamex.
Jennifer Taylor	Member of the Boards of Directors of Banco Nacional de México and Grupo Financiero Banamex.
Manuel Antonio Romo Villafuerte	Chief Executive Officer of Grupo Financiero Banamex.
Adolfo Anguiano Téllez	Chief Risk Officer of Banamex

Corporate Practices Committee

The Corporate Practices Committee supports the Boards of Directors in overseeing Grupo Financiero Banamex's management and operations, as well as those of its subsidiaries. It is composed exclusively of independent directors.

Key Responsibilities:

- Establish and oversee the operation of Banamex's compensation system.
- Review, at least twice a year, the performance of key executives of Grupo Financiero Banamex, track their performance metrics, and propose the Chief Executive Officer's compensation.
- Issue a favorable opinion on related-party transactions.
- Submit for approval by the Board of Directors of Grupo Financiero Banamex the standards and/or manuals related to Banamex's compensation system, key executives, the internal control system, overall strategies for the management and execution of the Group's business, internal audit, and the corporate transfer pricing framework.
- Review intercompany transfer pricing.
- Issue opinions on unusual transactions.

Corporate Practices Committee Members as of December 31, 2025:

- Jesús Viejo González (Chair)
- Alexandre Vartuli Gouvea
- José Manuel Arana Escobar

Communication and Control Committee

The Communication and Control Committee establishes policies, criteria, and customer identification procedures to ensure compliance with anti-money laundering regulations issued by the Secretariat of Finance and Public Credit. It also reviews contracts and account openings that may pose a high risk to the institution and establishes criteria for classifying customers based on their risk profile. It is composed of 16 primary members and 14 alternate members, all from senior management.

Communication and Control Committee Members as of December 31, 2025:

- Jesús Alberto Fernández Wilburn (Chair)
- Luis David Lara Gómez
- Ricardo Christian William Christensen Zambrano
- Diana Araiza Milan
- Jorge Enrique Peña Cárdenas
- Eduardo Medel de Pedro
- Jose Ernesto Magaña Chavarría
- David González Velázquez
- Daniel Alonso Garduño Gutierrez
- Eunice Figueroa Díaz Gonzalez
- Marco Alejandro Islas Martínez
- Kazim Emmanuel Gutierrez Novelo

Key Responsibilities

- Submit the Compliance Manual, as well as any amendments, to the Audit Committee.
- Present the results of risk assessment methodologies.
- Report on the results of internal or external audits regarding the effectiveness of the policies, measures, criteria, and procedures set out in the Compliance Manual, as well as the remediation of any deficiencies or omissions.
- Make recommendations regarding high-risk customers identified by the Compliance Officer.
- Establish and communicate criteria for classifying customers based on their risk profile.
- Ensure that automated systems incorporate lists of tax havens, i.e., jurisdictions that lack adequate measures to prevent, detect, and combat unusual transactions or that have weak controls, as well as lists of politically exposed persons (PEPs).
- Determine which transactions must be reported as unusual transactions or concerning internal transactions.
- Approve training programs related to the detection and reporting of activities that may fall within the scope of Articles 139 Quáter or 400 Bis of the Federal Criminal Code of Mexico.
- Report conduct by directors, officers, employees, or representatives of the entity that violates these provisions or the policies, criteria, measures, and procedures set out in the Compliance Manual.
- Resolve matters submitted for its consideration in connection with the applicable General Provisions.
- Ensure that adequate internal structures are in place to comply with the applicable General Provisions with respect to organization, personnel, and resources.

Technology and Modernization Committee

The Technology and Modernization Committee supports Banamex in evolving its infrastructure, operating and technology models to modernize its operations. Its members meet at least once per quarter.

Technology and Modernization Committee Members as of December 31, 2025:

- Ricardo Enrique Moreno García (Chair)
- Mónica Aspe Bernal
- Alexandre Vartuli Gouvea
- Timothy (Tim) Francis Ryan
- Felipe Chico Hernández
- Íñigo Friend
- Ignacio Deschamps González
- Manuel Antonio Romo Villafuerte
- Francisco Leyva
- Beatriz Ruiz

Key Responsibilities

- Oversee the Group's technology, data, digital transformation, and artificial intelligence strategies.
- Monitor the performance of key technology initiatives and investments.
- Ensure the reliability of technology operations, maintaining system stability and service levels.
- Foster a technology-driven organizational culture across all Banamex subsidiaries.

Human Capital and Culture Committee

The Human Capital and Culture Committee's primary objective is to foster a positive work environment in which employees feel valued and engaged and can play a meaningful role in the company's future.

Human Capital and Culture Committee Members as of December 31, 2025:

- Mónica Aspe Bernal (Chair)
- Jesús Viejo González
- José Manuel Arana Escobar
- Yara Saad
- Andrés Chico Hernández
- Ignacio Deschamps González
- Manuel Antonio Romo Villafuerte
- Adela Giral

Key Responsibilities:

- Oversee Banamex's corporate culture, with a focus on responsible and sustainable outcomes.
- Develop talent and succession plans.
- Support talent and culture decisions to drive Banamex's transformation.
- Oversee executive compensation plans and organizational culture.
- Support the Corporate Practices Committee in reviewing the compensation, appointment, and removal of the Chief Executive Officer and employees subject to the compensation system, as well as in preparing compensation policies and reports for the Board of Directors.

3.1.2 Compensation and Controls

Pursuant to the authorization granted by the National Banking and Securities Commission (CNBV) in official letter No. 312-1/113016/2014, dated September 12, 2014, and to Article 45 of the Act Regulating Financial Groups of Mexico, the Corporate Practices Committee of Grupo Financiero assumed all functions previously assigned to Banamex's Risk Committee solely in relation to the Compensation System.

Accordingly, during 2025, the Corporate Practices Committee of Grupo Financiero performed the following functions: (i) propose, for approval by the Board of Directors, compensation standards and procedures, as well as any amendments thereto; all employees or personnel holding positions within Banamex are subject to the Compensation System, including any applicable exceptions; (ii) implement and maintain the Compensation System at Banamex; (iii) communicate compensation standards and procedures to all relevant personnel; (iv) engage external consultants, when deemed necessary, in compensation and risk management matters to support the design of the Compensation System; and (v) report to the Board of Directors, at least semiannually, on the operation of the Compensation System and, at any time, when the risk exposure assumed by Banamex, its administrative, control, or business units, or individuals subject to the Compensation System, may warrant an adjustment to it.

Related-Party Transactions

In the ordinary course of business, the Bank enters into transactions with Citigroup Inc. affiliates, as well as with companies in which Bank officers serve as directors and whose shareholders or officers are members of the Board of Directors of Banco Nacional de México.

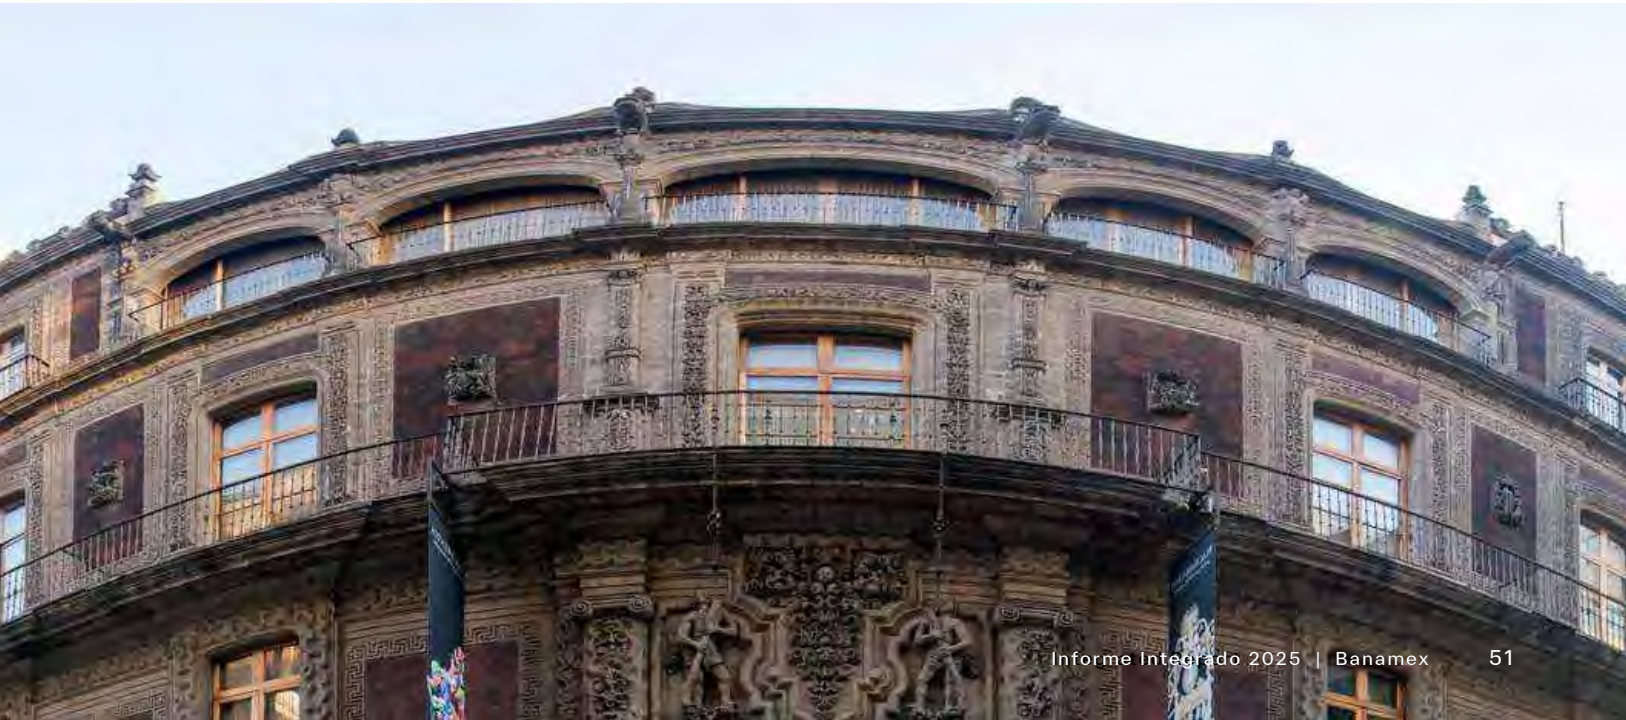

In accordance with the Bank's policies, all credit transactions with related parties are approved by the Board of Directors in compliance with the Credit Institutions Act of Mexico and are conducted at market terms.

Dividend Payments

The Shareholders' Meeting is responsible for declaring dividend payments, provided that such payments do not interfere with the reinvestment of earnings, the creation of reserves, or the maintenance of capital adequacy levels. Accordingly, there is no fixed schedule for dividend declarations. As of the date of this report, there are no corporate policies or other governing documents that limit or restrict Banamex's ability to declare dividends to its shareholders.

Since 2016, we have implemented a Conflict-of-Interest Prevention System for Banamex, which includes the following components:

- Rules and Controls
- Obligations and Responsibilities
- Conflict Escalation
- Training and Communication
- Monitoring and Updates
- Risk Management

3.2 Afore Corporate Governance

The corporate governance framework of Afore Banamex is a fundamental pillar that supports transparent, responsible, and long-term management. It promotes integrity in decision-making, regulatory compliance, and the protection of workers' interests. The corporate governance structure is organized as follows:

Afore
Board of Directors

SIEFOREs
Board of Directors

Investment Committee
Public

Risk Committee
Public

Regulatory Governance Bodies

Participation of independent directors

Board of Directors of Afore Banamex - 2025

10 Primary Directors

4 Independent Directors

3 Women Directors

40% Independent Directors

30% Women Directors

Board of Directors: The Board of Directors is the governing body responsible for directing and managing the business and assets of Afore Banamex and its Specialized Investment Funds for Retirement (SIEFORES). It also defines strategy and oversees operations and management, in accordance with applicable regulations and in alignment with the overall strategy of Grupo Financiero Banamex.

Investment Committee: The Investment Committee is responsible for defining, approving, and monitoring the Investment Strategy for the assets in which the SIEFORES invest or have exposure, based on the investment horizon and within the regulatory limits established by CONSAR, as well as applicable prudential limits.

Financial Risk Committee: The Financial Risk Committee is responsible for managing the financial risks to which the SIEFORES are exposed and for ensuring that financial transactions comply with the limits, policies, and procedures approved by the Board of Directors. In carrying out these responsibilities, the Committee defines, approves, and monitors risk management processes and methodologies within authorized regulatory limits.

Each member of the Board of Directors has more than 20 years of experience in the financial sector, contributing to sound decision-making and strong corporate governance practices.

As of January 1, 2025, Afore Banamex adopted a new corporate governance model aligned with local market practices and expectations. This model enables more agile and streamlined decision-making and clearer allocation of responsibilities, supporting the execution of Grupo Financiero Banamex's initial public offering.

All directors are required to comply with the Procedure and Code of Ethics and Best Practices. In addition, independent directors must submit an annual report to the Board of Directors, including their views on areas of opportunity identified within the Administrator in financial matters, as well as the most relevant actions taken in their role and their participation in the committees during the reporting period. This report is available to CONSAR at all times.

A Communication and Control Committee is also in place to meet regulatory requirements.

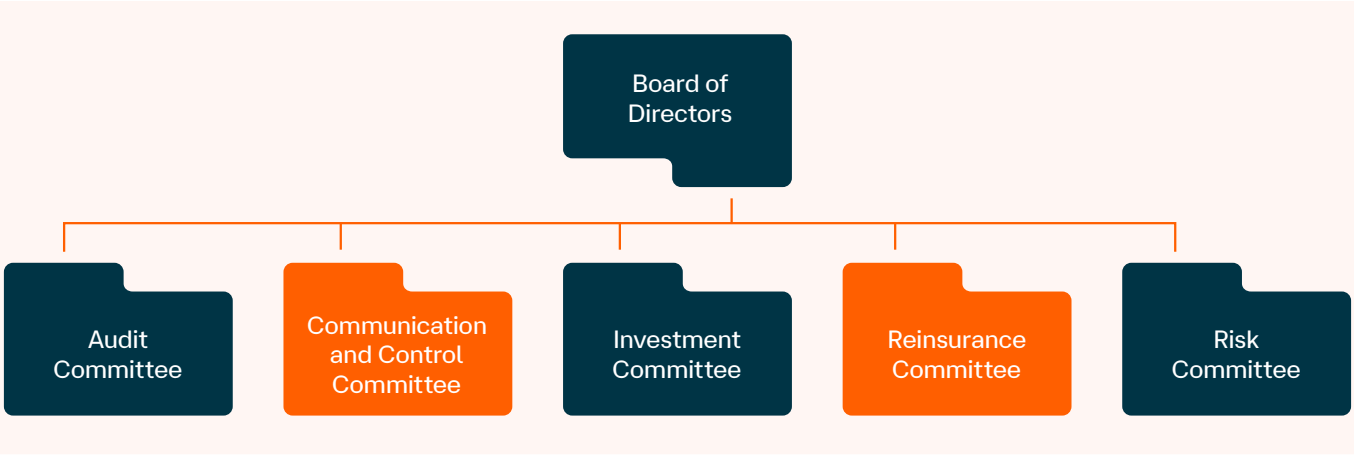

3.3 Corporate Governance – Seguros

Seguros Banamex and Pensiones Banamex have a robust internal governance framework, applying applicable insurance regulations, their bylaws, the provisions governing financial groups, and the general rules set forth in the General Corporations Act of Mexico. In addition, both entities are governed by the corporate standards of Grupo Financiero Banamex, which are subject to ongoing monitoring by the Group to ensure compliance.

The following committees support the Board of Directors:

- Audit Committee
- Communication and Control Committee
- Investment Committee
- Reinsurance Committee
- Risk Committee

Board of Directors: The Board of Directors is the governing body responsible for the Institutions' management and strategic direction. Under applicable insurance regulations, it establishes the measures necessary to ensure and verify compliance by the Institutions with applicable legal, regulatory, and administrative provisions.

Audit Committee: The Audit Committee oversees the Institution's adherence to internal regulations established by the Board of Directors, as well as compliance with applicable legal and administrative provisions.

Communication and Control Committee: The Communication and Control Committee is responsible for monitoring and ensuring compliance with obligations related to anti-money laundering and counter-terrorist financing.

Investment Committee: The Investment Committee ensures that the Institutions maintain their assets and investments at all times in accordance with the investment policy approved by the Board of Directors and applicable law and selects the assets and investments to be acquired by the Institutions.

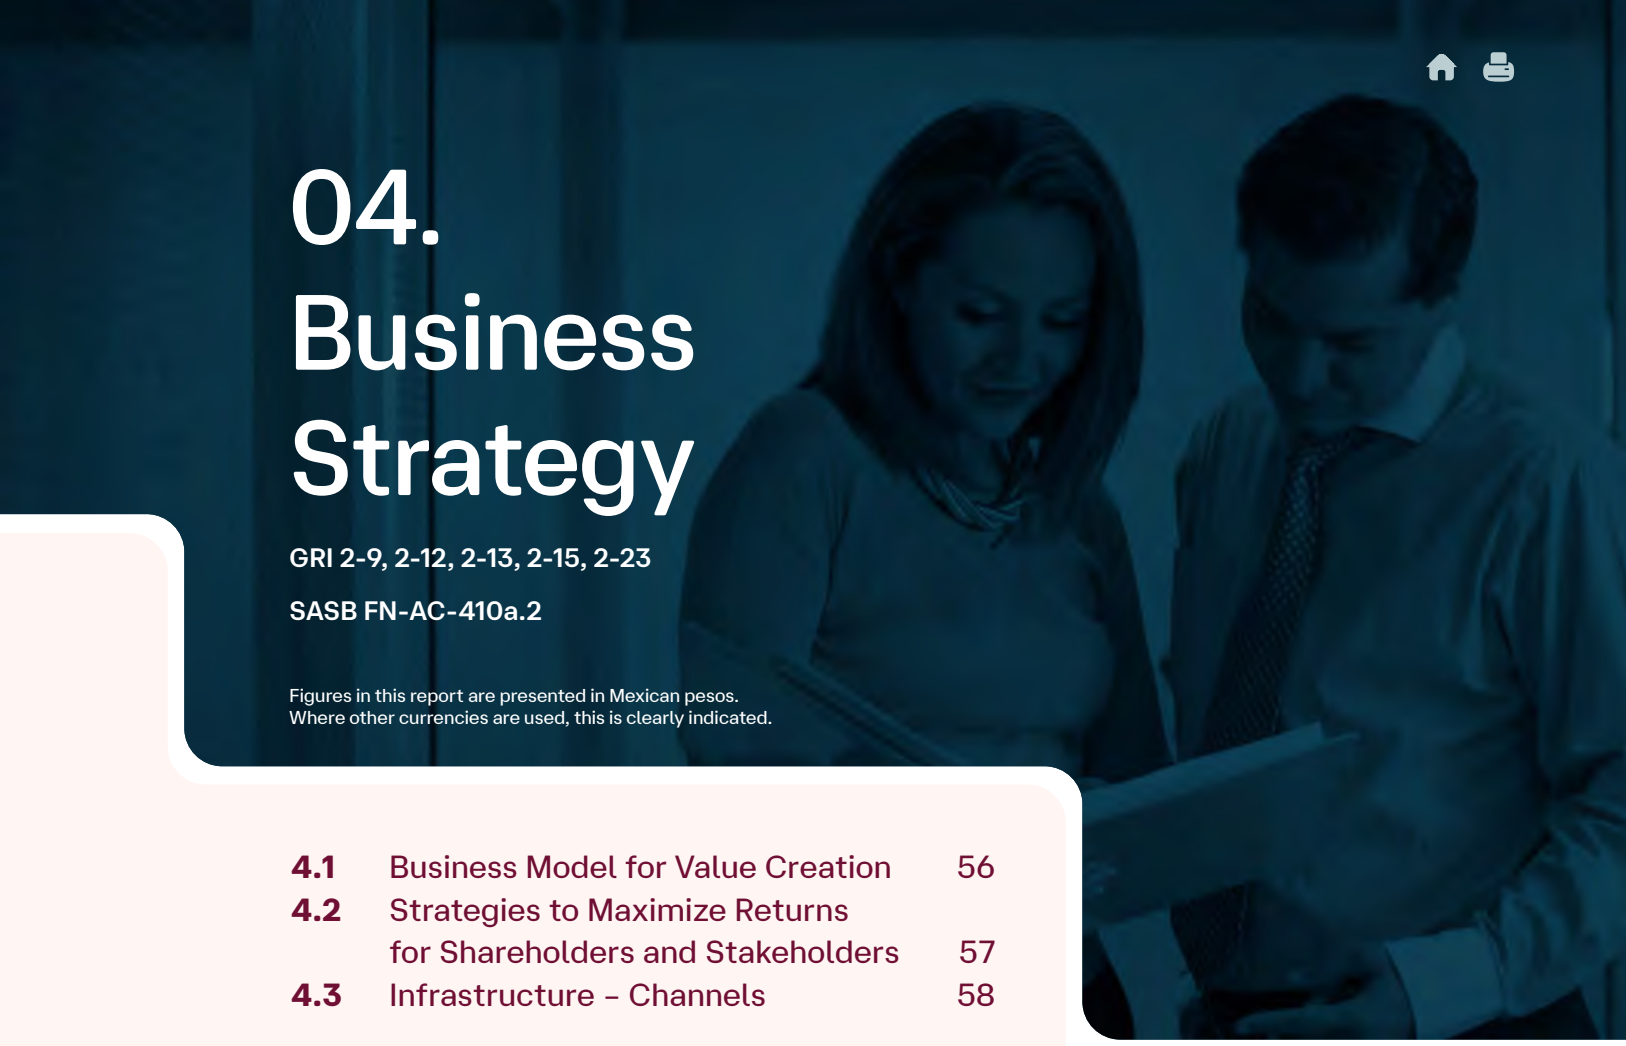

Reinsurance Committee: The Reinsurance Committee supports the Board of Directors in the design, implementation, oversight, and evaluation of reinsurance policies and strategies.

Risk Committee:* The Risk Committee is responsible for addressing matters related to the comprehensive management of risks to which the business is exposed, whether quantifiable or not, and for ensuring that operations comply with the limits, thresholds, policies, and procedures approved by the Board of Directors for comprehensive risk management.

Climate risk training was conducted for directors and senior management of Seguros Banamex and Pensiones Banamex, providing an updated perspective on the risks and opportunities associated with climate change, in alignment with leading climate governance practices. The training was delivered through a workshop by Chapter Zero Mexico, and EY also presented and facilitated the immersive EY Four Futures experience.

* Non-regulatory, based on corporate best practices.

4.2

Strategies to Maximize Returns for Shareholders and Stakeholders

At Banamex, we promote economic development, responsible finance, environmental stewardship, and equal opportunity through a comprehensive Corporate Citizenship strategy that guides our role as a financial intermediary, grounded in the highest ethical standards and strong corporate governance.

Our business model integrates Environmental, Social, and Governance (ESG) criteria from the design of products and services, actively engaging our stakeholders in our initiatives and overall performance. This evolution in our strategic approach has enabled us to respond competitively to emerging market trends while driving transformation in the financial sector through innovation.

We are active members of various industry and stakeholder groups focused on environmental, social, and sustainability issues (see Section 11.3, Partnerships with Local and Global Organizations).

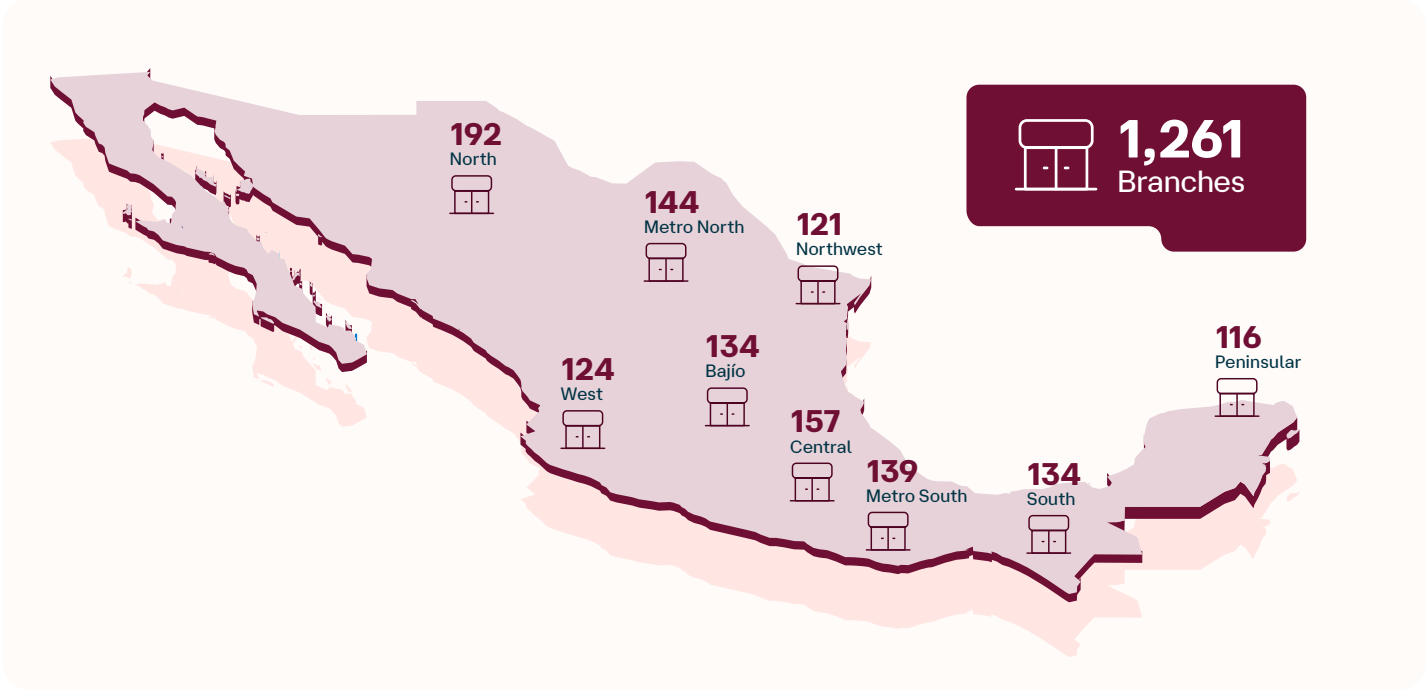

4.3 Infrastructure Channels

We aim to be available whenever and wherever our customers need us through an omnichannel model.

In recent years, we have developed a range of remote channels that have been widely adopted by our customers.

We have a network of 1,261 branches across the country, organized into nine divisions:

Branches

We operate traditional and digital branches, as well as locations within the facilities of various companies and government entities.

In terms of accessibility, approximately 90% of our branches are equipped with ramps to facilitate customer access. In addition, our branch design guidelines incorporate a wide range of accessibility features. To date, we have opened 23 new branches equipped with tactile maps, designated parking spaces for persons with disabilities, tactile paving, and, in some cases, accessible vestibules, circulation space, accessible café areas, restroom fixtures, accessories, and safety rails.

We are also upgrading three existing branches as part of our strategy to expand our portfolio of accessible locations.

In addition, our office portfolio includes accessibility features, with significant progress in certain Wealth Management offices, including the opening of seven offices with accessibility elements, as well as enhancements at our Santa Fe and Metepec corporate offices, including accessible restrooms, workspaces, and designated parking areas for vehicles transporting or driven by persons with disabilities, among other improvements.

ATMs

We operate 9,128 ATMs serving our cardholders and the general public, distributed across more than 687 locations nationwide.

Our ATM network is distinguished by its availability, speed of service, and low claim rate for cash withdrawals. We also aim to be present wherever our customers are, with ATMs located in branches, supermarkets, convenience stores, pharmacies, gas stations, municipal offices, hotels, hospitals, restaurants, universities, and airports, as well as within companies through Banamex payroll agreements.

Mobile Banking and CoDi

Banamex Móvil has become our customers' preferred channel for checking balances, making credit card payments, investing, and paying for services.

We actively incorporate customer feedback and continuously implement improvements to enhance the experience when making transfers and reviewing balances and transactions. Debit card transfers are now processed in real time.

We also continue to enhance technologies that enable more people in Mexico to access the financial system. Through CoDi (Digital Collection), customers can easily send and receive money by generating or scanning QR codes. They can also make payments at participating merchants through CoDi push notifications sent directly to their mobile app.

Banamex Portal and Online Banking

Banamex.com continuously adapts to customer needs through detailed Web Analytics, allowing us to identify opportunities and optimize content to offer our best products and services.

We continue to offer chat as an additional communication channel, enabling faster and more convenient customer support.

We have strengthened security and transaction monitoring and implemented metrics to identify more effective actions, enhancing the customer experience in the bill payment section. We also continue to offer a free anti-malware tool.

Audiomático

Audiomático is a telephone service that allows customers to perform various banking transactions quickly and securely, available 24 hours a day, 365 days a year, with certain time restrictions for investments and bill payments.

We also ensure security through the use of access codes.

5.1 Corporate Citizenship Model 61
5.2 ESG Governance 62
5.3 Responsible Environmental Management 65

We present our progress toward more sustainable, efficient operations, committed to environmental stewardship. From emissions mitigation to climate risk management, each action reinforces our conviction that caring for the planet is integral to our business model.

5.1 Corporate Citizenship Model

GRI 3-3
SASB FN-AC 410a.2
IBSO C.5.

In 2025, we completed the update to Grupo Financiero Banamex's double-materiality assessment.

The material topics presented in this report have been identified and prioritized in line with our business model, products, services, and operations, as well as our organizational culture and our impact on the communities we serve. These 15 topics* align with the four pillars of our Corporate Citizenship Strategy, which guide how we monitor and manage the issues most relevant to our stakeholders.

We also considered the interests of investors and key stakeholder groups, aligned with the requirements of the United Nations Sustainable Development Goals (SDGs) and the Ten Principles of the United Nations Global Compact.

Our Corporate Citizenship Model is structured around four pillars, with 11 priority areas aligned with eight SDGs:

01.
Economic Development
- Financial Inclusion
- Responsible Investment
- Sustainable Finance

02.
Environment
- Social and environmental risk management
- Environmental footprint
- Energy efficiency
- Sustainable Cities

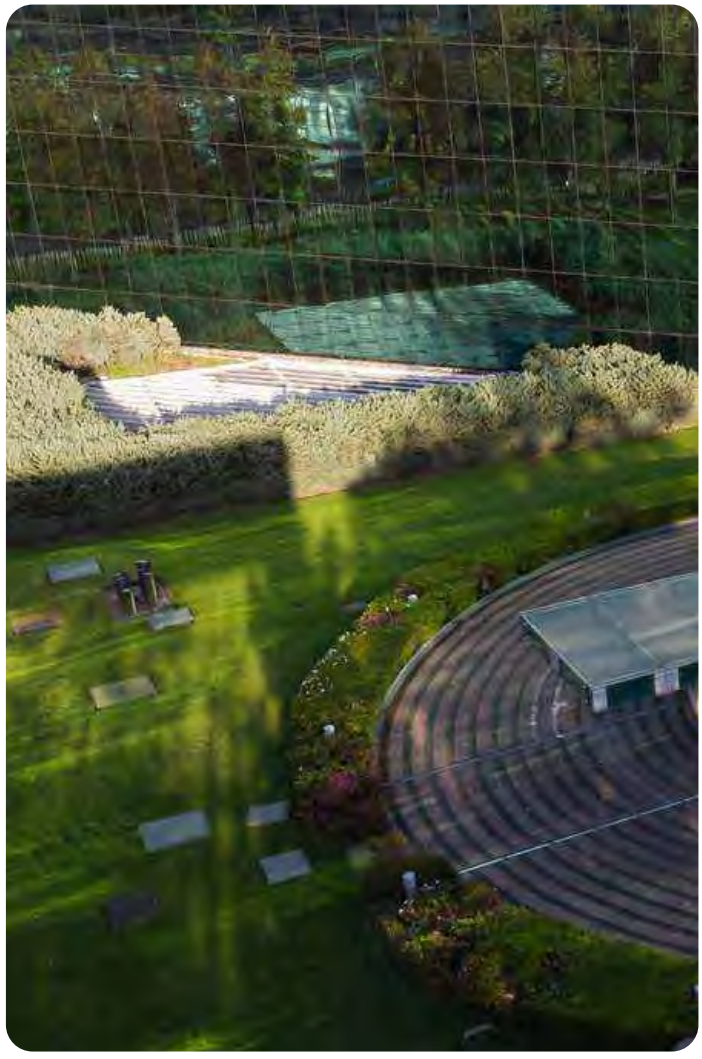

03.
Responsible Finance
- Anti-corruption

04.
Equal Opportunities
- Decent work
- Gender equality
- Inclusion of persons with disabilities

* For further details, see Section 11.4, Double Materiality Analysis.

5.2 ESG Governance

GRI 2-12, 201-2, 3-3

In 2025, we further enhanced our governance model by implementing Grupo Financiero Banamex's Environmental, Social, and Governance (ESG) Forum.

The ESG Forum is a governance body reporting to the Executive Committee on Business Strategy and is responsible for:

- Setting the strategic vision and supporting the integration of ESG considerations into GFB's strategy, processes, and objectives, including those related to climate risk.
- Overseeing ESG program performance and implementation progress.
- Ensuring and guiding the development, implementation, and compliance of ESG-related policies, as well as regulatory requirements.
- Overseeing the comprehensive management of ESG risks, including climate risk.
- Promoting an ESG culture across Grupo Financiero Banamex.
- Establishing the approach to integrate ESG criteria into financial products and processes.
- Driving the incorporation of ESG criteria into investment products, including responsible investment initiatives.
- Determining the disclosure and reporting approach.

The Forum was formally established and held its first session in May 2025, with a 94% attendance rate among its members during the year.

The ESG Forum brings together representatives from the following areas across Grupo Financiero Banamex:

- Independent Risk Management
- Afore Banamex
- Internal Audit
- Banamex Seguros and Pensiones
- Corporate and Institutional Business
- Wealth Management, Private Banking and Segments
- Human Capital and Culture
- Social Commitment
- Finance
- Legal
- Markets
- Operations and Technology (O&T)
- ESG
- Compliance and Internal Control
- Governance and Control
- SME
- Investor Relations
- Consumer Risk
- Treasury

Estructura

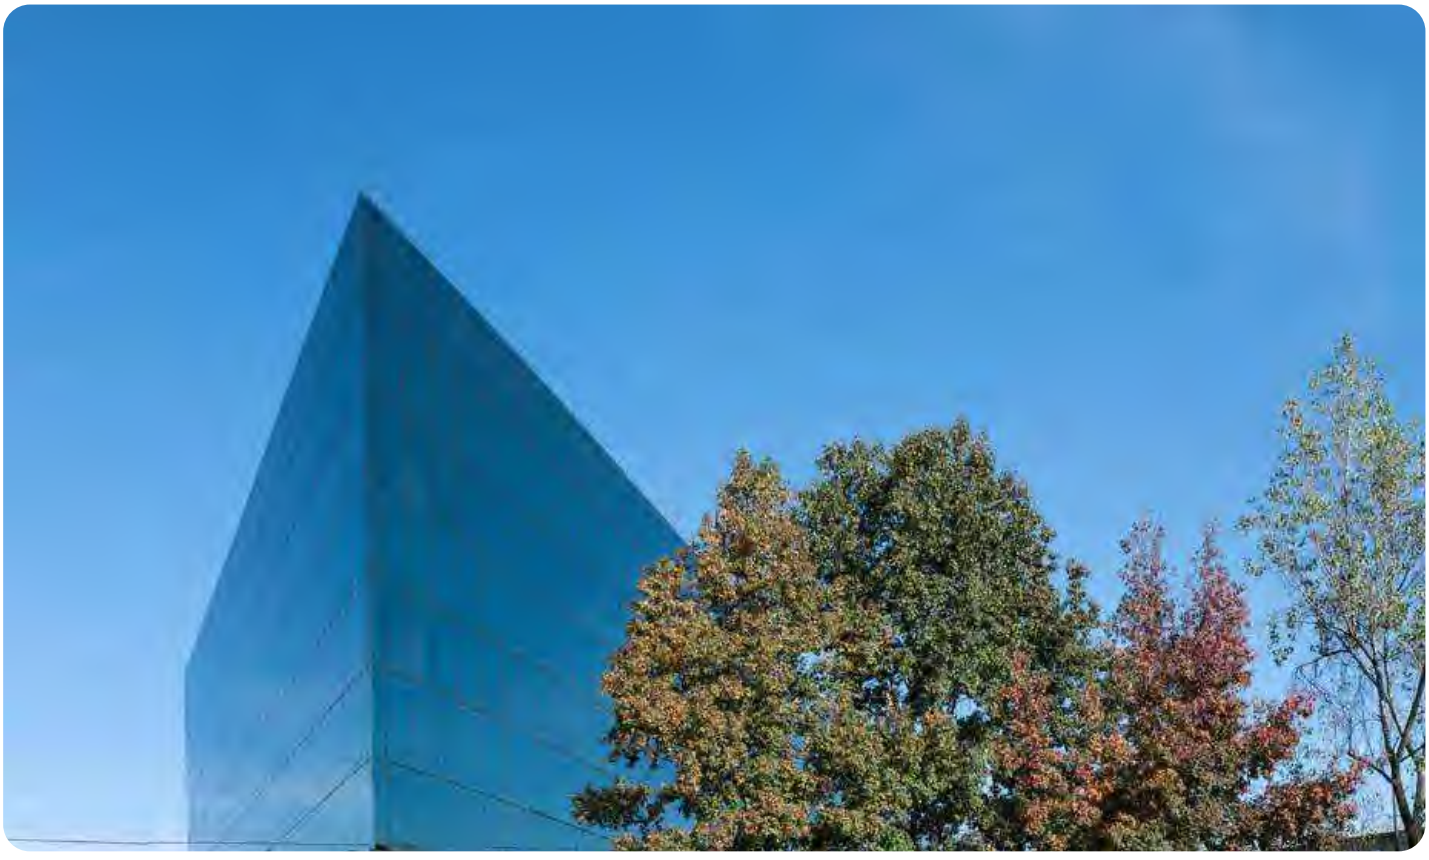

Since 2021, we have used an ESG Dashboard to track key initiatives aligned with our sustainability strategy. To support effective management, this dashboard is incorporated into senior management's annual performance evaluation. It serves as a key mechanism for delivering on our objectives and promoting accountability and measurable impact.

Governance oversight was expanded in 2025 by incorporating progress tracking into reports reviewed by the Board of Directors through the Corporate Practices Committee, further embedding sustainability into the Group's strategic decision-making.

That same year, progress tracking was also incorporated into the Executive Committee on Business Strategy, the Group's senior executive body, reinforcing alignment at the executive level.

In addition, following the integration of climate risk into our enterprise risk management framework, the Independent Risk area expanded its responsibilities to include oversight of climate risk. This enhances the Group's ability to assess, monitor, and mitigate climate-related risks, while also identifying sustainable financing opportunities and supporting their integration into business strategy and decision-making.

5.2.1 ESG Office Management

GRI 2-9,2-12,2-13

We implement our initiatives through our corporate divisions. Each division has defined indicators to measure the social and environmental impact of its business activities, supporting continuous improvement.

Responsibility for managing ESG matters across the organization lies with the ESG Office, which is part of the Social Commitment function. It was established in 2008 and reports directly to the Corporate Affairs Division, with updates provided to the Group's Chief Executive Officer through the Head of Social Commitment and the Head of the ESG Office.

Progress in this area was reported monthly to the Group's Chief Executive Officer and quarterly to the Risk Committee and the Executive Committee on Business Strategy.

In 2025, we made significant progress in our Corporate Citizenship efforts:

- We continued executing our strategy, with all corporate division heads committed to 2025 targets and indicators, which were incorporated into their dashboards.
- We worked with expert leaders to provide training to members of the Group's Board, as well as Afore and Insurance entities.
- We met the targets and work plans set out in the 2025 ESG Dashboard.
- We delivered cross-functional ESG training on sustainable finance and responsible investment.
- For the second consecutive year, we were recognized by the National Commission for the Protection and Defense of Financial Services Users (CONDUSEF) with the "Insignia de Adultos Mayores" (Commitment to Serving Older Adults Insignia), which promotes inclusion and fair treatment of older adults and recognizes their role in society and the financial sector.
- We continued measuring the carbon footprint of our commercial loan portfolio (Business Banking and SMEs) and the Afore investment portfolio (S3-c15).
- We advanced the analysis of physical and transition risks across our commercial loan portfolio (Business Banking and SMEs) and the Afore investment portfolio, enabling us to identify opportunities for improvement to be implemented in 2026 to support decision-making.

5.3 Responsible Environmental Management

In response to the urgency of climate change, Banamex focuses on three key areas to support the transition to a sustainable economy:

01.

Financing sustainable and responsible solutions:

We direct lending toward low-carbon solutions across sectors and activities, including renewable energy, clean technology, sustainable transport, green buildings, energy efficiency, the circular economy, agriculture, and sustainable land use, as well as water quality and conservation.

From the Afore perspective, this includes making investment decisions in line with ESG investment policies, collaborating on climate-related matters, and participating in initiatives to advance sustainability goals.

02.

Enhancing the assessment and disclosure of environmental, social, and climate-related risks:

We take an integrated approach to managing social and environmental risks, including physical and transition climate risks, and their impact on the Business Banking and SME loan portfolios and the Afore Banamex investment portfolio.

03.

Reducing the environmental impact of operations and emissions across our portfolios:

- Implementing improvements across owned and leased properties—including offices and branches—covering a total of 838,065 square meters (m^2) across all 32 states of Mexico.
- Advancing our decarbonization strategy for the Business Banking and SME loan portfolios, as well as the Afore Banamex investment portfolio.

Environmental Impact of Loan and Investment Portfolios

As part of our climate strategy, Banamex has developed a roadmap to manage greenhouse gas (GHG) emissions and climate-related risks—both physical and transition—across its Commercial Banking and Afore investment portfolios. As an initial step, we have defined a work plan to measure the carbon footprint of these portfolios.

For Commercial Banking, this exercise was designed to establish an initial strategic direction for identifying and measuring emissions, focusing on four key sectors within Business Banking and three within SMEs, selected based on their climate relevance and level of exposure. The methodology incorporated current progress in identifying climate impacts and existing measurement and monitoring capabilities to define concrete steps toward climate alignment and to support more sustainable portfolio decisions over the medium and long term.

The calculation was based on Category 15 (Scope 3) indicators under the Greenhouse Gas Protocol (GHG Protocol S3-C15) and on the Partnership for Carbon Accounting Financials (PCAF) methodology.

Sectors Included in the S3-C15 Emissions Calculation

6%
Agriculture
(Business Banking)

5%
Transport
(Business Banking and SMEs)

18%
Manufacturing Industries
(Business Banking and SMEs)

16%
Wholesale Trade
(Business Banking and SMEs)

Total Emissions

GRI 305-1, 305-2
IBSO A.1. A.2. A.3.

Sector	Total Financed Emissions - Scope 3 (tCO_2e)	% Commercial Banking	% SME
Agriculture	782,236.90	100%	0%
Wholesale Trade	2,713,118.84	14%	86%
Manufacturing Industries (Food, Beverages, etc.)	669,422.68	70%	30%
Manufacturing Industries (Wood, Paper, etc.)	1,047,305.08	59%	41%
Manufacturing Industries (Metals, Machinery, etc.)	954,161.66	28%	72%
Transport, Postal, and Storage Services (Air, Rail, etc.)	1,109,098.01	60%	40%
Transport, Postal, and Storage Services (Postal and Courier Services)	7,255.21	33%	67%
Total	**7,282,598.38**	**44%**	**56%**

These sectors include Business Banking and SMEs, which together represented approximately 16% of the total portfolio as of year-end 2024.

This calculation represents a key step in developing our roadmap for managing GHG emissions and climate-related risks, including both physical and transition risks. It provided an initial assessment of our climate footprint and helped identify opportunities to strengthen data coverage and quality (our data score was 4). This enables more precise measurement, reduces reliance on proxies, and results in more robust estimates of financed emissions.

In parallel, we will advance the development of Grupo Financiero Banamex's local Climate Policy, which will establish the principles and guidelines to steer the Group's approach to climate change and decarbonization.

Decarbonization Business 2025-2026

Phase 1		Phase 2		
Bank (Commercial Banking and SMEs)	**Afore**	**Bank (Commercial Banking and SMEs)**	**Afore**	**Grupo Financiero**
Establish a baseline for financed emissions in material sectors.	Conduct sector-level technical analysis to support emissions reduction targets.	Improve financed emissions inventories.	Design and implement emissions reduction strategies.	Define the Group's Climate Policy.

Environmental, Social, and Climate Risk Management

We continued to enhance the analysis of transactions from an environmental and social risk perspective, which remains a core strength of our credit evaluation process.

As part of the bank separation process, a key priority was to align the Environmental and Social Risk Management Policy with Banamex's strategy while maintaining a focus on the best market practices and reference standards. The policy was also integrated into the credit analysis process between the Commercial Lending Unit (CLU) and the Environmental, Social, and Governance (ESG) Office.

As part of this update, the policy expands coverage across economic sectors, based on the risk categorization framework proposed by the Mexican Banking Association (ABM).

The process established under the Bank's policy enhances the scope. It ensures the effective identification, categorization, assessment, and management of environmental and social risks associated with the financing portfolio, as outlined below:

Identification

Project and/or costumer information is collected and analyzed.

Categorization

A risk category (high, medium, or low) is assigned to each sector.

Assessment

Potential environmental and social risks are assessed.

Management

Commitments, action plans, and mitigation measures are monitored based on the findings.

This supports more effective risk prioritization, particularly in sectors with higher exposure. In 2025, the ESG Office evaluated 23 projects across multiple sectors, categorized in accordance with the Bank's policy as follows:

Category A	Category B	Category C	Total
3	12	8	23

During the year, we developed an internal guide to standardize the capture of environmental and social risk information from the early stages of credit analysis. This enables the timely identification of high-risk transactions and supports further assessment through targeted environmental and social due diligence questionnaires, currently under development.

In addition, each quarter, an analysis of the Institutional Business Banking portfolio is presented to the Bank's Risk Committee. This analysis is based on the Bank's Environmental and Social Risk Management Policy and the Environmental and Social Risk Categorization recommended by the Mexican Banking Association (ABM), in line with regional and international best practices. It identifies and monitors economic sectors that may pose potential risks to the environment and society.

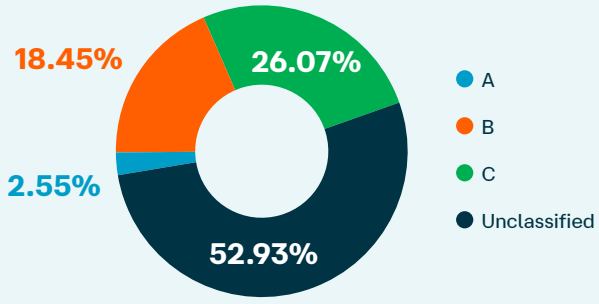

The following table presents the results as of year-end 2025 for sectors with the highest concentration of Category A (high) risk:

SCIAN Code	Sector, Subsector, Industry	%
Sector 11	Agriculture, animal production, forestry, fishing, and hunting.	0.04
Sector 21	Mining.	0.04
Sector 31-33	Manufacturing Industries.	2.47
Total Category A Risk		**2.55**

The following chart illustrates the total portfolio for 2025, broken down by risk percentages for Categories A, B, C (High, Medium, and Low), and Uncategorized.

Category A: Significant adverse risks and/or impacts that are diverse, irreversible, or unprecedented.
Category B: Limited risks and/or impacts that are few in number, generally site-specific, largely reversible, and readily addressed through mitigation measures.
Category C: Minimal or no risks and/or impacts.
Uncategorized: Sectors not considered in any of the aforementioned categories.

Institutional Business Banking

Climate Risk

As uncertainty continues to shape the operating environment, anticipating and managing risks that may affect long-term sustainability and competitiveness is essential. At Grupo Financiero Banamex, we recognize climate risk as an emerging risk and play an active role in supporting mitigation and adaptation efforts to limit its impact.

As part of our commitment to integrating climate risk into our risk management framework, we conducted an initial assessment of climate exposure in 2024, focused on identifying and prioritizing transition and physical risks across both the Bank and the Afore. For transition risks, we used climate scenarios to assess the potential impact of different regulatory, economic, and technological pathways on the sectors represented in our portfolios, helping us anticipate their vulnerability and capacity to adapt over the medium and long term.

In 2025, we enhanced our internal processes and policies to manage and oversee climate risks more systematically. We also advanced the development of methodological and governance frameworks to support the effective integration of climate risk into our enterprise risk management system.

Climate scenario analysis will remain a key tool for identifying risks and opportunities, assessing their nature, likelihood, and potential impact, and informing decision-making.

As data becomes more granular, we will refine our assessment criteria by incorporating both qualitative and quantitative factors and strengthening our oversight mechanisms.

In 2026, we will continue developing our risk management framework to support its integration into credit origination and investment decision-making. We will also advance the development of the Group's Climate Policy, which will define the principles and guidelines for managing climate risk, further strengthening our governance and strategic framework, and laying the foundation for metrics and targets.

</table>

Before the bank separation, operations were conducted under Citi's Climate Risk Management Framework.

Identification of Physical Risks for the Bank

Physical risks associated with climate change can have significant impacts, including an increased frequency of extreme weather events. These risks are categorized as acute, arising from natural disasters, and chronic, linked to long-term shifts in climate patterns.

Consistent with the Task Force on Climate-related Financial Disclosures (TCFD), we assessed the portfolio's exposure to seven key physical risks.

Table 1. Physical Risks Assessed

Flood hazard level – proportion of the municipality located in flood-prone areas.

CENAPRED, 2015

Drought hazard level – average rainfall deficit relative to historical annual averages.

CENAPRED, 2012

Wildfire hazard level

CENAPRED, 2020

Susceptibility to slope instability.

CENAPRED, 2020

Hazard level for tropical cyclones – probability of occurrence at a given intensity.

CENAPRED, 2012

Average number of heatwaves.

CENAPRED, 2012

Hazard level for low temperatures – associated with extreme minimum temperatures, the number of frost days, and official declarations related to these events.

CENAPRED, 2012

Source: National Center for Disaster Prevention (CENAPRED) and National Forestry Commission (CONAFOR).

As part of our initial climate analysis, we conducted a preliminary assessment of physical risks associated with climate change across the SME (Small and Medium-Sized Enterprises) and BEI (Commercial and Institutional Banking) loan portfolios. The figure below outlines the methodology applied.

Methodology for Assessing Physical Risk in the Loan Portfolio

01. Geographic Location

02. Risk Assessment and Exposure Level Assignment

03. Identification of High-Exposure Municipalities

In this exercise, we used geographic location based on the information available within Commercial Banking (Commercial Banking and SMEs). As a methodological proxy, we used the locations of offices associated with the loans in each portfolio. This approach provided an initial view of exposure to physical climate risks and serves as a baseline for more refined assessments as more granular portfolio data becomes available.

Climate Risk Assessment and Exposure Level Assignment

The assessment was carried out at the municipal level using Geographic Information Systems (GIS) and publicly available sources, including the National Risk Atlas of the National Center for Disaster Prevention (CENAPRED) for extreme weather events and the wildfire alert system of the National Forestry Commission (CONAFOR). These sources were used to estimate the potential exposure of assets to climate-related events.

Each risk was classified as High, Medium, or Low based on the reviewed sources, which assess the level of hazard associated with each climate phenomenon. For further details on the indicators used in the individual risk classifications, see Table 1.

Identification of High-Exposure Municipalities

Based on the individual classifications assigned to each physical risk across municipalities, a consolidated risk score was calculated at the municipal level to identify areas with the highest cumulative exposure, using the following criteria:

- **High Risk:** Municipalities exposed to three or more physical risks classified as High.
- **Medium Risk:** Municipalities exposed to two High risks or three Medium risks.
- **Low Risk:** Municipalities exposed to one Medium risk or only Low risks.

Identifying municipalities with higher exposure to physical climate risks provides a clearer view of how our loan portfolio is distributed across these areas. This analysis helps pinpoint exposures in higher-risk municipalities, informing the prioritization of risk management actions, mitigation efforts, and resilience-building initiatives for both our operations and our costumers.

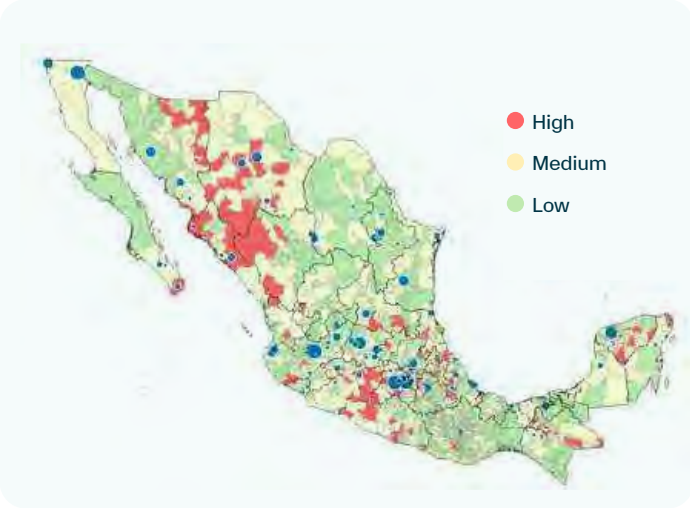

As part of the analysis, we developed a municipal-level climate risk map by aggregating individual physical risks (such as floods, droughts, hurricanes, and heatwaves). In this map, color intensity reflects the level of risk, with darker shades indicating higher risk. This visualization highlights areas where multiple high-risk factors overlap.

Given Mexico's geographic location and climate diversity, physical risks are present across the country. However, the analysis shows that certain municipalities face a higher concentration of risk due to specific geographic and climatic conditions.
This exercise represents an initial step toward systematically integrating physical risks into the Bank's risk management framework. It will serve as a foundation for future decisions related to monitoring, mitigation, and adaptation.

FN-CB-550a.2

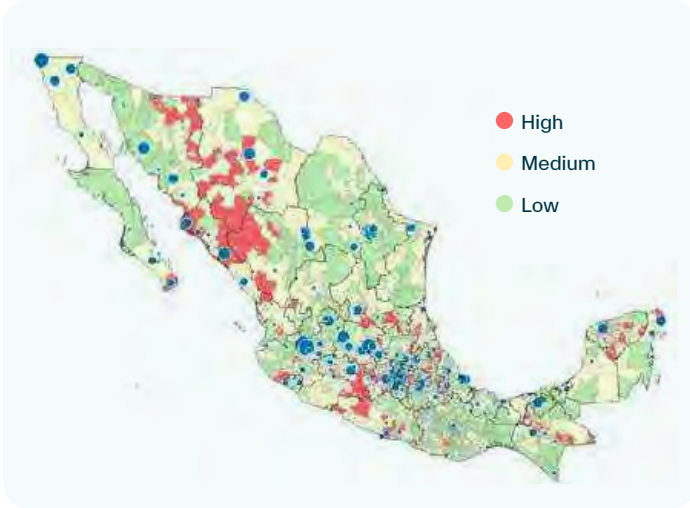

Commercial and Institutional Banking (BEI)

Municipal Physical Climate Risk Level

SME

Municipal Physical Climate Risk Level

These estimates were prepared for the Commercial Banking and SME portfolios, which together represent approximately 34% of the total portfolio, and are based on available client location data.

In 2025, we updated the analysis using the established methodology, incorporating a more detailed assessment to identify the sectors with the highest exposure to physical risks and their geographic distribution across Mexico. As a result of this update, we will prioritize data enhancements to strengthen future analyses and establish a baseline for identifying opportunities.

This is an evolving exercise that we will continue to refine and align with leading practices.

Identification of Physical Risks for the Afore

We assessed physical risks in the Afore investment portfolio using the methodology outlined below:

Methodology for Assessing Physical Risk – Afore

01.
Sector Classification

02.
Risk Assessment and Exposure Level Assignment

03.
Prioritization of High-Exposure Sectors

This exercise was designed to identify the sectors most vulnerable to climate-related events that could materially affect the long-term value and performance of financial assets.

To support this analysis, financial instruments were classified using North American Industry Classification System (NAICS) codes at the sector and subsector levels, based on the underlying economic activity. This categorization allowed us to group assets by sector, enabling a systematic assessment of relevant physical risks.

Consistent with the Task Force on Climate-related Financial Disclosures (TCFD), the key physical risks described above were evaluated. Each risk was assigned a sector-level exposure rating—High, Medium, or Low—based on the inherent vulnerability of each sector. These ratings were supported by a review of reliable public sources, including peer-reviewed scientific literature, reports from the Intergovernmental Panel on Climate Change (IPCC), publications from multilateral organizations such as the United Nations (UN) and the World Bank, and academic studies and technical papers.

Based on the exposure ratings assigned to each physical risk within a given sector, a consolidated sector-level risk score was calculated. This metric provides a clear, comparable view of physical climate vulnerability by sector, helping assess overall exposure and prioritize the most sensitive areas, while also identifying critical sectors requiring focused strategic attention.

In assessing physical climate risks in the Afore investment portfolio, we identified 10 sectors with high physical risk exposure.

Sectors with the Highest Exposure to Physical Risks

Subsector
Building Construction.
Civil Engineering Works.
Electric Power Generation, Transmission, Distribution and Commercialization; Water Supply; and Natural Gas Distribution to End Consumers.
Food Industry.
Oil and Gas Extraction.
Beverage and Tobacco Industries.
Transport Support Services.
Mining of Metallic and Non-Metallic Minerals, except Oil and Gas.
Plastics and Rubber Industry.
Pipeline Transportation.
Rail Transportation.
Chemical Industry.
Food and Beverage Preparation Services.
Machinery and Equipment Manufacturing.
Freight Transportation by Truck.
Animal Production and Breeding.
Non-Metallic Mineral Product Manufacturing.
Paper Industry.
Air Transportation.
Wood Industry.
Transport Equipment Manufacturing.

The most significant climate threats include flooding, extreme heatwaves, and tropical cyclones. These events, becoming more frequent and intense due to global warming, pose systemic risks to multiple sectors. They may lead to business disruptions, damage to physical assets, loss of investment value, reduced productivity, and higher insurance costs, among other impacts. In turn, these effects can weaken issuers' financial stability and affect the performance of financial instruments.

Identification of Transition Risks – Bank and Afore (Consolidated)

Transition risks refer to the financial and strategic challenges that organizations may face as they adapt to a low-carbon economy. These include risks related to evolving climate policies, regulations, and disclosure requirements, as well as the implementation of net-zero initiatives, carbon pricing mechanisms, and changes in energy and fuel costs. These factors can have a direct financial impact and may also affect an organization's reputation.

Consistent with the Task Force on Climate-related Financial Disclosures (TCFD), we conducted a high-level qualitative assessment of four transition risk categories across sectors, as outlined below:

Transition Risks Assessed

Risk	Description
Policy and Legal	Climate-related policies continue to evolve. Broadly, these measures fall into two categories: those aimed at limiting activities that contribute to climate change and those designed to support adaptation.
Technological	Technological advances that support the transition to a lower-carbon, more energy-efficient economy may significantly impact organizations.
Market	Climate change may affect markets in various ways, including shifts in supply and demand for commodities, products, and services as climate-related risks and opportunities are increasingly taken into account.
Reputational	Climate change has emerged as a potential reputational risk, driven by evolving perceptions among customers and communities about an organization's role in the transition to a lower-carbon economy.

Source: (TCFD,2017)

The transition risk analysis was initially conducted for both the Bank and the Afore, using a sector-based approach that enabled the identification of economic sectors with the highest exposure to risks associated with the transition to a low-carbon economy. Building on these results, we performed a focused analysis of the Bank's loan and investment portfolios to assess the exposure and vulnerability of costumers and assets under management to transition risks.

The analysis was based on the classification of economic sectors using the North American Industry Classification System (NAICS) codes, allowing exposure to be assessed according to the underlying economic activity of financial instruments.

To determine the level of transition risk—classified as High, Medium, or Low—we applied consistent criteria that consider potential impacts from regulatory, technological, market, and reputational factors, consistent with the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD).

Criteria for Defining Transition Risk Levels

Risk Level	Criterio
Low	• Minimal or predictable regulatory changes. • Stable demand. • Limited reliance on fossil fuels or availability of viable alternatives.
Medium	• Gradual transition with evolving regulations. • Adaptation possible with moderate investment. • Relevant use of fossil fuels, with substitution options.
High	• Stringent regulations with significant impact. • Significant decline in demand or the emergence of trade barriers. • High dependence on fossil fuels, with limited substitution options and high adaptation costs.

The assessment of transition risks was informed by climate scenarios developed by the Network for Greening the Financial System (NGFS), an international coalition of central banks and supervisory authorities that promotes analytical frameworks to understand and manage the economic and financial impacts of climate change.

As part of this analysis, we used two NGFS scenarios:

Current Policies Scenario

- Does not aim to meet the goals of the Paris Agreement.
- No significant reduction in net emissions.
- Limited transition, with greater exposure to physical climate risks.
- Estimated temperature increase: 2.5–2.7°C.

Net Zero 2050 Scenario

- Assumes a rapid and orderly transition to a decarbonized global economy.
- Aligned with international climate commitments.
- Requires structural changes in carbon-intensive sectors.
- Estimated temperature increase: 1.4–1.5°C.

Both scenarios were assessed across two time horizons: 2030 (short term) and 2050 (long term), to capture the evolution of climate impacts and their associated economic implications. This assessment supports the identification of potential exposures to transition risks and provides a basis for designing more effective mitigation and adaptation strategies.

The results indicate that sectors such as construction, manufacturing, trade, and transport could face elevated transition risk across scenarios and time horizons. These activities, which are closely linked to energy- or emissions-intensive processes, require focused attention to assess their capacity to adapt to evolving regulatory, technological, and market conditions.

The sector analysis also indicates that activities such as mining, oil and gas (O&G), electricity generation and distribution, and the supply of water and natural gas via pipelines to end consumers are significantly exposed to transition risks driven by regulatory, technological, reputational, and market factors.

Although the O&G sector does not hold the largest share of the portfolio, its exposure to transition risks remains significant given its high emissions intensity and strategic role in key value chains. While global oil demand has not shown a sustained decline—and in Mexico, the transition toward clean energy has progressed gradually—the sector remains a key area of risk, particularly given its exposure to regulatory changes, financial market pressures, and technological developments.

The electricity generation sector also faces elevated transition risks, driven by regulatory frameworks such as the Energy Transition Law (2015) and the National Energy Plan 2024–2030. These frameworks promote a shift toward clean energy and improved operational efficiency, requiring significant investment in the short and medium term. Transition risk in this sector is further heightened by the continued reliance on non-renewable energy sources and by the technological, economic, and timing challenges associated with transitioning to more sustainable energy models.

Given the portfolio's diversified nature, it is essential to complement traditional sector analysis with a broader view that accounts for risks across the value chain. Intermediate or support sectors, even if they do not represent a significant share of direct investment, may be exposed to material indirect risks through their links to suppliers, customers, or critical processes. This broader perspective enables a more strategic assessment of potential impacts and a clearer identification of portfolio vulnerabilities.

Transition Risk Assessment for the Bank and Afore by Sector, Scenario, and Time Horizon

SCIAN Sector	Sector Name	Baseline	Current Policies		Net Zero 2050

Metrics and Targets

The analysis identified key opportunities to strengthen the Group's climate alignment, particularly in governance and data management. This work provides a solid technical foundation to inform future strategic decisions. Based on these findings, we have defined the following priority actions to enhance climate management in upcoming reporting cycles:

- **Strengthening climate governance:** Formal mechanisms (policies and action plans) will be established to integrate climate risk management into the corporate governance structure, including clear oversight responsibilities for the Board of Directors and senior management.
- **Internal training and awareness:** Training programs will be implemented to strengthen technical capabilities across the Bank and Afore, including the Board and Committees, in climate risk and sustainability.
- **Data governance:** We will enhance the quality and availability of information on the location of financed assets, project characteristics, and costumers mitigation and adaptation plans to enable more precise climate assessments, particularly for exposures identified as high risk.
- **Engagement with costumers and strategic partners:** Dialogue with the most exposed sectors will be promoted to better understand their transition and resilience strategies.
- **Monitoring and continuous improvement:** The Bank will establish performance indicators and feedback mechanisms to track progress in climate management and adjust its strategy in response to evolving regulatory and scientific developments.
- **Deepening risk analysis:** Methodologies for assessing physical and transition risks will continue to be refined, incorporating climate scenarios, more granular geographic data, and relevant sector-specific metrics.

Partnerships for Risk Management: Our Role in the ARISE MX Private Sector Alliance for Disaster-Resilient Societies

In disaster risk management, Banamex was appointed lead of the Investment Working Group for Disaster Risk Prevention within ARISE MX.

In 2025, in collaboration with the SME Investment Working Group and El Colegio de México, we identified that the limited integration of risk considerations into SME investment decisions creates significant vulnerability to disaster risk. This increases both the potential magnitude of losses and the difficulty of timely recovery. In many cases, it can lead to prolonged operational disruptions, material economic losses, and even permanent business closures, with direct implications for sustainable development and community resilience.

In response, we coordinated efforts to develop a practical guide to help SMEs integrate disaster risk into investment decision-making processes. The guide emphasizes that risk integration is not optional, but a strategic necessity to protect assets, ensure business continuity, and strengthen resilience.

https://resilienciaenunacaja.com/wp-content/uploads/2026/03/GUIA-DE-DESASTRES-COLMEX_200326.pdf

The guide was developed through applied research, combining qualitative analysis of disaster risk literature with quantitative insights from the SME Working Group's Business Resilience Self-Assessment.

In 2026, we plan to formally launch the guide and promote its adoption through chambers of commerce and other relevant platforms, with the goal of enabling SMEs to strengthen their structures and enhance resilience.

5.3.3 Ecoefficiency

GRI 3-3, 302-1, 302-3, 302-4, 302-5, 303-1, 303-5, 305-1, 305-2, 305-4, 305-5, 306-1, 306-2, 306-3, 306-4, 306-5

Energy Transition

GRI 302-1,302-3,302-4,302-5
IBSO A.4. A.5.

Since 2014, Banamex has sourced renewable energy for its operations through an agreement with the Dominica I Wind Farm, located in Las Charcas, San Luis Potosí, which remains in operation. This positions Banamex as the first bank to implement this type of initiative.

Emissions

GRI 305-1, 305-2, 305-4, 305-5

We follow the Greenhouse Gas Protocol (GHG Protocol) to measure greenhouse gas (GHG) emissions.[6]

Emissions are consolidated using an operational control approach. The following gases are included in the calculation: carbon dioxide (CO_2), methane (CH_4), and nitrous oxide (N_2O).

Environmental Indicators – Energy	2024	2025
Occupied space (m^2) (contractual)	873,988	838,065
Employees	39,524	37,794
Electricity (GWh)	172.37	168.21
Fuel consumption (GWh)	7.71	3.78
Natural gas consumption (GWh)	0	0.00
LPG consumption (GWh)	1.80	1.25
Diesel consumption (GWh)	5.91	2.53
Total Energy (GWh)	**180.08**	**171.99**
kWh per occupied space	206.04	205.22
kWh per employee	4,556.21	4,550.72
Wind energy (GWh)	63.77	62.60

Environmental Indicators – Emissions	2024	2025*
LPG and diesel emissions (tCO_2e)	2,510.26	1,579.83
Emissions from energy consumption (tCO_2e)	76,530.71	74,684.47
Total CO_2e (t)	**79,040.97**	**76,264.30**
CO_2e offsets from renewable energy (t)	28,311.89	27,795.97*
Net CO_2e (t)	**50,729.08**	**48,468.33**
Net CO_2e (t) per occupied space	0.058	0.058
Net CO_2e (t) per employee	1.28	1.28

Total energy consumption decreased year over year, consistent with the reduction in occupied space.

In 2025, emissions decreased by 3.5% compared to 2024, equivalent to a reduction of 2,777 tCO_2e.

[6] Most of our emissions correspond to Scope 1 and are primarily associated with energy consumption in our operations. Calculations are based on global standards, and renewable energy offsets are updated annually. CO2e emissions are calculated using the emission factor of Mexico's National Electric System.
We apply the technical specifications and formulas established for calculating greenhouse gas emissions, including the global warming potentials (GWPs) defined by the Intergovernmental Panel on Climate Change (IPCC).

* Emissions from energy consumption were calculated using the 2024 electricity emission factor.

Water

GRI 303-1,303-5

We recognize the need to use water more efficiently and responsibly. As part of this effort, we expanded rainwater reuse initiatives and installed water-efficient sanitary fixtures.

Environmental Indicators – Water	2024	2025
Total water consumption (m^3)	437,459	393,595

Based on an assessment of our operational footprint, we do not operate in water-stressed areas.

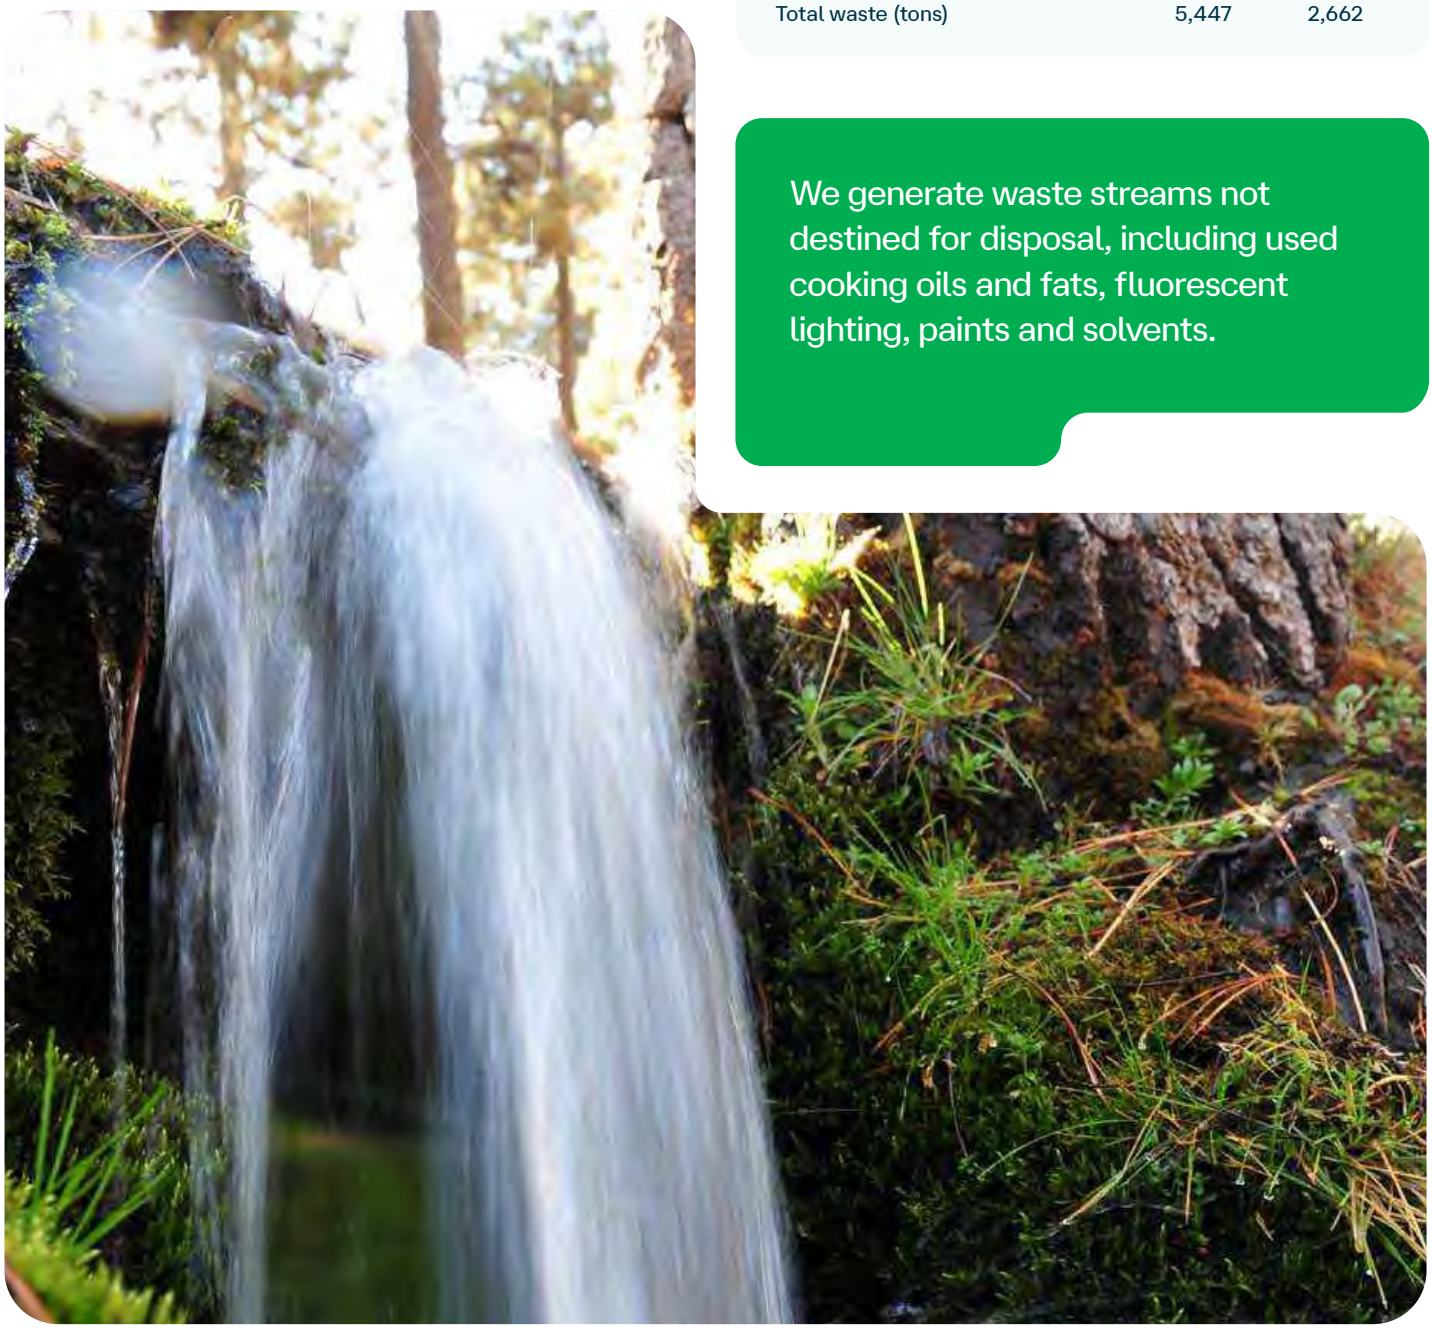

Waste

GRI 306-1, 306-2, 306-3, 306-4, 306-5
IBSO A.14.,A.15.

In 2025, we strengthened waste-collection tracking, improving data management and supporting more-informed decision-making. This initiative was carried out in collaboration with strategic partners, including City Garden, Recupera, and Sodexo.

Environmental Indicators – Waste	2024	2025
Recycling (tons)	275	230
Other waste (tons)	5,172	2,432
Total waste (tons)	5,447	2,662

We generate waste streams not destined for disposal, including used cooking oils and fats, fluorescent lighting, paints and solvents.

Sustainable Finance

GRI 2-24,3-3,416-1,417-1
SASB FN-CB-410a.2, FN-CB-410b.1, FN-CB-410b.2, FN-CB-410b.3, FN-CB-410b.4

At Banamex, we view sustainable finance as a strategic lever to support the country's economic development while responsibly managing the environmental, social, and climate-related risks and opportunities associated with our financial activity. Sustainable finance is not a standalone initiative, but a core component of our business strategy and our contribution to Mexico's sustainable development.

Our definition of sustainable finance spans multiple economic sectors, aligned with both our internal taxonomies and local frameworks, as well as leading practices. In our internal taxonomies, eligible activities include those related to the following sectors:

- Agriculture.
- Energy, water, and gas supply for end use.
- Construction.
- Manufacturing of specific goods.
- Commercial and passenger transport.
- Waste management and remediation services.

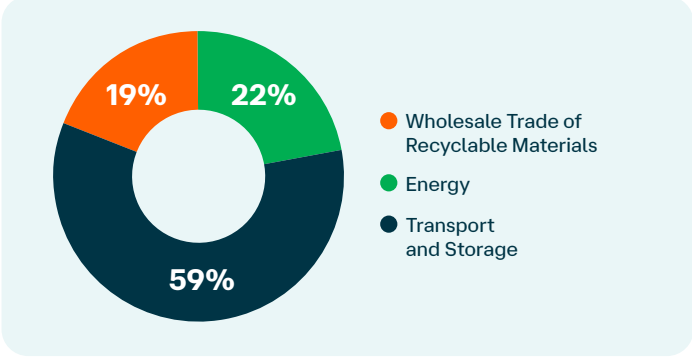

These sectors represent key areas for advancing a more resilient, resource-efficient, and socially inclusive economy.

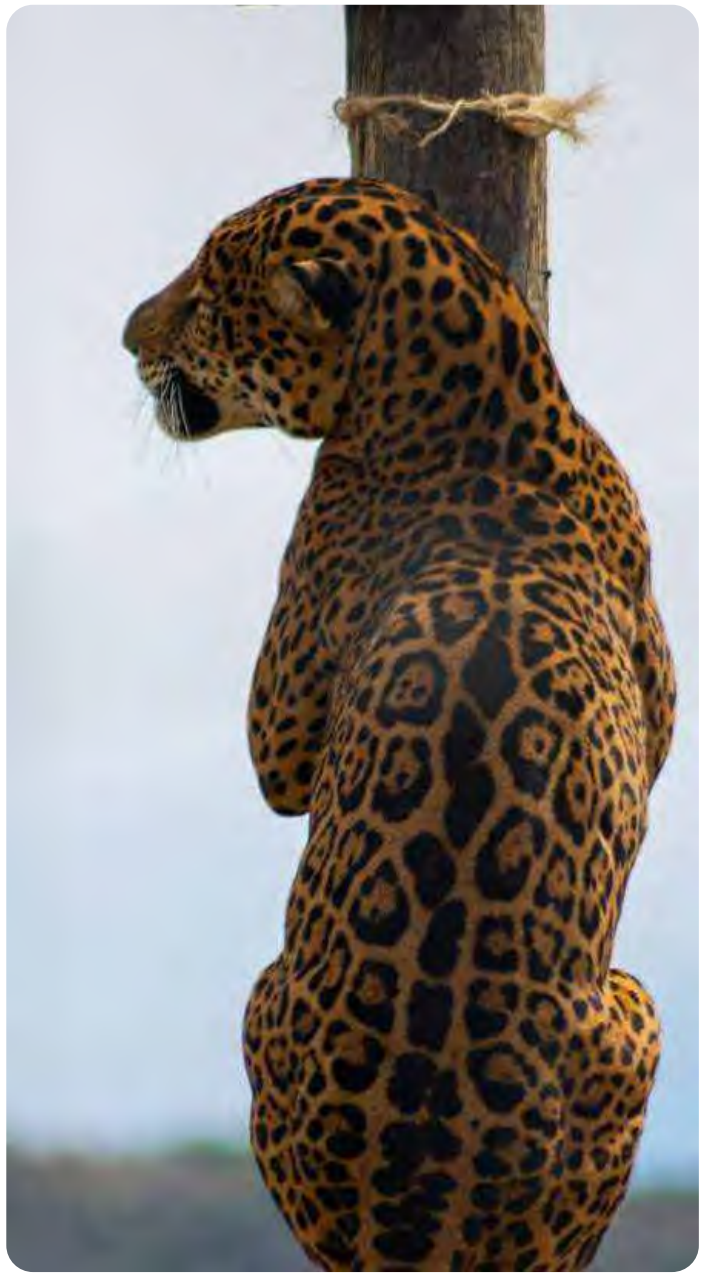

In 2025, through Commercial and Institutional Banking and SMEs, we channeled financing toward projects and activities that generate positive environmental and social impacts. Total sustainable finance amounted to 8.526 billion pesos, allocated across loans aligned with social and environmental criteria consistent with our definition and eligibility standards.

Business Banking and Institutions

Of the total amount, 2.609 billion pesos was allocated through Government Banking and 2.446 billion pesos through Business Banking. The latter is aligned with internal and local taxonomies and distributed across the following industries:

Sustainable Finance by Industry

Looking ahead, we will continue to strengthen our sustainable finance capabilities by expanding sector coverage, deepening the integration of environmental and social risks into credit decision-making, and enhancing the quality of our disclosures. We are confident that sustainable finance is a key driver in building a more resilient, competitive Banamex, aligned with Mexico's sustainable development.

As part of our 2025 initiatives, we partnered with the Mario Molina Center, the Aspen Network of Development Entrepreneurs (ANDE), and Banamex's SME and Government Banking teams to deliver awareness sessions and workshops on the Sustainable Cities Index. These sessions provided an overview of both overall and city-specific results and engaged 1,357 participants from various sectors. They also supported the identification of investment and collaboration opportunities to advance the Sustainable Development Goals (SDGs) in the participating cities, while highlighting key challenges, progress, and opportunities.

These activities included workshops and awareness sessions related to the sixth edition of the Sustainable Cities and States Index, led by specialists from the Mario Molina Center and the ESG Office, and coordinated by Government Banking, SMEs, and Social Commitment. In total, we conducted 20 in-person events and one virtual session, with participation from the states of Guanajuato, Guerrero, Jalisco, Nuevo León, Oaxaca, Puebla, Querétaro, Veracruz, Yucatán, and Zacatecas.

In 2026, we will continue working with our partners to deliver these workshops, which have generated strong interest among our clients, and to further strengthen our alliances in support of the Sustainable Development Goals (SDGs).

The development of the Index, along with the delivery of these sessions and workshops, reflects how Banamex promotes sustainable, equitable, and inclusive growth, creating not only economic value but also supporting the well-being of the communities in which we operate, in line with environmental stewardship.

Sustainability is embedded in our business strategy, and in partnership with Business Banking, we aim to ensure that all our products and services deliver positive environmental and social impact in the country.

FN-CB-240a.1

SME Lending

In 2025, we continued extending credit through special programs launched in 2015 to support SME lending.

Between 2015 and 2016, we introduced targeted programs to expand SME lending, and in 2025, we continued to provide financing through these initiatives.

01.

Sustainable Business Loan

Through Sustainable Banking, and in strategic partnership with the Inter-American Development Bank (IDB), we implemented the Sustainable Business Loan program, aimed at SMEs that allocate loan proceeds to renewable energy and sustainability projects with demonstrated technical, commercial, and financial viability.

From its launch in August 2015 through December 2025, a total of 1,857 loans have been granted, representing cumulative financing of 3.709 billion pesos.

02.

Women Entrepreneurs Loan

This program supports the development and growth of micro, small, and medium-sized enterprises led by women by providing access to preferential financing and business development tools. From 2016 through December 2025, a total of 11,318 loans were extended, totaling 13.236 billion pesos.

As part of our sustainable finance targets, 3.471 billion pesos was allocated to the SME Women Entrepreneurs Loan program.

03.

State-Level Initiatives

This program aims to promote lending in priority sectors defined by each of the 32 participating states. From its launch in 2014 through December 2025, a total of 6,321 loans have been extended, representing MXN 7,568 million in financing.

5.3.1 Afore

SASB FN-AC-330a.1, FN-AC-410a.1, FN-AC-410a.2, FN-AC-410a.3

Responsible Investment

At Afore Banamex, our Responsible Investment strategy integrates material ESG factors into applicable[7] investment processes to strengthen investment decision-making. ESG information is a core component of our analysis, giving us a clearer view of the risks and opportunities associated with companies and their underlying investment assets.

Our ESG integration strategy currently covers between 90% and 100% of the investment assets under management.

As part of our approach to alternative investments, we apply an exclusion list covering controversial activities, which limits or prohibits exposure based on thresholds and scope aligned with leading market practices.

We recognize our role in the transition to a low-carbon global economy and in supporting economic and social development. Integrating environmental, social, and corporate governance principles into the investment process is essential to fulfilling our fiduciary duty and supports better investment decisions across our strategy, including risk management.

Our Responsible Investment Strategy is built on the following pillars:

01.
ESG Integration

We incorporate ESG factors into the investment process to identify risks and opportunities.

02.
Active Ownership and Engagement

We promote ESG best practices among portfolio companies and actively exercise our shareholder rights.

03.
Training

We provide technical training and foster a culture in which "everyone is ESG."

04.
ESG Initiatives

Strategic partnerships:

We are also developing a fifth pillar focused on priority systemic sustainability issues, starting with climate change and expanding to biodiversity and human rights.

[7] The ESG process covers all asset classes in which the Siefores invest, except commodities, where we continue to define applicable best practices and material ESG factors.

ESG Integration

This pillar strengthens the investment process by combining material financial and non-financial information to build a deeper understanding of the instruments we invest in, as well as the ESG risks and opportunities associated with them. Our approach reflects the specific challenges and materiality of each sector. Through ESG integration, we aim to reduce portfolio volatility and create long-term value, supporting better outcomes for workers at retirement.

For more information on the integration process by asset class, see: https://www.aforebanamex.com.mx/portal-afore-api/zonaabierta/c/pdf/Guia_de_Inversion_Responsable.pdf

Active Ownership and Engagement

At Afore Banamex, engagement and active ownership are central to our ESG investment strategy, our long-term investment approach, and our fiduciary duty.

Our engagement strategy has two components:

- Individual engagement
- Collaborative engagement

We also exercise active ownership through the rights associated with the investments we manage, protecting the interests of our beneficiaries. This includes:

- Appointment of independent board members.
- Voting processes.

Training

Our training program builds internal awareness of ESG topics and develops the skills needed to integrate these factors into the evaluation of each asset class.

We have an annual Responsible Investment training program that builds and strengthens capabilities across all levels of the organization. In 2025, a total of 187 employees from across Risk, Investments, Legal, Investment Solutions, and other control areas participated.

Participants by topic

61
Biodiversity for financial institutions.

44
ESG fundamentals.

82
Climate risk measurement.

We focus on three core areas: biodiversity for financial institutions, ESG fundamentals, and climate risk measurement.

We also run a session series called “ESG Insights,” which takes a practical approach and allows teams to engage with external experts on emerging topics and trends in Responsible Investment. In 2025, sessions covered:

- Occupational health and safety.
- ESG trends.
- Building an integrated report.
- Creating value through a sustainability strategy.
- Biodiversity.

We also provide ESG onboarding for new employees and have developed supporting materials for the commercial team outlining our Responsible Investment strategy.

ESG Initiatives

To further strengthen our ESG strategy, Afore Banamex supports the following initiatives:

Climate Action 100+

MCOLAB

Signatory of:

PRI Principles for Responsible Investment

TCFD

Governance

At Afore Banamex, governance structures promote transparency in decision-making and provide clear accountability for the implementation of the ESG strategy.

Responsibility for executing this strategy and delivering results lies with the dedicated ESG team and the Investments and Risk teams. The strategy, its progress, and any relevant events that may affect ESG performance are regularly reported to and/or approved by the Investment Committee, the Financial Risk Committee, and the Board of Directors.

Afore Banamex is also part of Grupo Financiero Banamex's ESG Governance Forum.

ESG Risk Management

We identify and assess ESG risks and opportunities as part of our integration and risk management processes.

Metrics and Targets

Afore Banamex sets annual ESG targets, which are linked to the variable compensation of senior management and the teams responsible for implementing the ESG strategy. Progress and results are reported regularly to the Afore Banamex Board of Directors.

These targets are part of Grupo Financiero Banamex's strategic initiatives and are monitored at the Group level through the ESG dashboard.

Climate Change

According to the Intergovernmental Panel on Climate Change (IPCC), avoiding the most severe impacts of climate change requires a transition to carbon neutrality aligned with a 1.5°C scenario.

At Afore Banamex, we are committed to supporting the transition to a low-carbon economy and aligning our actions with the goals of the Paris Agreement.

Managing climate-related risks is part of our fiduciary duty. We address long-term risks in our investment portfolios while supporting inclusive development and sustainable access to natural resources across different investment horizons.

Climate Risk Strategy

To strengthen the management of climate-related risks and opportunities, we developed a roadmap in 2023 to build the internal capabilities required for climate risk management. This work aligns with IFRS standards and the TCFD implementation roadmap developed under the Climate Change Adaptation and Development Initiative (CCADI) pilot program. Once implemented, this framework will be subject to ongoing review and continuous improvement, in line with evolving commitments, tools, and advances in climate science.

For more information on Afore Banamex's Responsible Investment strategy, see: https://www.aforebanamex.com.mx/portal-afore-api/zonaabierta/c/pdf/Guia_de_Inversion_Responsable.pdf

5.3.2 Seguros Banamex

ESG – Responsible Investment

To support long-term sustainability and ensure that investments align with sound environmental, social, and governance practices, 100% of the Investments and Risk teams at Seguros Banamex and Pensiones Banamex have received training in ESG topics related to Responsible Investment.

The Investment Committee reviews ESG investment strategy, analysis, and equity portfolio performance every month.

These actions reinforce our commitment to delivering a strong value proposition to our costumers, strengthening our position in the insurance market, and enhancing value for Grupo Financiero Banamex.

Inclusion and Diversity

At Seguros Banamex and Pensiones Banamex, we actively promote equity, diversity, and inclusion across the organization. One of our priorities is to increase female representation in leadership and management roles to foster a broader range of perspectives. Women currently hold 37.1% of leadership positions, up 13.0 percentage points over the past five years.

We have a specialized, trained team dedicated to supporting older adults with their questions and assisting them with their insurance-related processes.

Older Adults

We are committed to providing dedicated support to older adults, helping improve their quality of life and promoting their inclusion. We offer a dedicated IVR option within our customer service system, as well as a specialized service team focused on addressing their questions and supporting insurance-related processes.

As part of our efforts to expand product offerings in this segment, we increased the maximum entry age for Vida Contigo to 70.

Fair Treatment

We continue to expand access to products and services that meet our costumers needs. Our life and accident insurance products include flexible features that offer a range of discounts and promotional options. Pricing is also age-based, allowing us to provide more accessible options for younger customers.

We aim to expand access to insurance across Mexico. Costumers can learn more about our products through our app and website.

We also offer products with a savings component that help costumers build capital while maintaining insurance coverage.

In line with global insurance standards and applicable regulations,[7] we maintain ongoing communication with policyholders in the Life and Accident segments via email and SMS. These communications provide key information on policy benefits, beneficiary designations, coverage details, points of contact, claims procedures, service feedback (Net Promoter Score), the importance of keeping personal data up to date, and any regulatory updates.

[7] a) Insurance Contract Act, Title I, Chapter IV, Articles 72 and 73.
b) Circular Única de Seguros y de Fianzas (CUSF), Title 4, Chapter 4.5, Article 4.5.10, Section II; Chapter 4.10, Articles 4.10.10 and 4.10.18.
c) Regulations of the Federal Data Protection Act (RLFPDPPP).
d) Federal Data Protection Act.
e) General provisions on sound practices, transparency, and advertising applicable to insurance institutions.

In branches and wealth management offices, prospective costumers have access to printed materials on new products, including key features, benefits, coverage, and services. Once a policy is issued, costumers receive full documentation, including the welcome letter, policy summary, general terms and conditions, policyholder rights, privacy notice, and authorization for recurring charges. Costumers can also access their information through the online customer portal: https://www.segurosbanamex.com.mx/SB/index.html[8]

Maintaining strong service and relationships with our costumers is a priority. We ensure consistent, controlled communication across our products, services, and processes in line with applicable regulatory requirements. As a result, to date, we have not received any rulings arising from lawsuits or legal proceedings related to advertising or communications with policyholders.

Through our Global Fair Treatment Policy, we reinforce our commitment to being a trusted partner by providing financial services responsibly and supporting economic growth. All employees of Seguros Banamex, as well as third-party providers who interact with costumers on our behalf, are expected to uphold fair treatment throughout the lifecycle of our products and services.

6.1	Responsible Marketing	90
6.2	Customer Service Units (Complaints)	94
6.3	Advertising Responsibility	96
6.4	Supply Chain Relationships	97

We maintain a strong culture of integrity and compliance across the organization. This section outlines the policies, codes, and programs that promote ethical conduct, compliance with applicable laws, and the protection of our customers, supporting a secure, transparent, and responsible operation.

6.1 Responsible Marketing

At Grupo Financiero Banamex, we promote a culture of fair treatment that is consistent with our Mission and Value Proposition, Leadership Standards, Code of Conduct, and Conduct Risk program. This framework enables us to build trust with our costumers in line with the highest standards.

Fair Treatment Program

The Fair Treatment Program is based on Citi's Global Consumer Fair Treatment Policy. It sets out the requirements and principles that guide how we uphold high ethical standards across all businesses within Grupo Financiero Banamex, including activities involving products and services, initiatives, practices, offerings, and consumer programs. This approach helps protect our costumers and reinforces our reputation as a trusted partner.

The program establishes a clear mandate to act as a trusted partner by responsibly providing financial products and services. It is a core element of how we do business and requires all employees to follow the principles of Responsible Finance, reflecting our commitment to serving costumers with fairness, value, clarity, and trust. We meet this commitment by listening to our costumers, understanding their needs, and offering appropriate solutions.

The Fair Treatment Program is supported by centralized governance and monitoring to ensure consistent execution and long-term sustainability. It also includes an organization-wide awareness and training strategy, with mandatory annual training for all employees, helping embed the program into our culture.

In addition, in line with the Institutional Escalation Policy, we continuously reinforce the importance of promptly escalating any concerns or events that may affect fair treatment, enabling timely assessment and mitigation.

Principles of the Fair Treatment Program

The Fair Treatment Program sets out principles that apply throughout the lifecycle of the products and services we offer to our costumers.

Works as Intended

Costumers can rely on products and services to perform as described. Post-sale requirements—such as switching products or providers, submitting claims, or filing complaints—are clearly explained and reasonable.

Easy to Understand

Costumers understand the terms and conditions of products and services, including limitations and exclusions. We establish a business relationship only after obtaining the costumers explicit consent. All information is clear and easy to understand.

Appropriate

Costumers can trust that Banamex offers products and services that meet their needs and are marketed appropriately. The information we provide is relevant and suitable.

Delivers Value

Costumers receive fair value relative to the cost of products and services. All costumers are treated fairly in the provision of those products and services.

Protocol for the Care and Service of Older Adults

As part of our commitment to Mexico and its people, Banamex has implemented and strengthened a series of actions and programs aligned with the Basic Principles for the Care of Older Adults in the Financial Sector, issued by the National Commission for the Protection and Defense of Financial Services Users (CONDUSEF). These initiatives aim to enhance the service model for older adults by promoting ethical principles and best practices and establishing standards, behaviors, and actions to address their needs and improve access to financial services.

Through a centralized governance model, our protocol for serving older adults includes, among other elements, financial education programs and anti-fraud campaigns tailored specifically to this segment. We also ensure ongoing training and awareness for our personnel, supported by our institutional programs and organizational values.

Banamex has held the “Commitment to the Care of Older Adults” recognition from CONDUSEF since February 2024.

For more information on Banamex’s service model for older adults, see:

https://www.banamex.com/adultos-mayores/

Sales Practices

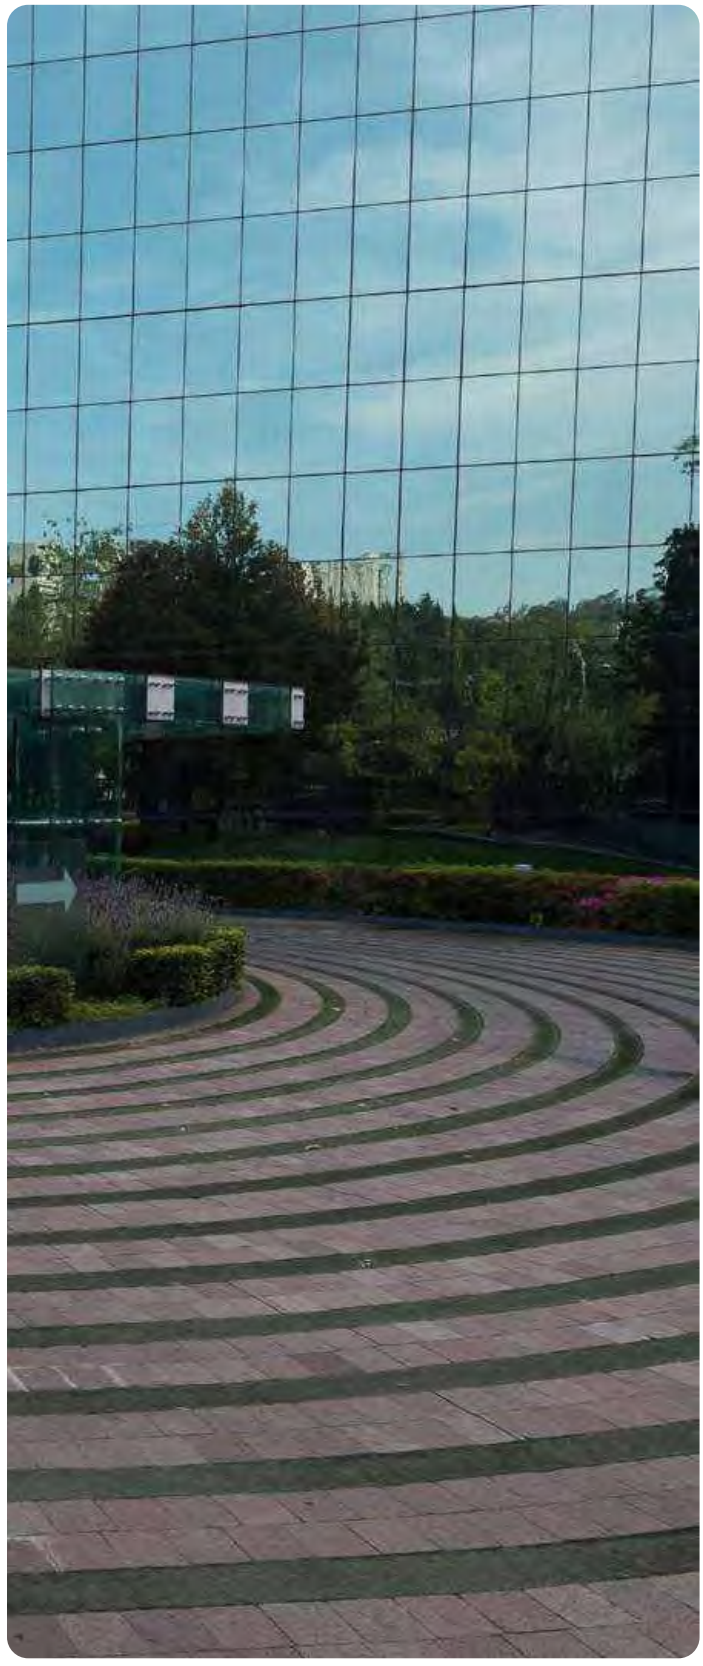

At Banamex, we have a Sales Practices Program designed to promote consistent sales practices across all business lines, aligned with our Responsible Finance principles and our Mission and Value Proposition of being a trusted partner to our costumers.

The program establishes expected standards of conduct to prevent actions that could harm costumers, whether intentional or due to negligence, including behaviors that prioritize commercial targets or personal compensation over the costumers best interest.

The program is built on the following principles:

- Employees must obtain costumer authorization for the opening and closing of accounts, as well as for transfers between accounts.
- Employees must provide clear, complete, and accurate information when promoting or executing a sale.
- Employees must ensure that the product or service offered aligns with the costumers request and needs.

The program is supported by centralized governance and monitoring, which oversee the identification, management, and reporting of risks. It also includes targeted awareness and training initiatives for commercial teams to support adoption and integration into the organization's culture.

6.1.1 Customer Relations

GRI 3-3

Since 2007, Banamex has conducted Brand Tracking, a nationwide study of banked individuals, to assess brand perception and positioning in Mexico. The study provides insight into our strengths and areas for improvement, supporting data-driven decision-making processes, strengthening customer relationships, refining marketing actions, and maintaining market relevance.

> A benchmark in promoting financial culture and trust in Mexico.

In 2025, Banamex maintained its position as a leading institution in the Mexican banking system, with a strong focus on financial education and social development.

Banamex ranks second in brand awareness and customer preference, reflecting its reputation and stability in the financial sector. Our focus on fraud prevention, social responsibility, and financial education has strengthened customer trust and engagement.

Throughout 2025, customer satisfaction and recommendation levels remained stable and positive, underpinned by a strategy centered on delivering value, security, and a strong banking experience.

6.2 Customer Service Units (Complaints)

GRI 2-16,2-25, 3-3
SASB FN-CF-270a.4, FN-CF-270a.5

User Service Performance (IDATU)

At Banamex, we have 35 representatives in our Specialized Customer Service Unit (UNE): four in Mexico City and one in each state across the country. These specialized units handle monetary and non-monetary complaints from individual and commercial costumers, resolving them fairly, improving service, and reducing risk in line with our Responsible Finance principles. UNE team members receive ongoing training in regulatory requirements and internal guidelines.

Complaints are recorded and managed to enable easy identification and tracking of potential fair treatment issues across products, services, or activities.

Costumers can submit inquiries and complaints through the following channels:

- **In person:** Branches
- **By phone:** Contact Center
- **Queremos Escucharte (We Want to Hear from You) inbox:** queremosescucharte@banamex.com
- **Specialized Unit (UNE)**
- **Email:** une@banamex.com

We follow a local Complaints Policy designed to share best practices in customer service and experience, supported by the following processes:

- End-to-end management of complaints for individual and commercial costumers.
- Structured handling across all stages: intake, tracking, resolution, and communication.
- Root cause analysis to improve processes and reduce recurring complaints.
- A corporate governance framework for adjudication and losses, providing clarity in complaint resolution.
- Minimum requirements for implementing the Fair Treatment Policy in complaints management.
- Timely identification and mitigation of recurring issues.

Number of Monetary and Non-Monetary Complaints Filed with CONDUSEF in 2025

Brand Health	Number of Complaints 2024	%	Number of Complaints 2025	%
No compensation	12,490	61.1%	10,882	63.3%
Monetary compensation	7,695	37.6%	5,707	33.3%
Non-monetary compensation	258	1.3%	531	3.1%
Total	**20,443**	**100.0%**	**17,120**	**100%**

IDATU

The User Service Performance Index (IDATU) is a service and customer care metric developed by CONDUSEF through the State-Level Bureau. It allows comparison of how banks handle complaints using CONDUSEF's own methodology.

We work to resolve complaints promptly and focus on continuous improvement.

According to the regulator's website, total complaints in 2025 (as of Q2) stood at 9,281, representing a 16.7% decrease (1,862 cases) compared to the same period in 2024 (11,143 cases). Q2 2025 is the most recent data available in the Bureau of Financial Institutions.

Complaints may be resolved in favor of the costumer or the bank: 42.8% were resolved in favor of the costumers and 57.2% in favor of the bank, with an average response time of 14 days.

Complaints in 2025 totaled 17,120, representing a 16.2% decrease (3,322 cases) compared to the same period in 2024 (20,443 cases).

All complaints were handled on time in 100% of cases.

The following table presents customer service indicators based on IDATU (2023–2025)

2023		2024		2025	
1Q	8.41	1Q	9.42	1Q	9.63
2Q	9.16	2Q	9.67	2Q	9.52
3Q	9.42	3Q	9.62	3Q	
4Q	9.48	4Q	9.53	4Q	

Note 1: The IDATU rating for Q4 2023 was 9.48, compared to 9.53 for Q4 2024.

6.3 Advertising Responsibility

GRI 3-3, 417-2, 417-3
SASB FN-IN-270a.1

We have established a General Procedure for Advertising Campaigns and Materials that standardizes the review and approval of advertising content.

Legal and Compliance review all materials to ensure they comply with applicable laws, regulations, and internal policies. This process also ensures alignment with the Fair Treatment of Customers policy. In addition, we provide annual Fair Treatment training, and both the business and marketing teams review all advertising materials to ensure these principles are reflected in the development and review of marketing campaigns.

We also have a process under which the New Product & Activity Approval (NPAA) team, together with the business's In Business Control Officer (IBCO), reviews proposals for new products, services, or capabilities, as well as process changes or improvements that affect channels, products, services, or customer relationships. All such proposals, projects, campaigns, processes, and technology developments are subject to the appropriate review and approval process.

As of year-end 2025, there were no cases of non-compliance related to product or service information or labeling that resulted in sanctions or fines. There were also no monetary losses from legal proceedings related to marketing or communications during the reporting period.

6.4 Supply Chain Relationships

GRI 3-3

Supplier Evaluation and Selection

We have a rigorous supplier management process that spans the entire commercial relationship, from selection, negotiation, and contracting through to payment.

Policies, processes, and guidelines are in place to ensure that activities are carried out within a framework of control, fairness, and transparency. These policies include provisions related to accessibility and diversity, as well as the prohibition of child labor, forced labor, and human trafficking, among others.

Suppliers are required to comply with all applicable laws, regulations, and standards. The Supplier Principles Statement complements any similar internal standards already implemented or in the process of implementation by suppliers. We support suppliers of goods and services in adopting their own codes or best practices aligned with the core principles and elements outlined below. We are committed to working with them to achieve these shared objectives and continuously improve their operations.

When sourcing goods or services, we conduct competitive processes in which potential suppliers are invited to participate and are evaluated against defined standards and quality criteria.

The supplier, product, or service selection process includes the following steps:

- Define requirements
- Develop sourcing strategy
- Select and evaluate suppliers
- Negotiate contracts
- Approve and implement contracts

Ethical business practices

Human rights in the workplace

Environmental sustainability

Management systems and implementation

Supplier Onboarding Policies[9]

- Code of Conduct
- Finance Policy on Expense Management
- Supplier Management Policy and Standards
- Local Supplier Contracting Policy
- Supplier Standards
- Anti-Money Laundering Policy
- Anti-Bribery and Corruption Policy
- Operational Risk Management Policy

At Banamex, we are firmly committed to treating suppliers with respect and promoting sound environmental and social practices across our supply chain. This is one of the ways we support the country's economic development and contribute to the progress of communities.

To advance these objectives, our procurement team works to ensure the consistent application of the bank's policies and standards.

In this context, Banamex has made a public commitment to increase the number of women-led supplier companies. As of year-end 2025, spending in this category totaled 1.2 trillion pesos. In addition, Banamex works with suppliers certified under the Mexican Standard for Labor Equality and Non-Discrimination (NMX-R-025-SCFI-2015), with identified spending of 2.1 trillion pesos. Banamex also supports minority suppliers through Cultural Promotion and Social Development programs, with spending of 1.6 million pesos, an amount we aim to increase by expanding opportunities for diverse suppliers.

	2024	2025
Total number of active suppliers at year-end	3,986	**3,936**
New suppliers onboarded during the fiscal year	182	**242**
Number of women-led companies (including those certified by WeConnect)	21	**19**
Percentage of domestic suppliers	87%	**92%**
Percentage of foreign suppliers	13%	**8%**

Digital Evolution

GRI 3-3, 418-1

SASB FN-CF-230a.3

Figures in this report are presented in Mexican pesos.
Where other currencies are used, this is clearly indicated.

7.1	Our Digital Transformation Mission	100
7.2	Digital Transformation Pillars	101
7.3	Modernization	104

Intellectual Capital

We show how technology and innovation enable a better customer experience, strengthen operational efficiency, and enhance the resilience of our infrastructure. We do so by integrating advanced digital solutions that support ongoing evolution in response to changing needs, with a focus on service, security, and sustainability.

7.1

Our Digital Transformation Mission

GRI 3-3

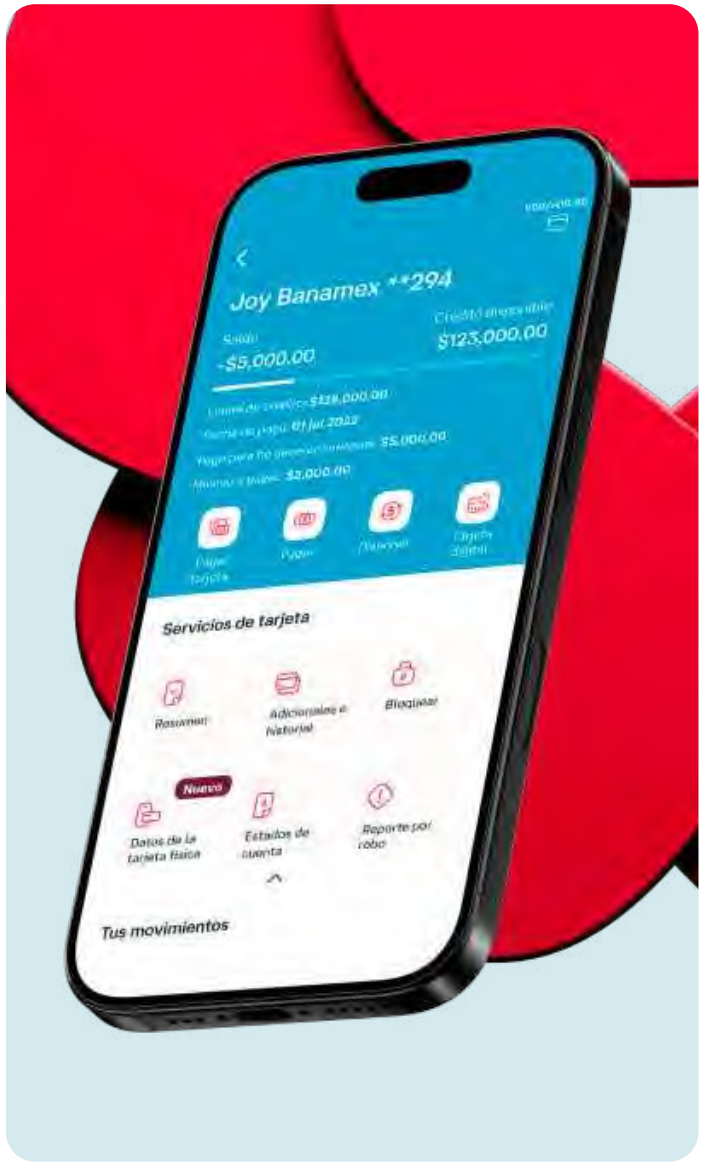

Growth and differentiation are driven by customer satisfaction and loyalty. Our three pillars provide the foundation to achieve this.

We drive Banamex's growth and differentiation through a robust and efficient digital ecosystem that supports high-quality products and services, fully personalized experiences, and consistent "wow" moments.

7.2 Digital Transformation Pillars

GRI 3-3

Our objective is to redefine banking by addressing our costumers' evolving needs and delivering services and functionalities through three core pillars:

01.

Digital Excellence

We are committed to delivering services that are 100% available and provide the best possible experience.

02.

Personalization

We design solutions that simplify recurring actions and deliver products, services, and experiences at the moment costumers need them.

03.

"Wow" Moments

We deliver unexpected experiences that help embed Banamex in customers' minds and foster lasting relationships.

Our digital strategy has delivered strong progress in the adoption and use of digital channels. As of December 2025, digital adoption exceeded 9.4 million costumers across the App and BancaNet, with the mobile app as the primary driver, reflecting a 24% increase in transactions compared to 2024.

Similarly, our digital channels drove out-of-the-branch sales, accounting for more than 63.8% of total sales. Average monthly logins to the App exceeded 210 million as of December.

Featured projects in 2025

Project	Description	Benefits*
Bill Payments	Feature that expands bill payment capabilities.	1.7 million+ successful transactions over 12 months.
Widget	App customization that provides quick access to frequently used transaction flows.	Approximately 10 million favorites saved, primarily transfers.
Google Pay	Implementation of digital wallets in the Android App.	Approximately 600,000 active tokens accumulated by year-end.
Seguros Banamex en la App	Sale and quotation of Vida Contigo life insurance and Accidentes Protegido insurance through the App.	Vida Contigo policies; Accidentes Protegido policies.
Banamex WhatsApp	New communication channel that enhances the digital customer experience.	Increased customer engagement to deliver personalized services.
More Providers for Airtime Top-Ups	Expanded airtime top-up functionality to include more than 20 mobile carriers.	Broader service offering for customers.
Institutional Payments	Thousands of services available online.	Greater customer confidence and convenience when making institutional payments online.
Mobility Payments (Tolls & Parking)	Toll tag recharge and parking payment features.	Successful transactions across Mueve CDMX, Pase Urbano, and TeleVia.
Instant Clarity for Every Purchase	Enhanced transaction list and details with merchant name and logo for debit and credit cards.	Improved transparency and clarity in transaction history.
Stories	New in-app communication channel that allows customers to learn about the benefits of being part of Banamex.	Innovative feature designed for younger segments allows users to save and share content.
Switch	Fully digital account, from remote onboarding to the option of requesting a physical card.	Approximately 300,000 accounts opened.
Upgrade from N2 to N4 Account	Enables customers to upgrade from N2 to N4 accounts in the App with a complete file.	Digital account upgrades completed by customers.
Payroll Account Opening with Pre-Created Card	N2 account enabled for payroll, linked to the employer, and issued with a pre-created card.	Payroll RAO (Remote Account Opening)an innovative payroll account onboarding service for both employees and employers.
Banamex Secure Call	Feature that helps prevent phone fraud through the App. The Fraud Prevention team notifies customers via a pop-up alert before calling about suspicious or unusual account activity.	8 million+ customers enrolled.
MTU (User Transaction Limit)	Regulatory security measure promoted by the National Banking and Securities Commission (CNBV) to strengthen security and prevent fraud.	MTU adjustment available in three clicks.
Belvo	API that connects Banamex systems with IMSS to verify income for customers without credit history or prior transactional data with the bank.	Increased approval rates for mortgages and credit cards through additional data sources.

* As of September 2025 or thereafter, including metrics such as the number of costumers beneficiaries, cost savings, and the mitigation of environmental impacts.

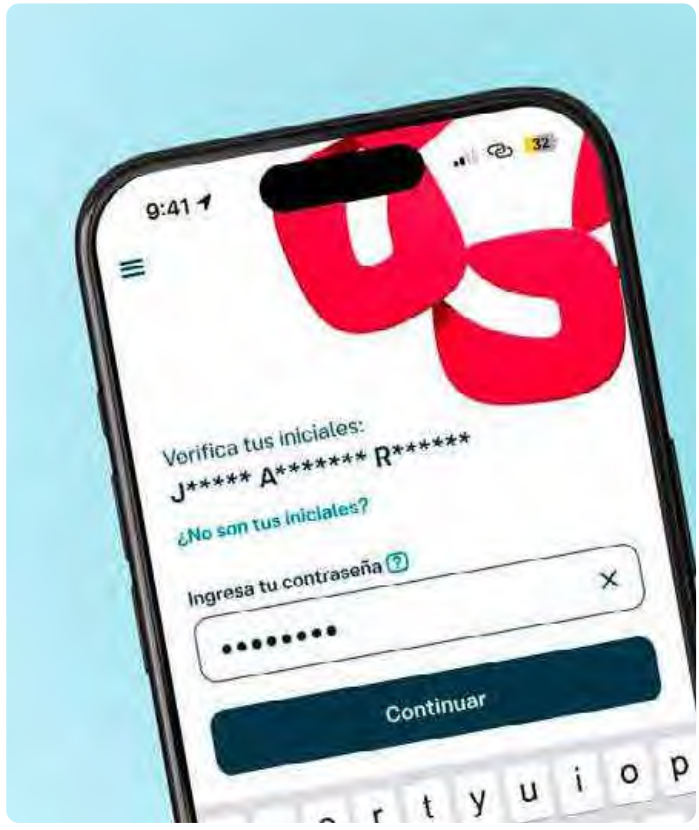

Project	Description	Benefits*
La Comer New Product	New credit card issued with partner Grupo La Comer, automatically linked to the Monedero Naranja rewards program.	5,000+ cards approved in the first month.
LineUp New Product	New credit card issued in partnership with LineUp to strengthen Banamex's positioning as the "entertainment bank" or the "presale bank."	8,000+ applications in the first month.
24/7 Investment Funds	Enables Banamex costumers to schedule purchase and sale transactions for investment funds outside business hours.	More than 10% of total investment fund purchases are made through scheduled transactions.
Digital Account Enhancements	1. Enable enrollment of digital credit cards in wallets (Apple Pay, Google Pay, PayPal). 2. Add digital cards to the favorites section. 3. Align the digital credit card experience with that of a digital account.	Digital services just a click away.
NetKey Portability	Reactivate NetKey Mobile on a new device in three simple steps while maintaining security.	Digital service with enhanced security.
Chubb Travel Insurance	Quotation and purchase of Chubb travel insurance through the App.	Nuevo producto en digital.
PIL* Reuse.	Personal unsecured loans can be reused through the App, BancaNet, and at branches.	Continued improvement of customer service across all digital channels.
Push Notification Campaign	Ensuring costumer security through secure channels such as Push Notifications.	Alerts for digital costumers via Push Notifications.
Statement Downloads	Default digital delivery for new digital customers and mass migration from paper to digital for existing digital customers.	100% of digital customers can view their statements in the App.
Bill Payment History	Displays completed bill payments within the payments hub.	24/7 visibility of bill payments made in the App, for both current and prior months.
PFAES Digital Services	Provides access to both personal and business banking services for costumers with business income (PFAES, self-employed individuals).	Flexible digital banking for both individual and business costumers.
Remote Credit Card A pplication Enhancements	1. Replace video calls with a video selfie in the remote application flow. 2. Replace four credit bureau authentication questions with a digitized handwritten signature (FAD) for new customers (NTB).	Improved customer experience and conversion rates.
Deeplinks	Directs offers and services from banners to the corresponding products and services.	Reduces friction through more intuitive navigation.
Quick Lock (Debit – App).	Enables customers to turn their debit card on and off through the App.	Available for debit and credit products.

*PIL: Personal Unsecured Loan.

7.3

Modernization and Transformation

GRI 3-3

The Bank of the Future

We have set out to define our vision for the Bank of the Future. To do so, we:

- Benchmarked Banamex's current position against leading institutions in Mexico and Latin America.
- Assessed our current state.
- Used these analyses, supported by a range of tools, to define the future we envision for Grupo Financiero Banamex.

We have a clear view of our growth objectives, our commitment to continuously improving the customer experience, and the initiatives that simplify our processes and strengthen our market position.

In 2025, we launched a Modernization program that brings these initiatives together under a single, integrated vision aligned with Banamex's three-year ambition.

We have defined a strategy to unlock the full potential of our organization through:

The Modernization Office

We established a Modernization Office focused on achieving the highest performance standards. This office sets realistic yet ambitious targets and engages the entire organization in executing initiatives through a governance model with regular, phased tracking, supported by technological tools.

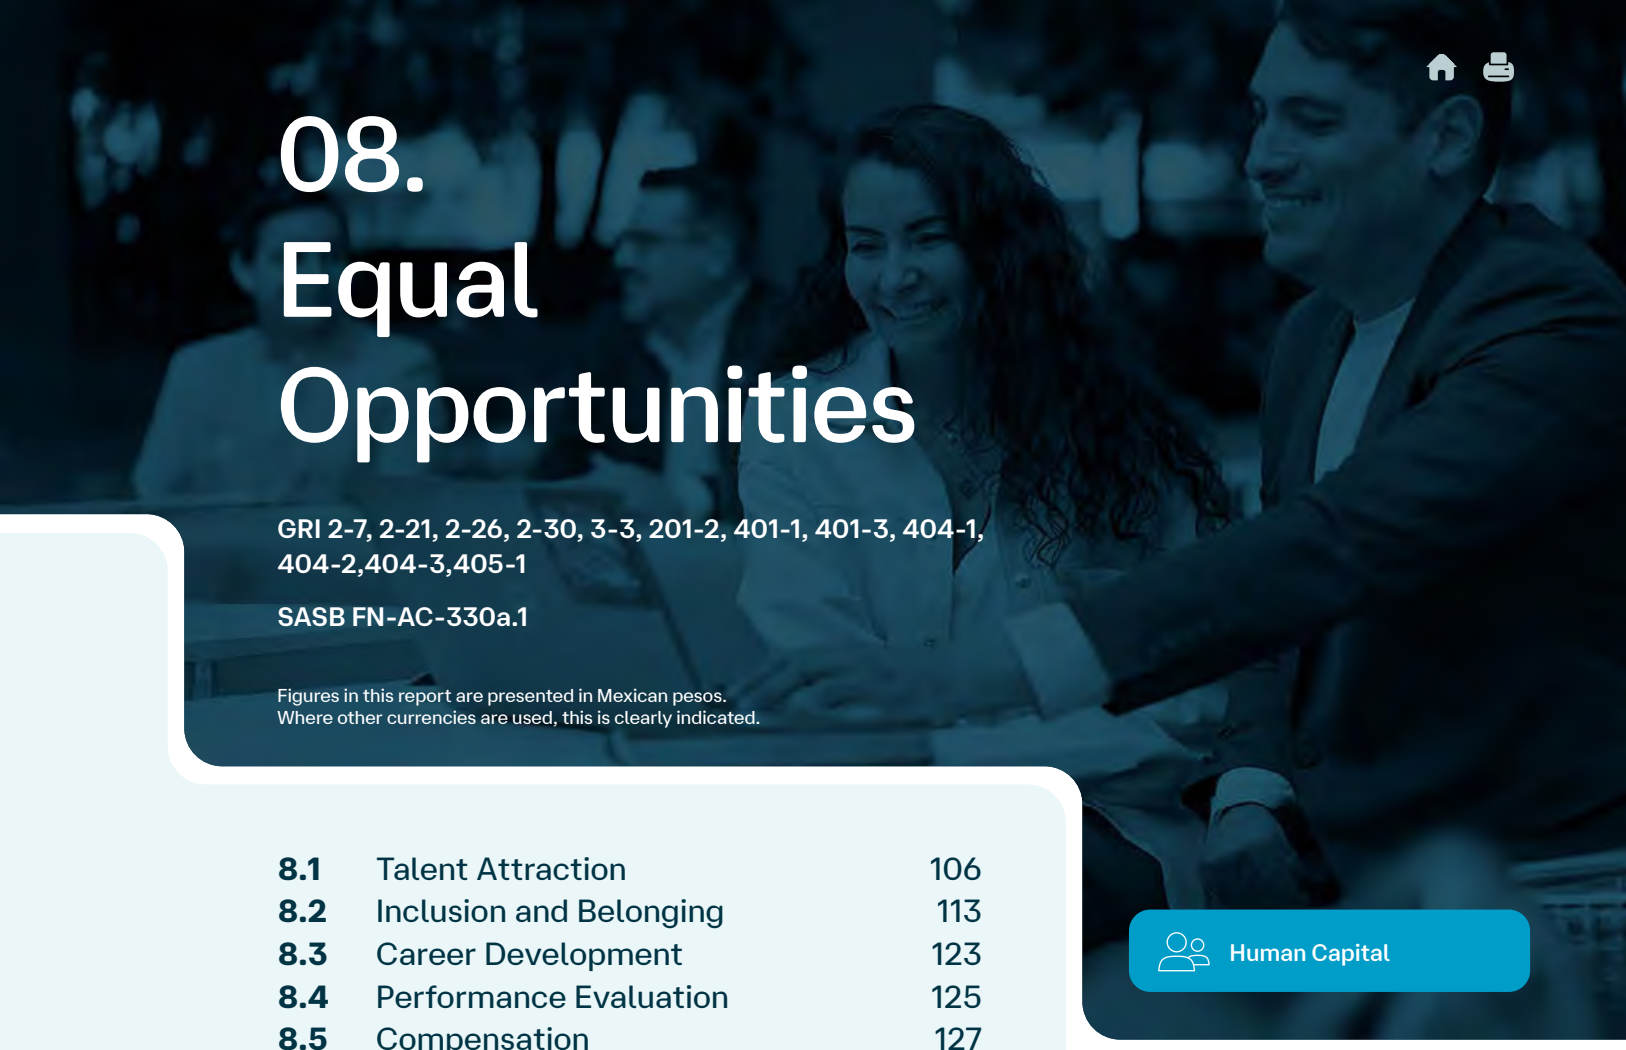

The Modernization Office has developed a portfolio of initiatives centered on improving the customer experience as its primary objective. Over the past year, we have worked intensively to shape the bank we aspire to be—one that meets the expectations of our society. Banco Nacional de México will continue advancing along this path to remain a benchmark in the industry and, above all, to strengthen the leadership that has distinguished us over 141 years of service in Mexico.

The engagement and commitment of the Banamex team are critical to turning this vision into results and ensuring steady progress toward our defined goals.

Identification of growth opportunities across our businesses.

Development of a detailed plan to improve efficiency and simplify processes.

Establishment of a Modernization Office to support implementation and strategic alignment across the bank.

Talent Attraction | Hiring

In line with our hiring model and in accordance with our policies on inclusion and non-discrimination, a key element of our process is a selection panel composed of four individuals who interview multiple candidates for each vacancy, ensuring that hiring decisions are fair and based on merit.

As part of our commitment to increasing workplace inclusion, we ensure the participation of at least one woman both in the candidate pool and on the evaluation panel.

Through this approach, we aim to mitigate unconscious bias in the selection process and increase the likelihood of diverse hiring outcomes.

Employee satisfaction is a priority for us. To better understand employee perspectives, we conduct surveys and interviews to provide more effective training and the appropriate tools to support their integration into the workplace in a comfortable and secure manner.

8.2
Inclusion and Belonging

GRI 3-3, 405-1, 406-1
IBSO B.1.

We have developed an Inclusion and Belonging strategy built around a model of five inclusion networks, each with specific initiatives and strategies led by corporate management:

- Disability and Neurodiversity Network
- Women's Council Network
- LGBTQ+ Pride Network
- Families Network
- Generations Network

We are committed to creating and promoting a workplace where every employee feels proud to be themselves. We believe that diversity is a source of institutional identity, belonging, creativity, innovation, and a productive, respectful work environment. Through this commitment, we reflect the perspectives of the communities we serve.

Disability and Neurodiversity Network (PcD and ND)

GRI 3-3, 405-1

At Banamex, our equity policy has helped us build a diverse organization where we foster a culture that enables us to reach our full potential through programs and initiatives that promote equity and inclusion.

Classification	2024		2025	
	Number	%	Number	%
Employees (≤C8)	23	53	17	46
Professionals (C9–C11)	17	40	17	46

Directors (≥C14)	0	0	0	0
Total	**43**	**100**	**37**	**100**

2025 Highlights

We have structured our efforts across four areas: (a) training, awareness, and support for the Persons with Disabilities (PcD) and Neurodiversity (ND) community; (b) support programs; (c) accessibility; and (d) recognition.

Training, Awareness, and Community Engagement for the PcD and ND Community

- **Partnership with Teletón:** Our partnership with Teletón grew stronger than ever through two key initiatives:
  - Visits to Teletón Program: Nine institutional visits and seven visits by different business units to the centers in Tlalnepantla, Puebla, and Ecatepec, with the participation of approximately 250 employees and their families.
  - Digital Donation Drive: A total of 1,032 employees donated MXN 815,536. These contributions will allow 13 children to continue their therapies and improve their quality of life.

  Both initiatives reinforce our commitment to being the Bank of Teletón and to continuing to support, promote, and raise awareness of initiatives that benefit children with motor disabilities, autism, and/or cancer, as well as their families and caregivers.
- **PcD and ND Network Forums:** Throughout the year, the PcD and ND Network held 10 awareness and training sessions attended by more than 700 employees.

These forums highlight progress made at Banamex in advancing inclusion for these communities, as well as the challenges we continue to face as an organization and as a society. They are scheduled in alignment with key dates and commemorations. Targeted training sessions were also delivered across various areas of the bank, including the Governance and Control Office and Operations and Technology, with participation from approximately 300 employees.

- **Participation in the 11th Apapache Walk for Autism:** For the second consecutive year, Banamex took part in the Apapache Walk for Autism, with more than 200 employees and their families forming the largest contingent during the event.
- **Integration Activities:** In 2025, the PcD and ND Network Committee met twice to follow up on proposed initiatives and strategies, as well as to connect and celebrate achievements.

Support Programs

- **Angels Brigade for Persons with Disabilities (PcD): We're Here for You:**
  We have trained emergency response personnel across our facilities through the Angels Brigade. We also have a specialized team that supports employees with disabilities during drills and real emergencies. During the year, we delivered 54 training sessions, reaching 2,513 participants. The Angels Brigade has 244 specialized members nationwide, supported by a broader network of 9,350 members.
- **Buddy Program:** This initiative supports new employees with disabilities throughout their onboarding process, helping ensure they can perform their roles effectively.

Accessibility

- **Reasonable Accommodations (Technology, Infrastructure, Human Capital):** We launched the Reasonable Accommodations Protocol for Persons with Disabilities, which establishes guidelines for requesting necessary adjustments to technological infrastructure, physical spaces, and human capital processes, ensuring that employees with disabilities can perform their roles under equitable conditions.
- **Multisensory Room:** IWe inaugurated a Multisensory Room on the third floor (North Tower) of our Moras corporate office. This space is designed to support concentration, rest, and self-regulation for employees during the workday, particularly those with neurodiverse conditions.
- **Physical Accessibility Infrastructure:** Foro Valparaíso features accessible restrooms, ramps, elevators, tactile floor plans on both ground and upper levels, audio descriptions, and tactile and sensory exhibits. Exhibition materials are available in both braille and print. Mexican Sign Language (LSM) interpretation is also provided upon request. Accessible pictograms and additional LSM video content will be introduced in the near future. At the Santa Fe corporate office, the main entrance is currently being adapted to remove architectural barriers and facilitate access for employees and costumers.
- **Mexican Sign Language Interpreters:** We provided Mexican Sign Language interpreters for:

+60
virtual sessions on awareness, training, and information, open to all employees.

2
virtual support sessions for employees to explain benefits processes.

3
additional virtual support sessions for employees to explain benefits processes.

In-person support throughout the Apapache Walk for Autism.

Awards

- **Éntrale Certification 2025:** Thanks to the effort and commitment of the PcD Network team, along with the support of various areas across the bank, Banamex received the “Company Committed to the Labor Inclusion of Persons with Disabilities” distinction, becoming one of 36 companies nationwide to earn this recognition. This distinction reflects Banamex’s position as one of the most inclusive companies in the country and a leading workplace for the PcD community.
- **Éntrale Award 2025 Nomination – “Innovative Inclusion Practices”:** Banamex was recognized with the Éntrale Award 2025, which highlights the most innovative inclusion practices in the country.
- **Infoawards 2025:** Foro Valparaíso was recognized as a winner in the category “Museums with Activities for Persons with Disabilities.” Our commitment extends beyond our employees and customers to everyone who visits our spaces.

Women's Council Network

GRI 2-26

We implement initiatives to attract, develop, and empower female talent, ensuring access to more equitable career opportunities.

The Women's Council was established in 2011 to foster a workplace built on equal opportunity, regardless of gender, and to promote the advancement of talented women so they can reach their full potential.

As part of our commitment to gender equality, we conducted a self-assessment using the Women's Empowerment Principles (WEPs), a tool promoted by UN Women and the United Nations Global Compact that measures performance in gender equality.

This assessment evaluates policies, practices, and organizational culture to identify gaps and areas for improvement. Based on 2025 data, Banamex achieved a score of 81%, reflecting a high level of progress in integrating a gender perspective and positioning the Bank among leading organizations in this area.

53%

Total Employees by Gender

Employees by Gender	2024		2025	
	Number	%	Number	%
Men	18,773	47.50	17,764	47
Women	20,751	52.50	20,030	53
Total	**39,524**	**100**	**37,794**	**100**

We focus on three key areas:

Empowerment:

We aim to provide the conditions employees need to take on leadership roles, make decisions, and actively shape their professional development.

Equal Treatment:

We work to eliminate biases that may limit employee growth, ensuring that everyone, regardless of gender, has equal access to development opportunities and recognition, while fostering an environment where equity is upheld at all levels..

Safety:

We contribute to strengthening safe, harassment-free, and non-discriminatory workplaces that support the full development of our employees.

2025 Highlights:

- **First edition of Ateneas:** A program designed for 120 women, focused on supporting and positively impacting their professional development.
- **Women of Impact Certificate Program:** Leadership and strategic finance program reaching 80 employees.
- **"Speakers Who Inspire" series:** A series of sessions covering motivational and general-interest topics for both women and men.
- **Awoman participation:** Council members and employees were invited to attend Awoman, an annual event that shares knowledge, inspiration, and experiences to support personal and professional development through talks and workshops led by specialists, with more than 300 participants.
- **"From Words to Action:** Addressing Gender-Based Violence": In partnership with Abogadas MX, employees participated virtually in a coaching session that provided practical tools to implement concrete actions promoting safe, violence-free workplaces.
- **Women in Senior Management in Mexico and Central America 2025:** Promotion of the KPMG study aimed at advancing female talent in high-impact initiatives by analyzing barriers to accessing and remaining in senior leadership roles and encouraging the development of other women.
- **ACTívate:** An intensive workshop designed for professional women seeking to build, scale, and strengthen their careers using digital tools and proven business strategies.
- **Women of Change:** Closing the Gender Gap: First film-discussion session featuring a series of short documentaries highlighting stories of resilience, solidarity, and success among women who challenge the status quo.
- **Violence-Free Spaces Strategy:** Development of a strategy aimed at creating a workplace free of violence and strengthening commitment to inclusion and equity. Each workshop provides practical tools to identify normalized patterns of violence and transform them into behaviors that foster positive workplace dynamics and well-being.
- **Positive Masculinities Circles:** Initiative to raise awareness among senior leadership on positive masculinity, engaging 90 directors across three sessions to promote cultural change within the organization.
- **Development Fair:** A space created to share tools and knowledge to support employees' professional growth, featuring sessions on financial inclusion, retirement products for women, and educational program opportunities and benefits.

LGBTQ+ Pride Network

At Banamex, we recognize and celebrate our LGBTQ+ community. We promote initiatives that uphold the human and labor rights of every colleague and are committed to fostering a respectful and safe workplace for all, regardless of sexual orientation, gender identity, or any other characteristic.

2025 Highlights:

For the seventh consecutive year, we received the HRC Equidad MX certification as one of the best places to work for the LGBTQ+ community in Mexico, reflecting strong non-discrimination policies and inclusive practices.

We ranked **3rd in the Super Empresas ranking by Expansión magazine and in the Top Companies ranking**, standing out in the **Diversity and Inclusion index**.

We also received the **"Amelio Robles" award** from the Movimiento por la Igualdad de Nuevo León, in recognition of our efforts to support the LGBTQ+ community. This award honors the first transgender person of the Mexican Revolution.

- **We continued to strengthen the initiatives launched in 2023 to support our trans community, including:**
  - » **"Transition in the Workplace: A Safe Space to Be"** program, which provides guidelines, tools, and support resources for employees who have begun or are planning their transition, as well as materials to guide and support managers in these situations.
  - » Availability of 12 gender-neutral, accessible restrooms, with plans for further expansion.
  - » Systems that allow employees to use their chosen name in line with their gender identity, regardless of their legal transition status.
  - » Inclusive benefits, including maternity, paternity, and adoption leave available to all employees who become parents, regardless of gender or family structure, as well as health insurance coverage for spouses and domestic partners.
- **We delivered training and awareness sessions throughout the year,** including internal conferences, forums, and panels addressing challenges faced by the LGBTQ+ community in the workplace and promoting solutions to foster inclusive environments.
- **We provided targeted training for three key groups:** Human Capital teams, managers, and employees across the organization.
- **We celebrated LGBTQ+ Pride Month** across our corporate offices nationwide. More than 3,500 employees, along with their families and friends, participated in events held in Santa Fe, Revolución, Metepec, Jardines en la Montaña, and Moras in Mexico City, as well as in Guadalajara and Monterrey.

- Senior leaders, including Cristina Rohde, Adela Giral López, Ana Cecilia González, Arnoldo Carrete, Lincoln Carrillo, Francisco Martínez, Miguel Toledo, and Enrique Granillo, participated in initiatives to reflect on the progress achieved and to reaffirm the organization's commitment to advancing inclusion for the LGBTQ+ community and for all individuals, regardless of their differences. Diversity is our strength.
- For the eighth consecutive year, Banamex participated in LGBTQ+ Pride marches. Approximately 1,000 employees joined our contingents, accompanied by Mexican drag queens Jenary Bloom, Andrómeda and Atlanta Fox, as well as DJs who performed at the events. The Banamex float featured the new logo and the colors of the LGBTQ+ flag, inspired by themes of royalty, because here, everyone is real.
- This year, two employees were included in Expansión magazine's 41+1 LGBTQ+ Business Leaders list, which recognizes leaders who promote inclusion within organizations:
  - » **Carlos Anaya Peralta:** Vice President of Institutional Marketing for Social Commitment, Social, Cultural, Institutional, Government, and Corporate Sponsorships, and Diversity and Inclusion, and member of the Pride Network Committee.
  - » **Luis Enrique Gutiérrez:** Digital Sales Manager at Banamex and one of the presidents of the Banamex Pride Network.

For the first time, Banamex heritage properties across the country displayed the Pride flag and hosted photo opportunities for visitors:

- » Palacio de Iturbide (Mexico City)
- » Museo Casa Montejo (Mérida)
- » Casa del Mayorazgo de la Canal (San Miguel de Allende)
- » Palacio del Conde de Valle de Súchil (Durango)

Banamex has participated in the Mexico City Pride March since 2013 and was the first bank in Mexico to fly the Pride flag, which it displayed at its headquarters on Reforma.

We foster an inclusive and respectful workplace and actively prevent discrimination in all its forms.

We respect and value diversity in the workplace and continuously share information across multiple channels on topics related to sexual diversity, with an inclusive approach that reflects the full LGBTQ+ community.

Family Network

We support employees and their diverse family structures through activities, programs, and benefits that promote well-being and work-life balance.

2025 Highlights:

- **1st Forum: "Lessons to Share with the Family."** Held in March to commemorate International Women's Day, the forum featured a panel of Banamex women leaders—Itza Morales, Karla Márquez, and Lorena Orive—who shared insights, recommendations, and best practices on professional development, personal resilience, and caregiving within the family.
- **We supported the "Opening Our Doors to Families"** initiative, inviting employees and their families to visit our Casas Señoriales (historic properties), welcoming more than 3,000 visitors:
  - » Palacio de Iturbide and Foro Valparaíso (Mexico City)
  - » Museo Casa Montejo (Mérida)
  - » Casa del Mayorazgo de la Canal (San Miguel de Allende)
  - » Palacio del Conde de Valle de Súchil (Durango)
  - » Casa Villa de Antequera (Oaxaca)
- **1st Gen-Z Fest:** Designed to give employees' children a window into Banamex, this event showcased the richness of our culture and the strength of our strategy and brand, reinforcing our position as one of the country's leading financial institutions. It also strengthened their sense of connection and belonging while contributing to their personal and professional development.
- **Older Adults Day:** We commemorated National Older Adults Day in Mexico by bringing together employees from across Grupo Financiero Banamex to offer recreational activities and interactive talks for older adults on topics such as the silver economy, financial education, digital literacy, and fraud prevention, among others.

  This initiative also reinforced our commitment to delivering high-quality service to older adults in line with CONDUSEF regulations, following our recognition with the **"Commitment to Serving Older Adults" insignia.**

  Pingo Laboral: A dynamic and engaging event for employees' children between the ages of 6 and 11, held nationwide. Its goal is to foster pride and a sense of belonging through activities such as financial education, cultural heritage, and volunteerism. More than 2,000 children participated.
- **Visits to Teletón Child Rehabilitation and Inclusion Centers (CRIT):** These visits, open to employees and their families, aim to promote a diverse and inclusive culture, with participation from more than 200 employees and their families.
- **Connecting Networks: What Unites Us Makes Us Stronger:** The O&T Core Operations team invited us to participate in this program, open to all employees, to learn about Banamex's internal networks that help build a more equitable, respectful, and inclusive environment for all.

Generations Network

At Banamex, we leverage the experience, skills, and perspectives of employees across all age groups to foster innovation and collaboration in support of our business objectives.

2025 Highlights

- **Strengthened and consolidated the Generations Network,** increasing participation by 48%.
- **Participated in Banamex Vitality Week,** where nearly 400 employees responded to a survey on the benefits offered, helping us gain deeper insight into generational needs and preferences.
- **Hosted the 1st Financial Inclusion Forum,** in collaboration with the AVU Foundation. Since 2023, the Generations Network has participated with AVU in various business forums to share best practices on generational inclusion. This marked the first time Banamex hosted the "Financial Inclusion for All Ages Forum." The forum fosters multi-stakeholder dialogue to identify barriers, opportunities, and innovative solutions to advance inclusive, ethical banking centered on people's needs at every stage of life.

  Strategic Value of the Forum

  - » Design and promote inclusive financial products tailored to different life stages and socioeconomic conditions.
  - » Advance social and financial innovation with a focus on longevity, sustainability, and universal accessibility.
  - » Strengthen cross-institutional partnerships and multi-stakeholder dialogue to support the development of equitable public policies and adaptive regulatory frameworks.

8.3 Career Development

GRI 3-3, 404-1, 404-2, 404-3
IBSO B.3.

We have established the following principles for employee training:

- We align our training strategies with the achievement of business objectives.
- We view learning as a key driver of employee development and performance, supporting the achievement of their professional goals.
- Through training, we contribute to the retention of key talent across the organization.
- We position development as a fundamental element of our institutional culture.
- Through our Training function, we address the organization's evolving needs.

Training Hours by Employee Level

At Banamex, we design training programs based on identified priorities to support functional capability, regulatory compliance, and business continuity, all aligned with our values and business objectives.

These programs are delivered through a mix of learning formats—virtual, in-person, and hybrid—combining classroom and online approaches to meet business needs. We also leverage digital platforms such as Degreed, which allow employees to access relevant learning resources, support their development plans, and strengthen our upskilling and reskilling efforts—enhancing current capabilities while developing new ones in line with the organization's growth.

The information provided is for reference purposes only and may be interpreted by the end user. Ensuring its accuracy and proper use is the responsibility of the recipient.

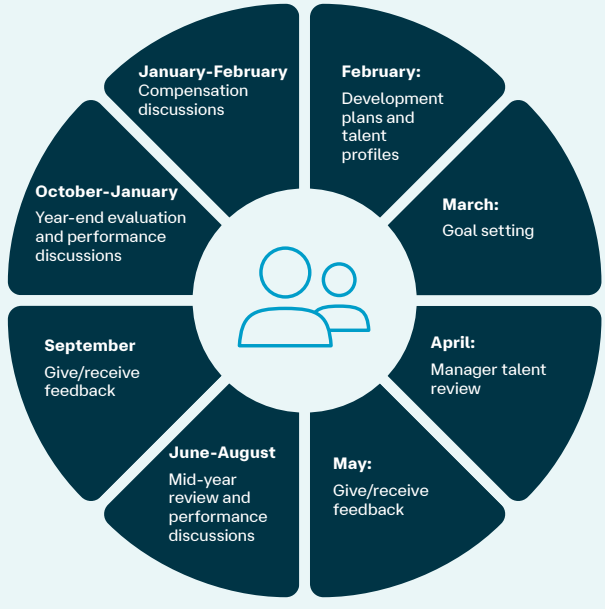

8.4

Performance Evaluation

GRI 3-3, 404-2
IBSO B.4.

All employees are subject to the compensation framework (bonus or incentive).

As part of this process, employees first complete a self-assessment of their business objectives (the "What"), based on three performance pillars: Risk and Control, Financial Performance, and Costumer and Franchise Outcomes, as well as the Leadership Principles (the "How"). Their manager then evaluates performance using a four-point rating scale, followed by a feedback discussion between both parties.

All employees follow the same process, with no preferential treatment at any stage.

Employees evaluated by job level

New social segments	2024			2025		
	Total Employees	Completed Evaluations	% of Employees Evaluated	Total Employees	Completed Evaluations	% of Employees Evaluated
Employees (≤C8)	19,926	18,763	94	18,601	16,726	90
Professionals (C9-C11)	11,217	10,700	95	10,816	9,030	83
Middle Management (C12-C13)	6,150	5,594	91	6,146	5,482	89
Directors (≥C14)	1,153	1,108	96	1,168	1,096	94

Employees Evaluated by Gender

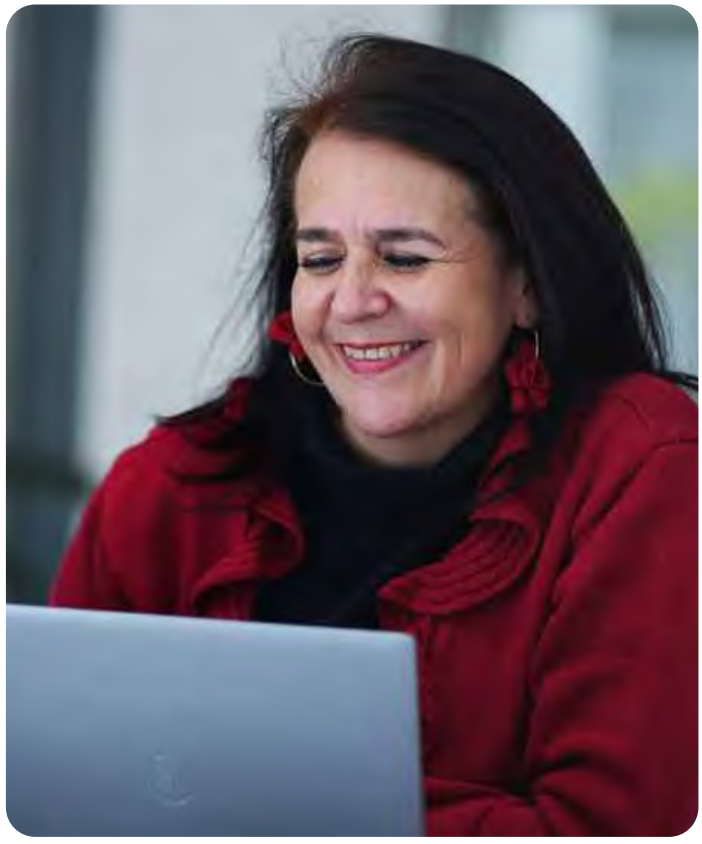

Gender	2024			2025		
	Total Employees	Completed Evaluations	% of Employees Evaluated	Total Employees	Completed Evaluations	% of Employees Evaluated
Men	17,945	16,911	94	17,135	15,064	88
Women	19,839	18,720	94	19,247	16,924	88
Total	**38,446**	**36,135**	**94**	**36,382***	**31,988***	**88**

* There are 349 employees with no gender information on record; 346 have completed their evaluations, representing a 99% completion rate.

At Banamex, we offer programs focused on developing our employees' capabilities, as well as transition support initiatives such as Mentoring, Reverse Mentoring, and Líderes del Futuro.

8.5 Compensation

GRI 2-21, 3-3, 201-3, 404-1, 404-2, 404-3, 405-2
IBSO B.2.

The compensation framework, applicable to all employees—regardless of whether they are classified as material risk takers—is as follows:

1. Fixed cash compensation:
- Comprises base salary, year-end bonus, and vacation premium, in line with current standards.

2. Variable compensation:
- Performance bonuses: Payments granted to eligible employees based on their performance evaluation rating, which is based on four pillars: Leadership, Risk and Control, Financial Performance, and Costumer and Franchise Outcomes.
- Incentive plans: Targeted at employees primarily in sales and service roles, focused on product placement and sales, as well as the achievement of productivity targets. These incentives may be paid on an annual or quarterly basis.
- Employee Profit Sharing (PTU): Profit sharing is determined based on results and in accordance with applicable laws.

As of year-end 2025, the ratio of total annual compensation between the highest-paid individual and the average employee exceeded 133:1.

Base Salary and Female-to-Male Pay Ratio by Employee Level

Employee Category	2024		2025	
	Base Salary	Female-to-Male Salary Ratio	Base Salary	Female-to-Male Salary Ratio

Directors (≥C14)	197,281.88	.93:1	206,050.39	.92:1

8.6 Benefits

GRI 3-3, 201-3, 401-2, 401-3, 404-3

Parental Leave

We provide maternity and paternity leave to support employee well-being and productivity, as well as to promote recruitment and retention of qualified employees. We also aim to facilitate access to these benefits and emphasize that taking leave does not negatively impact employees' career progression.

We offer 16 weeks of paid leave for mothers and four weeks for fathers. In the case of adoption, employees in the primary caregiver role are entitled to six weeks of leave, with 100% pay during the absence.

Employees who returned to work

Number of employees who:	2024		2025	
	Women	Men	Women	Men

Our employees have a hybrid retirement/pension plan that includes both Defined Benefit (DB) and Defined Contribution (DC) components.

As of December 2025, the estimated value of the obligations related to the DB component (as the DC component does not require such calculation) amounted to MXN 62,401 million. To meet these obligations, we have trust assets totaling MXN 54,791 million.

In addition, the value of the DC component fund amounted to MXN 18,438 million as of the same date.

As of year-end 2025, employee pension plans include:

- Pre-2002 plan
- 2002 pension plan
- 2007 retirement plan
- 2011 retirement support plan (introduced in 2011 and currently applicable to new hires)
- 2014 pension plan

8.7 Health and Safety

IBSO B.5.

8.7.1 Health and Well-being

Vitalidad Banamex is our global well-being program, designed to promote physical and mental health by encouraging healthy lifestyles.

Vitalidad Contigo support line

Telephone counseling: Offers confidential support for emotional or everyday situations that may affect employees. Qualified professionals handle calls, and the service is available free of charge, 24 hours a day, 365 days a year, for employees and their immediate family members.

In-person or virtual counseling: When needed, appointments are arranged with psychologists from the Intersistemas network, who may provide up to five sessions at no cost.

Emotional telephone counseling: Provides ongoing psychological support by phone, with scheduled sessions that allow users to work consistently with the same specialist, without the need to travel.

Everyday information services: Guide procedures, requirements, and available resources related to psychological, educational, and family services, as well as legal and financial matters. In addition to identifying relevant resources, the service offers practical guidance on where to go, timelines, costs, and required documentation.

Leadership support: A telephone-based service designed to strengthen people management skills, including team communication, assertiveness, and the handling of sensitive or critical situations.

Wellness coaching: Supports employees in setting and achieving well-being goals across nutrition, physical activity, stress management, sleep habits, and tobacco use. This approach encourages lasting and sustainable changes through ongoing guidance and personal motivation.

Nutritional counseling: Provides support to improve eating habits and encourage healthier lifestyle choices.

TotalPass

At Banamex, we are committed to the health and well-being of our employees and their families. To support this, employees have access to TotalPass, which allows them to work out whenever and wherever they choose, through leading gym chains, fitness studios, and online platforms across Mexico.

This benefit is available to all employees and may be extended to up to five beneficiaries. It applies to all entities within Grupo Financiero Banamex and its subsidiaries.

TotalPass is a corporate benefit that provides access to more than 7,000 sports and fitness centers nationwide, along with more than 250 activities.

Vitalidad Banamex campaigns

These are communication initiatives designed to raise awareness and promote education on topics related to a balanced lifestyle that integrates personal, professional, and health dimensions, always with a preventive approach.

To support this, a range of informational sessions is delivered in different formats, including videos (blog), editorial content certified by the Mayo Clinic, infographics, and Zoom sessions. These initiatives encourage employees to adopt lifestyles aligned with Vitalidad Banamex.

8.7.2 Workplace Safety

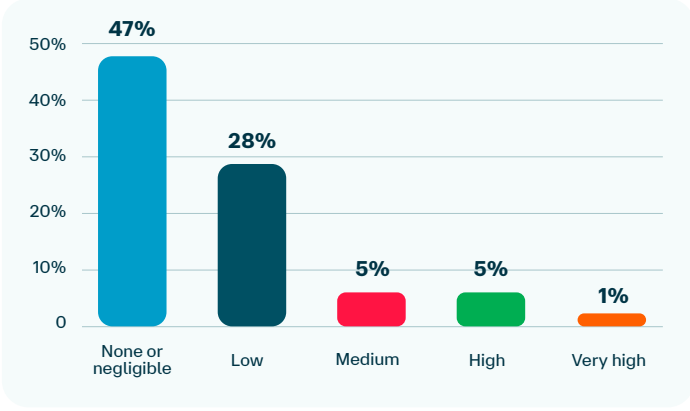

NOM-035 (Mexican standard on psychosocial risk factors in the workplace)

Grupo Financiero Banamex conducted the NOM-035-STPS-2018 survey on psychosocial risk factors across the organization between June 13 and September 30, 2025. A total of 16,752 employees participated, representing 43% of our workforce.

This assessment allows us to identify risk levels across five categories and implement actions to promote a healthy work environment.

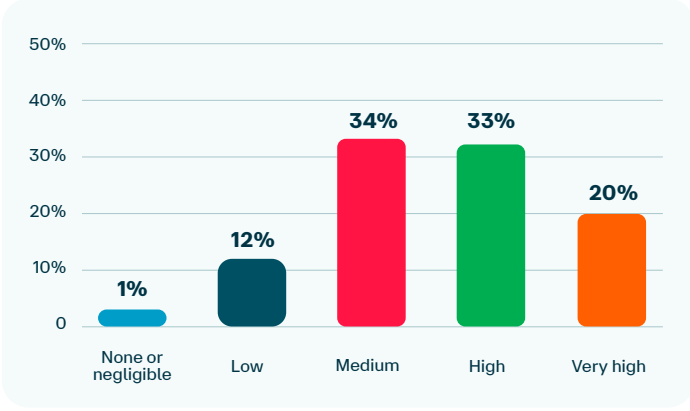

The following summarizes the Group's overall results by psychosocial risk category:

Work Environment

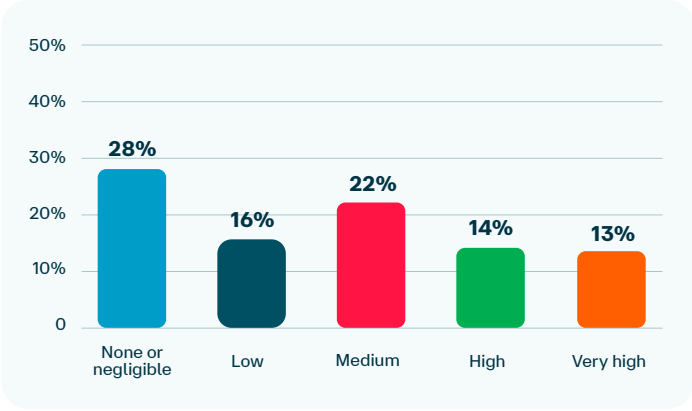

This chart shows the level of risk posed by workload demands that may exceed employees' capacity, as well as the level of control employees have over their work.

Activity-Related-Factors

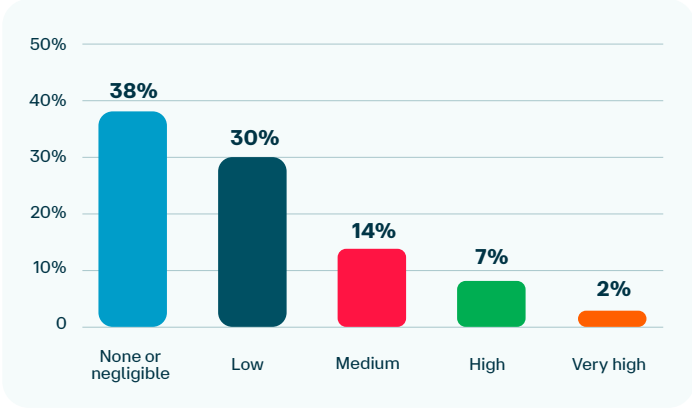

This chart shows the level of risk posed by workload demands that may exceed employees' capacity, as well as the level of control they have over their work performance.

Organization of Working Time

This chart shows the level of risk associated with the organization of working time, including the length and scheduling of the workday, as well as work-life balance challenges that arise when personal or family responsibilities conflict with job demands.

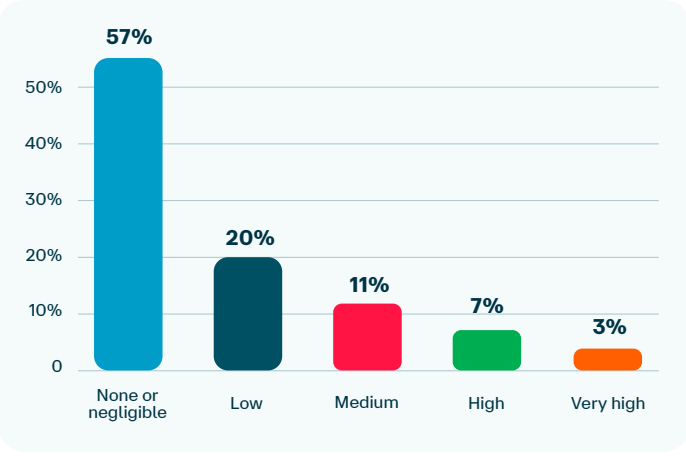

Leadership and Workplace Relationships

This chart shows the level of risk associated with leadership and workplace relationships, including how interactions between managers and employees influence how work is carried out and team dynamics. It also reflects negative workplace interactions, such as limited collaboration, lack of support, workplace violence, psychological harassment, bullying, and mistreatment.

Organizational Environment

This chart shows the level of risk associated with the organizational environment, including limited performance feedback, a lack of recognition and compensation, and a weak sense of belonging and job instability.

Workplace Accidents

403-9
IBSO B.6.

A total of 91 workplace accidents were reported in 2025, resulting in 3,693 lost workdays. Each case was reviewed to identify root causes and take corrective action.

8.8

Organizational Culture and Work Environment

GRI 403-3, 403-4, 404-2
SASAB FN-AC-330a.1

At Banamex, culture defines how we work and is reflected in our habits, behaviors, and relationships with costumers, partners, communities, and colleagues. In 2025, we evolved to begin a new stage with the relaunch of our brand.

Our 2025 strategy was guided by our brand promise, “Here. For you. Always.” and our commitment to our employees, “Banamex begins with you.” This enabled us to develop and consolidate our Employee Value Proposition, which brings together everything Banamex offers its employees.

This value proposition served as the foundation of our 2025 culture strategy and is structured around six pillars:

Career Development

Benefits

Culture and Purpose

Ethics, Inclusion, and Belonging

Health and Well-being

Inspirational Leadership

To consolidate this value proposition, we worked across multiple areas and teams throughout the organization to structure our initiatives, actions, and strategies in a coordinated way that strengthens our employer brand.

Some of the activities led by the Culture team include:

Banamex Fest: 11 events held across major corporate locations nationwide, with participation from 4,000 employees in person and more than 20,000 virtually during the brand relaunch.

Digital Teletón fundraising campaign: MXN 1,210,120 raised to support the treatment of 24 children with disabilities.

Workshops “The Experience We Share”: In collaboration with the Learning team, 108 workshops were delivered, reaching more than 3,500 employees.

Pingo Laboral: In collaboration with the CSIS and ESPA teams, as well as the Financial Education, Franchise and Social Commitment teams, in-person and virtual activities were organized for employees’ children between the ages of 6 and 11, fostering pride and a sense of belonging among more than 2,000 participants.

Banking Games: Third place in the overall medal standings in Mexico City, with 427 medals. In addition, the reopening of the Regional Banking Games across five divisions of the country reached more than 750 employees.

Opening Our Doors to Families: More than 550 families participated in guided visits to six of our Casas Señoriales nationwide, in collaboration with the Fomento Cultural Banamex team.

Culture Champions: More than 50,000 participations in activities designed to promote Banamex cultural principles. Employees earned points and badges for their participation. This initiative brought together teams across the organization and enabled strategic collaborations, including:

- National donation campaigns (with the Volunteering team)
- IMPACTA (with Customer and Business Development)
- Financial Advisors (with Financial Education)
- NOM-034 survey (with Labor Relations, CSIS, and Inclusion and Belonging)
- Individual development plans (with Talent)
- Digital Teletón fundraising campaign (with teams across the bank)

Onboarding: Onboarding was relaunched in collaboration with the Talent Acquisition, Financial Education, and Cultural Heritage teams, both in person at the Palacio de Iturbide and virtually nationwide, through 16 sessions, reaching more than 2,500 employees.

Health and Well-being: In 2025, we launched the Vitalidad Banamex strategy, bringing together a range of

activities, initiatives, and services to support employees' overall well-being across physical, financial, mental, and emotional dimensions. We also held Banamex Vitality Week, a hybrid experience designed to raise awareness of available services and benefits, reaching more than 10,000 participants.

Ethics, Inclusion, and Belonging: We foster a safe and inclusive workplace for all employees, grounded in integrity, empathy, and equal opportunity.

- We have clear policies and procedures to address and escalate any situation that may violate our principles or compromise the integrity of our costumers, colleagues, suppliers, or the communities we serve.
- We support five employee networks (Orgullo LGBT+, Generations, Families, Women, and Persons with Disabilities and Neurodiversity), made up of employees from across the bank who voluntarily come together to promote diversity, equity, and inclusion.

All activities are consolidated in the Banamex Begins with You SharePoint site and shared every Friday through the Banamex Begins with You newsletter. Communication across channels plays a key role in connecting employees with our employee value proposition.

Investment in Organizational Culture and Diversity and Inclusion (MXN)

	2024	2025

9.2 Approach and History

GRI 3-3, 413-1, 413-2

We work to advance social development in Mexico by strengthening the capabilities and conditions of individuals and communities, while preserving and enhancing the cultural, natural, social, and economic resources that support a sustainable future.

Through our actions and initiatives, we support the Sustainable Development Goals (SDGs), with a particular focus on SDG 17, Partnerships for the Goals. We emphasize target 17, which promotes effective partnerships across the public, public-private, and civil society sectors, leveraging their experience and approaches to resource mobilization.

Since 1997, Banco Nacional de México has played a leading role in Teletón. In partnership with Fundación Teletón México, A.C., we support one of the country's most meaningful social causes: improving the lives of children with disabilities. Our efforts include fundraising through ATMs, customer contributions, and co-branded credit cards, as well as logistical and operational support for Teletón's main annual event, where the general public contributes additional donations.

As of 2025, the organization strengthened its reporting approach by refining how social investment is consolidated and how beneficiaries are identified and tracked, aiming to improve the accuracy and comparability of the information. This led to the following adjustments:

Social Investment: Includes only those actions that directly benefit individuals or have a positive impact on the environment, as well as the resources required for their proper execution.

Beneficiaries: The report is structured into four categories—direct beneficiaries, indirect beneficiaries, visitors, and reach—allowing for a clearer view of the impact of these actions and reinforcing standards of transparency and accountability.

- Direct beneficiary: An individual or group that receives immediate and tangible benefits from the services, support, or activities carried out under the project.
- Indirect beneficiary: An individual or group that benefits from the outcomes achieved with direct beneficiaries, without directly participating in project activities.
- Visitors: Attendees at exhibitions or visitors to museums.
- Reach: Percentage of participants in large-scale or outreach events, percentage of residents involved in restoration projects, and attendees at videomapping activities.

Social Investment

*The 2024 social investment figure has been revised following the application of the standard based on Banco Nacional de México's net income, resulting in an adjusted figure of 1.7%.

9.3

Governance and Transparency in Social Impact

In 2008, we established the Social Commitment Division, which oversees the following Social Engagement teams:

- Strategy, Governance, and Impact
- Financial Education
- Volunteering
- Fomento Social Banamex
- Cultural Heritage and Fomento Cultural Banamex

The Social Commitment Division reports directly to the Corporate Affairs Division, which in turn reports to the Chief Executive Officer of Grupo Financiero Banamex.

To fulfill our social investment plan, Fomento Social Banamex operates as a second-tier institution, while Fomento Cultural Banamex carries out its own projects.

To ensure the effective allocation of financial resources, projects are evaluated by a specialized internal team and subsequently submitted for approval to the following multidisciplinary governing bodies:

- Social Investment Working Group or the Boards of Directors of the Fomento entities
- Project Evaluation Committee

We have internal policies and procedures in place to oversee, monitor, and follow up on donations and project evaluation criteria, while upholding our principles of legality, legal certainty, transparency, and sustainability.

The beneficiary institution is required to submit an impact report and supporting documentation for accountability purposes upon the project's completion.

9.3.1 Composition of the Board of Directors

The Fomento entities are non-profit civil associations governed by a Board of Directors that meets four times a year and is primarily responsible for approving strategy and overseeing the execution of each association's annual work plan.

As of year-end 2025, the Board of Directors comprised the following members:

Members	Role	Fomento Cultural Banamex	Fomento Social Banamex
Alberto Gómez Alcalá	Chairman	✓	✓
Jose María Castro López	Board Member	✓	✓
Daniel Alonso Garduño Gutiérrez	Board Member	✓	✓
Adela Giral López	Board Member	✓	✓
Andrés Albo Márquez	Board Member	✓	✓
Elliot Harris Reyes	Board Member	✓	✓
Beatriz Ruiz Velasco De la Garza	Board Member	✓	✓
Heidy Rosalina Muñoz González	Non-member Secretary	✓	✓
Claudia Verges Hernández	Non-member Deputy Secretary	✓	✓
Natalia Pollak Bianchi	Director (voice only)	✓	
Ana Vanessa González Deister	Director (voice only)		✓

9.3.2 Transparency

Each approved project follows a rigorous process to ensure proper donor identification and the appropriate allocation of resources. This process includes, but is not limited to:

Project submission
Definition of the project and registration of the funding request.

Review and validation
Receipt and validation of documentation.

Due Diligence
Detailed investigation and analysis of the institution.

Evaluation
Analysis and assessment.

Approval
Presentation of results to the relevant governing bodies.

Verification
Submission of the impact report and confirmation of the proper use of resources.

9.4 Evaluation of Social Investment Projects

Social Commitment has a dedicated Social Impact Evaluation function that assesses and selects projects and interventions with the greatest potential to generate positive social impact.

This function reviews initiatives from each Social Engagement team (AVS) and provides an objective view of each project's strength and alignment with the team's strategy.

As part of the evaluation process, each project is assessed to ensure its design clearly responds to the needs it intends to address. Sustainability is also considered, including environmental, economic, and social factors.

The methodology currently in place is designed to support consistent, evidence-based decision-making and to ensure that projects are well defined and positioned to achieve their intended outcomes.

This methodology is supported by a tool that brings together large volumes of information and combines quantitative and qualitative inputs. It enables the identification of three levels of impact:

1. Direct support through products and services
2. Beneficiary development
3. Transformation of the surrounding environment

In 2019, Banamex adopted a comprehensive strategy that guides its role as a financial intermediary in promoting economic development, responsible finance, environmental stewardship, and equal opportunity. This strategy is grounded in the highest ethical standards and strong corporate governance. It is directly aligned with the United Nations Sustainable Development Agenda, which aims to achieve the 17 Sustainable Development Goals (SDGs).

As part of project formulation, the following criteria are assessed:

- Objectives
- Goals
- Activities/components
- Monitoring and evaluation
- Communication
- Alignment

The Project Evaluation Committee (JEP) and the Social Investment Working Group (GTIS), composed of multidisciplinary teams of employees, are the governing bodies where each Social Engagement team (AVS) presents its projects for review and approval.

In 2025, a total of 298 projects were submitted to these bodies through the Project Integration Form (FIP) or the Basic Project Submission Form (FBPP).

Project Evaluation

	2024	2025
Projects evaluated	272	298
Projects approved	118	175
Approval rate	40%	59%
Project design	90%	89%

At the end of each project, an impact report is prepared to confirm the proper use of resources and assess the project's results and impact.

9.5 Financial Education

GRI 3-3, 203-1
SASB FN-CB-240a.4

Since 2004, Banamex has led efforts to advance financial education in Mexico, launching the country's first comprehensive nationwide program, independent from its banking operations and built on a human-centered approach.

This initiative was driven by the recognition that stronger financial understanding supports individual well-being and economic development. Over the past 21 years, the program has reached millions of people and influenced public policy, institutional initiatives, and academic programs, strengthening its impact at both national and regional levels. Today, financial education is firmly embedded in the national public agenda, and Banamex continues to promote financial knowledge as a key driver of progress in Mexico.

The program helps foster a strong economic and financial culture aimed at improving quality of life for individuals, their families, and their communities. Since its launch, interest in financial education has grown significantly across the public and private sectors as well as within civil society. As a result, Mexico now has a National Financial Inclusion Policy and a National Financial Education Strategy, both of which recognize the strategic importance of financial inclusion and financial education.

In Mexico, as in many emerging markets, financial inclusion remains a significant challenge. In this context, financial education plays a central role in bringing more people into the financial system and enabling them to benefit from it. The program has contributed directly to expanding both access to and use of financial products and services, with a particular focus on lower-income populations and micro, small, and medium-sized enterprises. Through these efforts, it has positively impacted millions of beneficiaries, supporting their economic empowerment and strengthening their financial capabilities.

The Financial Education team's efforts go beyond basic banking access or an understanding of financial products and concepts. Their comprehensive approach plays a key role in designing, implementing, and evaluating educational strategies to develop and strengthen people's skills, enabling them to manage and optimize their financial resources effectively. This approach not only promotes financial inclusion but also has a tangible impact on quality of life, empowering individuals to make informed and sustainable decisions that support their well-being and that of their families and communities.

Investment and the number of people reached through digital and in-person activities.

Year	Type of Beneficiary	Persons Benefitted	Investment in Mexican Pesos
2024	Direct	328,298	$ 18,100,000
2025	Direct	233,153	$ 21,362,573
2025	Visitors	61,233	$900,000
2025	Direct + Visitors	294,386	$22,262,573
2025	Indirect	1,177,544	

In 2025, to drive meaningful and sustainable impact, we prioritized in-person activities and focused our efforts on three groups: employees, costumers, and young people.

We see financial education as essential to everyday life, regardless of income level or social background. Since the program began, we have taken a human-centered approach focused on personal development and empowerment through the effective use of financial products and services.

Our work is guided by the belief that financial education should be accessible to all, high-quality, and focused on building life skills. We organize our efforts around four lines of action:

Knowledge development

We create and share accessible tools and content to support financial learning.

We also conduct research and analysis on financial inclusion.

Promotion of financial education

We encourage people to make decisions that improve their financial lives and to become agents of change through engaging, practical learning experiences.

Our offering includes workshops, conferences, interactive sessions, courses, and diploma programs.

Public engagement and sector influence

We promote systemic improvements in financial and economic education, aiming to expand its impact across institutions and sectors.

Workforce and entrepreneurship development

We strengthen job-related skills and promote sound financial management among young people to expand their education and employment opportunities.

We also encourage self-awareness to help individuals identify their strengths and interests and develop potential sources of income through entrepreneurship.

Key Financial Education Initiatives

Approximately 30% of activities are aimed at unbanked populations or those not yet part of the formal financial system, supporting financial inclusion and promoting equitable access to financial services.

1. Digital education platform

A platform designed to help costumers and non-costumers make the most of banking products and services. Its main objective is to provide engaging content that helps users improve their relationship with money.

2024	2025
87,155 visitors	**61,233** visitors

In 2025, we laid the groundwork to significantly expand the platform's reach by developing specialized content for small and medium-sized enterprises, to be launched in 2026.

Traffic analysis shows that most users access our content through mobile devices, such as smartphones and tablets. This allows us to reach users anytime and anywhere, facilitating continuous access to financial education and supporting both personal and business development.

The most viewed topics on the Financial Education site include Investment, Afore, and Debt Management, highlighting strong interest in key areas for informed financial decision-making. Some lessons also include interactive quizzes that help users assess and reinforce their learning, leading to high engagement and improved knowledge retention.

In 2026, we will introduce new courses and lessons with more engaging formats and high-value content to expand access to financial education. These efforts reinforce our commitment to financial inclusion and to improving people's lives, while supporting broader economic and social development.

2. Mi Camino Emprendedor (My Entrepreneurial Journey) Platform

Launched in 2022, this platform promotes entrepreneurship by providing tools and information for individuals looking to start a business, develop an idea, or strengthen an existing venture.

2024	2025
2,000 visitors	**150** visitors

As part of this initiative, targeted training programs were delivered to communities near stadiums in Mexico City, Guadalajara, and Monterrey—host cities for World Cup matches. The goal was to equip participants with the tools and knowledge needed to capitalize on the economic opportunities generated by the event. This effort strengthened participants' ability to engage in productive and commercial activities, supporting local economic development and community well-being.

3. Saber Decidir (Informed Decision-Making): Financial Well-being for My Family

This program helps people build the knowledge, skills, and habits they need to make sound personal and financial decisions, improving well-being for individuals, families, and communities.

2024	2025
74 Courses delivered	**52** Courses delivered
1,448 Beneficiaries trained	**7,363** Beneficiaries trained

An evaluation by the Center for Research and Higher Studies in Social Anthropology (CIESAS) shows a clear positive impact on participants' personal, family, and community well-being:

- Participants report positive experiences and highlight changes that carry over into their daily lives, families, and communities.
- The exchange of experiences during sessions, along with greater openness in expressing emotions, reflects the effectiveness of the workshops.
- Many facilitators were once participants, reflecting the program's lasting impact.
- The workshops are well structured, with results consistently pointing to positive outcomes.
- After more than three decades, the model continues to address real needs and remains widely accepted in the communities it serves, confirming its relevance over time.

4. Investment Challenge

This initiative targets young people between the ages of 18 and 29 and builds financial skills through a four-week investment simulation. Participants with the strongest strategies receive prizes.

The challenge gives participants hands-on experience with stock market and investment fund transactions in a virtual setting, using the AcciTrade Coach simulator to manage a portfolio of three million virtual points.

The program is held every two years. The 2025 edition was delivered in collaboration with the Gulf-Peninsular Division and the Switch team, both based in Yucatán. A total of 70 beneficiaries were reached through specialized lectures, interactive activities, and the main competition on the AcciTrade Coach platform. The program strengthens financial skills and helps prepare a new generation of investment leaders.

5. National Financial Education Week (SNEF)

Organized by the Government of Mexico, SNEF brings together public, private, social, and educational institutions to deliver interactive and educational activities focused on financial literacy.

In 2025, SNEF was held from October 23 to 31 in a hybrid format nationwide. The Financial Education team participated through conferences, a virtual stand, and the distribution of informational content, reaching 45,714 beneficiaries.

During the event, 23,339 views of virtual conferences were recorded at higher education institutions such as the Instituto Tecnológico de Oaxaca, Instituto Tecnológico de Zacatecas, Instituto Tecnológico Superior de Centla, Tecnológico de Monterrey, and Instituto Tecnológico de Tláhuac, among others. These results show SNEF's ability to connect with a broad university audience and help build financial skills among younger generations.

SNEF has become an important platform for raising awareness of financial education, recognized as a key factor in individual well-being and the development of more inclusive and resilient economies. According to the National Commission for the Protection and Defense of Financial Services Users (CONDUSEF), the Banamex stand was the most visited at the main venue, with strong interest in topics such as investment, savings, emergency funds, and insurance—underscoring the need for practical financial knowledge.

6. National Financial Education Week Abroad (SEFIME)

This program supports Mexicans living abroad through workshops, advisory sessions, and hybrid conferences focused on savings, investment, remittances, and access to housing.

As part of SEFIME, we trained staff at Mexico's foreign representations and operators of the Financial Advisory Windows (VAF), equipping them with updated knowledge and practical tools to better serve migrant communities.

In 2025, these activities reached 36,581 people across multiple U.S. cities, reflecting the program's reach and its role in strengthening financial skills among Mexicans abroad.

7. Entrepreneurship Diploma in collaboration with CONDUSEF

We aim to promote an entrepreneurial mindset.

International data shows that around 70% of the global population is interested in starting a business, with even higher levels among those between the ages of 15 and 29.

In Mexico, this figure exceeds 85%; however, 7 in 10 businesses fail within the first 2 years.

In response to this reality, we partnered with CONDUSEF to develop the Entrepreneurship Diploma, an online, asynchronous, and fully free program. It consists of five modules, totaling 50 hours and is available at https://emprendimiento.condusef.gob.mx/

In 2025, the program enrolled 25,347 participants, reflecting strong interest and broad reach, particularly among young people in Mexico.

8. Jóvenes Construyendo el Futuro (Youth Building the Future)

In collaboration with the Secretariat of Labor and the Asociación de Bancos de México, Banamex implemented a social inclusion program that provides young people with hands-on training across a range of institutions. In 2025, the program welcomed 120 participants.

During their time in the program, participants are trained as Financial Education promoters while strengthening their interpersonal and socio-emotional skills. They are equipped with practical tools for employability and entrepreneurship, participate in cultural visits and contribute to volunteer initiatives. The program also provides exposure to real operational environments.

Participants develop experience in event execution, logistics, and leadership through initiatives such as Juventudes (Youth) and contribute to financial content development, reinforcing both autonomy and professional confidence.

In 2025, participants were assigned to areas including Financial Education, the Historical Archive, Foro Valparaíso, Casas Señoriales, and Organizational Culture. In these roles, they supported high-impact national initiatives, including National Financial Education Week.

As part of their transition into the workforce, a dedicated recruitment initiative was organized in collaboration with the Talent Acquisition team. By year-end, 20 participants were interviewing for full-time roles at the bank, including teller, credit card advisor, and Afore pension advisor positions.

This program strengthens youth employability while reinforcing Banamex's commitment to expanding access to opportunity and contributing to the development of Mexico's social fabric.

9. Financial Education Forum

Another edition of the Financial Education Forum was held, bringing together leading experts since its inception, including Nobel laureates and senior Mexican authorities.

This year's discussions focused on the strategic importance of financial education as a key tool for addressing retirement-related challenges. The initiative strengthened participants' understanding of savings and investment and increased awareness of the importance of planning for a secure retirement. The forum also helped position financial education as a central pillar of the national agenda, promoting a more holistic perspective on long-term financial well-being. The forum brought together 625 participants, reflecting its reach and continued relevance in Mexican society.

10. Financial Education in the Formal Education Curriculum

In 2025, Banamex partnered with Universidad Tecnológica de México (UNITEC) to integrate financial education into the cross-disciplinary course Budgets within its economic-administrative programs.

Banamex-developed materials were adopted across UNITEC's nine campuses and incorporated into the course evaluation, representing 25% of the final grade and setting a new benchmark for financial education at the university level in Mexico.

The program was launched during the final academic term of the year, reaching 1,218 students who gained access to practical tools to support both their professional and personal financial decision-making. This initiative strengthens financial literacy among future professionals and reinforces Banamex's role as a leading promoter of financial education within Mexico's higher education system.

11. Benefíciate, Inviértete, Finánciate (BIF) (Benefit, Invest, Finance)

In 2024, Banamex designed and delivered a personal finance education program for Grupo Financiero employees. The program featured contributions from both internal and external experts and was developed with the following objectives:

- Provide employees with a tailored learning experience.
- Equip them with tools to advise costumers and prospective costumers on personal finance.
- Improve their quality of life by helping reduce financial stress.

The first edition was completed by 9,607 employees, reflecting strong engagement across the organization. Building on this momentum, session recordings from the final quarter were made available again in 2025, reaching 3,202 unique participants. These results highlight the program's scale and its contribution to both employees' professional development and financial well-being across the Group.

Program evaluation results indicate that:

- The average session rating was 9.6 out of 10.
- 97% of participants reported learning something applicable to their daily lives.
- 83% feel prepared to provide financial guidance to others.
- 100% gained tools to improve their financial well-being.

12. Diploma Program for Personal Finance Advisors

Banamex partnered with the Faculty of Economics at the National Autonomous University of Mexico (UNAM) to develop a diploma program for personal finance advisors. The program is designed to prepare professionals who combine technical expertise with empathy and strong ethical standards, with a clear focus on improving financial well-being. The first edition will be launched as a pilot, with plans to offer the program twice a year starting in the second half of 2026. Each cohort will provide participants with practical, up-to-date tools aligned with current financial needs.

For its initial launch, Educación Financiera Banamex will award 25 scholarships to support the development of advisors who can expand access to financial guidance and contribute to better financial outcomes at both the individual and community levels across Mexico.

13. Financial Psychology Diploma Program

Banamex, in collaboration with the Faculty of Psychology at UNAM, developed a diploma program focused on financial behavior. The program approaches financial decision-making from a psychological perspective, combining elements of behavioral economics, mental health, and individual and group intervention strategies. It is designed to strengthen professional practice by equipping participants with practical tools to support more informed, conscious, and well-being-oriented financial decisions at both the individual and societal levels. The first edition will be implemented as a pilot to evaluate results and scale the program annually.

Educación Financiera Banamex will support the launch by awarding 25 scholarships, enabling access for committed professionals, and contributing to the development of specialized talent. Over time, the program is expected to broaden its reach and support efforts to reduce financial stress in Mexico.

14. Institutional Outreach

Banamex's financial education specialists deliver the institution's educational programs across the country through both in-person and virtual formats. Their work reaches a wide range of audiences, including costumers, non-costumers, partners, universities, companies, schools, and civil society organizations. In 2025, the program brought together 45,492 participants, reflecting its national scale and sustained demand.

Nearly half of the participants (48%) were bank costumers. The team also delivered specialized sessions for more than 60 high-value costumer companies, including Tafer, Dixon, Ericsson, and Cemex, strengthening relationships while supporting financial capability within the business sector.

The program supports multiple business segments, including Payroll, SMEs, Government Banking, and Commercial Banking. It is developed in coordination with key internal areas, including Human Resources, Volunteering, Marketing, and Social Commitment, as well as its Fomento and Cultural Heritage (Patrimonio) divisions. This cross-functional approach allows the program to operate at scale while maintaining relevance across audiences, reinforcing its role in expanding financial knowledge and capability in Mexico.

15. My Finances, My Well-Being Workshop

In 2025, Banamex delivered a financial education workshop for branch employees to strengthen their ability to manage, grow, and advise on financial resources. A total of 407 employees from Mexico City, Guadalajara, Quintana Roo, and Yucatán participated. The program contributed to improving the quality of financial guidance provided at the branch level.

The workshop promotes sound saving and investment practices, covering core topics such as goal setting, budgeting, saving, debt management, and investment strategies. By building practical, applicable knowledge, employees are better equipped to strengthen their own financial habits and deliver more consistent, informed support to costumers.

16. Teller Onboarding

As part of the onboarding program for new teller operators, a financial education module was introduced to highlight the importance of financial literacy, supporting a dual strategic objective:

Strengthen employees' personal financial well-being and enhance the quality of personal financial guidance provided to costumers at the branch level.

Following a pilot in 2024, the module was formally incorporated in 2025 as a mandatory component for all incoming teller personnel. To date, 24 groups have completed the program.

The initiative was developed in collaboration with the Branch Operations and Learning teams. In 2025, 1,793 new tellers completed the module.

This integration has strengthened employee preparedness while supporting more consistent service quality across branches.

17. Guadalajara International Book Fair

As an official sponsor of the Guadalajara International Book Fair, Banamex continues to strengthen its presence at one of the most important events in the Spanish-language publishing world.

As part of its financial education efforts, Banamex participated in the 2025 edition with a dedicated stand designed for children, young people, and families. The space offered workshops and interactive activities to promote saving and introduce the fundamentals of investing.

In 2025, the initiative reached 13,269 participants, including students and families, reinforcing understanding of key financial concepts such as saving and investing clearly and practically, particularly among younger audiences.

18. Small Business Diploma Program (CEDEPEC)

Banamex offers the Small Business Diploma Program (CEDEPEC) to help small business owners strengthen the management and sustainability of their businesses. The program focuses on practical financial and operational skills that help participants improve performance, increase competitiveness, and move beyond subsistence-level activity.

The program enrolled 1,500 business owners in 2025.

Survey results collected at the beginning and end of the course indicate that:

- 98.7% of graduates would recommend the program.
- 94.7% reported an increase in sales, with gains ranging from 10% to 30%

These results reflect the program's effectiveness in supporting business development among participants.

728 participants	**1,500** participants

19. Children's Villages

This program serves children and adolescents who have lost parental care or are at risk of losing it, and who are supported by Aldeas Infantiles SOS México (part of SOS Children's Villages International) through its alternative care and family strengthening programs.

Educación Financiera Banamex delivers a comprehensive training program focused on developing digital and entrepreneurial skills. Participants are encouraged to identify needs within their communities and design practical solutions through project-based learning. The program also introduces participants to tools such as artificial intelligence and supports them in translating ideas into structured initiatives.

Ongoing guidance and follow-up help participants develop projects with increasing independence. This approach enables participants to build relevant skills and apply them to support their communities.

20. DHBUS

DHBUS is a mobile classroom that travels to schools and underserved communities across the Yucatán Peninsula.

Designed as an interactive learning space, the adapted bus delivers workshops, hands-on activities, and educational resources for middle and high school students. Core topics include:

- Basic financial education (saving, budgeting, and responsible money management).
- Entrepreneurship and personal financial decision-making.
- Digital tools to strengthen financial skills.
- Guided reflection on personal and professional goals from a financial perspective.

The program is complemented by digital tools such as the Virtual Museum of Personal Finance (MUVIFI), a 360° immersive experience that reinforces financial inclusion concepts and promotes active learning. In 2025, the program reached 43,822 participants across 255 schools—primarily public—and 54 communities.

21. Youth Supporting Children (Jóvenes Ayudando a Niñas y Niños)

Banamex offers a free, online program that connects university students completing their social service with primary and secondary school students in Mexico who are experiencing learning gaps.

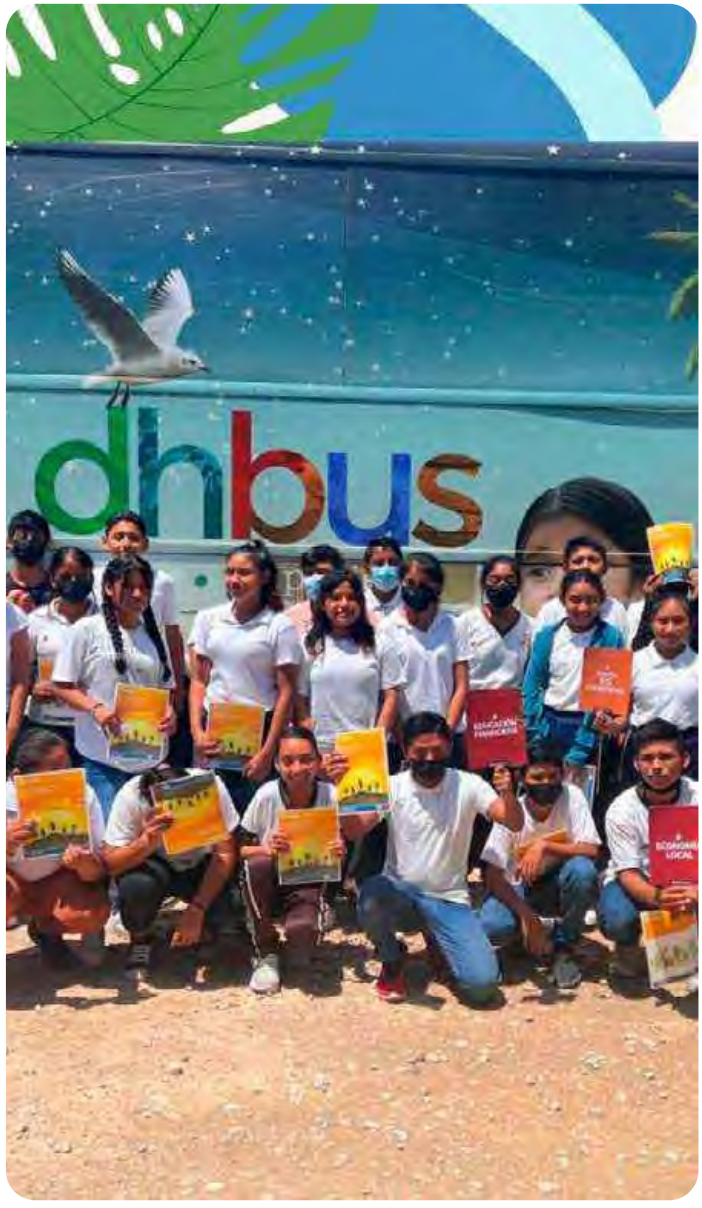

In 2025, the program reached 6,000 children, supporting their academic development and helping reduce educational gaps.

reached

22. AMCO SUMMIT

Banamex was the only financial institution to participate with a dedicated stand and workshops at the AMCO Summit, directly reaching 450 primary and secondary school students.

The event brings together students, families, educators, and academic leaders, fostering collaboration across the education community. Banamex's participation reinforces its commitment to supporting education through partnerships with organizations that have a strong presence in Mexico and across 13 countries in Latin America and Europe.

23. Banamex Financial Inclusion Index

For the eighth consecutive year, Banamex presented its Financial Inclusion Index. This tool assesses access to and use of financial products and services in Mexico at both the state and municipal levels.

The study has become a reference point for public authorities, financial institutions, and academia, providing data that supports the development of strategies to expand financial inclusion.

Its relevance has been recognized both nationally and internationally. The United Nations Development Programme (UNDP) has used the Index as a basis for designing and implementing its Financial Inclusion Program for Women. It has also been cited by the Secretariat of Finance and Public Credit (SHCP) and other institutions, reflecting its contribution to public policy development.

In this edition, the Index reached a broad audience, with coverage by more than 60 media outlets and presentations at leading academic institutions, including the National Autonomous University of Mexico (UNAM) and Universidad Iberoamericana (UIA), as well as at major cultural and educational events such as the Guadalajara International Book Fair and the Hidalgo State University Fair.

24. Protocol for Customers in Vulnerable Situations

In line with guidelines issued by the National Banking and Securities Commission (CNBV), Banamex established a multidisciplinary team that included representatives from Fraud Prevention, Branch Operations, the Contact Center, Marketing, the Neurodiversity and Disability Network, and Financial Education, among others.

As part of this effort, Banamex developed two targeted sessions to strengthen support for customers in vulnerable situations: Cyber Fraud Prevention and How to Use an ATM.

Banamex will incorporate Mexican Sign Language interpretation into new audiovisual materials on its Financial Education platform, further expanding access and supporting more inclusive and secure financial education.

9.6 Volunteer Program

Since 2004, Banamex has promoted a culture of solidarity and social engagement among its employees through its Volunteer Program, supporting communities and environmental conservation efforts.

In 2021, Voluntariado Banamex became part of the Corporate Citizenship Strategy, aligning volunteer efforts with broader priorities related to sustainable development, economic growth, and Mexico's long-term progress.

The program is open to employees, as well as their family members and friends, who contribute their time, skills, and expertise through a range of initiatives that benefit the communities where Banamex operates and support environmental protection.

The program also focuses on developing participants' skills and fostering continuous learning to strengthen their ability to contribute to social, environmental, and cultural initiatives. To support this, Banamex provides training, access to tools, and partnerships with civil society organizations that help scale these efforts.

The Volunteer Program is structured around four core areas:

- Social Development
- Environmental Regeneration
- Cultural Promotion
- Financial Guidance

Volunteer Program Results

	2024	2025
Volunteer participations	24,118	26,549
Employee volunteers	14,841	17,931

47.3% of employees participated in volunteer activities in 2025.

Experienced volunteers play a key role in leading and sustaining volunteer initiatives across the organization.

Environmental Achievements

In 2025, employees contributed to environmental initiatives with the following results:

23,219
trees planted in collaboration with partner organizations

2,714 kg
of waste removed from public spaces.

245
maguey plants planted

2,116 kg
of plastic caps were collected and donated to Banco de Tapitas A.C., supporting recycling and social initiatives.

Maintenance of **712** trees to support preservation efforts

8,312 pollinator plants cultivated in greenhouse environments

44 sesiones
virtual environmental education sessions delivered, with 2,913 connections

Banamex received the
Galardón Cladodio
for the fourth consecutive year in recognition of its contribution to environmental care through volunteer work.

Social Achievements

Key social initiatives carried out in 2025 include:

The National Food Campaign, held annually between May and June.

Brought together
14,470
employees, who collected 51,054 kilograms of rice and beans in collaboration with the Asociación de Bancos de Alimentos de México, benefiting more than 51,000 people nationwide.

421
employees contributed to relief efforts following the October floods in Veracruz and Puebla.

418
employees were trained as financial education advisors.

1,473
employees participated in toy donation drives during the holiday season, supporting children in vulnerable situations.

1,042
employees participated in the Teletón digital fundraising campaign to support children with disabilities.

9,581
employees participated in volunteer activities, both in person and virtually.

9.7
Fomento Social Banamex

Fomento Social Banamex, A.C. was established in 1992 at the initiative of Alfredo Harp Helú and Roberto Hernández Ramírez.

For more than three decades, it has supported social development in underserved communities and regions, both through direct project implementation and by providing funding to civil society organizations and public institutions working to address poverty and marginalization.

Its mission is to promote inclusive development and social well-being through programs and initiatives focused on job creation, social entrepreneurship, and sustainable community development.

Fomento Social Banamex works to strengthen the capabilities and conditions of communities and individuals, supporting the responsible use and development of cultural, natural, social, and economic resources that contribute to long-term sustainability.

Its initiatives are aligned to promote inclusive economic growth, particularly for vulnerable populations, by improving living conditions, enhancing resilience, and supporting sustainable development.

In the social sphere, Fomento Social Banamex supports projects that improve living conditions for individuals and communities and strengthen skills for productivity and employment; in the economic sphere, it promotes income generation and supports job creation and social enterprises; in the environmental sphere, it promotes the sustainable use of natural resources through organic, biodiversity-friendly production and the use of renewable energy; and in the cultural sphere, it supports creative entrepreneurship.

Our Focus Areas

Fomento Social Banamex operates across three core areas of support, each encompassing a range of programs aligned with the provisions set out in Article 79 of Mexico's Income Tax Act.

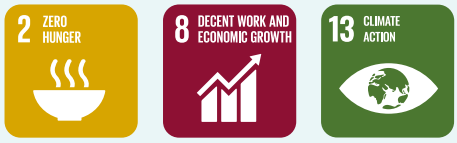

Natural Disaster Relief	Employment and Income Generation	Support for Civil Society Organizations
Economic Recovery • Initiatives to strengthen local economies. • Organized community participation to improve living conditions.	**Community Development** • Initiatives to strengthen local economies. • Organized community participation to improve living conditions.	**Home Runs Program** • Support for basic needs, including food and clothing. • Medical assistance.
Emergency and Prevention • Support for basic needs, including food and clothing. • Participation in civil protection efforts. • Support for the sustainable use of natural resources and environmental protection.	**Workforce Training and Employability** • Education and training for employment.	**institutional strengthening** • Strengthening of organizations engaged in eligible activities.
Restoration and Reconstruction • Support for basic housing needs. • Initiatives to strengthen local economies. • Restoration and recovery of national cultural heritage.	**Social Entrepreneurship** • Initiatives to strengthen local economies. • Organized community participation to improve living conditions. • Education and training for employment.	**Gender Equality** • Promotion of gender equality.

In line with these areas and activities, in 2025, Fomento Social Banamex allocated 60.9 million pesos to projects that directly benefited more than 61,000 people and reached more than 240,000 people.

Natural Disaster Relief

Hurricanes Otis and John in Guerrero

On October 26, 2023, Banamex activated the 1x1 Program to support individuals and communities affected by Hurricane Otis, and Fomento Social opened a dedicated account to receive donations. As of January 31, 2024, the program had raised 9.769 million pesos through 4,500 donations from individuals and companies. In addition, partner organizations contributed 21.774 million pesos, received across 2024 and 2025.

Beyond the funds raised through the 1x1 account, co-investment partners contributed 37.654 million pesos directly to economic recovery projects led by Banamex.

Under the 1x1 Program, Banamex allocated 36.901 million pesos to expand support for communities affected by Hurricane Otis. Of this amount, 5 million pesos was directed to CRIT Acapulco, with the remainder allocated by Fomento Social to reconstruction and economic recovery efforts.

In September 2024, Hurricane John affected the states of Guerrero, Oaxaca, and Michoacán, further impacting communities already affected by Hurricane Otis. In response, Banamex allocated 2 million pesos to support basic subsistence needs in the affected areas.

*Figures are presented in mexican pesos

The reconstruction of the La Diana Market in Acapulco is the most significant project made possible through the partnership with Fundación Coppel, Fundación Coca-Cola, Fundación Compartamos, Fundación Televisa, and Cemex. State and local authorities support the project, and Diseño y Construcción is carrying it out. Legal advisory services have been provided by Appleseed and the Abogados ProBono network to support the formalization of market stalls and the establishment of an association to represent the market vendors. Construction began in August 2024 and was completed in November 2025, directly benefiting market vendors and indirectly reaching more than 50,000 market users.

In 2025, Fomento Social funded eight livelihood recovery projects and three water security projects, directly benefiting 2,540 people. CEMEFI funded the remaining seven projects. All projects are currently under implementation and are expected to report results by the end of 2026.

The Manos de Guerrero project, funded in 2025 and developed in collaboration with New Ventures and the Secretariat of Economic Promotion and Development of the State of Guerrero, supports artisans in adopting new tools for personal development and economic recovery. The program follows a hybrid model that combines in-person and virtual support, building trust, providing structured guidance, and fostering collaboration. It is being implemented in the municipalities of Ometepec, Xochistlahuaca, and Tlacoachistlahuaca and includes mentoring, microlearning-based training, commercial linkages, and access to seed capital. A total of 260 artisans are expected to benefit from the program.

Projects supported in 2024 and 2025, in partnership with the Centro para la Competitividad de México (CCMX) of the Consejo Mexicano de Negocios (Mexican Business Council), focus on strengthening business capabilities among 200 entrepreneurs and 21 local SMEs in Acapulco. The initiative supports the development of innovative business models, new value propositions, and expanded sales channels, in coordination with academic institutions and the state government.

In partnership with the Rotary Club of Acapulco, Fomento Social supports the Familias Progresando (Families Moving Forward) project, which uses drone-based reforestation to restore five hard-to-access natural areas during the 2025 rainy season (June-October). The project covers 3,265.88 hectares across areas including El Veladero National Park, Las Brisas Canyon, La Roqueta Island, Bicentenario State Park, and Brisas Marqués. It aims to promote tree growth to support climate regulation, improve air and water quality, preserve biodiversity, enhance water management, capture carbon, and reduce the impact of natural disasters. The initiative includes collecting 150,000 seeds from native and endemic tree species to produce 50,000 clay capsules containing seeds, compost, and water-retention material. Drones will disperse the capsules across targeted areas. The project aims to achieve a 70% germination and survival rate. The capsules will be produced by 12 women, who will receive compensation to support their households' economic recovery.

Hurricane Erick in Guerrero and Oaxaca

On June 19, Hurricane Erick made landfall on the coasts of Oaxaca and Guerrero, causing significant damage and losses, particularly among vulnerable populations.

To support community-based organizations in implementing projects that contribute to comprehensive, sustainable, and resilient recovery, Fomento Social Banamex, in partnership with Plataforma Nuup, the United Nations Development Programme (UNDP), Fundación Coppel, and Promotora Social México, issued an invitation-only call for proposals titled “Sustainable Economic Recovery in Response to the Impacts of Hurricane Erick 2024.” The call was directed to civil society organizations, working groups, and social economy enterprises in the states of Guerrero and Oaxaca. Invitations were sent on September 25, 2025, to 11 authorized recipient organizations and 25 producer organizations.

By October 13, a total of 21 proposals had been received—7 from Guerrero and 14 from Oaxaca. These proposals were reviewed and evaluated by a committee composed of representatives from UNDP, Nuup, Promotora Social México, Fundación Coppel, and Fomento Social Banamex. On October 29, 14 proposals were shortlisted for further evaluation under Fomento Social Banamex’s internal review process.

On December 11, the Fomento Social Banamex Project Evaluation Committee selected the final projects based on the evaluation ranking. Funding for these projects will be disbursed in 2026.

Employment and Income Generation

Strengthening Productivity and Sustainable Community Development

As part of its efforts to strengthen the local economy, Fomento Social continues to support productive projects and sustainable community development initiatives. The main projects and initiatives carried out in 2025 are outlined below.

a) "Building Capabilities for Sustainable Development" within the RedEAmérica Network

In 2025, Fomento Social provided a grant of 1.47 million pesos to Fundación Unidos contra la Pobreza y Marginación to support the project's second phase. Fomento Social Banamex also participates, alongside 11 companies and foundations, in the design and implementation of a collaborative fund developed through the Mexico Node of RedEAmérica. Participating organizations include the Centro Mexicano para la Filantropía (CEMEFI), Fundación ADO, Fundación Estafeta, Fundación Holcim México, Fundación Merced, Fundación Smurfit Westrock, Fundación Sempra Infraestructura, and FECHAC, among others.

Through this collaborative mechanism, Fomento Social has contributed 2 million pesos, and, together with partner organizations, nearly 8 million pesos has been raised. These resources support initiatives aimed at strengthening the local economy of six community groups implementing projects over two years.

The six selected projects are being implemented in the states of Oaxaca, Chiapas, Michoacán, Sonora, Tlaxcala, Hidalgo, and Yucatán. To date, they have reached 920 people, with a target of 1,102 beneficiaries.

Selected Projects - Collaborative Fund

Group	Project Name	Key Activities	Results Achieved	Beneficiaries
Alternare	Agroecological Products from Small-Scale Women Producers in the Monarch Region"	• A call for applications was launched for the sixth cohort of the Rural Entrepreneurship Training Program (16 participants selected from 14 communities). • Ongoing support provided to 117 agroecological plots, benefiting 102 producers.	• ncome-generation model incorporating skills and resources for sustainable practices. • Development of sales channels and partnerships. • Financial and social sustainability. • Environmental conservation.	165
CEDO	"Women's Empowerment and Value Creation: Sustainable Crab Processing"	• Progress made in the design and construction planning of the Comprehensive Well-being Unit (UBI). • Pilot processing initiatives strengthened post-capture handling practices. • Participation in fairs and festivals increased visibility and market linkages.	• Certification of labor competencies under the federal CONOCER program. • Recognition of women's work. • Strengthened technical, business, and life skills. • Establishment of the Comprehensive Well-being Unit (UBI).	12

Group	Project Name	Key Activities	Results Achieved	Beneficiaries
Fonda	"Barrilete and Marine Finfish Fishery Value Recovery Project"	• Continued progress in strengthening organizational capacity and commercialization among fishing cooperatives in Oaxaca. • Development of a robust methodological strategy to consolidate the organization.	• Sustainable, high-quality product. • Product diversification and value-added development. • Generation of sustainable income. • Strengthening of sales channels. • Financial and social sustainability.	19
Gaia	"Management and Diversification of Two Maguey-Producing Areas: Building Sustainable Alternatives"	• Formation of four family-based working groups (149 producers in Tlaxcala and Hidalgo). • Preparation of a draft on agave value chains. • Knowledge exchange visit to Rancho Vía Orgánica.	• Development of an agave-based value chain. • Strengthening of advocacy capacities.	138
INSADE	"Artisanal Yucatecan Sauces and Jams"	• Increased participation in training sessions. • Participants—primarily women—showed strong interest in innovation, skills development, and exploring new business opportunities.	• Increase in annual production (up to 500 units). • Growth in direct and online sales. • Participation in local markets. • Social sustainability.	38
YOMOL A'TEL	"Yomol A´tel"	• Successful implementation of community-managed financing for piglets. • Product diversification through the use of aromatic plants for food products (spiced beverages, teas).	• Consolidation and follow-up of women-led enterprises. • Development of technical and productive capacities. • Promotion of community leadership. • Community and intercultural engagement.	548

b) Productivity Support Calls with UNDP and Nuup

On September 9, 2025, Fomento Social signed a Memorandum of Understanding (MoU) with the United Nations Development Programme (UNDP). During the event, key results from the calls for proposals were presented, along with lessons learned and insights from the collaboration. These included developing a repository of best practices that captures the knowledge and leadership of participating initiatives in managing solutions, while supporting their scalability and replication.

In 2025, a Manual for the Establishment and Management of Revolving Funds was also developed to support organizations in building capacity for the sustainable management of program resources. The manual promotes the creation of internal credit funds to help organizations manage financial support for their producer members more effectively.

Social Entrepreneurship

Since 2014, through its Social Entrepreneurship Support Program, Fomento Social Banamex has supported projects, organizations, and enterprises that address social and environmental challenges through innovative, sustainable business models aimed at improving the quality of life for vulnerable populations. These initiatives help strengthen the local economy by promoting business models that originate within communities or address basic needs. The projects supported in 2025 include the following:

Emergente 2025: To promote productivity and sustainable community development through creative enterprises with social impact, Fomento Social provided a grant of 1.3 million pesos to The Hub MYT, A.C., for the EMERGENTE program. The program provides training, technical assistance, and access to seed capital for 90 high-impact creative projects that engage with or benefit individuals, groups, and communities facing barriers to economic opportunity. A call for applications will be launched in late 2025, with program implementation scheduled to begin in the first quarter of 2026.

In addition, a pilot initiative will be launched with 15 SMEs in Oaxaca to support the adoption of sustainable processes and impact measurement practices.

Mujeres de Cambio (Women of Change) Banamex Nacional: To promote women's economic development and expand access to tools and opportunities for impact-driven entrepreneurship, Fomento Social Banamex provided a grant of MXN 1.5 million to Co Plataforma de Investigación Generativa, A.C., to implement the Mujeres de Cambio and Mujeres de Cambio in Climate Tech programs, with support from DisruptivoTV. These programs aim to reduce the gender gap in entrepreneurship through a multi-pronged approach that includes reaching 500,000 women through a communications strategy designed to promote a gender-inclusive entrepreneurial culture; supporting 200 women-led ventures through training on the Socialab innovation platform; accelerating 10 active social enterprises; and providing advisory support to 60 ventures focused on climate-related challenges through technological innovation. Three of these ventures will receive seed capital. The Climate Tech component is implemented with the support and technical advisory of the German Agency for International Cooperation (GIZ).

Mujeres de Cambio Banamex in Tamaulipas: To help reduce the gender gap in entrepreneurship in the state, in 2024, Fomento Social Banamex provided a grant of 1.2 million pesos to Co Plataforma de Investigación Generativa, A.C., for the Mujeres de Cambio Banamex project. Program activities began in 2025, reaching 550 direct beneficiaries across the state through in-person entrepreneurship forums and training sessions designed to encourage and strengthen women-led ventures. The project is implemented with the support of DisruptivoTV and has been carried out with the participation and support of the state government through various agencies.

Latin American Impact Investment Forum (FLII) 2025: In 2025, the Latin American Impact Investment Forum (FLII) was supported by Banamex and brought together 1,000 participants from 37 countries. Of these, 40% were entrepreneurs, 30% investors, 18% ecosystem builders, 6% from academia, 4% from public institutions, and 2% from the media. The forum featured 223 speakers and panelists and included 70 sessions.

Aspen Network of Development Entrepreneurs (ANDE): In 2025, the project "Development of the Small and Growing Business (SGB) sector with a focus on job creation" reached more than 630 beneficiaries, promoting impact-driven entrepreneurship in mid-sized cities and raising awareness among local entrepreneurial communities of both opportunities and challenges. Activities were conducted in Cancún (Quintana Roo), Mexicali (Baja California), Oaxaca City, and León (Guanajuato), as well as through virtual workshops.
In September and October 2025, ANDE's Global Conference was held in Latin America for the first time, in the Mexican Riviera Maya, with support from Banamex. The event brought together more than 200 leaders from 44 countries to exchange ideas on the entrepreneurship ecosystem, inclusive innovation, corporate participation in social and sustainable development, and the diversification of financing models. Fomento Social Banamex participated in the Latin America high-level committee, supported the coordination of field visits, and took part in the panel "Entrepreneurship as a Mechanism for Inclusion."

Employability Support / Education and Training for Work

In 2025, Fomento Social supported the following initiatives:

Co-Investment for Decent Work. In partnership with Fundación Monte de Piedad, Fundación Coppel, Accenture, and Empower, this initiative continued in 2025, with Empower and The Emerging Markets Foundation joining as additional donors. Fomento Social Banamex contributed 10.5 million pesos to support the work of 41 civil society organizations and two multi-stakeholder networks: the Alianza Jóvenes con Trabajo Digno (Youth Alliance for Decent Work) at the national level and the Red Global de Jóvenes Oportunidad (Global Opportunity Youth Network) in Mexico City. Total co-investment in 2025 stood at 96.08 million pesos, supporting efforts to improve employability and life trajectories for more than 14,000 young people and individuals with disabilities.

Outcomes-Based Payment Mechanism - Social Impact Bond in Nuevo León (UN Women): Through a Memorandum of Understanding led by UN Women and the Government of the State of Nuevo León, with support from the Secretariat of Inclusion and Equality and in collaboration with Promotora Social México, Fundación Coppel, Fundación D'Acero, Fundación Monte de Piedad, Provident, and Fundación Promover (the implementing organization), this initiative aims to strengthen formal employment opportunities for 470 women in vulnerable situations in the state. The program promotes economic empowerment and gender equality by supporting women's access to formal employment. Payments are linked to the achievement of predefined outcomes under an outcomes-based financing model.

Social Impact Bond for Youth Employment in Nuevo León: This initiative focuses on young people between the ages of 18 and 29 living in the Greater Monterrey Metropolitan Area, to facilitate their entry into formal employment and encourage some to resume their education. The program seeks to improve employability through a combination of technical training, soft skills development, and access to a network of employers committed to inclusive hiring.

In 2025, 1 million pesos was allocated to provide stipends to participating youth during their training, enabling them to continue their courses and actively pursue employment opportunities.

STEM Teacher Training Program: In collaboration with Movimiento STEM+, Fomento Social Banamex launched the STEM Teacher Training Program 2025, which aims to train 15,000 teachers across Mexico under a STEM-based approach. The program equips educators with new teaching methodologies to apply in the classroom, while also strengthening their professional development by enhancing access to dignified, productive, and well-compensated employment. Through this training, teachers are supported in transforming their practice and fostering 21st-century skills among their students.

Mexico-United Kingdom Initiative 2025: English Language Training and Graduate Studies: This program aims to support 12 students from public universities and institutions in Mexico, with limited financial resources and English proficiency below the level required for admission to foreign universities, in pursuing graduate studies in the United Kingdom. The initiative included an online English course delivered by UK universities, jointly supported by Fomento Social and Bécalos. The program strengthened participants' research skills and increased their chances of admission to either a dual master's program between Queen Mary University of London and a Mexican institution, or a direct doctoral program at Queen Mary University or Durham University. In October 2025, all participating students (100%) completed the course and obtained a certification valid for admission to universities in the United Kingdom.

Common Fund for the Integration of Migrants and Refugees in Mexico: Fomento Social Banamex, Fundación Monte de Piedad, and Fundación Coppel, in collaboration with Hispanics in Philanthropy (HIP), established the Comunidades de Acogida common fund to support the integration of migrants and refugees in Mexico. Since its launch in 2024, the fund has aimed to promote full social and economic inclusion by supporting equal access to opportunities, services, and resources. It provides annual, flexible, trust-based funding to civil society organizations aligned with this objective.

The second and third phases of the fund will be implemented in 2026 and 2027, respectively, with continued support from the same partner organizations.

Support for Civil Society Organizations

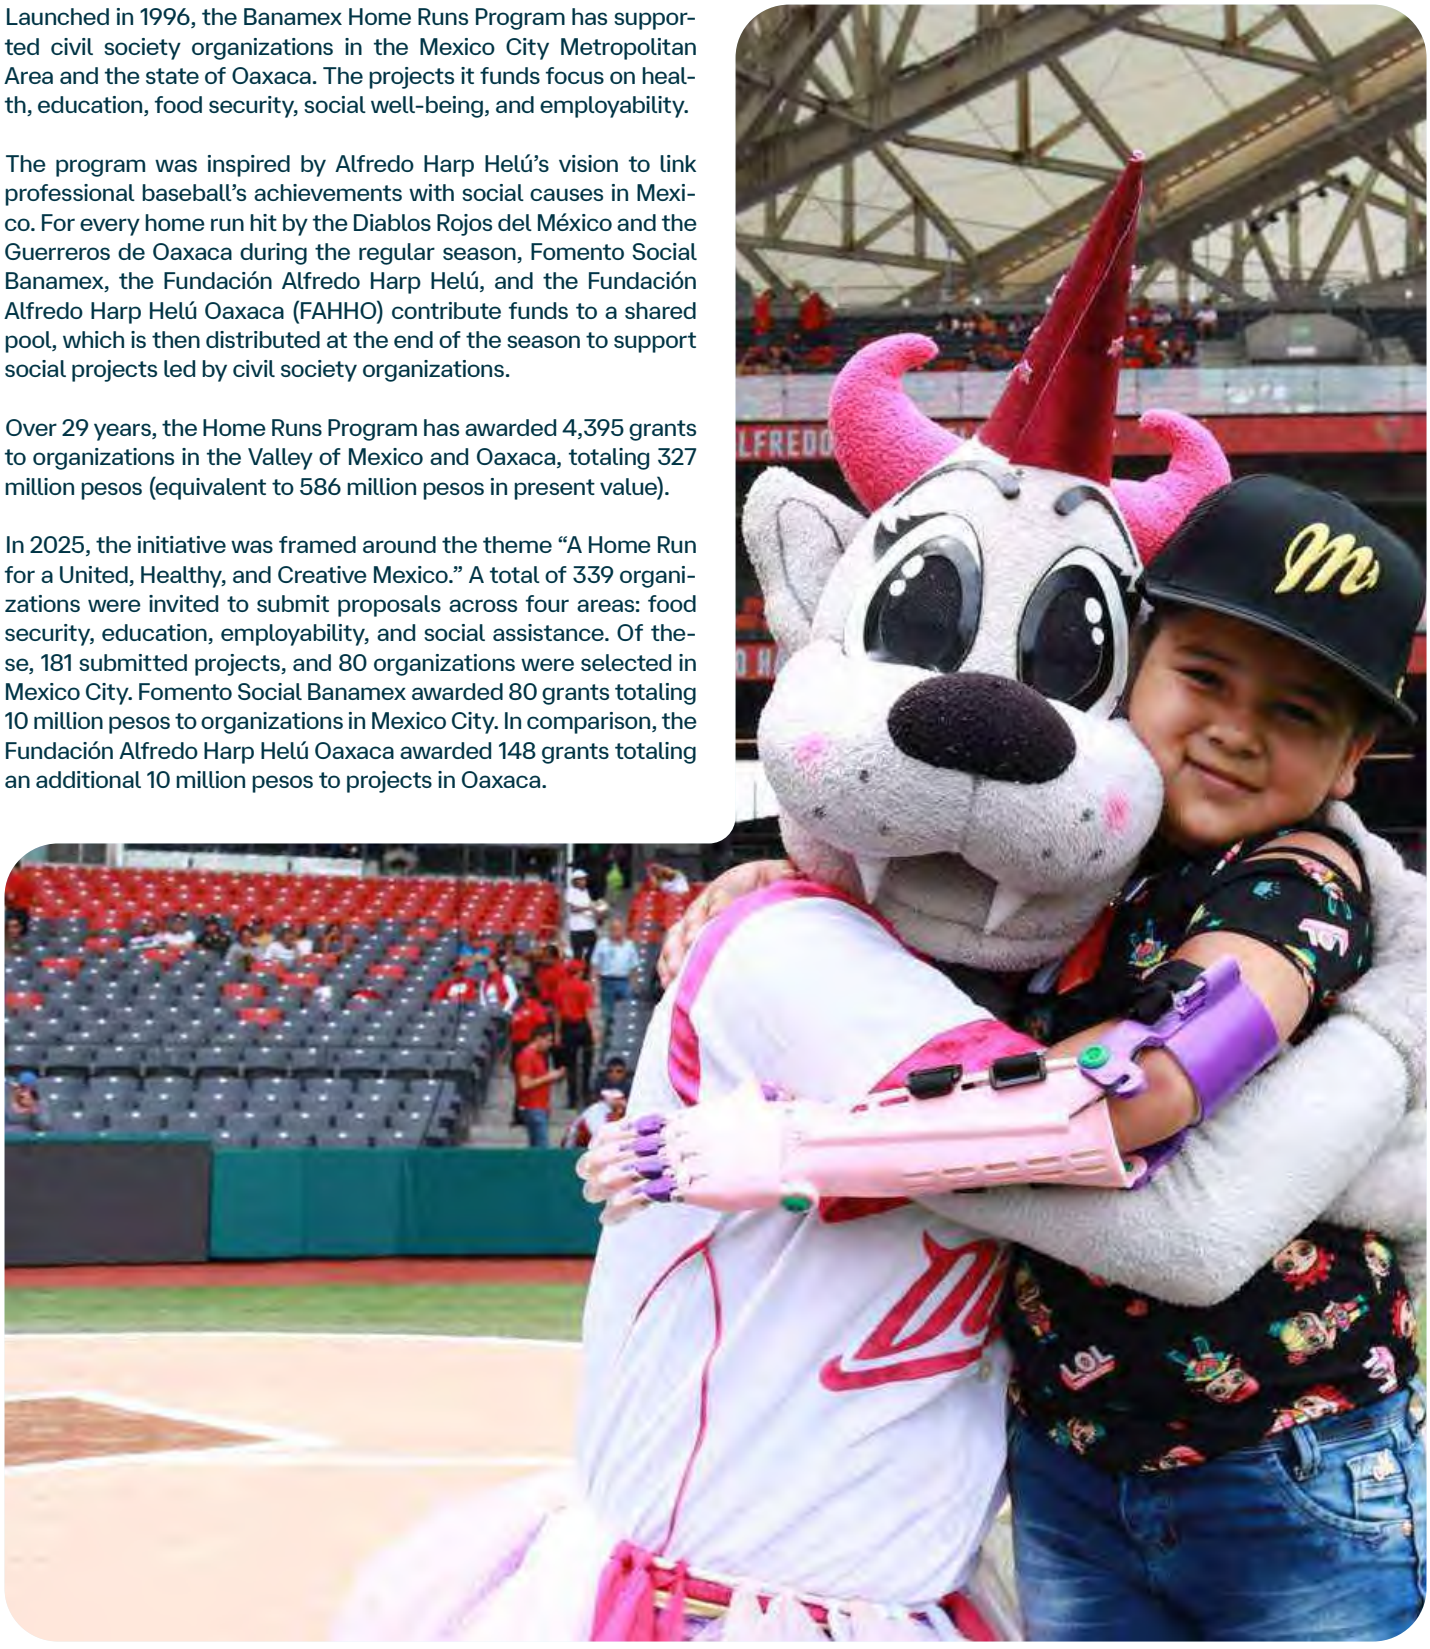

Banamex Home Runs Program

Launched in 1996, the Banamex Home Runs Program has supported civil society organizations in the Mexico City Metropolitan Area and the state of Oaxaca. The projects it funds focus on health, education, food security, social well-being, and employability.

The program was inspired by Alfredo Harp Helú's vision to link professional baseball's achievements with social causes in Mexico. For every home run hit by the Diablos Rojos del México and the Guerreros de Oaxaca during the regular season, Fomento Social Banamex, the Fundación Alfredo Harp Helú, and the Fundación Alfredo Harp Helú Oaxaca (FAHHO) contribute funds to a shared pool, which is then distributed at the end of the season to support social projects led by civil society organizations.

Over 29 years, the Home Runs Program has awarded 4,395 grants to organizations in the Valley of Mexico and Oaxaca, totaling 327 million pesos (equivalent to 586 million pesos in present value).

In 2025, the initiative was framed around the theme "A Home Run for a United, Healthy, and Creative Mexico." A total of 339 organizations were invited to submit proposals across four areas: food security, education, employability, and social assistance. Of these, 181 submitted projects, and 80 organizations were selected in Mexico City. Fomento Social Banamex awarded 80 grants totaling 10 million pesos to organizations in Mexico City. In comparison, the Fundación Alfredo Harp Helú Oaxaca awarded 148 grants totaling an additional 10 million pesos to projects in Oaxaca.

Social Impact Results

2025 Impact Results by Cause

Activities	Disaster Relief	Employment and Income Generation	Support for CSOs	Totals

Patrimonio y Fomento Cultural Banamex

Created in 2025, Patrimonio y Fomento Cultural Banamex integrates all of the Bank's art- and culture-related areas, including Patrimonio Artístico, Fomento Cultural, the Archivo Histórico, Casas Señoriales, and Foro Valparaíso.

This structure allows us to bring greater coherence to our cultural work—strengthening what connects us to our history while shaping a clear path forward. It reflects an ongoing commitment to promoting Mexican culture and to safeguarding one of the country's most significant artistic and architectural collections.

The mission of Patrimonio y Fomento Cultural Banamex is to drive investment in cultural development and to preserve, promote, and share Mexican culture, as well as the artistic and documentary legacy entrusted to Banco Nacional de México. Its vision is to serve as a leading example in the private sector, advancing culture through initiatives that are both innovative and inclusive, aligned with the evolving needs of the country and the institution

Over time, this work has positioned Banamex as a cultural reference within the private sector. Our efforts span the preservation of artistic, architectural, and documentary heritage, as well as the presentation of art, architecture, design, photography, and Mexican history through national and international exhibitions. These are complemented by a strong editorial program, public engagement initiatives, and inclusive programming designed for a wide range of audiences, with particular attention to young people and individuals with disabilities. We also maintain close ties with communities through initiatives such as the Programa de Apoyo al Arte Popular (Folk Art Support Program), the Programa de Desarrollo de Arte y Cultura (Art and Culture Development Program), and the Communities Project (Proyecto de Comunidades).

*Grants awarded by Fomento Cultural Banamex, A.C. (excluding DAC).
**Except for the budgets of Foro Valparaíso and the Archivo Histórico, which are managed by Banco Nacional de México, all remaining investment is attributable to Fomento Cultural Banamex, A.C.

9.8.1 Venues

Foro Valparaíso

Opened in 2019 as part of the 135th anniversary of Banco Nacional de México, Foro Valparaíso is a space dedicated to entrepreneurship, innovation, and culture. It is housed in the Palacio de los Condes de San Mateo de Valparaíso, one of the finest examples of 18th-century baroque architecture, designed by Francisco Guerrero y Torres and home to Banco Nacional de México since its founding in 1884.

The venue permanently exhibits 119 of the most representative works from the Banamex painting collection, spanning the 17th to the 20th century and widely regarded as the most important private collection of Mexican art. Visitors can also explore the former Board of Directors room, the Banamex employees' room, the Compromiso Social (Social Commitment) room, the innovation room, and the entrepreneurship lab. Foro Valparaíso also serves as the physical headquarters of the Banamex Financial Education Center, where free courses, workshops, lectures, and other activities are offered.

One of its key objectives is to highlight Banamex's contributions to the development of individuals, families, and businesses in Mexico, with a particular focus on fostering an entrepreneurial mindset among young people in vulnerable communities, enabling them to positively transform their surroundings.

In 2025, Foro Valparaíso welcomed
40,143 visitors

Palacio de Iturbide

The Palacio de Iturbide—formerly known as Palacio de Moncada—is another landmark of New Spanish baroque architecture. Built between 1779 and 1785 by Francisco Guerrero y Torres, it originally served as the residence of the Moncada-Jaral de Berrio family and later housed several historical figures, including Agustín de Iturbide, who lived there in 1823. Since then, the building has been known as Palacio de Iturbide.

Since the founding of Fomento Cultural Banamex in 1971, it has served as its operational center. Today, Palacio de Iturbide hosts some of the most important temporary exhibitions on Mexican art, folk art, history, colonial painting, photography, architecture, and design, all accompanied by a permanent program of free cultural and educational activities. Since 1972, the venue has presented more than 600 exhibitions and, since 1992, has welcomed more than 50 million visitors. It also features educational and mediation spaces, an art library, a photographic archive, and a bookstore.

In 2025, Palacio de Iturbide welcomed
1,003,162 visitors

Casa del Mayorazgo de la Canal

Located in the historic center of San Miguel de Allende, this property is one of the finest examples of New Spanish civil architecture in the Bajío region and has witnessed key political and social events, particularly during the Independence period. Banco Nacional de México acquired the property in 1981.

In 2010, it became the first of the four Casas de Cultura Banamex—historical and cultural spaces designed to contribute to the country's cultural, social, environmental, and educational development. The ground floor was adapted to host temporary exhibitions and cultural activities, and in 2022, the venue reopened fully to the public.

The site features two permanent exhibitions: one focused on the historical significance of the Bajío region and the Canal family, and another recreating a colonial-era kitchen, complemented by programming centered on local gastronomy. It also includes temporary exhibition galleries, a children's play and learning space, a reading room for young audiences, a reference library, and a multipurpose room.

In 2025, Casa del Mayorazgo de la Canal welcomed
185,083 visitors

Museo Casa Montejo

Built between 1542 and 1549 under the direction of Francisco de Montejo, founder of Mérida, this property is the only example of a Renaissance-style civil residence in Mexico. It is also the oldest building in Banco Nacional de México's holdings and has been open to the public free of charge as a Casa de Cultura Banamex since 2010.

Casa Montejo features a site museum that recreates the house as it would have appeared in the late 19th century, along with temporary exhibition galleries and multipurpose spaces.

In 2025, Museo Casa Montejo welcomed
259,766 visitors

Palacio del Conde del Valle de Súchil

Built in the second half of the 18th century by Pedro de Huertas, this palace is a prominent example of New Spanish architecture in Durango. During the 19th century and the first half of the 20th century, it served various purposes until Banco Nacional de México acquired it in 1985 and restored it in 1988 for use as a branch and office. In 2011, it opened to the public as a Casa de Cultura Banamex.

The venue includes temporary exhibition galleries as well as educational and engagement spaces.

In 2025, Palacio del Conde del Valle de Súchil welcomed
29,539 visitors

Casa Villa de Antequera

Its history dates back to 1529, when land plots were granted to the conquistadors of the newly founded Villa de Antequera, now Oaxaca. One of these plots was awarded to Diego de Porras, who built his residence on the site. Over time, the structure underwent multiple modifications, including the most recent changes to its façade in the early 20th century. Banco Nacional de México acquired the property in 1896, converting it into its eighth branch nationwide.

In 2025, Casa Villa de Antequera was adapted to host temporary exhibitions and, in August, opened to the public as the sixth Casa de Cultura Banamex. It features exhibition galleries and a repurposed former bank vault used to display highlights from the Banamex art collection.

In 2025, Casa Villa de Antequera welcomed
6,981 visitors

9.8.2. Collections

9.8.2.1 Banco Nacional de México Collections

Art Collection

The Banco Nacional de México Art Collection dates back to the Bank's founding in 1884. It is dedicated to the preservation, study, and public presentation of significant works of painting by Mexican and international artists working on Mexican themes. With 3,665 works spanning the 17th through the 21st centuries, the collection is one of the Bank's most valuable long-term assets.

In 2025, the Bank loaned 87 works to 15 exhibitions—13 in Mexico and 2 internationally. A total of 544 works were physically verified across Mexico City and 11 states. Labels for works displayed in Banamex offices and branches were also updated to incorporate QR codes that provide expanded object information.

Archivo Histórico Banamex

Archivo Histórico Banamex, the Bank's historical archive, traces its origins to the late 1970s, when the Bank's General Management initiated a project to consolidate historical records dispersed across offices and branches in preparation for its centennial in 1984.

The Archive formally opened in March 1991 with a mandate to safeguard, organize, preserve, and provide access to the historical holdings of Banco Nacional de México for researchers and the general public. Today, it comprises more than 120,000 archival units organized into ten collections, including historical documents, numismatic materials, photographic and audiovisual holdings, museum objects and an extensive newspaper archive and library accumulated over more than 140 years.

As it approaches its 35th anniversary, the Archive has launched a modernization process focused on updating inventories and catalogs, improving conservation materials, reorganizing collections within its vault—the oldest in Banco Nacional de México—and gradually advancing its digitization.

With the support of seven participants from the Jóvenes Construyendo el Futuro program, more than 10,000 archival units were rehoused using updated preservation materials, primarily within the Board of Directors, Photographic Archive, Newspaper Archive, and Museum Objects collections. Additional external support enabled the Archive to update inventories, develop new catalog records, and reorganize more than 18,000 units across the Board of Directors, Accounting, Management, and Newspaper Archive collections. These efforts have improved efficiency in storage, inventory management, preservation, access, and research services.

The Archive continues to receive materials from across Banco Nacional de México. In 2025, approximately 1,500 archival units from Fomento Cultural Banamex were transferred from Branch 100 (Head Office), together with around 200 historical photographs and more than 20 museum objects from the Systems Department at the Jardines de la Montaña corporate offices.

In 2025, the Archivo Histórico collaborated with the Museo del Banco de México, contributing photographic materials to the exhibition One Hundred Years of the Banco de México: A Shared History. Throughout the year, both the Archivo Histórico Banamex and the Fomento Cultural Art Library also participated in meetings and activities organized by the Asociación Mexicana de Archivos y Bibliotecas Privados, A.C. (AMABPAC), of which they have been founding members since 1994.

9.8.2.2 Fomento Cultural Banamex Collections

Folk Art Collection

The Folk Art Collection focuses on the most representative works created by artisans recognized as Grandes Maestros del Arte Popular (Great Masters of Folk Art), with an emphasis on artistic quality and technical mastery. Built over nearly three decades, the collection reflects sustained engagement with these master artisans, supported by a disciplined acquisition approach that has tracked the evolution of their work since 1996.

Over time, the collection has expanded through the acquisition of award-winning pieces from competitions and other cultural platforms that promote folk art in Mexico.

The collection is organized into two main bodies of work: Grandes Maestros del Arte Popular Mexicano, comprising 19,130 pieces (7,134 cataloged entries), and Grandes Maestros del Arte Popular de Iberoamérica, with 7,468 pieces (4,285 cataloged entries). Together, they feature works by leading artisans from Mexico and 21 countries across Ibero-America, spanning a wide range of traditional materials, including ceramics, plant fibers, wood, metal, textiles, and mixed media. The collection also includes 645 historical pieces of cartonería (traditional papier-mâché), majolica, and ceramics.

In 2025, the Mexican Folk Art Collection recorded the addition of 412 pieces, corresponding to 109 cataloged entries. In total, 9,058 pieces from the collection were presented in exhibitions. These correspond to 2,134 cataloged entries, including:

5
permanent exhibitions in Chiapas, Mexico City, Yucatán, and Madrid

7
cataloged entries, representing 45 pieces, on loan to four exhibitions in Mexico City

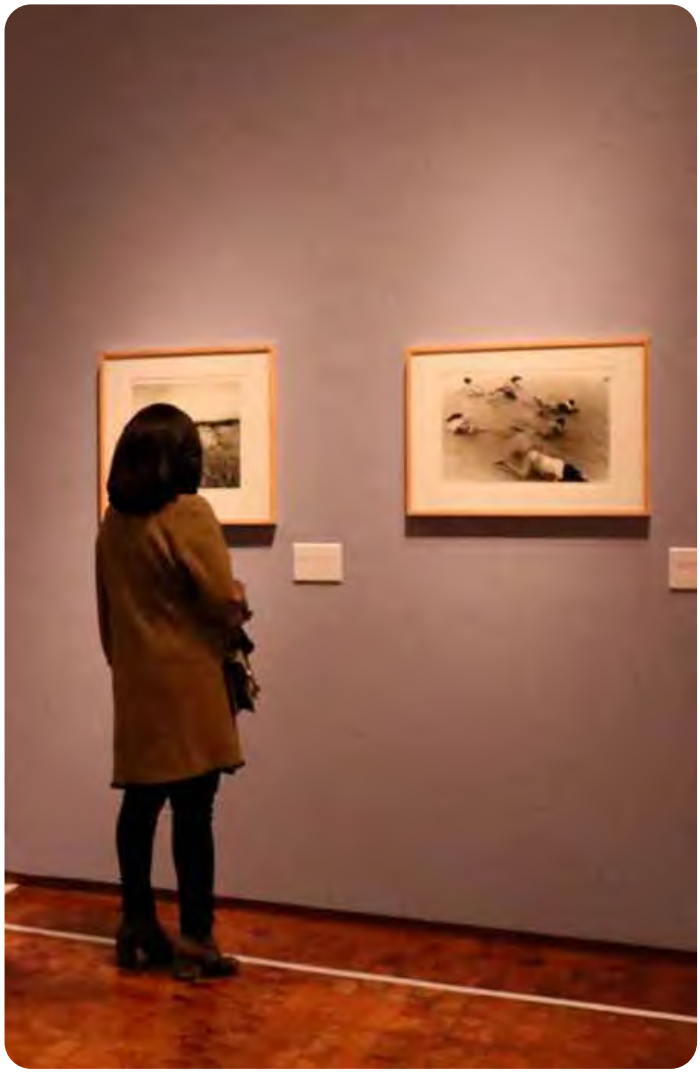

13
temporary exhibitions in Mexico City, Guanajuato, and Oaxaca

6
isplays in Banamex branches and offices

Documentary Collection:
Art Library and Photographic Archive

Since its founding in 1971, Fomento Cultural has built a significant collection of books, photographs, and film and video materials focused on art and on the institution's own research projects. Opened in 1991, the Art Library and Photographic Archive are housed at Palacio de Iturbide and are available for internal use and, in some cases, for professional research.

The collection includes 9,043 volumes, primarily in the fields of fine arts and history, as well as 35,390 photographs, in addition to other educational and audiovisual materials. The Photographic Archive holds both plates and digital images from the institution's editorial work, as well as 34,827 photographs documenting festivals and folk art from the Tonatiuh Gutiérrez collection. It also preserves and documents the Fomento Cultural reference archive, safeguarding the institution's memory.

A total of 18 book loans and 64 image loans were processed in 2025. The library at Casa del Mayorazgo de la Canal, which houses publications produced by Fomento Cultural, received 10,489 visitors.

9.8.3 Exhibitions

Fomento Cultural promotes the recognition of Mexico's art and history by providing free access to knowledge for the general public. This is achieved through non-formal education and public engagement grounded in the aesthetic experience, contributing to the development of informed and engaged citizenship. Its exhibition program is supported by original research and curatorial work, contributing to a broader understanding of art and history. Fomento Cultural preserves, presents, and promotes the work of Mexican artists across different periods, as well as that of international artists whose work is connected to Mexico.

9.8.3.1 Exhibitions at Our Venues

Most Significant Exhibitions

Miguel Covarrubias. A Borderless Perspective

Palacio de Iturbide
April 23 - September 21, 2025

446 works
37 national collections
13 international collections

Curated by Sergio Raúl Arroyo and Anahí Luna/
311,146 visitors

Miguel Covarrubias was perhaps the most versatile Mexican artist of his generation. This major exhibition explored the life and work of a creator who broke boundaries and moved fluidly across disciplines, including art, anthropology, theater, editorial design, illustration, and archaeology. It offered a compelling look into the restless and brilliant mind of an artist known for his keen observation, empathy, and distinctive style.

Mexico Through the Eyes of Its People III

Simultaneous exhibition across multiple venues nationwide

Venue	State	Dates	Visitors	Photographs on Display
Palacio de Iturbide	Mexico City	June 11 - September 21, 2025 October 24 - November 9, 2025	90,392	140
Museo de Historia Mexicana	Nuevo León	June 4 - September 3, 2025	53,069	22

Museo Casa Montejo	Yucatán	June 27 - September 30, 2025	30,820	34
Casa Villa de Antequera	Oaxaca	August 14, 2025 - March 2026	6,464	34
Universidad Iberoamericana	Mexico City	September 12 - October 10, 2025	43,675	50
Museo de Arte de Sinaloa	Sinaloa	November 21, 2025 - February 22, 2026	1,198	50
FIL Guadalajara	Jalisco	November 29 - December 7, 2025	95,311	34
Centro de Textiles del Mundo Maya	Chiapas	December 4, 2025 - May 2026	2,196	34

This exhibition presents a curated selection of award-winning and shortlisted photographs from the competition of the same name, held to mark the 140th anniversary of Banco Nacional de México. The images offer a portrait of contemporary Mexico—its landscapes, people, traditions, and culture—capturing everyday life, celebrations, and special moments, while reflecting the country's values and identity.

Mexican Water Festival. Julio Castellanos

Foro Valparaíso
July 23 – September 30, 2025

13 works
6 collections
14,434 visitors

Curated by: Caty Cárdenas y Dafne Cruz

As the first exhibition in the series Emblematic Works from the Banamex Painting Collection, this show offers fresh perspectives on some of the institution's most notable artworks. In this exhibition, Mexican Water Festival brings together 13 works by renowned artists such as Leopoldo Méndez, Lola Álvarez Bravo, Agustín Víctor Casasola, Fernando Beltrán, and Adolfo Best Maugard. Anchored by Julio Castellanos's work, the exhibition explores and reinterprets life in public baths and recreational spaces during a period when the Mexican government advanced cultural policies focused on social well-being and nation-building.

Day of the Dead Altar. Indigenous Women Artisans

Palacio de Iturbide
October 24 – November 9, 2025

336, 840 visitors

A monumental Day of the Dead altar (ofrenda) inspired by majolica and Talavera pottery, featuring clay pieces from the workshop of César Torres Ramírez and César Torres Jiménez of Puebla. Along the side corridors, visitors encountered cartonería pieces created by the Linares family of Mexico City. The staircase featured a traditional Huamantla carpet from Tlaxcala, crafted by artist Alejandro Lira.

Mexican Nativity Scenes

Palacio de Iturbide
December 4, 2025 – February 8, 2026

182,796 visitors as of December 31, 2025

This traditional exhibition celebrates the holiday season and showcases the richness of our collection of folk art Nativity scenes. The exhibition also featured a large Christmas tree decorated with tin angels by Tomás Ricardo Pacheco and, for the first time, a "rain of stars" created by master artisan Efrén Romero Sánchez, both from Oaxaca.

Graciela Iturbide

Casa de México en España
June 19 – September 14, 2025

18,419
visitors

Palacio de Iturbide
November 26, 2025 – February 8, 2026

24,919
visitors as of
December 31, 2025

Curated by: Juan Rafael Coronel Rivera

This exhibition celebrates the career of one of Mexico's most distinguished photographers, Graciela Iturbide, recipient of the Princess of Asturias Award. It features 50 photographs selected by the artist herself, accompanied by an interview in which she shares the story behind each work.

Arnaldo Coen. Per-versiones

Casa del Mayorazgo de la Canal
September 12, 2024 – August 3, 2025

150,295
visitors

Palacio del Conde del Valle de Súchil
August 26, 2025 – March 31, 2026

8,597
visitors

Curated by: Arnaldo Coen y Lourdes Sosa

Arnaldo Coen is one of the most important figures of the La Ruptura generation. This exhibition brings together 96 works, beginning with a selection of 42 pieces that trace the artist's career, including a large-scale torso sculpture from his own collection and five works from the Banamex art collection. A second section presents Perversiones, the artist's most recent series, created during the pandemic. It includes 16 large-format paintings in black, white, and gold, along with 32 smaller works featuring vibrant cubes inspired by the I Ching.

20th Century Oaxacan Vanguard

Casa Villa de Antequera
August 14, 2025 – March 2026

Curated by: Leticia Gámez

6,464
visitors

This exhibition features works by Rufino Tamayo, Francisco Toledo, Rodolfo Nieto, Rodolfo Morales, and Sergio Hernández—leading figures of the 20th-century Oaxacan avant-garde. They come together in this small yet significant exhibition, housed in the vault of Casa Villa de Antequera, a space dedicated to preserving the treasures of the Banamex art collection.

9.8.4 Editorial

Our editorial program plays an important role in preserving and promoting Mexico's cultural heritage, helping share its art and history with a broader audience. Through our publications, we aim to establish ourselves as a trusted reference in these fields. The program focuses on three main formats: books, exhibition catalogs, and brochures, along with a wide range of promotional materials related to our projects. It also includes the publication of the Bank's annual Book of the Year.

In 2025, we published eight books, three of which were made available free of charge in digital format through the Fomento Cultural website. In addition, six brochures were produced for exhibitions at the Palacio de Iturbide and Foro Valparaíso, with a total print run of 94,000 copies, along with 15 digital editorial pieces.

Books Published in 2025

Title	Copies Printed
Agua de simiente. Las tintoreras de añil de Hueyapan (Seed Water: The Indigo Dyers of Hueyapan)	1,000

Teodora Blanco/María Izquierdo. Percepciones de belleza (Teodora Blanco/María Izquierdo: Perceptions of Beauty)	1,000

9.8.5 Education, Engagement, and Public Program

Engaging with visitors and sharing the Bank's cultural and social initiatives through educational work are central to our mission. We deliver a broad public program that includes talks, lectures, concerts, book presentations, university courses, seminars, and colloquia. We also work closely with universities and academic and research institutions in art, history, social sciences, architecture, and design across the country.

The Education and Engagement team designs learning experiences that deepen how audiences connect with exhibitions. Our approach encourages dialogue, critical thinking, and meaningful engagement. We provide personalized attention and the infrastructure needed to ensure a complete and enriching visit across our venues. We also run outreach activities for communities where we operate, for vulnerable groups, and for communities involved in our heritage restoration and conservation projects.

Through our mediator training program, we strengthen museum education by refining our engagement model, training new mediators, and organizing exchanges with other cultural institutions. We offer a year-round program of activities—including workshops, board games, and themed tours—designed for a wide range of audiences. These activities encourage reflection on key social issues, including sustainability, diversity and inclusion, community, and gender. In coordination with schools and educational partners, we also design visits and workshops tailored to different grade levels.

Our outreach efforts help us build lasting relationships with local communities, nearby cultural institutions, and public authorities, as well as with Banamex employees, retirees, and their families. These initiatives strengthen our institutional culture and reinforce a sense of belonging.

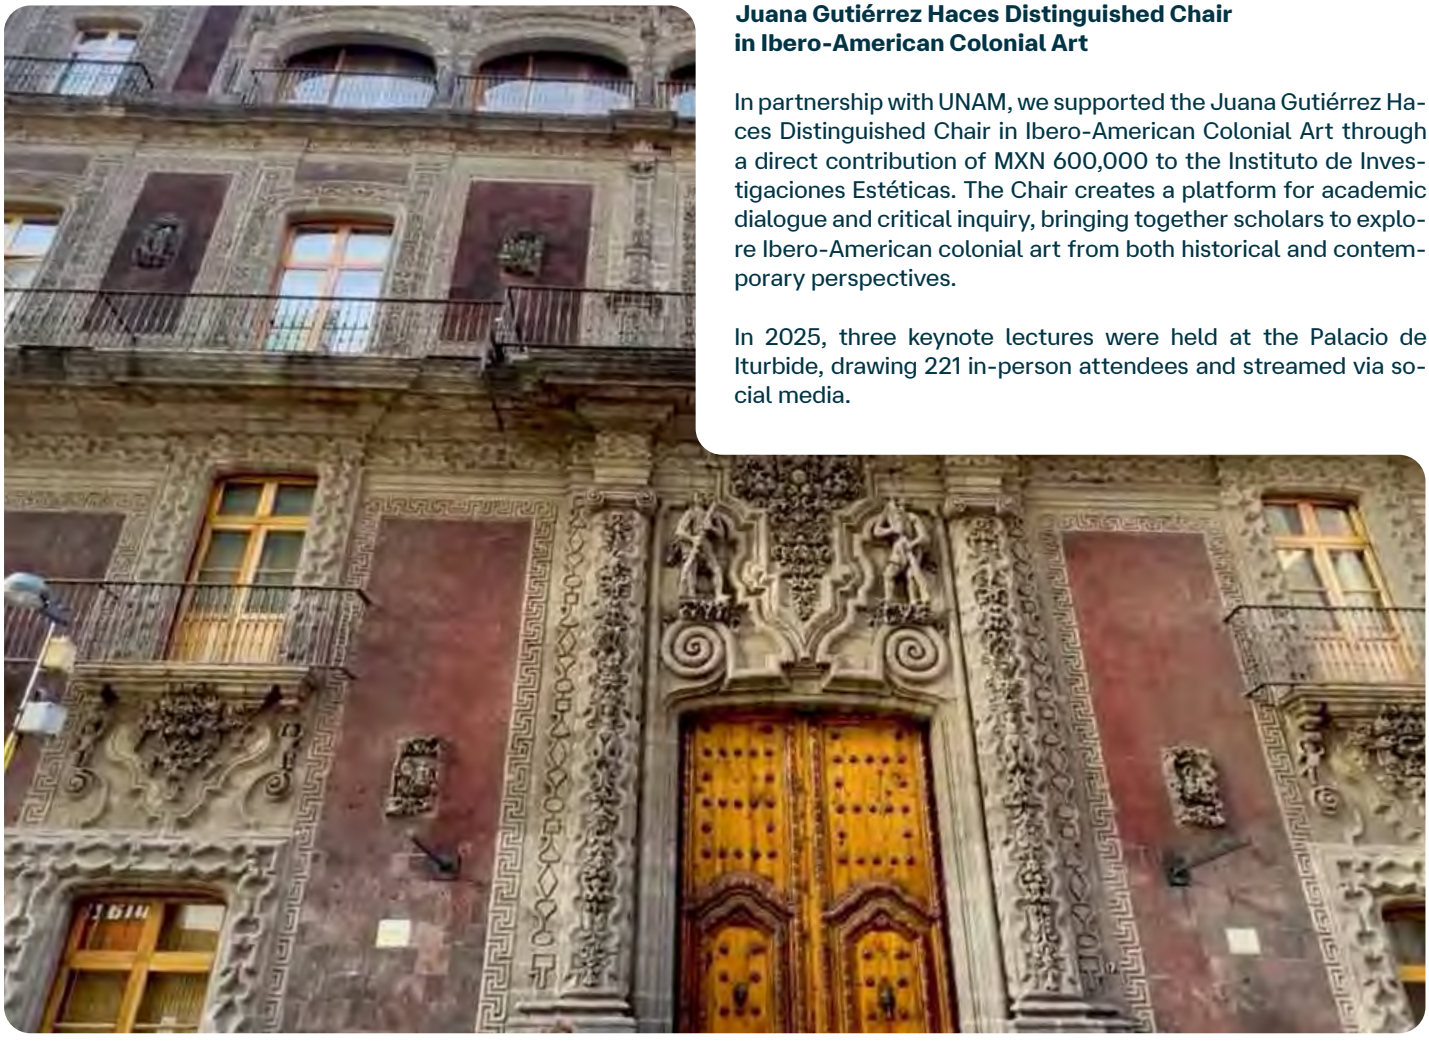

Another key initiative is the Comunidades Valparaíso program, through which we work with community groups and vulnerable populations in Mexico City, as well as with communities near our historic properties. The program supports the development of community-based social innovation projects. It provides training, tools, and partnerships to improve access and services for people with disabilities through the Comprehensive Program for the Care of Persons with Disabilities (PcD). This work promotes an inclusive culture grounded in a human rights approach, with a focus on awareness, education, information, and accessibility. Finally, the Financial Education Center, located at Foro Valparaíso and developed in partnership with Banamex's Financial Education team, offers workshops, lectures, and activities that promote financial literacy among children, young people, adults, and vulnerable communities. The Center also includes the Entrepreneurship Lab, an interactive space designed to help visitors identify their strengths and develop an entrepreneurial mindset.

Juana Gutiérrez Haces Distinguished Chair in Ibero-American Colonial Art

In partnership with UNAM, we supported the Juana Gutiérrez Haces Distinguished Chair in Ibero-American Colonial Art through a direct contribution of MXN 600,000 to the Instituto de Investigaciones Estéticas. The Chair creates a platform for academic dialogue and critical inquiry, bringing together scholars to explore Ibero-American colonial art from both historical and contemporary perspectives.

In 2025, three keynote lectures were held at the Palacio de Iturbide, drawing 221 in-person attendees and streamed via social media.

9.8.6 Heritage Restoration and Conservation

We recognize the importance of Mexico's cultural heritage and the responsibility to preserve it. In collaboration with public and private institutions, state governments, and national and international partners, we lead comprehensive tourism and community development programs across the country, with a focus on sustainability. These efforts aim to improve quality of life while strengthening the long-term value and viability of cultural heritage.

Integrated Tourism Program for Maní, Yucatán

Maní was the first Indigenous community in Yucatán where Franciscan missionaries established a convent complex, built in 1549 and dedicated to Saint Michael the Archangel. Since 2008, we have worked on the Restoration and Integrated Development Project for Maní, in partnership with Fundación Pedro y Elena Hernández, the World Monuments Fund, the Government of the State of Yucatán, and the National Institute of Anthropology and History (INAH), among other partners. The project builds on Maní's cultural strengths through investments in urban, tourism, and cultural infrastructure, supporting economic development, promoting the sustainable use of heritage, and improving quality of life for the local population.

In 2025, more than 22,500 people participated in guided tours of Maní, and over 20,800 guide maps were distributed to tour operators, travel agencies, hotels, restaurants, and tourism offices across the state of Yucatán. Today, Maní is recognized as a culturally rich destination known for its traditions, gastronomy, folk art, and exceptional embroidery. The project is expected to reach completion in 2026.

Maintenance of Historic Pipe Organs

To support the preservation of historic pipe organs and promote music within the communities where they are located, we carried out cleaning and maintenance work on three instruments in Oaxaca:

- Santo Domingo Yanhuitlán, Oaxaca
- Basílica de Nuestra Señora de la Soledad, Oaxaca City
- Parroquia de La Asunción, Tlaxiaco, Oaxaca

To reintroduce these instruments to the community, we organized three free concerts and developed an educational brochure for local audiences.

Metropolitan Cathedral of Mexico City

The Metropolitan Cathedral of Mexico City is the most important religious building of the colonial period, both for its historical significance and its architectural value. To support its preservation, we initiated a comprehensive diagnostic assessment of the fourteen side chapels, focusing on their condition and on the cleaning and lighting systems. This effort also includes the preparation of an architectural plan detailing the dimensions and layout of each chapel.

This effort will serve as the foundation for a broader restoration plan to be carried out beginning in 2026, in collaboration with relevant authorities and partner institutions.

9.8.7 Folk Art Support Program

Established in 1996, this program seeks to preserve, promote, and strengthen high-quality artisanal production in Mexico, while recognizing the country's Grand Masters of Mexican Folk Art. Today, it stands as a leading initiative in the field, with a long-term vision and a broad impact across rural, semi-urban, and urban communities.

Direct Support for Artisan Workshops

We have upgraded workshop infrastructure, including kilns, exhibition spaces, and storage areas. Additional efforts have focused on training apprentices, improving packaging techniques, and providing guidance on pricing, cost structures, and tax formalization. Another key priority is safeguarding artisanal techniques and production processes at risk of disappearing. Since 2022, we have also offered training on online sales strategies, encouraging master artisans to make effective use of social media, e-commerce platforms, and digital payment tools.

Results of Support for Artisan Workshops	2024	2025

Folk Art Exhibitions

Our exhibition program, both in Mexico and abroad, aims to showcase the work of artisan workshops and the Grand Masters of Mexican Folk Art, recognizing them as individual creators and supporting the opening of new market opportunities.

In 2025, our Folk Art Collection was featured in 28 exhibitions, promoting the work of 738 artisans:

Exhibitions	Number of Exhibitions	Women Artisans Featured	Men Artisans Featured	Artisan Groups Featured
Temporary Exhibitions	13	178	254	10
Permanent Exhibitions	11	132	133	25
Loans from the Collection	4	2	4	-

Support for Folk Art Competitions

Competitions are among the most effective ways to encourage creativity among folk artists and strengthen their recognition within their communities. For more than 20 years, we have partnered with the Secretariat of Culture and FONART to support the country's three most important national competitions, while also collaborating on state-level initiatives.

Location	Competition	Fomento Cultural Contribution	Women Artisans Awarded	Men Artisans Awarded	Entries Submitted	Communities Represented	States Represented

Saltillo Sarape Competition

In collaboration with Ralph Lauren and with support from the INBA Foundation, we launched the Saltillo Sarape Competition in 2025, held in Contla, Tlaxcala, and Saltillo, Coahuila. The initiative recognizes the work of artisans who preserve the sarape textile tradition, highlighting their creativity in design, technical skill, and deep knowledge of this Mexican cultural heritage.

The first phase began with an open call from March 31 to May 5, 2025. From the submissions received, ten winners—five from Contla and five from Saltillo—were selected from 58 entries submitted by 42 participants (22 men and 20 women).

In the second phase, the winners presented their finished pieces in an exhibition on the first floor of the Palacio de Iturbide, held from October 24 to November 9, 2025. The jury also awarded a Special Prize for Best Woven Sarape to Israel Antonio Pérez, a 29-year-old artisan from Contla.

Centro de Textiles del Mundo Maya (CTMM)

The Centro de Textiles del Mundo Maya opened to the public in 2012 as a unique cultural space in Latin America. It is located on the second floor of the former convent of Santo Domingo de Guzmán in San Cristóbal de las Casas, Chiapas. The CTMM houses one of the most important textile collections from Chiapas and Guatemala, with more than 2,500 pieces from the Pellizzi Collection and the Fomento Cultural Banamex Folk Art Collection. Its mission is to research, preserve, and share Mayan textile traditions, while serving as a dynamic, multidisciplinary, and intercultural center that contributes to the development of Indigenous artisan communities.

In 2025, we supported the CTMM's operations through a contribution of MXN 4,290,000, benefiting 59,142 people, including visitors to its permanent and temporary exhibitions, as well as participants in educational and engagement activities for artisans and the general public.

9.8.8 Banamex Calls for Proposals

21st Banamex Atanasio G. Saravia Prize in Mexican Regional History

Since 1984, and on a biennial basis, we have awarded the Banamex Atanasio G. Saravia Prize in Mexican Regional History to recognize and support those working in this field, encourage research, and honor the legacy of Atanasio G. Saravia, a distinguished banker and historian. Over the past 41 years, a total of 2,327 research works have been submitted.

For the 21st edition (2024–2025), we received 62 submissions across five categories: undergraduate theses, master's theses, doctoral dissertations, professional research, and independent research by non-academic contributors. Submissions came from 18 states in Mexico, representing 19 academic and research institutions nationwide, as well as two international universities. Throughout 2025, the selection process included nine working sessions with the Prize jury, composed of 23 members from 13 institutions across the country, all serving on a voluntary basis. The jury includes representatives from the Mexican Academy of History (corresponding to the Royal Academy of History in Madrid), the Institute of Historical Research at the National Autonomous University of Mexico (UNAM), the Directorate of Historical Studies at the National Institute of Anthropology and History (INAH), and the Center for Historical Studies at El Colegio de México, as well as independent scholars from different regions of the country.

The awards ceremony for the 21st edition will take place in the first quarter of 2026.

El México de los mexicanos III

To mark the 140th anniversary of the Banco Nacional de México, we launched the third edition of El México de los mexicanos, inviting both professional and amateur photographers to capture contemporary Mexico with a forward-looking perspective. The initiative highlights the diversity, complexity, and vitality of Mexican society through images of its landscapes, people, traditions, values, and culture, as well as the activities shaping the country's future.

The call for entries was open from May 16 to September 30, 2024, and the awards ceremony was held on June 11, 2025, at the Palacio de Iturbide. The competition drew 4,536 photographers from all 32 states in Mexico, as well as participants from 17 countries, including Spain, the United States, France, and Canada, who submitted a total of 18,046 images. An international jury of photography and visual arts professionals selected 44 images for awards, honorable mentions, and special recognitions, with a total prize pool of USD 140,000.

The selected photographs were incorporated into the El México de los mexicanos III Collection and published in a commemorative book in both print and digital formats. Throughout 2025,

the exhibition was presented in nine venues across Mexico City, Chiapas, Guanajuato, Jalisco, Nuevo León, Oaxaca, Sinaloa, and Yucatán, and will continue touring nationwide in 2026.

Art and Culture Development Program (DAC)

GRI 203-1

The Banamex Art and Culture Development Program (DAC), launched in 2020, supports cultural development through projects in public and private spaces. It aims to strengthen national cultural talent while contributing to the growth and development of the communities where it operates.

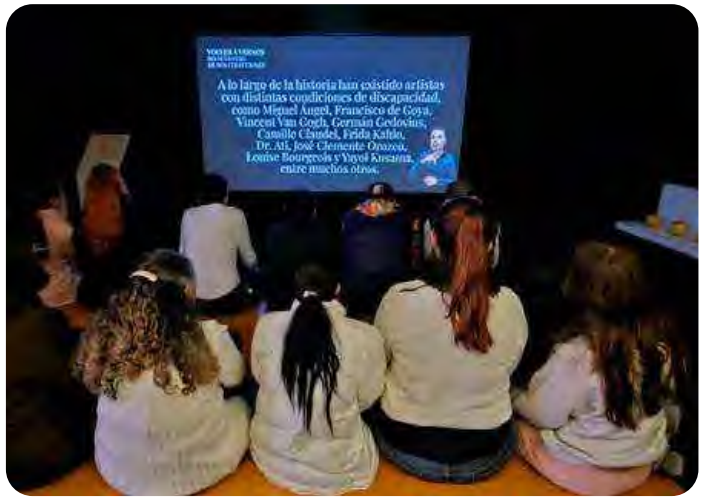

In April 2025, Banamex launched the sixth edition of the DAC Program. Preselected institutions participated in the following categories:

01.

Sociocultural Interventions: Activities such as exhibitions, workshops, and training programs designed to strengthen cultural spaces across Mexico and expand access to culture for diverse audiences, with a particular focus on young people.

02.

Innovation, Technology, and Restoration: Infrastructure-related initiatives aimed at improving access to culture and promoting inclusive experiences, including the restoration and enhancement of museums, cultural venues, and arts centers.

Sociocultural Interventions	12	11
Innovation, Technology, and Restoration	10	15
Total	22	26

A team of Banamex specialists evaluates projects submitted by participating institutions based on the following criteria:

- Alignment with the institution's objectives
- Impact measurement
- Communication plan
- Participation of partners
- Operational sustainability and long-term results

This evaluation is complemented by an additional review based on

- Project reach and potential impact
- Project design and structure
- Conceptual clarity
- Strategic alignment

Across the six DAC calls for proposals, Banamex has invited more than 170 cultural institutions and has supported 97 sociocultural and infrastructure projects, totaling 72.5 million pesos in investment. This is in addition to 29 projects funded with 51.7 million pesos under the initiative to restore cultural venues affected by the 2017 earthquakes, bringing total support to 124.2 million pesos.

In 2025, investment in the DAC Program totaled 15.5 million pesos. Of this amount, Banco Nacional de México contributed MXN 12.3 million pesos to support 21 projects, while Fomento Cultural Banamex contributed 3.2 million pesos to support 5 projects.*

Banamex Popular Art Cup Special Program 2026

To mark the 2026 FIFA World Cup, to be hosted by Mexico, the United States, and Canada, we launched the Banamex Popular Art Cup. The competition aims to honor and celebrate Mexico's artisanal legacy and heritage, while fostering, promoting, and sharing folk art as a core element of the country's cultural identity. It also seeks to connect traditional craftsmanship with the theme of soccer, a sport deeply embedded in Mexican popular culture.

Open from December 2, 2025, to April 3, 2026, the call for entries invites artisans aged 18 and over from communities across the country. The program will culminate in three simultaneous exhibitions in Mexico City, Monterrey, and Guadalajara in June 2026.

9.8.9 Commercialization

Through the Commercialization area, we make publications produced by Fomento Cultural, along with folk art pieces, available to the public, to promote these creations and support the household economies of artisan workshops. Sales proceeds are allocated to a revolving fund that enables continued investment in editorial production and the acquisition of folk-art pieces.

Books and artworks are also distributed through six consignees nationwide. In 2025, we participated in four national fairs (Zona Maco, FIL Minería, FILAH, and FIL Guadalajara) and one international fair (the International Folk Art Market in Santa Fe, New Mexico). In addition, we took part in three business-area events (the 33rd Banamex Advisory Councils Plenary Meeting, the 88th Banking Convention, and the Mexico City Grand Prix Formula 1). We organized three folk art exhibitions at the Palacio de Iturbide, along with six special-price caravans.

7,550
books sold in 2025

1,729

The artisans supported through these sales are:

Activity	Women Artisans Supported	Men Artisans Supported	Artisan Groups Supported	States
Purchase of Folk Art Pieces	31	32	2	17
Sale of Folk Art Pieces	77	109	7	24

In 2025, we also completed an in-kind donation of 32,203 books to the General Directorate of Libraries of the Secretariat of Culture of the Government of Mexico. This network includes 7,476 public libraries, the largest in Latin America, comprising 2 federal libraries, 31 state libraries, and 7,443 institutional, borough, and municipal libraries. Together, they serve a total of 2,282 municipalities, representing 93% of all municipalities in the country. Notably, the Directorate serves approximately 12 million users each year.

9.8.10 Outreach

Through the Outreach area, we develop communication strategies and manage initiatives to promote all our activities across internal and external communication channels.

9.8.11 Rankings and Awards

Infoawards 2025

Foro Valparaíso received the Infoawards 2025 award, granted by the Asociación Infotecarios at the Latin American level, in the Museums with Programs for People with Disabilities category. This award honors individuals and institutions that stand out for their service to people with disabilities and for initiatives that promote inclusion and accessibility.

Distintivo "A"

Foro Valparaíso obtained the Distintivo "A" certification from Todo Accesible, specialists in the creation of inclusive environments. This distinction positions Foro Valparaíso as the first museum in Mexico to receive this recognition.

Antonio García Cubas Award

The publication Biombos y castas. Pintura profana en la Nueva España received an honorable mention in the Catalog category of the Antonio García Cubas Award. Granted by the National Institute of Anthropology and History, the award recognizes institutions that promote knowledge and preserve cultural heritage through their publications.

Ibermuseos Award

The Centro de Textiles del Mundo Maya (CTMM) was one of ten museums recognized in the 13th edition of the Ibermuseos Education Award, which recognizes, promotes, and supports the educational work of Ibero-American museums, highlighting their commitment to communities, diverse forms of storytelling, and their essential role as agents of change. The project "Jugando con el Universo Textil Maya" was the only entry from Mexico among the awardees, selected from more than 200 projects from 17 countries across Ibero-America.

We reaffirm our commitment to a culture of integrity and compliance at all levels of the organization. We outline the policies, codes, and programs that promote ethical conduct, respect for the law, and the protection of our costumers, thereby strengthening a secure, transparent, and responsible operation.

10.1 Ethics and Compliance Culture

GRI 2-11, 2-15, 2-23, 2-26, 3-3, 406-1, 407-1, 408-1
SASB FN-CB-510 a.2, FN-AC-510 a.2

When we do things right, we create positive financial and social impact in the communities we serve.

Every day, we work to strengthen our culture of ethics, risk management, compliance, and audit through robust controls that enable us to operate and grow our business safely. Across all areas, we strive to ensure that all employees uphold the highest standards of ethical and professional conduct, delivering the best outcomes for our current and future costumers and the communities in which we operate.

This structure allows us to identify and learn from our mistakes, take responsibility for our actions, and foster a shared commitment among all employees to earn and maintain our costumers' trust by applying our values and principles in everything we do. We are also responsible for providing financial products, services, and advice in a responsible manner, while complying with all applicable laws, regulations, and internal policies, including the Code of Conduct.

Code of Conduct

GRI 205
IBSO C.6.

In Mexico, we are guided by the globally established Code of Conduct, which sets out the ethical standards and behaviors expected of us as employees and representatives in our interactions with costumers, colleagues, shareholders, communities, and one another. It also provides an overview of key legal and regulatory requirements and our internal policies.

The Board of Directors has adopted the Code of Conduct, which applies to all directors, officers, and employees. All service providers are contractually required to adhere to this Code, to support our workforce and uphold our commitment to human rights.

All employees are required to read and comply with this Code, as we are committed to conducting business in accordance with the highest standards of ethical conduct. Other service providers may also be subject to the Code through contractual or other formal arrangements.

All employees are expected to demonstrate accountability by adhering to our values, leading by example, and taking responsibility for their decisions. Upon joining Banamex, employees must acknowledge that they have read the Code and agree to comply with its provisions. Violations may result in disciplinary action, including termination of employment.

We regularly ask employees to reaffirm their commitment to these standards through training programs. We also use job-related ethical scenarios to support the practical application of the principles set out in the Code of Conduct, as well as our mission, value proposition, and applicable laws.

https://www.citigroup.com/rcs/citigpa/storage/public/external-citi-code-of-conduct-es.pdf

Reporting Ethical Concerns

The Code of Conduct outlines the types of behaviors that must be escalated and the resources available to employees to promptly raise concerns, including a link to the Escalation Policy. This policy provides multiple channels for employees to report concerns, including their managers or other members of management, Human Resources, Employee Relations, internal legal advisors, designated Independent Compliance officers, and the Ethics and Investigations hotline.

Every employee plays a critical role in escalating ethical concerns so they can be addressed quickly and effectively. The Code of Conduct states that, when in doubt, employees should escalate the issue.

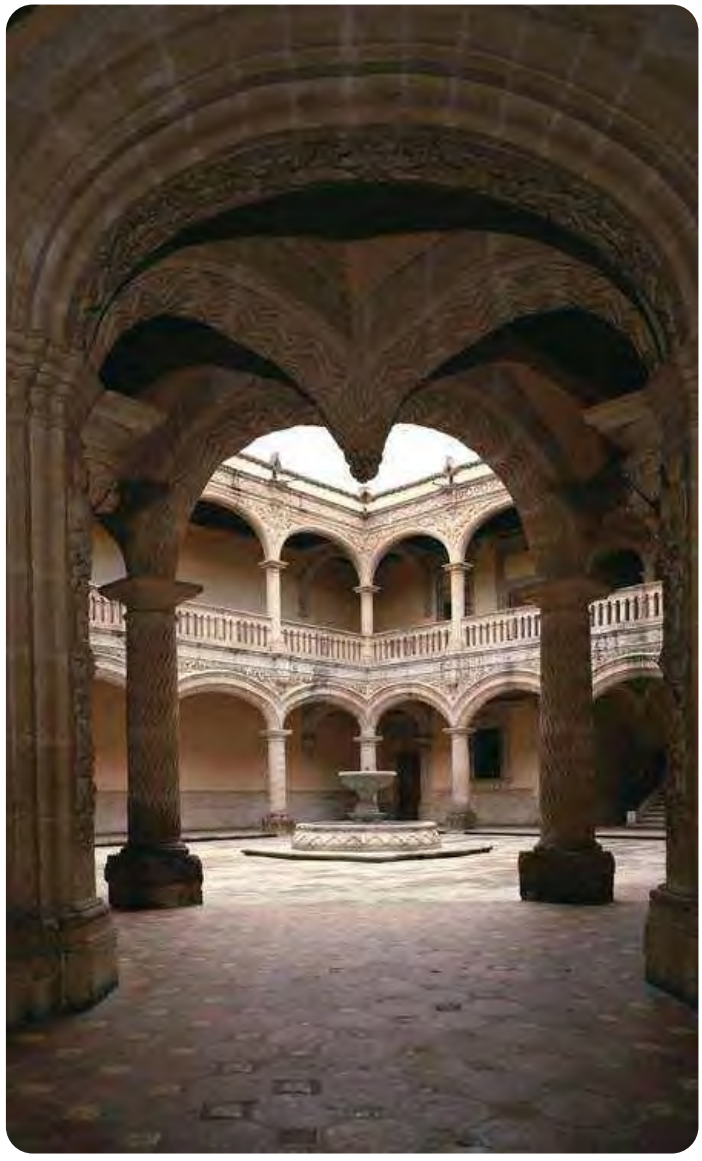

As part of our reporting framework, the Ethics Line is one of several channels for employees and third parties, including the general public, to report concerns about potential misconduct to the Ethics Office. We also provide internal and public websites, as well as a 24/7 phone line with access to multilingual interpreting support.

We believe it is essential that individuals feel safe raising concerns. All reports are handled confidentially and in accordance with applicable laws and regulations. Concerns may be reported anonymously, and retaliation of any kind against individuals who report concerns, ask questions, or participate in investigations is strictly prohibited. Any employee who engages in retaliation may be subject to disciplinary action, including termination.

Our leaders reinforce appropriate conduct and accountability across the organization and equip employees to make ethical decisions, escalate issues, and meet standards of conduct. Managers are expected to lead by example, foster an inclusive work environment free from discrimination, harassment, or retaliation, and promote awareness of available resources. They must encourage employees to speak up and use appropriate channels to raise concerns. Retaliation is never tolerated.

10.2 Compliance Programs

GRI 2-11, 2-23, 2-24,3-3,205-1,205-2,205-3
SASB FN-CB-510 a.1, FN-CB-510 a.2

We conduct our business and operations in compliance with applicable laws and regulations.

We maintain a robust, risk-based global sanctions program aligned with our global footprint. This program promotes compliance with sanctions requirements through policies and procedures, risk categorization and tolerance levels, annual risk assessments, control audits, employee training, and the support of a diverse team of professionals overseeing compliance worldwide.

We establish standards of conduct to mitigate risks, including conflicts of interest, fraud, bribery, corruption, and money laundering. The Compliance function provides guidance and support to Banamex businesses in both implementing and applying these policies on a daily basis. These efforts are reinforced through employee communications and ongoing training programs. With respect to local regulatory compliance, the Code of Conduct provides that where there is a difference between applicable internal policies and the laws of the jurisdictions in which employees operate, the stricter requirement will apply. Where business units, regions, or functions maintain stricter policies than the Code, those policies will prevail.

Anti-Money Laundering and Counter-Terrorist Financing Program

At Banamex, as part of Citi, we developed a global Anti-Money Laundering and Counter-Terrorist Financing (AML/CTF) program considered best-in-class. Today, we implement a robust AML/CTF program designed to comply with applicable regulations in Mexico and mitigate the risks of money laundering and terrorist financing. Through this program, we contribute to the security of our costumers, our branches, and the broader Mexican financial system.

The program is built around four core pillars:

01.

Prevention

We assess each costumers potential risk to ensure compliance with internal policies and risk standards.

02.

Detection

We monitor transactions of both new and existing costumers to identify suspicious activity or unusual behavior patterns.

03.

Reporting

We prepare, track, and submit reports on suspicious transactions in accordance with regulatory requirements.

04.

Governance

We maintain AML policies, risk assessments, controls, and training programs. The Compliance Officer is responsible for overseeing the program and reporting any significant deficiencies to the Board of Directors.

The Anti-Money Laundering program is supported by approximately 1,000 employees dedicated to its execution.

Anti-Bribery and Corruption Program

Grupo Financiero Banamex is committed to conducting business in accordance with the highest ethical standards and in compliance with applicable anti-bribery and corruption laws and regulations, including the U.S. Foreign Corrupt Practices Act (FCPA), the UK Bribery Act, and applicable local laws in the jurisdictions where it operates.

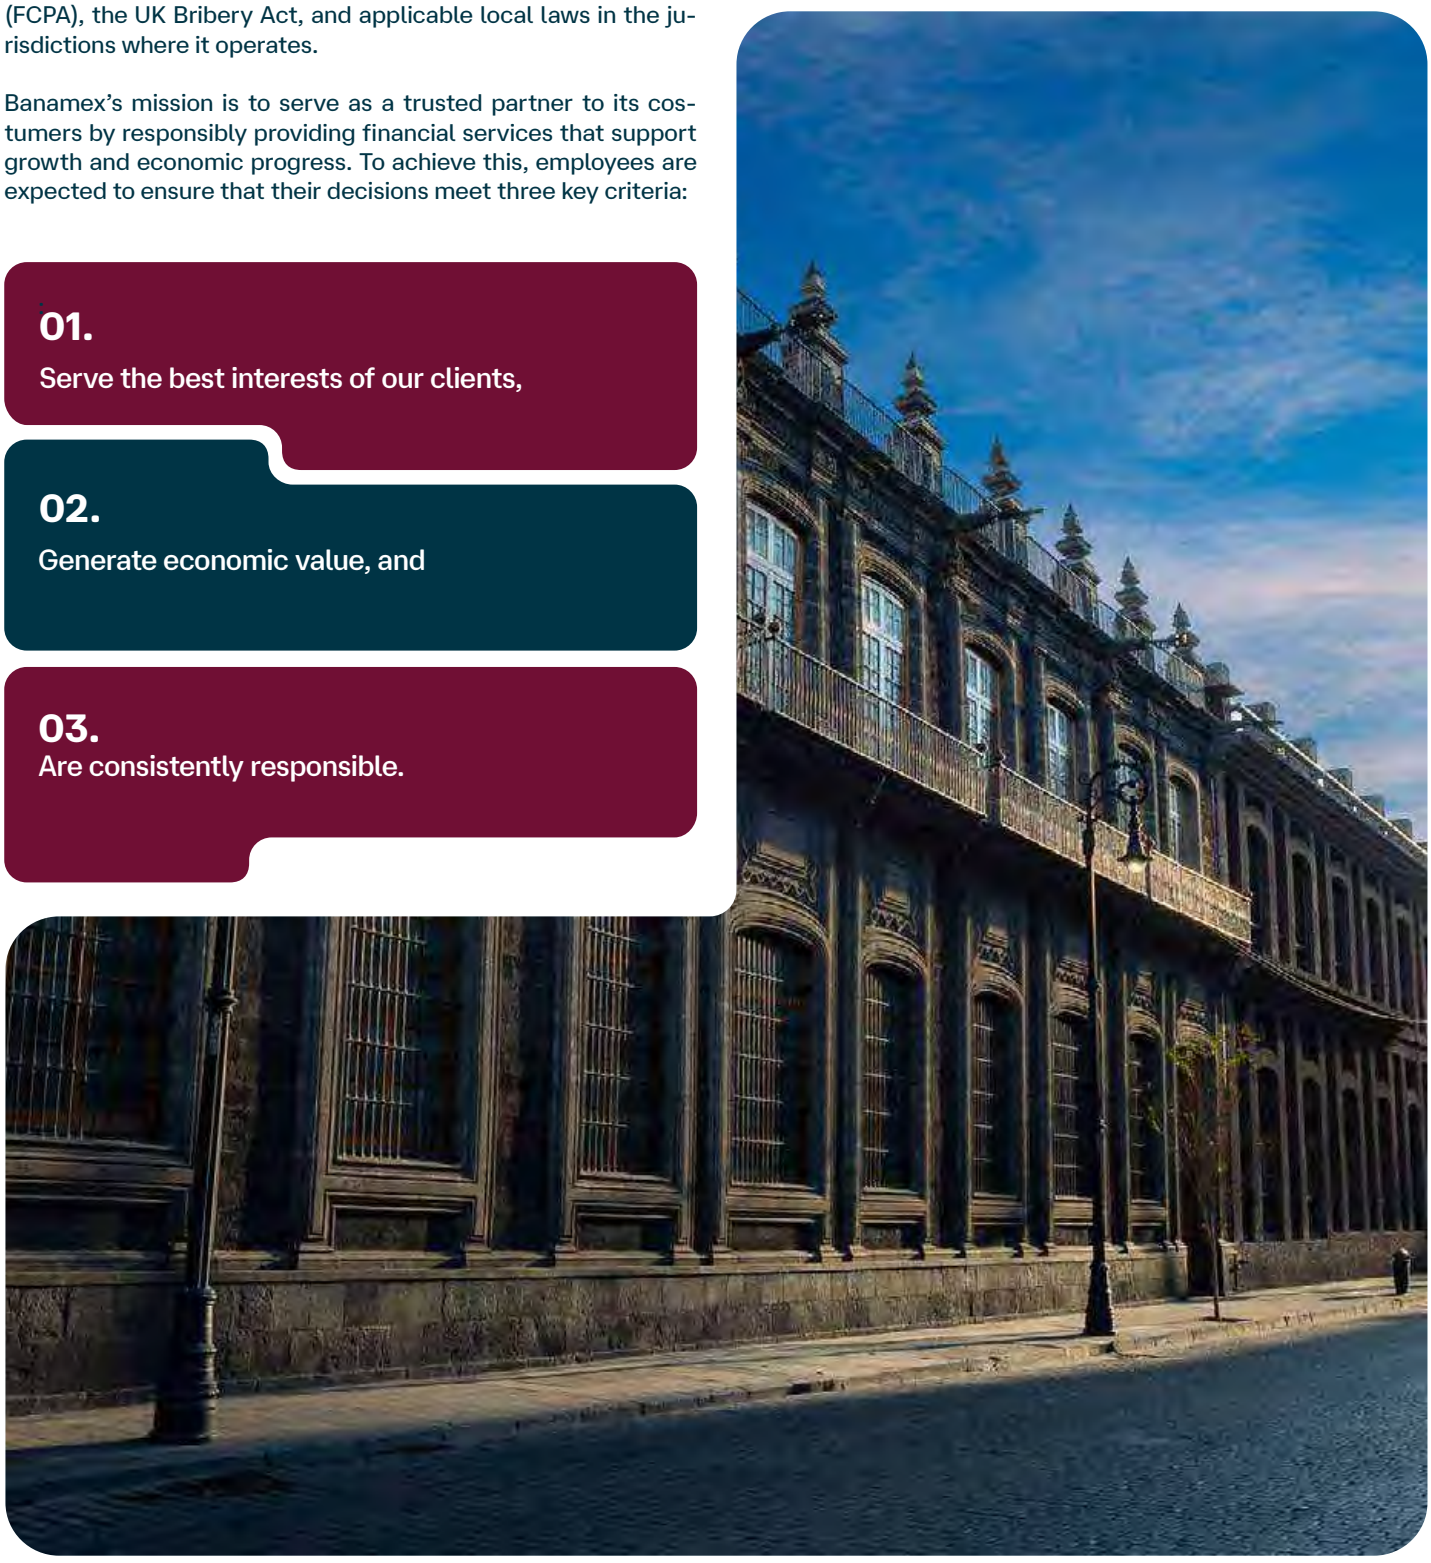

Banamex's mission is to serve as a trusted partner to its costumers by responsibly providing financial services that support growth and economic progress. To achieve this, employees are expected to ensure that their decisions meet three key criteria:

01.
Serve the best interests of our clients,

02.
Generate economic value, and

03.
Are consistently responsible.

Banamex's Global Anti-Bribery and Corruption Program embodies these principles, fostering transparent, prudent, reliable, and responsible conduct.

Through Banamex's Anti-Bribery and Corruption Program, we implement policies, standards, procedures, internal controls, systems, and training aligned with the Compliance Risk Management Framework and designed to ensure compliance with applicable anti-bribery and corruption laws. Key components include:

- Bribery risk assessment process.
- Risk management processes (oversight, governance, and escalation).
- Communication and training for employees at all levels.
- Review and pre-approval processes for travel, hospitality, gifts, hiring, donations, and charitable contributions.
- Due diligence for third-party relationships, business transactions, and new activities (including products and services).
- Control, monitoring, and confidential reporting systems.
- Financial controls and recordkeeping; and
- Independent testing and audit processes.

The Program establishes a risk-based framework to identify, assess, and mitigate bribery and corruption risks across the institution and its business areas. This framework defines risk levels for suppliers and sets applicable requirements and controls, including appropriate anti-corruption provisions in contracts, to enable monitoring throughout the supplier lifecycle.

All suppliers, including agents, are expected to conduct their activities in connection with Banamex in accordance with the highest standards of business conduct, including compliance with applicable laws prohibiting bribery, corruption, fraud, and misrepresentation, and avoiding even the appearance of improper conduct. Suppliers must maintain appropriate policies and procedures to ensure compliance.

The Anti-Bribery and Corruption Policy, along with its standards and procedures, establishes specific requirements for providing or accepting travel, lodging, charitable contributions, and donations, in accordance with applicable local regulations.

In Mexico, Banamex provides annual online training to all employees on Anti-Bribery and Corruption, complemented by targeted awareness communications as needed.

Banamex conducts an annual Anti-Bribery and Corruption risk assessment to meet regulatory expectations, quantify inherent risks, and evaluate the effectiveness of controls across business lines and the costumer base.

Confirmed Corruption Cases and Actions Taken

In 2025, we operated within our established zero-tolerance risk appetite for bribery, and no cases of non-compliance with applicable anti-bribery and corruption regulations were reported. Likewise, no significant control deficiencies or serious violations of program policies and procedures by Banamex employees were identified in Mexico during the year.

For more information, please refer to the public Anti-Bribery and Corruption Program statement at:

https://www.banamex.com/citibanamex/pdf/anti-corrupcion.pdf?icid=s.pageName-OU4-05052020-Information-irIntegridadCitibanamex-ES/Mobile

10.3

Annual Ethics and Compliance Training

GRI 3-3

In line with global training standards, Anti-Money Laundering and Anti-Bribery courses, among others, are mandatory for all Grupo Financiero Banamex employees.

From January 1 to December 31, 2025, more than 36,000 employees completed training modules on Anti-Money Laundering (AML), Anti-Bribery, and Regulatory Compliance.

As part of our digital transformation, we have established procedures to protect the company's data, systems, and access.

As part of our digital transformation, we have established procedures to protect the company's data, systems, and access. We maintain contingency and incident response plans to prevent information loss that could compromise costumers security and the sustainability of our operations.

A strong Information Security program begins with a clearly defined and communicated strategy.

Our cybersecurity strategy sets goals, objectives, and priorities to strengthen Banamex's cyber resilience and enhance the company's ability to defend against an increasingly complex and evolving threat landscape. The strategy is based on:

- **Maintaining a modern cybersecurity** program to protect the organization from evolving threats, including:
  - » Integrating cyber protection with information security.
  - » Adopting a risk-based approach to mitigate cyber threats; and
  - » Advancing solutions aligned with architecture and threat-focused operations.

- **Prioritizing the protection of our costumers data by:**
  - » Maintaining operations within our cybersecurity risk appetite and further strengthening our risk posture.
- **Building a sustainable,** continuously improving program that keeps pace with the growing volume and sophistication of threats, maintains Banamex within its risk appetite, and meets regulatory expectations for cyber risk management.

Supporting and enabling business priorities.

10.4.1. Policies and Codes

Our Data Governance Policy establishes guidelines to ensure a consistent and controlled process for creating, maintaining, and using enterprise data, which is considered a critical corporate asset. It applies to all employees and contractors.

Data owners implement controls to detect, prevent, and remediate defective data, documenting these actions in the tool approved by the Enterprise Data Governance Committee.

The Chief Data Officer monitors compliance metrics and reports them to the Enterprise Data Governance Committee, including risk reduction achieved through data governance improvements.

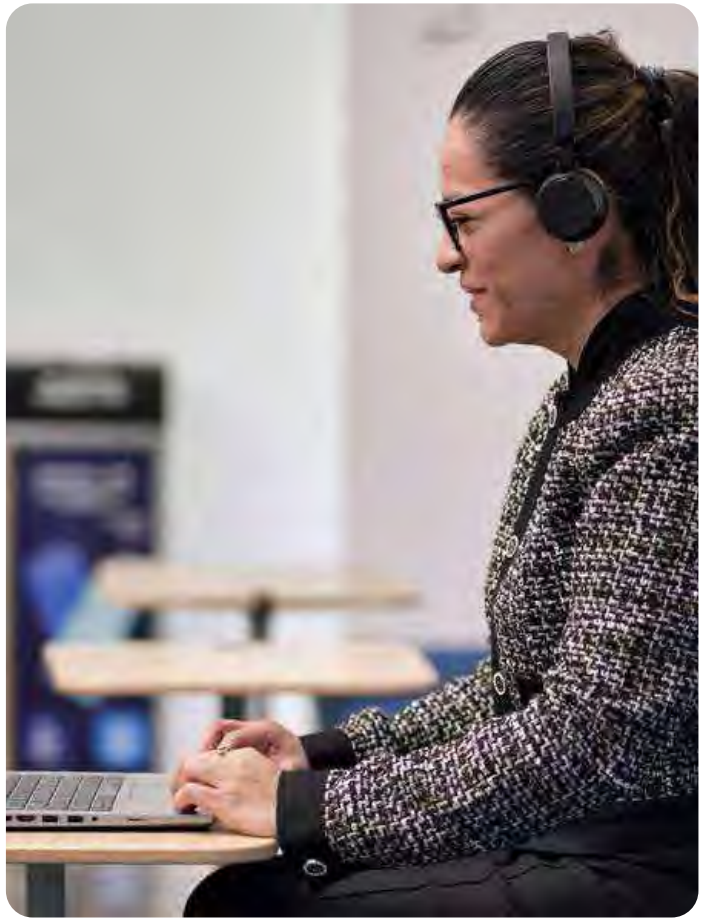

All Banamex employees are required to complete training related to maintaining data quality, understanding associated risks, and maximizing the value of data as an asset, in line with their roles.

All concerns must be promptly reported in accordance with our Escalation Policy.

10.5 Data Privacy

GRI 3-3, 418-1
FN-CF-220a.2
FN.CF-230a.2
IBSO C.8.

Privacy Is Everyone's Responsibility

At Banamex, we are committed to protecting the personal data of our costumers and users and ensuring its ethical use in accordance with the purposes set out in our Privacy Notice. This is carried out in compliance with the principles established in the Federal Act on the Protection of Personal Data Held by Private Parties, its regulations, and applicable provisions.

Following amendments to the Federal Act on the Protection of Personal Data Held by Private Parties, published in the Official Gazette on March 20, 2025, we implemented the necessary internal updates.

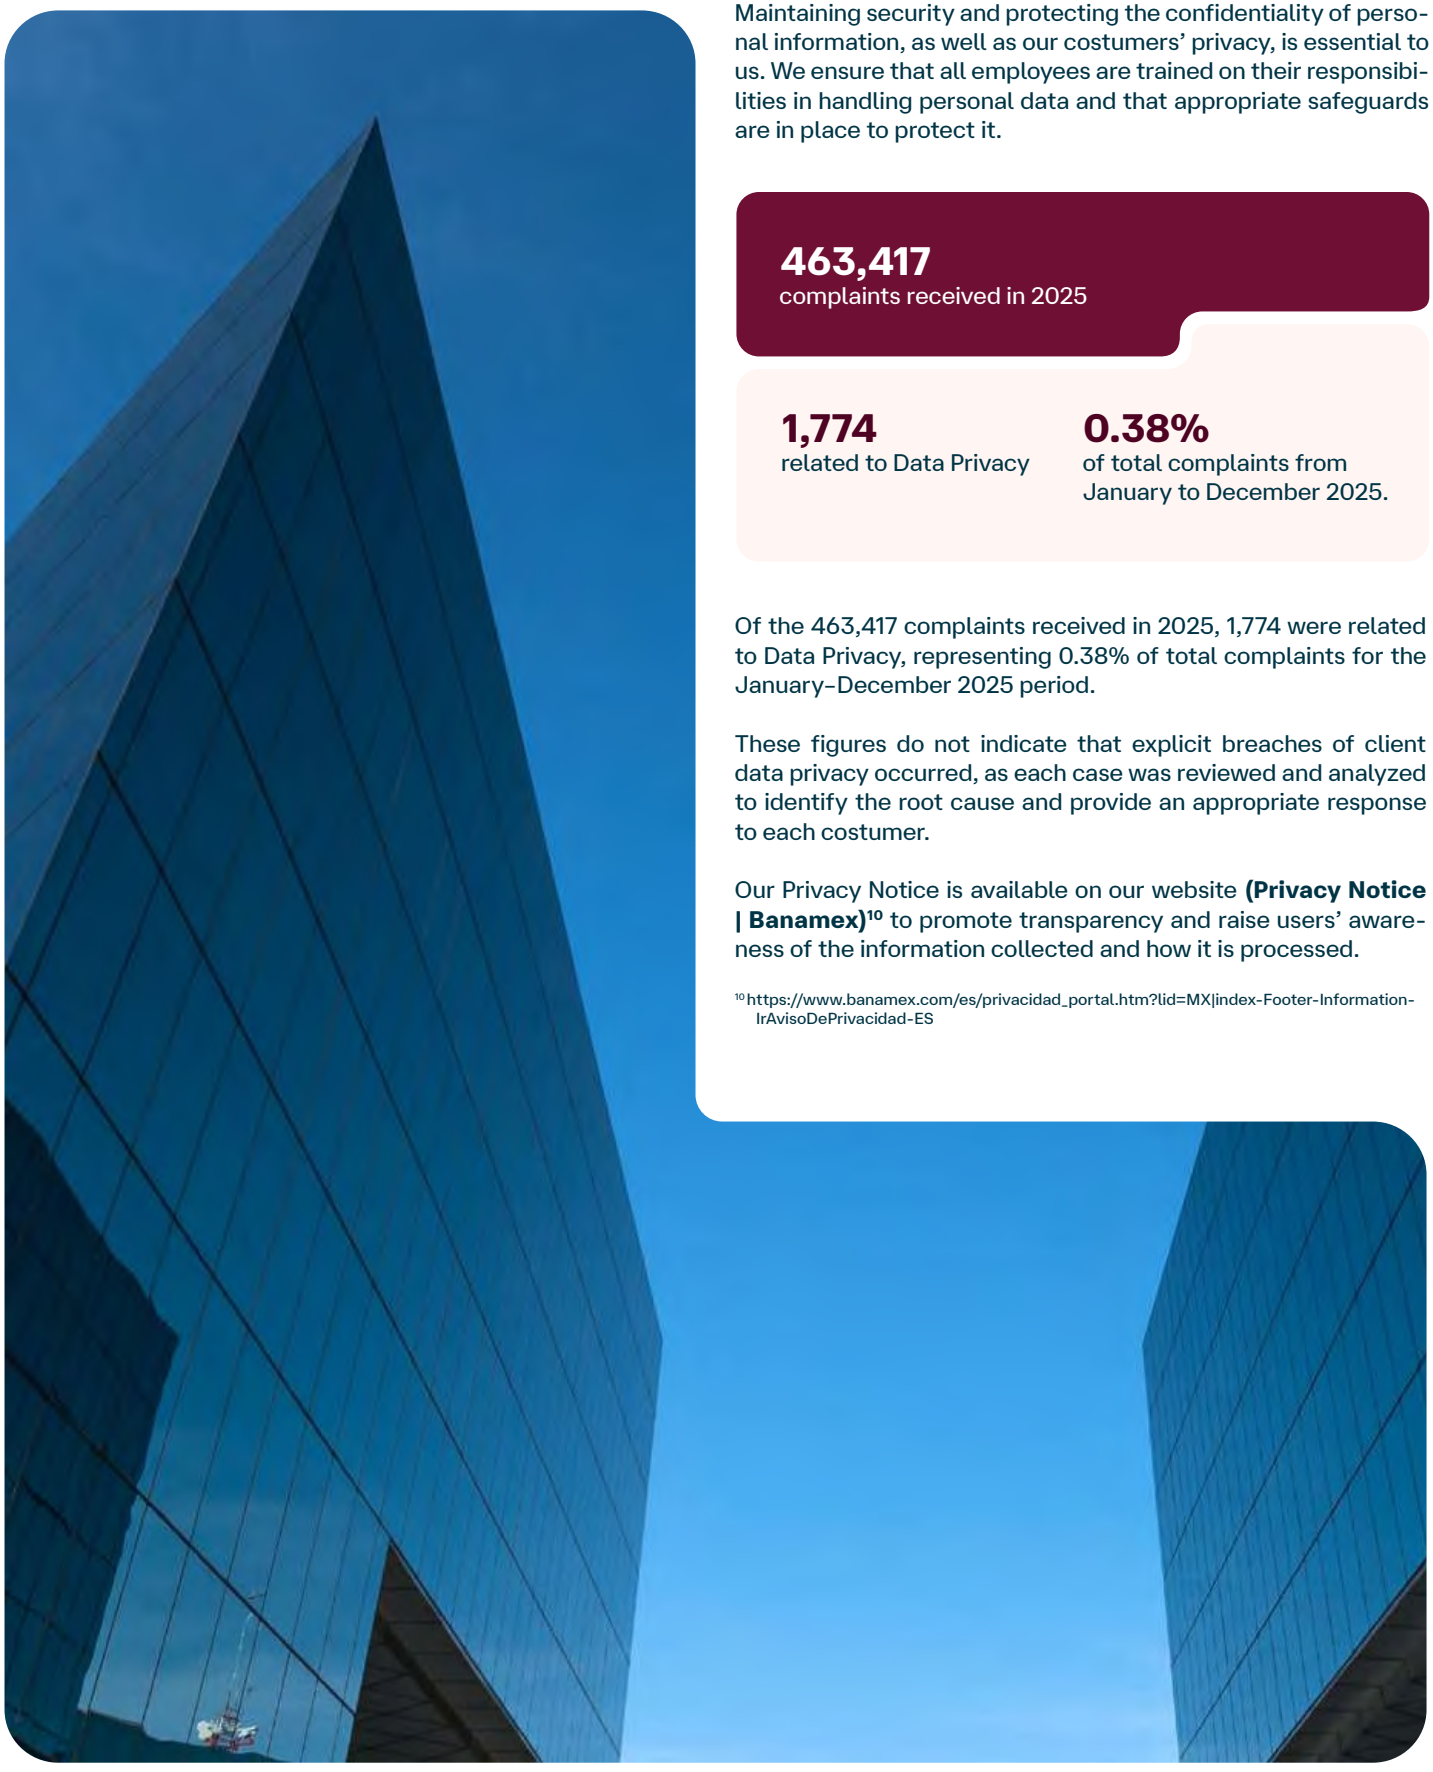

On May 12 of this year, the Personal Data Protection Unit (UPDP) was formally established under the Secretariat of Anti-Corruption and Good Governance. This body serves as the data protection authority, with powers to oversee compliance with the law, conduct related proceedings, and impose sanctions.

Any costumer (data subject) who wishes to learn more about how Banamex processes their personal data may submit a request through the channels specified in the Privacy Notice to exercise their Access, Rectification, Cancellation, or Objection (ARCO) rights.

To submit an ARCO request, the data subject must verify their identity or, where applicable, that of their representative. The request must include: a contact address or method for notifications; a clear and precise description of the personal data concerned; the right to be exercised and the request being made; and any information or documentation that may facilitate processing.

Internally, ARCO requests are routed to the appropriate service area, which has 20 business days from the date of receipt to respond to the data subject or their representative. Responses are provided either by email (if requested by the data subject) or through the corresponding Banamex branch. This period may be extended once, if necessary.

As the data controller of our costumers personal data, Banamex maintains administrative, technical, and physical safeguards to protect personal data against damage, loss, alteration, destruction, or unauthorized use, access, or processing.

Maintaining security and protecting the confidentiality of personal information, as well as our costumers' privacy, is essential to us. We ensure that all employees are trained on their responsibilities in handling personal data and that appropriate safeguards are in place to protect it.

463,417
complaints received in 2025

1,774
related to Data Privacy

0.38%
of total complaints from January to December 2025.

Of the 463,417 complaints received in 2025, 1,774 were related to Data Privacy, representing 0.38% of total complaints for the January–December 2025 period.

These figures do not indicate that explicit breaches of client data privacy occurred, as each case was reviewed and analyzed to identify the root cause and provide an appropriate response to each costumer.

Our Privacy Notice is available on our website **(Privacy Notice | Banamex)**[10] to promote transparency and raise users' awareness of the information collected and how it is processed.

11. How We Deliver Value

GRI 3-3, 207-3

Figures in this report are presented in Mexican pesos.
Where other currencies are used, this is clearly indicated.

11.1	External Environment	212
11.2	Stakeholder Engagement	215
11.3	Partnerships with Local and Global Organizations	217
11.4	Double Materiality Analysis	221
11.5	Due Diligence	226

We share how our capabilities, relationships, and strategy translate into tangible results. By integrating our analysis of the operating environment, stakeholder commitments, strategic partnerships, and double materiality, we show how we create economic, social, and environmental value—strengthening our operations and contributing to the sustainable development of Mexico.

11.1 External Environment

Global developments continue to shape both personal and financial decisions.

At Banamex, we closely monitor international conditions. In 2025, the global economy grew by 3.2%, in line with the previous year, according to estimates from the International Monetary Fund. This resilience was achieved despite an uncertain investment environment driven by evolving and protectionist U.S. trade policies. However, this was offset by increased investment in technology and artificial intelligence (AI), particularly in North America and Asia, as well as fiscal and monetary support and accommodative financial conditions that facilitated private investment.

Across the United States and other major economies, inflation continued to ease, moving closer to central bank targets, though not yet fully reaching them, supporting household purchasing power. Global inflation declined to 4.2%, down from 5.8% in 2024, after peaking at 8.7% in 2022 amid the pandemic. In the United States, consumer price growth fell to 2.9%, while inflationary pressures persisted in Latin America, where inflation reached 7.6%.

Despite these broadly positive outcomes, medium-term risks remain. A reassessment of productivity expectations linked to AI could lead to reduced investment and significant market corrections, including in the financial sector and AI-related industries. This would weigh on economic growth, job creation, and household wealth. In addition, escalating trade tensions could prolong uncertainty and dampen investment across sectors, affecting global markets, supply chains, and commodity prices. At the same time, upside opportunities remain, including increased technology investment and a potential easing of uncertainty related to trade policy and geopolitical conflicts. In this complex environment, Banamex's daily operations face ongoing challenges driven by global dynamics and their potential impact on Mexico.

Domestic Economy

Amid global uncertainty, declining public investment, and domestic legal reforms that weighed on private investment, Mexico's GDP grew by 0.6% in 2025, below the 1.4% recorded in 2024 and well under the historical average of 2.0%, as well as population growth of 1.2%. In nominal terms, the economy reached MXN 35,255 billion, with GDP per capita of MXN 264,000. In real terms, GDP per capita remained below its pre-pandemic level.

Economic performance across the three main sectors was mixed. The primary sector (agriculture, livestock, fishing, and forestry), supported by improved rainfall and higher reservoir levels, grew by 4.2% in 2025, following near stagnation (0.4%) in the prior year. The secondary (industrial) sector contracted for a second consecutive year, declining by 1.3% in 2025 after a 0.4% decrease in 2024. Manufacturing fell by 0.5%, reflecting weaker external and domestic demand amid slower consumption. Construction declined by 1.0%, following 3.0% growth in 2024, due to the completion of major public infrastructure projects in southern Mexico, including the Tren Maya. The tertiary (services) sector grew by 1.3%, less than half the 2.3% recorded in 2024, driven by declines in wholesale trade and accommodation and food services, alongside moderate growth in other segments.

From a supply-and-demand perspective, performance was also mixed. Exports of goods and services remained the most dynamic driver, growing by 7.6%, up from 4.2% in 2024. Although the United States—Mexico's main trading partner—began raising tariffs on imports, including those from Mexico, the USMCA helped Mexican exporters expand their market share. Effective U.S. tariffs averaged around 10% globally, compared to less than 5% for Mexico, enabling Mexico to reach a 16% share of U.S. imports—the highest among all countries—and consolidate its position as the United States' leading trading partner. In this context, foreign direct investment (FDI) also performed strongly, exceeding USD 40 billion and reaching a record level.

In contrast, the domestic market weakened significantly in 2025. Investment fell by 6.7%, following 3.4% growth in the prior year, reflecting reduced public infrastructure spending and lower machinery and equipment purchases. Private consumption also slowed sharply, increasing by just 1.1%, compared to 2.8% in 2024. Formal employment growth moderated to 0.5%, down from 2.0%, further dampening demand for goods and services.

On the fiscal side, the deficit narrowed to 3.9% of GDP, down from 5.0% in 2024, as deterioration in public finances stabilized. Government spending remained elevated at 26.1% of GDP, driven primarily by social programs, while revenues reached 22.3%, constrained by weak economic growth. Despite this adjustment, fiscal pressures and higher financing costs continued to affect public debt, which rose to 58.1% of GDP from 57.0% in 2024. Nevertheless, major credit rating agencies maintained Mexico's long-term sovereign debt at investment grade.

In a year marked by geopolitical and trade tensions, investors demonstrated resilience, and financial variables delivered broadly positive results. The equity market posted gains of nearly 30% in Mexican peso terms, while the exchange rate appreciated by an average of 5% over the year and by more than 10% from year-end 2024 to year-end 2025. Meanwhile, the Bank of Mexico continued its easing cycle. By the end of 2025, the policy rate stood at 7.00%, down from 10.00% the previous year. This decline was accompanied by a downward trend in inflation, which closed the year at 3.7%, compared to 4.2% in 2024, although upward price pressures persist.

Financial Sector Trends

Short-term outlooks suggest that economies will remain resilient, although global GDP growth in 2026 is expected to be slightly lower than in 2025. Uncertainty around U.S. trade policy, including the renegotiation of the USMCA, as well as ongoing geopolitical conflicts, is likely to persist.

Despite these factors, the financial system—and the banking sector in particular—will continue to undergo significant transformation, driven by technological advances such as digitalization and artificial intelligence, as well as evolving customer expectations. In line with these trends, Banamex is focused on strengthening its processes to enhance its business offering, comply with regulatory changes, and deliver the highest level of service to its costumers. Our commitment is to contribute to the country's progress and well-being within a framework of sustainable development and corporate social responsibility.

The start of the new year presents challenges for the financial system amid a volatile macroeconomic and geopolitical environment. The most relevant include:

Digitalization:

The primary driver of transformation in banking requires significant investment in technology to improve efficiency, customer experience, and security. Digital and mobile banking will continue to expand, prompting banks to enhance their platforms with greater functionality. Artificial intelligence and machine learning are expected to optimize product offerings and strengthen risk detection and mitigation.

Competition from FinTechs and Neobanks:

Traditional banks face increasing competition from FinTech companies and digital-only banks. Operating without physical branches or traditional infrastructure, these players compete through lower-cost models, posing a key challenge to the industry.

Regulatory Environment and Sustainability:

Demographic changes, increased participation of women in the economy, growing sustainability practices (driven by climate change and social responsibility), and rising risks related to money laundering and cyberattacks are shaping an increasingly demanding regulatory landscape. The banking sector remains one of the most regulated, with a focus on financial stability, customer protection, and the prevention of financial crime.

11.2 Stakeholders

GRI 2-29, 207-3

We identify as stakeholders all those with whom we create value through our products and services, as well as through our operations and social and sustainability initiatives.

Our primary stakeholders include costumers, employees, and suppliers, as well as associations, authorities, governments, and communities.

We promote a culture of participation, community, communication, and engagement to protect and strengthen cultural, natural, social, and economic assets. We are committed to maintaining ongoing dialogue with our stakeholders through the communication channels we provide, considering their interests, concerns, and expectations.

This continuous engagement enables us to identify, assess, and prioritize operational risks that could adversely affect our environment.

Stakeholder Engagement

Below is a brief overview of our relationships and the communication channels we maintain with our key stakeholders:

Stakeholders	Communication Channels	Key Areas	Frequency	Focus Areas
Government and Regulatory Entities	Reports, emails, press releases and working meetings.	Finance + Tax + Financial Planning + Legal + Compliance and Control + Social Impact + Divisional and District Offices + Volunteering	Annual, quarterly, ongoing.	Bank financial position, financial projections, project results, and support in identifying social needs.
Costumers	Market research, call center, phone lines, social media, and branch service.	Commercial Intelligence + Divisional and District Offices + Legal + Branches + Suppliers	Ongoing.	Needs, product and concept evaluations, opinion studies.
Employees	Employee Voice Survey (VOE), newsletters, portal, videos, informational capsules, email, reports, working groups, conferences, training, phone, events, meetings, and social media.	Human Resources + Organizational Culture + Communications + Compliance and Control + Social Impact + Financial Education + Volunteering + ESG Office + Legal	Annual, monthly, ongoing.	Financial and organizational culture, training and development, social initiatives, satisfaction and engagement, cultural and social agenda, corporate citizenship.
Shareholders	Reports, meetings.	Executive Management + Financial Planning + Finance + Legal	Annual.	Bank financial position, financial projections, opportunity and risk management, social, environmental, and economic performance.
Regulators	Email, meetings, reports, events.	Financial Planning + Finance + Controllership + Business Areas + Risk + Legal + Economic Research + Compliance and Control + Social Impact	Ongoing.	Regulatory, financial, and operational information on Banamex and peers; representation in social responsibility and sustainability; volunteer partnerships with the Mexican Banking Association (ABM).
Investors and Financial Markets	Email, phone, meetings, and reports.	Financial Planning + Risk + Finance + Legal + Economic Research	Ongoing.	Bank and banking system financial position, financial projections, economic, political, and financial outlook for the country.

11.3

Partnerships with Local and Global Organizations

GRI 2-28

Banamex Advisory Councils Plenary Meeting

In 2025, we held the 33rd Banamex Advisory Councils Plenary Meeting, a pioneering initiative in Mexico's financial sector.

The event has become a forum for informed dialogue among the bank's key costumers, leading business figures, and senior political, economic, and financial authorities. Notable speakers included Ana María Aguilar, Regional Advisor at the Bank for International Settlements (Mexico Office), who provided insights into key national economic indicators. The program also featured two Nobel laureates: Maria Ressa, Nobel Peace Prize recipient (2021), who addressed the challenges of digital media and her approach to social impact, and Daron Acemoglu, Nobel Prize in Economics recipient (2024), who discussed the challenges facing modern societies and global economic trends. In addition, Ben Nemtin, speaker, and author of the international bestseller "My Bucket List," delivered a message on purpose-driven action and personal impact.

Luis Carlos Ugalde, Managing Director of Integralia Consultores, and Juan E. Pardinas Carpizo, former editorial director of Reforma and former head of the Mexican Institute for Competitiveness (IMCO), examined Mexico's competitive opportunities over the next decade. A panel on geopolitical risks featured Ambassador Miguel Ruiz Cabañas, career diplomat, and professor at Tecnológico de Monterrey, alongside Ana María Salazar, former advisor to President Bill Clinton and former U.S. Deputy Assistant Secretary of Defense, and Rafael Fernández de Castro, Director of the Center for U.S.-Mexican Studies at the University of California, San Diego. The panel provided a global geopolitical outlook and discussed the challenges Mexico faces amid political changes in the United States.

The agenda also included the complimentary workshop Knowledge and Personal Transformation for Success and Well-Being, designed for younger members of business families. Led by the Director of Banamex's Center for Family Business Development and a team of experts, the two-day program focused on equipping the next generation of entrepreneurs with leadership and personal development tools.

Regional Advisory Councils

We also held sessions across our Regional Advisory Councils, aimed at providing updates on the national economic outlook, regional dynamics, and key sectors. These meetings also offered insights into financial markets and new investment products developed specifically for Banamex costumers in collaboration with BlackRock. Sergio Méndez, CEO of BlackRock, participated in two of the most impactful regional sessions.

The agendas also included key indicators on Banamex's competitive positioning, as well as its main performance metrics for 2025, reflecting the bank's strength and brand value.

Business-focused content was incorporated into the sessions, including: "Adapting to Today's Changing Environment," presented by journalist and author Alberto Latí; "The Challenges Women Face in the Business World," delivered by Terry Gutiérrez Smith, CEO of Tesla for Latin America; and "The Legacy of Family Businesses: Strategic Development and Institutionalization," led by Ángel García Lascuráin, a specialist in strategic planning. A series of thematic business sessions was also held, including **Successful Succession Planning for the Retirement of the Family Patriarch**, designed for council members and young entrepreneurs. The session provided practical insights to support decision-making in family businesses during generational transitions. It was led by the Director of Banamex's Center for Family Business Development, along with a subject-matter expert. It included testimonials from two of our board chairs, who shared successful transition practices.

Industry Associations

- Mexican Banking Association (ABM)
- Mexican Association of Stock Market Intermediaries (AMIB)
- Mexican Association of Insurance Institutions (AMIS)
- Mexican Association of Retirement Fund Administrators (AMAFORE)

From our Financial Education area, and in coordination with the ABM committee, we highlight the following initiatives:

- Development and planning of SNEF (National Financial Education Week) 2025.
- Participation in Banca Explica on financial education.
- Design and development of assessment tools for participants and coordinators in the Jóvenes Construyendo el Futuro program.
- Organization of the fourth Financial Education Congress at the ABM.

In addition, we maintain ongoing communication and collaboration with CONDUSEF on educational offerings and the periodic dissemination of content.

Corporate Sustainability: Membership in Affiliated Organizations (2025)

- Impact Investment Alliance
- Mexican Alliance for Biodiversity and Business (AMEBIN)
- CENACED – Unidos por Ellos
- Small Business Center
- ABM Diversity, Equity, and Inclusion Committee
- ABM Financial Education Committee
- ABM Social Responsibility Committee
- ABM Sustainability Committee
- AMIB Sustainability Committee
- CEMEFI Council
- Cuentas Contigo – Junior Achievement
- Ensamble
- Mexico City Water Fund – Agua Capital
- GRI Stakeholder Council (20 Seats)
- GRI Banking Group
- GRI LATAM
- Latimpacto
- UNDP – Private Sector Alliance for Financial Inclusion
- UN Global Compact
- UN Global Compact Working Groups: Sustainable Cities and Labor Inclusion
- United Nations Environment Programme Finance Initiative (UNEP FI) – PRB, PRI
- RedEAmérica
- ARISE Resilience Leaders

Initiatives

Below is a brief overview of our participation, scope, and commitments related to ESG matters.

Initiative and Description	Scope of Participation
International Labour Organization (ILO) – IFP Declaration The International Labour Organization Declaration commits members to respect and promote the principles and rights of freedom of association and collective bargaining, the elimination of forced or compulsory labor, the abolition of child labor, and the elimination of discrimination in employment and occupation.	We adhere to these commitments in our labor practices.
UN Global Compact A voluntary initiative through which we commit to integrating its ten principles into our strategies and operations, and to advancing the Sustainable Development Goals (SDGs).	We have been a signatory since 2012.
ARISE Led by the United Nations Office for Disaster Risk Reduction, this initiative promotes alignment of the private sector with the Sendai Framework and strengthens resilience to disasters.	We lead the Disaster Risk Investment Working Group.
Principles for Responsible Banking (PRB) A global framework developed by the United Nations Environment Programme Finance Initiative (UNEP FI) to promote sustainable banking, aligning strategies and operations with the SDGs and the Paris Agreement.	Banamex became a signatory in 2019.
Principles for Responsible Investment (PRI) Through our commitment to the UN PRI, we promote the development of a sustainable global system by encouraging the adoption of these principles in investment processes and collaboration in their implementation.	Afore has been a signatory since 2021.
Climate Action 100+ An initiative that promotes action by companies responsible for the majority of global greenhouse gas emissions to address climate change.	Afore has been a signatory since 2022.

We continue to engage with the private sector to advance the 2030 Agenda and its Sustainable Development Goals (SDGs), with a particular focus on carbon markets, sustainable cities, and climate change management.

11.4 Double Materiality Analysis

GRI 3-1,3-2

Double materiality is an approach that assesses both the financial and non-financial impacts of a company, identifying the topics that represent risks and opportunities for the organization from both internal and external perspectives, and across its stakeholder groups.

An ESG topic is financially material when it has, or may have, a significant financial impact on the company—in other words, how external factors affect the business. Conversely, a topic is material from an impact perspective when the organization generates, or may generate, significant effects on society or the environment through its operations—that is, the company's impact on the external environment.

The Double Materiality Analysis, initiated at the end of 2024 and completed in 2025, consisted of the following steps:

01.

Mapping

Identification, classification, and prioritization of Banamex's stakeholder groups.

02.

Preliminary ESG Topic List

Document analysis to develop a preliminary list of relevant ESG topics, considering the business's impacts, risks, and opportunities.

03.

Stakeholder Engagement

Engagement with stakeholders through interviews with Banamex executives and board members, as well as surveys of costumers and employees.

04.

Prioritization

Prioritization of topics based on interviews and artificial intelligence tools.

05.

Validation

Validation of results.

Identification

The objective of this analysis was to identify the topics that reflect the most significant economic, environmental, and social impacts, as well as those that influence stakeholder decision-making.

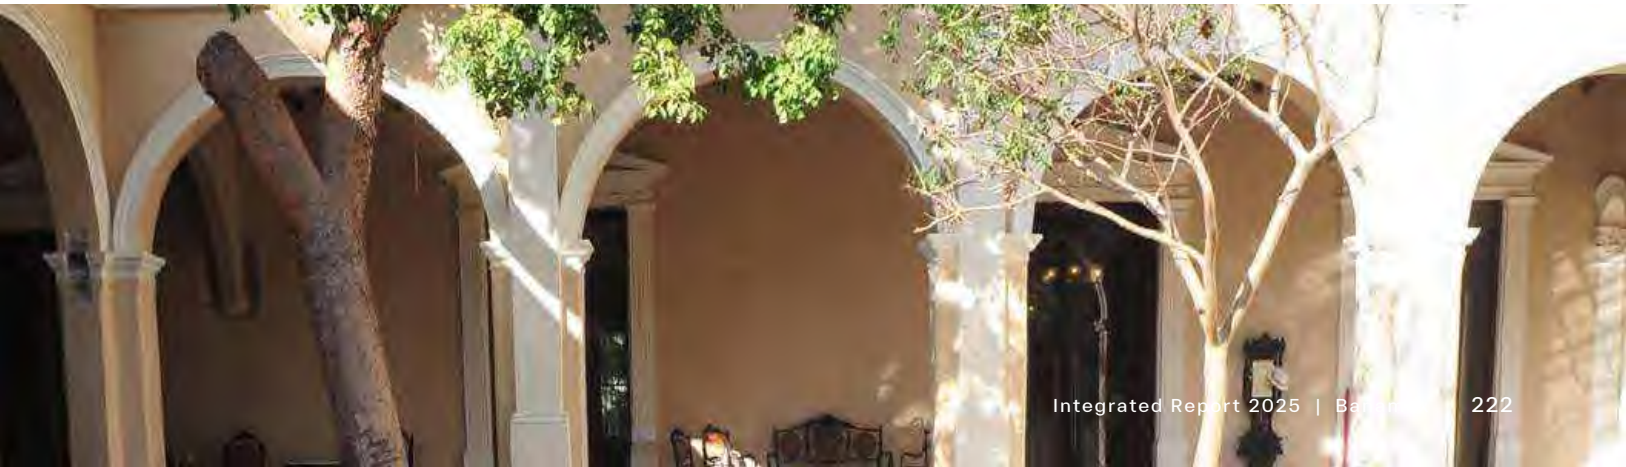

To develop a list of potentially relevant topics related to our operations, risks, and impacts, we used the GRI standards as a foundation. We complemented them with inputs from the following processes:

Company Perspective

- Review of corporate documents, including the Code of Conduct, policies, and the Integrated Report 2023.
- Input from key stakeholder groups, including executive management and direct reports, members of the Board of Directors (Group, Insurance, and Afore), as well as employees, costumers, suppliers, and NGOs.

Stakeholder Perspective

- Analysis of prior stakeholder consultations, including the 2017 and 2020 materiality studies.
- Review of industry reports.
- ESG priorities identified by international rating agencies and investors.
- Analysis of Banamex's media coverage.

Prioritization

Once potentially relevant topics were identified, we proceeded with prioritization, applying a dual perspective: stakeholder input and the company's strategic priorities.

To capture the stakeholder perspective, we conducted both direct and indirect consultations. For the company perspective, we considered the topics most frequently raised in interviews with senior executives.

Company Approach

- Online survey conducted with employees, costumers, strategic partners, non-governmental organizations, and suppliers.
- Stakeholder perspective.
- Interviews with senior executives.

Validation

As a result of this materiality assessment, 16 material topics were identified. Of these, 15 were evaluated from both financial and impact perspectives, while Nature and Biodiversity were classified as an emerging topic.

The topics identified under each criterion are presented below:

Environmental

- Eco-efficiency (sustainable operations)
- Transition to renewable energy
- Climate change

Social

- Financial accessibility and inclusion
- Talent management
- Cultural and social heritage
- Customer relationships
- Human rights

Governance

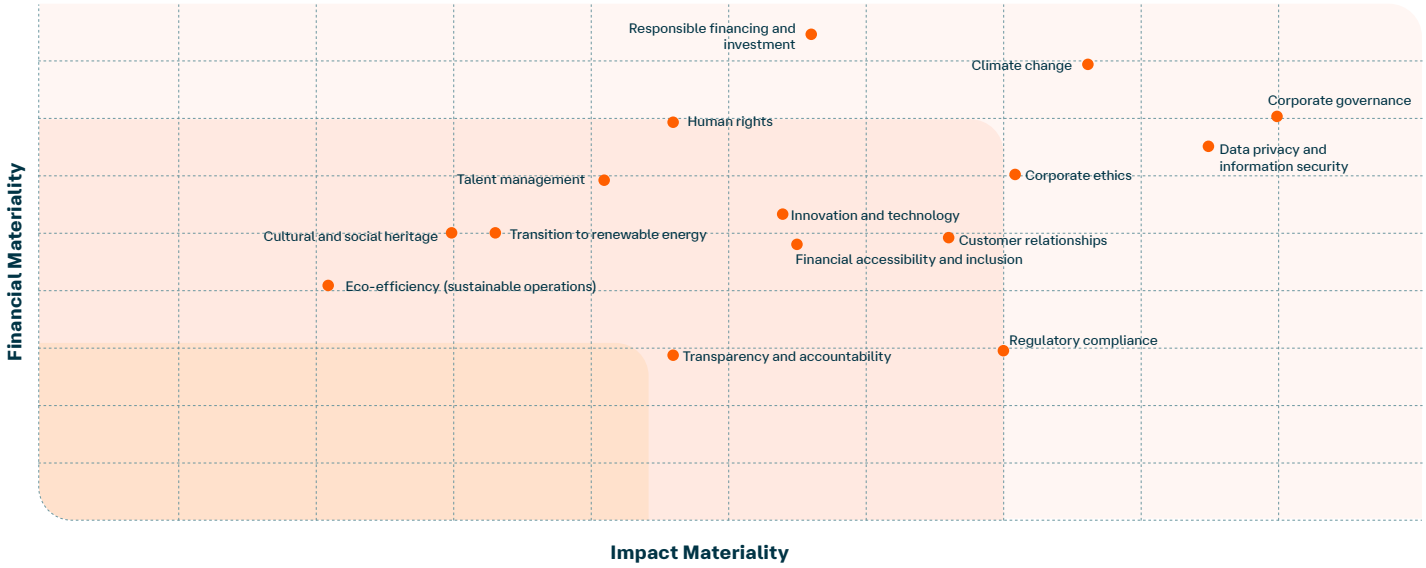

- Corporate governance
- Regulatory compliance
- Corporate ethics
- Transparency and accountability
- Data privacy and information security
- Innovation and technology
- Responsible financing and investment

Double Materiality Matrix

GRI 3-1, 3-2

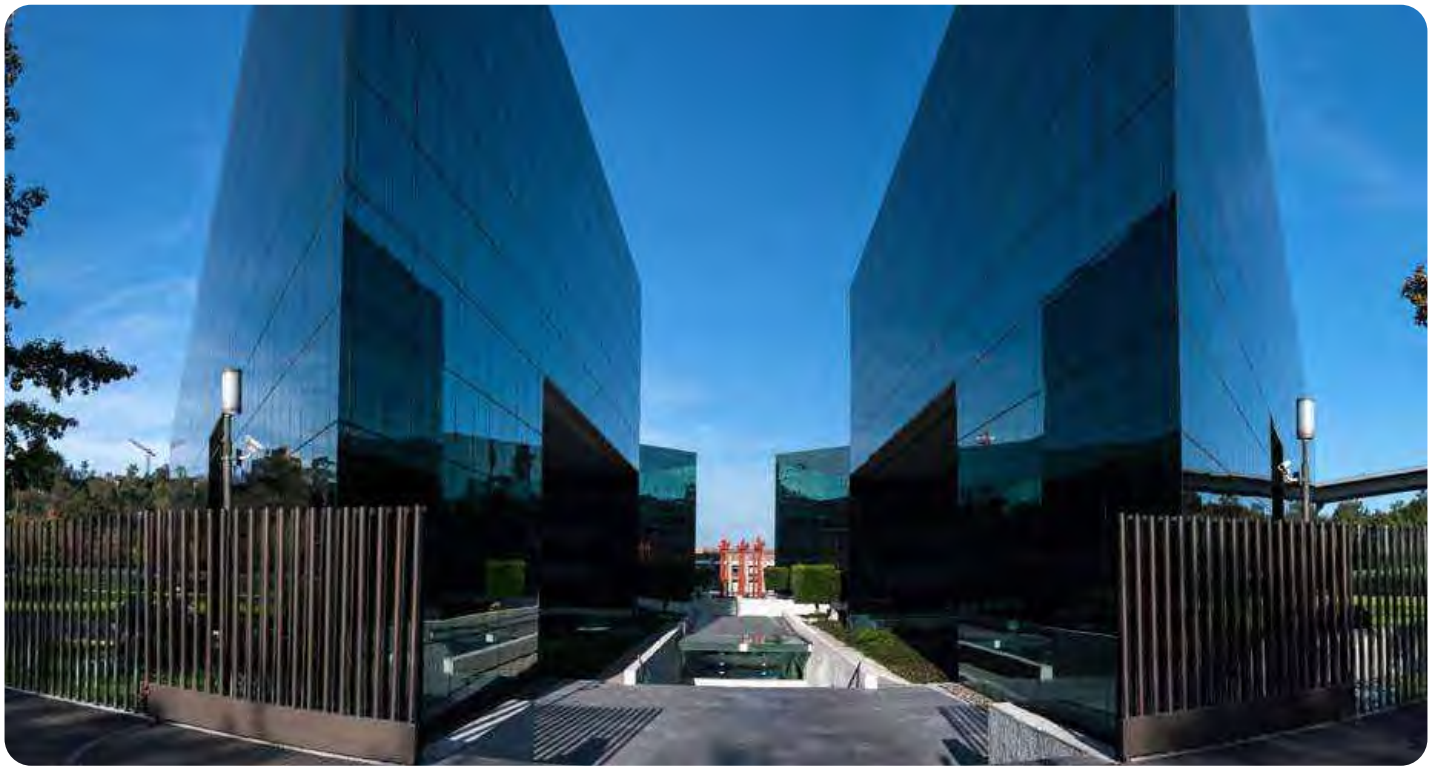

Topics critical from a financial perspective but not prioritized by external stakeholders

Topics critical from both financial and impact perspectives

Topics not considered critical by external stakeholders, nor from a financial perspective

Topics critical for external stakeholders, but not from a financial perspective

Material Topics

GRI 3-1, 3-2

Material Topic	Axis	Subtopics	Double Materiality
Corporate Governance	Governance	• Corporate Governance • Diversity in governing bodies • ESG governance	Critical
Climate Change	Environmental	• Climate-related risks and management • Greenhouse gas (GHG) emissions	Critical
Data Privacy and Information Security	Governance	• Cybersecurity and information security • Data privacy management	Critical
Responsible Financing and Investment	Governance	• Responsible Financing and Investment • Financed emissions	Critical
Corporate Ethics	Governance	• Corporate ethics and anti-corruption	Critical
Regulatory Compliance	Governance	• Compliance management	Critical
Customer Relationships	Social	• Customer rights • Customer satisfaction	Priority
Human Rights	Social	• Human rights (workforce, supply chain, social initiatives)	Priority
Innovation and Technology	Governance	• Business model innovation • Digital transformatio	Priority
Financial Accessibility and Inclusion	Social	• Accessibility of products and services	Priority
Talent Management	Social	• Talent attraction, management, and retention • Fair and equitable compensation • Diversity, equity, and inclusion • Fair and inclusive workplace • Occupational health and safety	Priority
Transition to renewable energy	Environmental	• Transition to renewable energy	Priority
Cultural and social heritage	Social	• Financial education • Cultural and social heritage	Priority
Transparency and accountability	Governance	• Investor relations • Non-financial reporting • Financial reporting • Stakeholder engagement	Priority
Eco-efficiency (sustainable operations)	Environmental	• Energy consumption • Waste management (technological, plastic, paper, etc.) • Sustainable spaces	Priority

Based on the study results, an action plan is in place to address the business needs identified in this exercise. Progress will be reported in the next edition.

11.5 Due Diligence

GRI 2-23, 2-24, 2-26, 3-3, 406-1, 407-1, 408-1

As stated in our Human Rights Statement, our mission is to provide financial services responsibly and contribute to economic growth and progress.

In doing so, we may have both positive and negative impacts on the protection and fulfillment of internationally recognized human rights. This represents a significant responsibility and, at the same time, an opportunity to put our mission and value proposition into practice.

At Banamex, we are guided by internationally recognized standards, including the United Nations Guiding Principles on Business and Human Rights, the Universal Declaration of Human Rights, and the Fundamental Conventions of the International Labour Organization (ILO), covering child labor, forced labor, freedom of association, the right to organize and bargain collectively, equal remuneration, and non-discrimination in the workplace. In addition, we assess our performance in line with the due diligence framework of the Organization for Economic Co-operation and Development (OECD).[11]

Our commitment to these principles is reflected in our policies and actions toward employees, suppliers, and costumers, as further detailed in our Human Rights Statement. We are also a signatory to the United Nations Global Compact.

[11] https://www.oecd.org/es/publications/guia-de-la-ocde-de-debida-diligencia-para-una-conducta-empresarial-responsable_14922561-es.html

Below, we present our progress in identifying risks, implementing response measures, and monitoring outcomes in line with the OECD due diligence guidelines:

05.
Communicate how impacts are addressed.

02.
Identify and assess adverse impacts in operations, supply chains, and business relationships.

01.
Integrate responsible business conduct into policies and management systems.

04.
Track implementation and results.

03.
Cease, prevent, or mitigate adverse impacts.

06.
Enable remediation where appropriate.

Guideline	Performance	Further Detail
Integrate responsible business conduct into policies and management systems.	Human Rights Statement Code of Conduct Ethics Line Environmental and Social Risk Management Policy We extend the Code of Conduct guidelines to our value chain through Citi's Supplier Principles Statement Citi's Supplier Sustainability and Diversity Program	• Ethics and compliance • Responsible finance • Team • Commitment to society
Identify and assess adverse impacts in operations, supply chains, and business relationships.	Ethics Line Escalation Policy: We provide multiple channels for employees to raise concerns, including their managers or other members of management, Human Resources, Employee Relations, internal legal advisors, designated Independent Compliance officers, security, investigations, and ethics hotlines. The Voice of the Employee is an annual diagnostic tool that assesses employees' perceptions of the work environment and key management practices. In 2025, the response rate was 88%. Through the Task Force on Climate-related Financial Disclosures (TCFD)[12] pilot, we assessed physical and transition risks associated with a low-carbon economy for the agribusiness and commercial real estate portfolios. The enterprise risk management process identifies, measures, and monitors risks and their impact on operations, earnings, and capital. The Risk Committee considers economic, environmental, and social factors in the performance of its oversight functions. Specialized areas address stakeholder feedback and concerns, which are escalated through internal systems based on their nature and severity. We implement a self-assessment control program, methodology, and tool known as the Manager's Control Assessment (MCA). The Operational Risk Management (ORM) function independently facilitates and reviews the implementation of the MCA and the proper application of the Governance, Risk, and Control (GRC) framework across all areas of Grupo Financiero Banamex, providing guidance on risk and control identification. Independent reviews of risk management functions assess employees' ability to identify, analyze, and understand risks and their implications, respond appropriately, and comply with enterprise risk management policies and applicable legal and regulatory requirements.	• Ethics and compliance • Risk management • Team

[12] *Task Force on Climate-related Financial Disclosures (TCFD): a working group established to encourage companies to disclose to investors the risks associated with climate change and how they manage them..*

Guideline	Performance	Further Detail
Cease, prevent, and/ or mitigate adverse impacts.	Escalation Policy: We provide multiple channels for employees to raise concerns, including their managers or other members of management, Human Resources, Employee Relations, internal legal advisors, designated Independent Compliance officers, security, investigations, and ethics hotlines. The global “Banamex Vitality” program is a well-being initiative that promotes physical and mental health through healthy lifestyles. TotalPass Plan: All Grupo Financiero Banamex employees have access to this benefit, which allows them to train anytime and anywhere, with access to leading gym chains, fitness studios, and online platforms across Mexico.	• Ethics and compliance • Team • Digital transformation • Information security
Track implementation and results.	The enterprise risk management process identifies, measures, and monitors risks and their impact on operations, as well as their effects on earnings and capital value. Specialized areas address stakeholder feedback and concerns, which are escalated through internal systems based on their nature and severity.	• Risk management

IFRS S1 and S2 Disclosures

In our 2024 Integrated Report, we presented, for the first time, disclosures aligned with the IFRS Sustainability Standards (IFRS S1 and IFRS S2), laying the foundation for a process that links our strategic decision-making to the management of sustainability- and climate-related risks and opportunities. This initial effort set the direction, identified key focus areas, and committed the Group to a path of continuous development.

In 2025, we made tangible progress in translating these commitments into measurable outcomes. The completion of our separation from Citigroup on December 1, 2024, enabled us to redesign our ESG governance, strengthen our climate analysis capabilities, and establish our own climate risk management framework. Below, we present the reference index of our disclosures, structured around the four core pillars of the IFRS Standards: Governance, Strategy, Risk Management, and Metrics and Targets, followed by a summary of the progress achieved.

IFRS Index

Sustainability-related disclosures

Standard	Metric	Paragraphs	Page, Response, or Reason for Omission

Note: Page references correspond to the sections of the Integrated Report 2025 in which each requirement is addressed. Paragraph numbers refer to IFRS S1 and S2 issued by the ISSB.

Summary of Progress 2024 – 2025

Pillar	Baseline	2025 Progress
Governance	ESG scorecard linked to senior management performance evaluation. Commitment to establishing formal oversight structures.	The ESG Forum was established with participation from 19 areas and 94% attendance. Climate risk is integrated into Independent Risk. ESG targets included in reporting to the Board of Directors and the Executive Committee of Business Strategy
Strategy	Financial materiality as a cross-cutting axis. Preliminary identification of risks. Foundational narrative.	Double materiality updated (16 topics). Assessment of 7 physical risks and 4 transition risks using NGFS scenarios. Financed carbon footprint: 7.28M tCO_2e. Sustainable finance: MXN 8,526 million.
Risk Management	Existing comprehensive framework. Initial integration of ESG and climate considerations. Development of internal capabilities.	ESRM policy updated following the separation, with ABM coverage. Physical risk (GIS) and transition risk (NGFS) methodologies implemented. ARISE Mexico leadership.
Metrics and Targets	Baseline with 2023 data. Ongoing consolidation of ESG scorecard metrics. No measurement of financed emissions.	Gross emissions reduced by 3.51%. First measurement of financed emissions (7.28 million tCO_2e, 16% of total portfolio). Water: 10% reduction; 36% clean energy supply.

This approach positions us to evolve continuously, advancing toward a business model that not only complies with international disclosure standards but also leverages them as a tool to generate sustainable competitive advantages. Looking ahead, our commitment is to continue strengthening this integration by focusing on the publication of the Group's Climate Policy, expanding the measurement of financed emissions, establishing quantitative decarbonization targets, and deepening our climate scenario analysis, using material information to guide strategic investments that enhance long-term value creation for our clients, shareholders, and communities.

Materiality and SDG Index 2025

Material Topic	Subtopic	Report Section	Axis	Related SDG and Type of Impact	Impact
Corporate Governance	Corporate Governance	3. Corporate Governance	Governance	SDG 16 Peace, Justice, and Strong Institutions – Positive impact (effective institutions).	Contributes to strengthening institutions through responsible, transparent, and effective practices.
Corporate Governance	Diversity in governing bodies	3.1 Governing bodies	Governance	SDG 5 Gender Equality and SDG 10 Reduced Inequalities – Positive impact (equity and inclusion).	Promotes gender equity and inclusion in strategic decision-making.
Corporate Governance	ESG governance	5.2 ESG governance	Governance	SDG 12 Responsible Consumption and Production and SDG 16 Peace, Justice, and Strong Institutions – Positive impact (responsibility and transparency).	Promotes sustainability and organizational responsibility as the foundation for ethical and transparent management.
Climate Change	Climate-related risks and management	5.3 Environmental, social, climate, and disaster risk management	Environmental	SDG 13 Climate Action – Mitigation of negative impact.	Manages climate change risks and reduces their impact on operations.
Climate Change	Greenhouse gas (GHG) emissions	5.3.3 Environmental performance	Environmental	SDG 13 Climate Action – Mitigation of negative impact.	Implements actions to reduce the carbon footprint and support the Paris Agreement.
Data Privacy and Information Security	Cybersecurity and information security	2.4 Risk Identification and Management and 10.4 Information Security	Governance	SDG 9 Industry, Innovation and Infrastructure and SDG 16 Peace, Justice, and Strong Institutions – Mitigation of negative impact.	Protects the integrity of digital systems and reduces risks for users and the organization.
Data Privacy and Information Security	Data privacy management	2.4 Risk Identification and Management and 10.4 Information Security	Governance	SDG 16 Peace, Justice, and Strong Institutions – Mitigation of negative impact.	Prevents misuse of personal data, strengthening trust and regulatory compliance.
Responsible Financing and Investment	Responsible Financing and Investment	5.3.1 Afore / Responsible Investment	Governance	SDG 8 Decent Work and Economic Growth, SDG 12 Responsible Consumption and Production, and SDG 13 Climate Action – Positive impact (sustainable finance).	Channels capital toward sustainable projects with positive social and environmental impact.
Responsible Financing and Investment	Financed emissions	5.3.1 Afore / Metrics	Governance	SDG 13 Climate Action – Mitigation of negative impact.	Assesses and manages indirect environmental impacts associated with the investment portfolio.
Corporate Ethics	Corporate ethics and anti-corruption	10.1 Ethics and compliance culture / 10.2 Compliance programs / 10.3 Training	Governance	SDG 16 Peace, Justice, and Strong Institutions – Mitigation of negative impact.	Prevents misconduct and fosters a culture of corporate integrity.
Regulatory Compliance	Compliance management	10.2 Compliance programs	Governance	SDG 16 Peace, Justice, and Strong Institutions – Mitigation of negative impact.	Ensures adherence to laws and standards, reducing legal and reputational risks.
Customer Relationships	Customer rights	6.1 Responsible commercialization / 6.1.1 Customer relationships	Social	SDG 8 Decent Work and Economic Growth and SDG 10 Reduced Inequalities – Mitigation of negative impact.	Ensures respect for consumer rights through fair and accessible treatment.
Customer Relationships	Customer satisfaction	6.1.1 Customer relationships	Social	SDG 8 Decent Work and Economic Growth – Positive impact (responsible service).	Enhances service quality, fostering responsible and sustainable relationships with clients.

Material Topic	Subtopic	Report Section	Axis	Related SDG and Type of Impact	Impact
Human Rights	Workforce	8. Equal opportunity	Social	SDG 8 Decent Work and Economic Growth – Positive impact (decent employment).	Creates stable, fair, and dignified jobs that support personal development.
Human Rights	Supply chain	6.4 Supply chain relationships	Social	SDG 8 Decent Work and Economic Growth and SDG 12 Responsible Consumption and Production – Mitigation of negative impact.	Promotes fair labor conditions among suppliers and ethical traceability.
Human Rights	Social initiatives	5.1 Corporate Citizenship Model	Social	SDG 10 Reduced Inequalities and SDG 17 Partnerships for the Goals – Positive impact (partnerships for inclusion).	Contributes to the development of vulnerable communities through social partnerships and inclusive programs.

Independent Practitioners' Limited Assurance Report

To the Board of Directors of Grupo Financiero Banamex, S. A. de C. V.:

Report on key sustainability performance indicators of Grupo Financiero Banamex, S. A. de C. V. (hereinafter "Banamex") that are included in the Integrated Report 2025.

Conclusion

We have performed a limited assurance engagement on whether the key sustainability performance indicators of Banamex, detailed in Annex A attached to this assurance report for the period from January 1st. to December 31st, 2025, have been prepared in accordance with the standards of the Global Reporting Initiative (GRI) (the "Criteria").

Based on the procedures performed and evidence obtained, nothing has come to our attention to cause us to believe that the key sustainability performance indicators of Banamex detailed in Annex A attached to this assurance report for the period from January 1st. to December 31st, 2025, are not prepared, in all material respects, in accordance with Criteria.

Basis for conclusion

We conducted our engagement in accordance with International Standard on Assurance Engagements (ISAE) 3000 (Revised), Assurance Engagements Other Than Audits or Reviews of Historical Financial Information, issued by the International Auditing and Assurance Standards Board (IAASB). Our responsibilities under this standard are further described in the "Our responsibilities" section of our report.

We have complied with the independence and other ethical requirements of the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA).

Our firm applies International Standard on Quality Management (ISQM) 1, Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements, issued by the IAASB. This standard requires the firm to design, implement and operate a system of quality management, including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion.

Restriction on use

Our report should not be regarded as suitable to be used or relied on by any party to acquire rights against us other than the Board of Directors and the Finance Department and ESG Office of Banamex for any purpose or in any other context. Any party other than the Board of Directors and the Finance Department and ESG Office of Banamex, who obtains access to our report or a copy thereof and chooses to rely on our report (or any party thereof) will do so at its own risk. To the extent permitted by law, we do not accept or assume any responsibility and disclaim any liability to any party other than Banamex for our work, for this independent limited assurance report, or for the conclusions we have reached.

Responsibilities for the *key sustainability performance indicators*

The Finance Department and ESG Office are responsible for:

- designing, implementing and maintaining internal control relevant to the preparation of the key sustainability performance indicators such that they are free from material misstatement, whether due to fraud or error.
- selecting or developing suitable criteria for preparing the key sustainability performance indicators and appropriately referring to or describing the criteria used
- preparing and properly calculating the key sustainability performance indicators in accordance with the Criteria.
- making judgments and estimates that are reasonable in the circumstances.
- ensure that the persons involved in the preparation and submission of the report are appropriately trained and their information systems are properly updated; and
- guarantee the veracity of the information made available to us and related to the parameters included in the conclusion of this report.

Likewise, Banamex's Management is responsible for preventing and detecting fraud.

Our responsibilities

We are responsible for:

- planning and performing the engagement to obtain limited assurance about whether the key sustainability performance indicators are free from material misstatement, whether due to fraud or error.
- forming an independent conclusion, based on the procedures we have performed and the evidence we have obtained; and
- reporting our conclusion to the Board of Directors of Banamex.

Summary of the work we performed as the basis for our conclusion

We exercised professional judgment and maintained professional skepticism throughout the engagement. We designed and performed our procedures to obtain evidence about the key sustainability Performance Indicators that is sufficient and appropriate to provide a basis for our conclusion. Our procedures selected depended on our understanding of the key sustainability performance indicators and other engagement circumstances, and our consideration of areas where material misstatements are likely to arise. In carrying out our engagement, the procedures we performed primarily consisted of:

- inquiries to management to understand the methodologies and data used in the preparation of the key sustainability performance indicators;
- inspection of a selection of supporting documentation;
- analytical procedures;
- recalculations of key sustainability performance indicators on the applicable Criteria;
- evaluation of the overall presentation of the key sustainability performance indicators to determine whether it is consistent with the applicable Criteria and whether it is consistent with our overall knowledge and experience with the Company.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

KPMG Cardenas Dosal, S.C.

Alejandro Muñoz Mayen
Director

Mexico City, April 09 2026

Annex A

The key sustainability performance indicators' subject of our limited assurance engagement are the following.
