About Our Report

THE FUTURE OF BANKING

As we continue to adapt to the changing landscape of banking, our customers' needs, perspectives, and desires, drive us to re-imagine how we best serve them.

In this connection, we continue to re-engineer our operations to facilitate an enhanced experience for all our stakeholders, both internal and external.

Through our digital transformation roadmap, we are introducing new technological tools that enable us to offer business solutions, for example our Group Digital Onboarding platform, that address our customers' unique needs.

With these new channels as well as the work being done to enhance the in-branch experience, we are confident in our ability to deliver quick, convenient, digital-first banking services to our customers, wherever they are in the world.

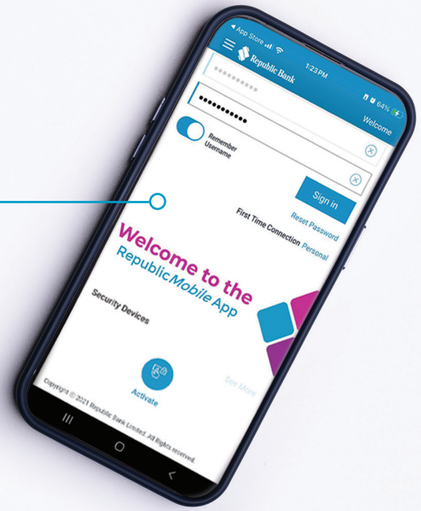
Security is key

As technology advances, so does our commitment to protection. Through advanced encryption, we safeguard every transaction and connection—giving customers the confidence and control that define secure, modern banking.

Staying one step ahead

Through Republic*Online*, we're helping customers stay alert and secure in an ever-changing digital world. Real-time updates, smarter alerts, and built-in safeguards protect every transaction—empowering users to outsmart cyber threats and bank with confidence.



Wherever you are

From home to across the globe, your bank is always within reach. Powered by world-class technology and global security systems, we protect every transaction—delivering the confidence, connection, and peace of mind that come with truly borderless banking.

Protecting what connects us

Cybersecurity is a shared commitment that connects our people, systems, and customers across every market. By promoting awareness and safe information practices, we're helping customers outsmart threats before they arise.

About Us

Republic Bank (Guyana) Limited is one of Guyana's largest and longest operating financial institutions, celebrating a history of service to the people of the nation for more than 187 years. As a comprehensive bank, Republic Bank (Guyana) Limited provides its clients customised, efficient, and competitively priced financial products and services across a network that spans 12 branches and 52 Automated Teller Machines (ATMs). In addition to the suite of services already provided, the Bank has placed significant attention on growing its lending portfolio, with particular emphasis on small and medium-sized enterprises. It has also strengthened its focus on corporate social investment driven by a long-ingrained philosophy of sustainable development in Guyana.

Our Enablers

- An improved execution mechanism featuring an enhanced operating model and a new strategic transformation office.
- A culture of innovation, collaboration and accountability, with a focus on talent management and the prioritisation of our staff's well-being.
- Consolidation of our technological infrastructure to manage costs, reduce redundancy, boost efficiency and enhance security.

Our Key Stakeholders

EMPLOYEES
CUSTOMERS

the ease of **innovation**

Innovation continues to shape how our customers connect and grow with us. Republic*Onboard* stands at the heart of this transformation—our fully digital platform makes opening and managing accounts simpler, faster, and more secure. Across the region, it's redefining convenience and setting a new standard for accessible, technology-driven banking experiences built around our customers' lives.

Notice of Meeting

NOTICE is hereby given that the forty-first Annual General Meeting of Republic Bank (Guyana) Limited will be held at the Guyana Marriott Hotel located at Block Alpha Battery Road, Kingston, Georgetown, on Monday, December 8, 2025, at 15:00 hours (3:00 p.m.) for the following purposes:

1. To receive the Report of the Directors and the Auditors and to approve the Audited Accounts for the year ended September 30, 2025.

2. To re-elect three Directors to fill offices vacated by those retiring from the Board by rotation in accordance with the By-laws namely; Nigel M. Baptiste, Natalia Seepersaud and Parasram Salickram.

3. To elect Lekhnaraine Shivraj who was appointed to fill a casual vacancy as a Director in accordance with the By-laws.

4. To elect Toussant Boyce who was appointed to fill a casual vacancy as a Director in accordance with the By-laws.

5. To reappoint the Auditors, EY Accountants.

And the following special business namely:

6. To consider and if thought fit, pass resolutions relating to:
   a. Dividends;
   b. Directors' service agreement providing for their remuneration; and
   c. Remuneration of the auditors.

7. To consider any other business that may be conducted at an Annual General Meeting.

By order of the Board,

CHRISTINE A. MCGOWAN
CORPORATE SECRETARY

October 27, 2025

Registered Office

155-156 New Market Street
North Cummingsburg
Georgetown, Guyana

Notes

- Only stockholders may attend.
- Any member entitled to attend and to vote is entitled to appoint a proxy to attend and vote instead of him/her.
- A proxy need not be a member of the Company. The instrument appointing a proxy must bear a G$10 revenue stamp and be deposited at the Registered Office of the Company not less than 48 hours before the time for holding the meeting.
- Any Corporation which is a member of the Company may, by resolution of its Directors or other governing body, authorise such person as it thinks fit to act as its representative at the meeting (By-law 86).

Directors' Report

The Directors have pleasure in submitting their Report and Audited Financial Statements for the year ended September 30, 2025.

Principal activities

The Bank provides a comprehensive range of commercial banking services at 12 locations throughout Guyana.

Financial results

(in thousands of Guyana Dollars)

	2025	2024
Net income after taxation	**8,370,793**	7,262,484
Interim dividend paid	**900,000**	726,000
Retained earnings	**7,470,793**	6,536,484
Final dividend proposed	**2,925,000**	2,550,000

Dividends

An interim dividend of $3.00 per stock unit ($900 million) was paid during the year and a final dividend of $9.75 per stock unit ($2,925 million) for the year ended September 30, 2025, is recommended. This, if approved, will bring the total payout for the year to $3,825 million.

Capital and reserves

Capital and reserves other than retained earnings totaled $1,954.9 million as shown in the Statement of changes in equity.

Retained earnings at September 30, 2025 is $40,383.4 million (2024: $35,618.8 million) after a transfer of $181.4 million from the General Banking Risk Reserve and $137.3 million from other reserves, $3,450 million paid out as dividends (final 2024: $2,550 million, interim 2025: $900 million), and $8,370.8 million transferred from the Statement of Income for 2025.

Donations

In addition to the Bank's Power to Make A Difference investment initiatives (see pages 72 to 73), general donations to charitable or public causes for the year were $6.9 million (2024: $7.1 million), emphasising the Bank's strong social investment policy.

Substantial stockholding (units of stock)

A substantial stockholder for the purposes of the Securities Industry Act Cap. 73:04 is one who controls five percent or more of the voting power at a General Meeting. The following are the substantial stockholders of the Bank:

Directors' Report

	Number of stock units 2025	% held	Number of stock units 2024	% held
Republic Financial Holdings Limited	**152,898,395**	**50.97**	152,898,395	50.97
Demerara Mutual Life Assurance Society Limited	**16,306,080**	**5.44**	16,306,080	5.44
Guyana and Trinidad Mutual Fire and Life Group of Companies	**15,798,760**	**5.27**	15,798,760	5.27
Trust Company (Guyana) Limited	**20,312,079**	**6.77**	20,654,129	6.89
Hand-in-Hand Mutual Fire & Life Group of Companies	**19,305,322**	**6.44**	19,852,495	6.62

Directors

In accordance with the Bank's By-laws, Nigel M. Baptiste, Natalia Seepersaud and Parasram Salickram retire from the Board by rotation and being eligible, offer themselves for re-election.

Auditors

EY Accountants have informed the Bank of their willingness to continue in office as auditors. A resolution proposing their re-appointment and authorising the Directors to fix their remuneration will be submitted to the Annual General Meeting.

Contribution of each activity to operating profit

'Banking operations' is considered as one single business operation which includes lending, investments, foreign exchange trading and deposit taking. The contribution or cost from these activities to operating profit is disclosed in the Statement of income.

Geographic analysis of turnover and contribution to results

The Bank operates only in Guyana, but several investments are held overseas for which income of $1,034.5 million (2024: $675.5 million) was earned during the year. Please refer to Note 24 of the financial statements for further information.

Interest of Directors and Chief Executive and their associates

Of these categories only the following persons held stocks in the company, all of which were held beneficially:

Directors' service contracts

There are no service contracts with the Directors proposed for election at the forthcoming Annual General Meeting, or with any other Directors, which are not determinable within one year without payment of compensation.

Contracts with Directors

Other than normal banking and employment contracts, there were no contracts between the Bank and its Directors or in which the Directors were materially interested.

Contract of significance with Stockholder or its subsidiary

The Bank expended the sum of $219.5 million (2024: $196.6 million) under a Technical Services Agreement with Republic Bank Limited for the provision of management, credit analysis, internal audit and other services. Technical Service fees are determined with reference to the Bank's net interest and other income.

empowering and **excelling**

We’re redefining progress through tech ingenuity. With our new digital-first card experience, customers can activate and use their cards instantly—no waiting, just seamless control. Built on enhanced security and forward-thinking design, this milestone places Republic Bank among the region’s digital leaders, setting new standards for convenience and confidence in modern banking.

Chairman's Review

NIGEL M. BAPTISTE
Group President and CEO

Building value through vision and leadership

Introduction

Fellow Directors and stockholders, I'm pleased to report on the annual performance of Republic Bank (Guyana) Limited for the fiscal year ended September 30, 2025. Throughout the year, the Bank continued building on its strategic plan enabled by our ongoing digital transformation. For the year the Bank has delivered a strong performance driven by growth across all our business segments – retail, mortgages, SME, commercial and corporate sectors.

Profit after tax totalled $8,370.8 million, which represents an increase of $1,108.3 million, or 15.26 percent compared to the 2024 profit of $7,262.5 recorded. Earnings per stock unit amounted to $27.90, an increase from $24.21 in 2024. Your Directors have therefore recommended a final dividend of $9.75 (per stock unit), which, if approved at the Annual General Meeting, will bring the total dividend for the year to $3,825 million (2024: $3,276 million).

Chairman's economic review

The global economy continues to demonstrate resilience amidst challenges posed by heightened trade tensions, elevated policy uncertainties and increased geopolitical risk. Recent increased tariffs present significant challenges, including increased production cost, disruption to global supply chains, and intensified financial market volatility. Global growth for 2025 is estimated at 2.8 percent, down from 3.3 percent in 2024. The pace of global growth remains below the long-term average of 3.8 percent recorded between 2000 and 2019. Meanwhile, global headline inflation is projected to decline from an annual average of 5.7 percent in 2024 to 4.3 percent in 2025. Advanced economies are expected to return to their inflation targets quicker than emerging markets and developing economies.

8.37 NET PROFIT ($B)

9.75 FINAL DIVIDEND ($)

27.90 EARNINGS PER STOCK UNIT ($)

Guyana's economic transformation continues to advance strongly while broadening in scale. Rapidly expanding oil production, strong non-oil output and substantial public infrastructure investment supported the highest real GDP growth rate in the world, averaging 47 percent per year since 2022.

Latin America and the Caribbean achieved notable progress in recent years. Growth rates have returned to long-term averages, inflation largely contained, fiscal consolidation efforts are underway, and unemployment levels have reached historic lows. The ongoing geopolitical realignment of trade and investment flows presents a strategic opportunity for countries in the region to benefit from nearshoring and deeper regional integration. Despite these gains, persistent challenges such as low investment levels, elevated public debt and an increasingly complex external environment continue to hinder the region's long-term development prospects. According to the World Bank's latest economic outlook, the regional economy is projected to grow by 2.1 percent in 2025 and 2.4 percent in 2026 making it the slowest-growing region globally.

Guyana's economic transformation continues to advance strongly while broadening in scale. Rapidly expanding oil production, strong non-oil output and substantial public infrastructure investment supported the highest real Gross Domestic Product (GDP) growth rate in the world, averaging 47 percent per year since 2022. In 2024, real GDP grew by 43.6 percent while real non-oil GDP expanded by 13.1 percent. Growth in real GDP was attributed to higher output from the oil and gas sector as well as major non-oil sectors. Inflation reached 2.9 percent by end of 2024, from 2 percent at end of 2023, largely driven by higher food prices.

As at March 2025, oil production rose by 1.8 percent, reaching 56.8 million barrels, up from 56 million barrels a year earlier. This increase was primarily driven by the strong performance of the *Prosperity* FPSO vessel, which recorded an 11.5 percent year-on-year increase in crude oil output.

The agriculture sector showed mixed performance compared to March 2024 with sugar production rising by 53.5 percent to 8,290 metric tons while rice output declined by 10.3 percent to 172,450 metric tons, impacted by adverse weather and capacity constraints. The mining and quarrying sector recorded overall growth, with increased output in bauxite, gold, crushed stone, and manganese compared to March 2024. Bauxite production rose significantly to 941,200 tonnes, while gold declarations increased by 12.8 percent.

Construction activities continue to accelerate supported by increased public investment in transformative infrastructure programs and robust private sector participation in commercial and residential developments. As a result, the construction sector is expected to maintain its strong growth trajectory, with an estimated expansion of 24.8 percent in 2025. The services sector also demonstrated improved performance, with notable growth in professional, scientific and technical services, financial and insurance activities as well as accommodation and food services. The latter was supported by increased access to private sector credit, which recorded year-on-year growth of 19.2 percent as of March 2025. Overall, the services sector is projected to expand by 8 percent by the end of 2025.

The Urban Consumer Price Index (CPI) declined slightly by 0.2 percent at the end of the first quarter of 2025, largely due to a 1.2 percent decrease in food prices.

Non-performing loans (NPLs) as a share of total loans were 2.2 percent as at March 2025, an improvement compared with the corresponding period in 2024. The foregoing change mainly resulted from a 17 percent increase in total loans with minimal increase in NPLs.

At the end of the first quarter of 2025, Guyana's balance of payments recorded a deficit of US$222.9 million compared to a surplus of US$12.2 million during the same period in 2024. This shift was driven by a higher capital account deficit although the current account remained in surplus. The capital account shortfall was due to outflows to the Natural Resource Fund and cost recovery by the oil and gas sector, while the current account surplus was mainly supported by reduced payments for services.

Guyana's Net International Investment Position (NIIP) was estimated at US$2,476.4 million (March 2025) representing an increase of US$1,534.6 million from December 2024.

Chairman's Review

Foreign exchange market transactions increased by 12.1 percent or US$580.6 million to US$5,396.3 million driven mainly by increased activity among bank Cambios. The Bank of Guyana's mid-rate held steady at G$208.50 as at March 2025.

Our focus on digital innovation and operational efficiency remains a strategic priority, with steady progress being made on key initiatives designed to enhance the customer experience and optimise cost structures.

Group developments

As at June 30, 2025, total assets stood at US$128,963 billion, an increase of US$10,603 million or 8.22 percent over total assets when compared to June 2024. The Group's solid performance highlights its resilience, effective risk management, and strong core banking results driven by growth in net interest income and improved customer engagement.

Our focus on digital innovation and operational efficiency remains a strategic priority, with steady progress being made on key initiatives designed to enhance the customer experience and optimise cost structures. In the third quarter, the Group advanced its strategic agenda by increasing its shareholding in Cayman National Corporation Ltd. in the Cayman Islands to 86.91 percent.

The Group will continue prioritising the delivery of exceptional customer experiences, operational efficiency, employee engagement, risk management and as we advance our transformation to a more agile and technologically advanced organisation.

We remain firmly committed to sustainable development, guided by the principles of environmental stewardship, social responsibility, and sound corporate governance.

Future outlook

Guyana's economy is projected to expand by 10.6 percent in real GDP, supported by moderate growth in the oil and gas industry and other related services. This growth will be largely driven by peak oil production from the three existing FPSOs and the addition of *One Guyana* FPSO. Production is expected to reach 786,000 barrels per day by the fourth quarter of 2025, with an average production of 674,000 barrels per day throughout the year, contributing to the sector's projected growth of 9.5 percent in 2025.

Non-oil GDP growth is projected at 13.8 percent, driven primarily by continued expansion in the agriculture, forestry, and fishing sectors, and sustained growth in construction, manufacturing, and services. Additionally, the gold and bauxite mining industries are expected to contribute positively to the performance of the non-oil economy. Inflation is forecast at 2.8 percent, supported by continued implementation of prudent monetary policy aimed at containing inflationary pressures and maintaining exchange rate stability.

As 2026 approaches, Guyana's economic outlook remains robust, supported by strong growth prospects across key sectors. Republic Bank (Guyana) Limited remains well-positioned to navigate future developments with resilience and agility in the evolving economic and financial landscape. We continue building on a strong foundation, leveraging strategic investments in digital transformation, operational efficiency, and human capital development to enhance service delivery and long-term value creation.

Acknowledgements

Appreciation is extended to my fellow Directors for their support throughout the fiscal. I take this opportunity to thank former Director, Mrs. Yolande Foo, who retired during the fiscal for her sterling service and welcome Mr. Lekhnaraine Shivraj to the Board. Congratulations and best wishes are extended to Dr. Toussant Boyce on his appointment as Managing Director of the Bank, and I thank former Managing Director, Mr. Stephen Grell and interim Managing Director, Mr. David Robinson for their leadership.

On behalf of the Board of Directors, gratitude is also extended to the management and staff for their hard work and commitment. I also thank our stockholders and customers for their continued confidence and loyalty to the organisation.

NIGEL M. BAPTISTE
CHAIRMAN

Exploring digital transformation and advancing technology

Technology is shaping a new era of connection, creativity, and possibility. The Republic Bank Regional Technology Summit brought together leaders and visionaries to explore how digital advancement can transform business and strengthen communities. Through collaboration and shared insight, we're charting a future where innovation drives sustainable growth—not just for the Bank, but for the region we proudly call home.

Managing Director's Discussion and Analysis

DAVID R. ROBINSON
Managing Director

Driving sustainable growth through innovation and service

I'm pleased to report that the Bank achieved another outstanding year's performance, recording growth in its asset base by $75.2 billion, or 21.43 percent to $425.8 billion. The Bank's profitability increased to $8,370.8 million a 15.26 percent increase over the last fiscal. This strong growth is attributable to determined focus on our strategic goals and digital transformation. Return on assets moved from 2.20 percent to 2.09 percent, Return on equity increased from 20.07 percent to 20.70 percent, Earnings per stock unit increased from $24.21 to $27.90 and our Efficiency Ratio moved from 39.68 percent to 38.64 percent.

We continue demonstrating our commitment to delivering excellence, driving innovation, and creating sustainable value for our customers, stockholders, and communities. We remain focused on strengthening stakeholder engagement, navigating change, capitalising on new opportunities, and building a resilient future amid evolving market conditions enabled by our digital transformation strategy.

We remain focused on strengthening stakeholder engagement, navigating change, capitalising on new opportunities, and building a resilient future amid evolving market conditions enabled by our digital transformation strategy.

425.8 TOTAL ASSETS ($B)

2.09 RETURN ON ASSETS (%)

20.70 RETURN ON EQUITY (%)

Customer service

In keeping with our thrust to provide personalised, efficient and competitively priced financial products and services, the bank continues working toward ultimate customer satisfaction.

Mindful of the five key pillars of customer service: building trust, demonstrating competence, offering varied service channels, providing empathetic service, and ensuring satisfaction, emphasis is continually placed on varied staff training at all levels via on-the-job, classroom and online programmes.

Ongoing tracking and monitoring of our service delivery through customer feedback provides insight about what we are doing well, and areas requiring improvement, which enable us to seek avenues for enhancement.

We continue promoting our electronic banking products that afford quick and convenient 24-hour access, from anywhere, and minimising the need for branch visits. Ongoing upgrade of our Automated Teller Machines (ATMs) and expansion of locations aim to further enhance customer experience. During the fiscal, we introduced a digital onboarding platform via our website that facilitates new and existing customers desirous of establishing deposit accounts.

We look toward a future of digital transformation and enriched customer experiences, thereby building stronger and long-lasting relationships.

Human Resources

Cognisant that human centric leadership is essential for navigating an evolving environment, management and supervisory staff participated in customised leadership training programmes. Training was also conducted to develop competency and interpersonal skills in the areas of design thinking, business process reengineering, customer service, business communication, performance management, banking applications, finance, credit, marketing, accounting, occupational health and safety and first aid.

Aligned with the Bank's digitisation efforts and thrust to engage newer generations, our online learning portal enables employees to build capacity through a range of e-learning courses.

As the Bank evolves in response to digital transformation and shifting labour market conditions, we remain committed to cultivating a culture of continuous learning and development — empowering our workforce to adapt to new dynamics and contribute meaningfully to the Bank's strategic objectives.

As part of its commitment to corporate social responsibility, the Bank executed the 17th Republic Bank Youth Link Apprenticeship Programme, following which twenty-five high school graduates successfully completed their training.

Members of staff also engaged in various celebratory team-building exercises in recognition of their efforts that contributed to the Republic Financial Holdings Limited's (RFHL) 2024 milestone performance. Staff also participated in other events, including our Family Fun Day and annual Interfaith Service and breakfast.

Information Technology

With the demand for change in the worlds of banking and technology, exponential growth in the shifting landscape resulting from the oil and gas sector, Republic Bank (Guyana) Limited continues its focus on advanced technology to ensure optimum performance of our primary network infrastructure, and computer and ancillary systems.

As earlier mentioned, emphasis continues to be placed on promoting our digital and electronic services, which have seen increased uptake, particularly RepublicOnline and RepublicMobile, indicative of customers' satisfaction with the digital experience.

Upgrade of our Automated Teller Machine fleet commenced during the fiscal; is 50 percent complete, and aims at improved efficiency and uptime, as we continue expanding this service in new locations.

As the Bank evolves in response to digital transformation and shifting labour market conditions, we remain committed to cultivating a culture of continuous learning and development — empowering our workforce to adapt to new dynamics and contribute meaningfully to the Bank's strategic objectives.

Managing Director's Discussion and Analysis

Increased use of electronic platforms for funds transfer and management via Electronic Funds Transfer (EFT) and Real Time Gross Settlement (RTGS) continue benefiting our commercial and corporate customers.

Given ever-present cybersecurity threats, we remain vigilant and are actively working towards mitigation. Key achievements were Payment Card Industry Data Security Standards (PCI DSS) certification and introduction of multi-factor authentication for customer facing and internal applications.

To ensure our employees are equipped with the necessary tools, planned upgrades for computers and other peripheral hardware that complement our business are ongoing.

Looking ahead, we are committed to deriving maximum benefit from the Bank's investment in technology and implementing new ways for its effective application to provide reliable, convenient and secure banking for customers.

Administration and premises

In addition to routine maintenance, the Treasury and Corporate Business sections of our Camp Street branch were expanded, and subject to the requisite approvals, construction of a new branch in Berbice will commence within the year, to facilitate relocation of the existing New Amsterdam branch's operations.

Empowering communities

The Bank continues strengthening its partnerships with governmental and non-governmental organisations in support of key sustainable development goals through its Power to Make A Difference social investment initiative.

Youth development and sport remained a key focus for this fiscal with the launch of several new initiatives designed to develop talent and build life skills. These included the inaugural national Republic Bank/One Guyana National B Division Volleyball Tournament which saw participation by 858 athletes, and an EDGE Series three-by-three basketball tournament which afforded players exposure and further development of their skills. We also partnered with the Vurlon Mills Football Academy hosting an all-girls football camp for ages 8-16, combining football training with workshops on leadership, hygiene, nutrition and life skills sessions on

Looking ahead, we are committed to deriving maximum benefit from the Bank's investment in technology and implementing new ways for its effective application to provide reliable, convenient and secure banking for customers.

communication, decision-making and time management. At the grassroots level, the Republic Bank Under-18 School Football League gave young athletes a platform to showcase their abilities. Our youth cricket initiative, Republic Bank Five for Fun also remains active, engaging boys and girls in 75 primary schools across Guyana. Additionally, we continue as Title Sponsor for the Caribbean Premier League (CPL), further solidifying our support for cricket in Guyana and across the region.

The introduction of Restore A Sense of I Can Tech Clubs at secondary schools across the country empowered students to gain practical skills in PC repair, video editing, web and app development and cybersecurity. The Bank continued its investment in financial literacy with the use of artificial intelligence to train over 900 secondary school students through the WizdomCRM Virtual Stock Market Game. This initiative enhanced students' Mathematics, Economics and personal finance knowledge, with the Bank sponsoring cash prizes for the top four winners of Cycle 7 of the game in Guyana.

At the tertiary level, we continued support for our University of Guyana scholarship awardees. Current recipient Lakeisha Bobb-Blackman continues to pursue a Bachelor of Science degree in Finance while Nicholas Sagadaya recently completed his Bachelor of Science degree in Biology. This four-year scholarship programme is strategically aligned with Guyana's developmental needs, focused on areas such as Agriculture, Forestry. Earth and Environmental Sciences, Technology, Natural Sciences, Finance, Entrepreneurship, and Supply Chain Management.

The Bank also renewed its commitment to youth entrepreneurship, supporting a programme that empowers individuals aged 17-28. This year, 30 young entrepreneurs graduated from the programme with 20 receiving grants to launch or grow their businesses.

Our support for the arts continued through our collaboration with the Ministry of Culture Youth and Sport, hosting the 17th Republic Bank Panorama Steel Band Competition and 14th Right Start Pan Minors Music Literacy Programme. These initiatives provide avenues for sustaining the national steelpan artform and preserving Guyana's cultural heritage.

In partnership with Women Across Differences (WAD), we proudly marked ten years of support for the Comprehensive Empowerment Programme for Adolescent Mothers. This initiative equips young women with knowledge and skills regarding sexual and reproductive health, family planning, vocational training, and personal development, enabling them to manage their future with confidence. We also expanded our social impact by supporting the autistic community through our partnership with Sameir Uniquely ME Inc., an organisation committed to helping children with autism thrive.

Our alliance with the Mayor and Councillors of the City of Georgetown entered its twenty-first year of facilitating maintenance of the Promenade Gardens which provides a green space for citizens.

Our employees actively championed education and youth empowerment through volunteerism initiatives. Interactive sessions were held with students, and they distributed school-ready hampers to ensure the children were ready for the new term. For the 17th consecutive year, they also partnered with Rose Hall Town Youth and Sports Club hosting a summer camp that supports students transitioning to secondary school, combining academic support with essential life skills training and open discussions about social issues.

Looking ahead, the Bank remains committed to building stronger, more resilient communities, through continued focus on youth and gender empowerment, education, sport development, entrepreneurship, cultural heritage preservation, mental health awareness, and environmental conservation. At Republic Bank, we are more than a financial institution, we are partners in progress dedicated to supporting communities and contributing to a brighter, more sustainable future.

Investing in the future through our Youth Link Apprenticeship Programme

The future of banking begins with our youth. Through the Youth Link Apprenticeship Programme, Republic Bank continues to nurture the next generation of leaders—equipping high school graduates with hands-on experience, career-ready skills, and a passion for community service. It's more than training; it's an investment in people and the future we're building together.

Managing Director's Discussion and Analysis

Regulatory compliance

Guyana remains committed to ensuring a strong Anti-money Laundering, Countering Terrorist Financing and Countering the Proliferation Financing framework is maintained and to this end, stakeholders are continuously engaged. There is already an indication that preparation is being made for the third cycle of the National Risk Assessment which should position Guyana well for the fifth round of Mutual Evaluation.

Republic Bank remains compliant with current regulatory requirements and regularly updates its policies and procedures. Following a recent review, the Bank updated its Anti-money Laundering, Countering Terrorist Financing and Countering the Proliferation Financing Policy and Sanctions Policy. Importance is also placed on mitigating the threat posed by Artificial Intelligence (AI) through the cloning of persons' identities to facilitate the compromise of financial information. To this end, the Bank is committed to educating stakeholders, as greater staff and customer awareness is viewed as a primary method of preventing theft and consequential loss.

We present below a discussion and analysis of the financial position and performance of the Bank for the year ended September 30, 2025, to be read in conjunction with the Directors' report and audited financial statements presented on pages 25 to 27 and pages 85 to 90 respectively.

These statements are published in Guyana dollars. Foreign amounts have been converted to Guyana dollars at the prevailing mid-rate on September 30, for each financial year. The following are the mid-rates for the major currencies as at September 30, 2025:

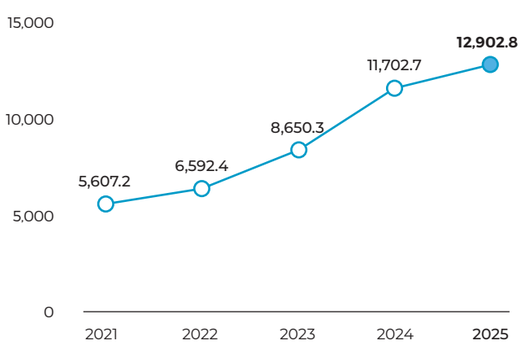
	2025	2024
United States dollars	**213.25**	213.25
Pounds Sterling	**285.00**	273.25
Canadian dollars	**159.00**	170.75
Euro	**245.00**	240.75

Statement of income review

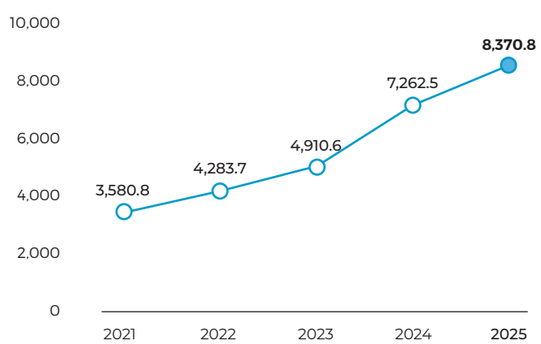
Financial summary

After tax profit of $8,370.8 million represents an increase in profitability of $1,108.3 million or 15.26 percent compared with 2024. This increase in profitability resulted primarily from the increase in Interest income (loans and advances and Treasury Bills). Corporation Tax paid amounted to $5,160.9 million compared with $3,879.2 million in 2024. (See under-mentioned graph.)

Profit before tax ($M)

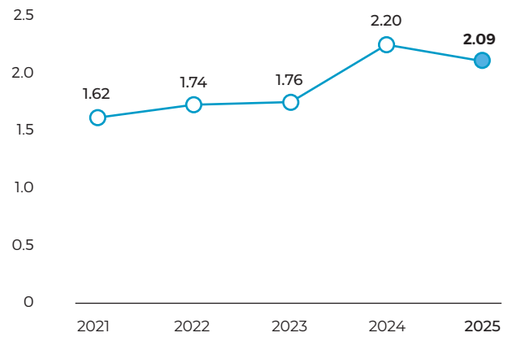


Profit after tax ($M)

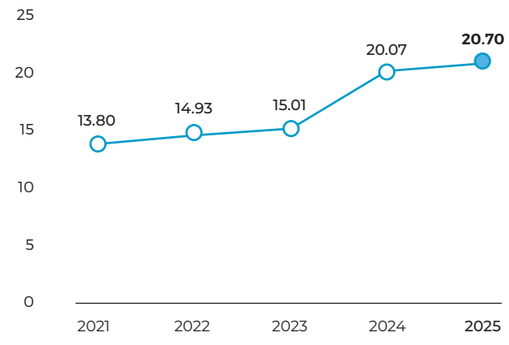


The Bank's Return on average assets (2.09 percent) decreased year on year, and its return on average stockholders' equity increased (20.70 percent). Earnings per stock unit moved from $24.21 in 2024 to $27.90 in 2025. (See graphs below.)

Return on average assets (%)



Return on average outstanding equity (%)



Net interest and Other income

Net interest and Other income grew by $2,293.1 million or 11.67 percent to $21,950.2 million in 2025 compared to the $19,657.1 million generated in 2024, which is attributed mainly to the increase in interest on loans and advances, Treasury Bills, commissions and fees income.

Net interest income increased by $2,321.3 million or 17.83 percent to $15,337.3 million and is attributed primarily to an increase in income from loans and advances, Treasury Bills and foreign investments.

Net interest margin

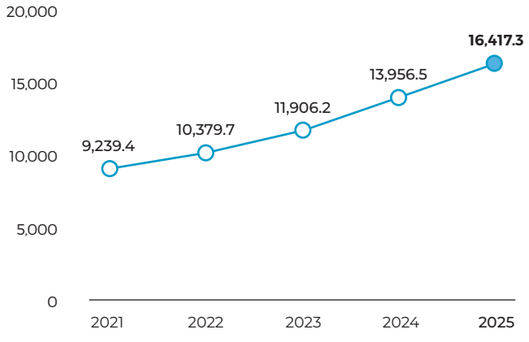
	2025 %	2024 %
Net interest income/Total average interest earning assets	**4.61**	4.72
Net interest income/Total average assets	**3.83**	3.94

Refer to Statement of Financial Position and Note 17.

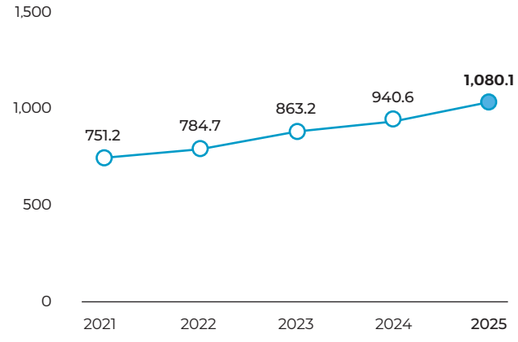
Republic Bank remains compliant with current regulatory requirements and regularly updates its policies and procedures. Importance is also placed on mitigating the threat posed by Artificial Intelligence (AI) through the cloning of persons' identities to facilitate the compromise of financial information. To this end, the Bank is committed to educating stakeholders, as greater staff and customer awareness is viewed as a primary method of preventing theft and consequential loss.

Managing Director's Discussion and Analysis

Interest income ($M)



Interest expense ($M)



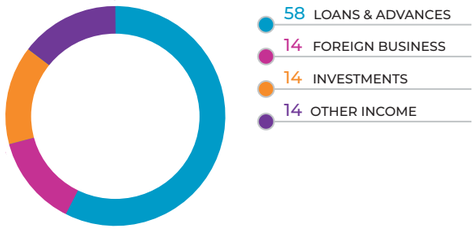
There were no unusual non-operational items.

The ratio of the Bank's average interest earning assets to average customer deposits, decreased to 95.23 percent, from 97.18 percent in 2024. This is reflective of the Bank's policy of managing customers' deposits in a challenging environment where investments and lending opportunities are relatively competitive. At September 30, 2025, 46.17 percent of the Bank's interest earning assets consisted of Treasury Bills.

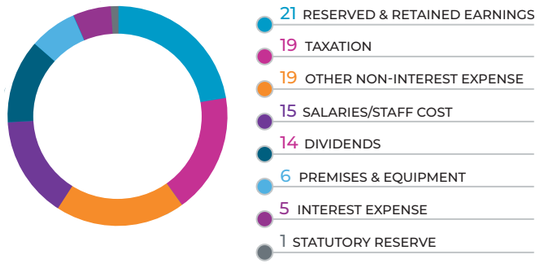
Interest paid on deposits for 2025 at $1,080.1 million, exceeded that of 2024 ($940.6 million), as the Bank continued to manage its assets and liabilities in an environment of inadequate investment opportunities. It is recognised, however, that customers simultaneously use a range of products and the Bank strives to ensure that rates (deposit and lending) are competitive with the rest of the industry and attractive to existing and potential customers.

Other income, which amounted to $6,612.9 million and contributed 28.71 percent to total income, was below the 2024 amount by $28.2 million, or 0.42 percent. Despite continued emphasis, foreign exchange trading resulted in exchange gains for 2025 of $3,356.7 million, which represented a decrease of $326.2 million or 8.86 percent over 2024. Exchange earnings continue to be the major contributor of Other income, contributing 50.76 percent (2024: 55.45 percent) of the total.

Sources of revenue (%)



Revenue distribution (%)



Non-interest expense

Non-interest expenditure, which comprises operating expenses and provision for Expected Credit Losses (ECLs), increased by $1,093.1 million or 13.74 percent over 2024, mainly as a result of staff cost which increased to $3,614.2 million and provision for ECLs, which moved to $566.5 million.

The Bank aggressively competes for the limited investment opportunities even as there is continuous growth in the liquidity of the country's financial houses, relative to those investments.

The Bank's productivity/efficiency ratio, which is Non-interest expenses to Net interest income and Other income, decreased to 38.64 percent from 39.68 percent in 2024.

In accordance with IFRS 9 – Financial Instruments, which replaces IAS 39, the Bank consistently reviews all loans and other debt financial assets not held at Fair Value Through Profit or Loss (FVPL), together with loan commitments and financial guarantee contracts and records an allowance for ECLs. The allowance is based on the ECLs associated with the probability of default in the next 12 months unless there has been a significant increase in credit risk since origination.

The financial statements include ECL provision made on its performing portfolio, of $604.3 million at September 30, 2025.

At September 30, 2025, specific provision on Non-Performing Loans (NPLs) decreased to $121.2 million. Overall in 2025, expenses related to ECL amounted to $566.5 million against an expense of $154.2 million in 2024. The Bank continues to strive to maintain a very prudent policy especially on its unsecured consumer lending portfolio. Recoveries on loans which were previously written-off amounted to $680.3 million in 2025 (2024: $654.2 million).

The Bank's ratio of non-performing to performing loans at September 30, 2025 stood at 0.64 percent, and its ratio of specific provision for loan losses to NPLs, at 10.76 percent.

Statement of financial position review

Cash and cash equivalents

Cash and cash equivalents, which include cash-on-hand, deposits held with correspondent banks, claims on other banks and balances in excess of the statutory deposit increased by $3.2 billion year on year. This increase was mainly due to the increase in our deposits held with correspondent banks, which increased by $2.9 billion and Surplus Funds with Bank of Guyana, which also increased by $0.3 million, over the same period.

Investment securities

Investment securities, including Government of Guyana Treasury Bills, increased by $37.5 billion or 23.34 percent, during the year. The increase arose mainly in the Bank's investment in Treasury Bills which moved from $138.4 billion in 2024 to $167.1 billion in 2025 or 20.75 percent. Other Investments also increased by $8.8 billion, or 39.36 percent, to $31.2 billion. The Bank aggressively competes for the limited investment opportunities even as there is continuous growth in the liquidity of the country's financial houses, relative to those investments.

198.3 INVESTMENTS ($B)

150.2 ADVANCES ($B)

Managing Director's Discussion and Analysis

Advances

Advances grew by $23.9 billion to $150.2 billion, an increase of 18.89 percent. The concentration by sector in the loans and advances portfolio, a function of the Bank's Credit Risk Management process, remained fairly constant during the year.

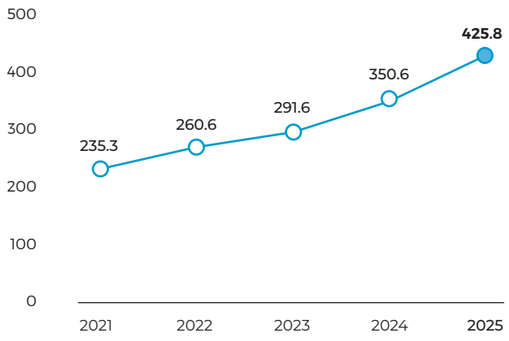
Significantly however, the Retail sub-sector recorded a 35.27 percent increase to $23.2 billion from $17.2 billion, while the Mortgages sub-sector, a 27.60 percent increase from $49.3 billion to $62.9 billion and the Demand Loans sub-sector, a 9.57 percent increase in value from $63.2 billion to $69.3 billion. The Bank remains poised to aggressively support the Government's planned home ownership thrust.

As a percentage of total assets, loans and advances accounted for 35.29 percent (2024: 36.04 percent).

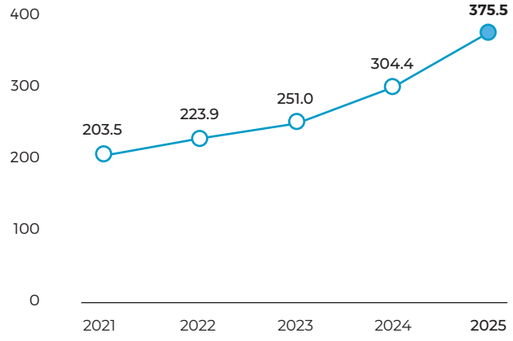
Total assets

The Bank's total assets of $425.8 billion represent an increase of $75.2 billion or 21.43 percent above 2024; attributed mainly to Treasury Bills and loans and advances. Over the past three years, net investment in loans and advances grew by $12.9 billion, $16.3 billion and $23.9 billion, respectively. In a challenging and competitive environment for sound economic projects, the Bank continues to seek and attract new and remunerative investments, even as it honours its obligation of securing depositors' funds. (See graph below.)

Total assets ($B)



Total deposits ($B)



Deposits

In 2025, the Bank's deposits increased by $71.1 billion or 23.36 percent, moving to $375.5 billion from $304.5 billion in 2024, as shown in the graph above. Our depositors can remain confident in the Bank's continued focus, as it provides quality products and services, at competitive rates. Our Demand Deposits portfolio increased by $47.4 billion or 22.78 percent, Savings Deposits by $22.8 billion or 25.98 percent, and our Fixed and Term Deposits by $827.7 million or 10.17 percent.

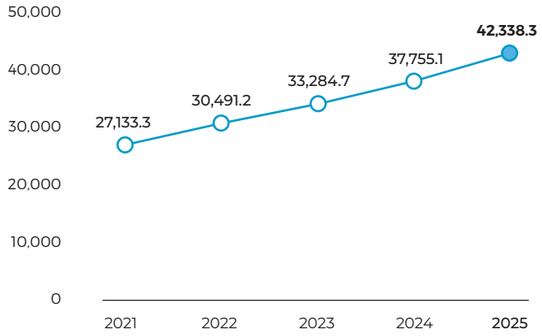
Capital structure and resources

The Bank's policy is to maintain capital adequacy, ensure capital growth and minimise capital impairment. The governing Financial Institutions Act Cap. 85:03 restricts a single or group borrower's loan to defined percentages of the Bank's capital base. From the after tax profits of $8,370.8 million, $3,825 million is being proposed as dividends and $4,545.8 million transferred from the Statement of Income to stockholders' equity. At September 30, 2025 the book value of stockholders' equity amounted to $42.3 billion.

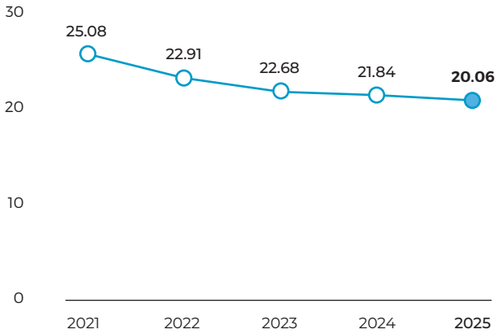
Total dividends paid and proposed for fiscal 2025 amount to $3,825 million and equates to a dividend payout ratio of 45.69 percent (2024: 45.11 percent).

There was an increase in the price at which the Bank's stock traded on the Guyana Stock Exchange with a spread of 22.09 percent between the highest price of $525 and lowest price of $430 with an average weighted price of $480 per stock unit. In terms of volume, most trades were done at a unit price of $460. Using the Market Weighted Average Price of $480 from the last trade date (September 29, 2025) for the Bank's stock, the price/earnings ratio decreased to 17.71 from 19.37 in 2024. The net asset value of one unit is $141.1 (2024: $125.9) which, with a price of $480 gives a price/book ratio of 3.40:1 (2024: 3.73:1).

Stockholders' equity ($M)



Capital adequacy (%)



Regulatory capital

Capital adequacy is monitored by the Bank on a quarterly basis and computed based on guidelines developed by the Basel Committee on Banking Regulations and Supervisory Practice (the Basel Committee), as implemented by the Bank of Guyana under the Financial Institutions Act Cap. 85:03.

The risk-based capital guidelines require a minimum ratio of capital to risk-weighted assets of 8 percent. The results for this year have further strengthened the Bank, with its capital base growing from $37.8 billion to $42.3 billion year-on-year. The capital adequacy ratio moved to 20.06 percent at September 30, 2025 from 21.84 percent at September 30, 2024. This decrease is attributable to an increase in total risk-weighted assets.

Risk management

Overview

Banking is about the management of risks. These are discussed extensively on pages 133 to 148 of this Annual Report.

In an increasingly complex and dynamic environment, characterised by evolving economic and regulatory conditions, the ability to effectively identify, assess, and address risks is crucial for ensuring business continuity and maintaining stakeholders' confidence. These include customers, shareholders, and regulators. Financial institutions face varied challenges, ranging from new regulations to increasing cyber threats. Robust risk management is therefore crucial to safeguard the Bank's financial stability and capitalise on growth opportunities in Guyana's economy and further afield.

Managing Director's Discussion and Analysis

Republic Bank (Guyana) Limited continues to focus on fostering a culture of continuous improvement, strategic foresight, and innovation, to navigate these complexities and maintain its competitive edge.

Within the Bank's enterprise risk management strategy, managing risk is a collaborative and cross-functional effort. The Enterprise Risk Management team works with the business units to ensure consist assessment and collation of risk information, which is shared with the Bank's Enterprise Risk Management Committee and Board of Directors.

The Bank's risk management activities, included within the Enterprise Risk Management framework, comprise improvement in its systems and processes. Over the last few years, the Bank implemented wide-ranging modifications intended to improve efficiency and strengthen the internal control environment. The Bank's Enterprise Risk department oversees and conducts training and supported by the Internal Audit function makes recommendations for enhanced internal controls. Where appropriate, risk is transferred by placement of adequate insurance coverage.

Equally important, the Bank has incorporated Environmental, Social and Governance (ESG) metrics in its risk management. This is not only about sustainability and avoiding negative outcomes but seizing opportunities to create value and drive innovation. Effectively managing ESG risks also positions the Bank to operate effectively in a rapidly changing environment.

Future outlook

Guyana's economy continues to experience significant growth and is expected to remain one of the fastest growing economies in the world. As at March 2025, Guyana produced a total of 19,432.5 million barrels of oil, earning revenue of US$375.4 million and an additional US$84.2 million in royalties. All major sectors in the non-oil economy also recorded commendable growth and are projected to maintain this positive trend toward the end of the year.

As the Guyanese economy continues rapid growth, Republic Bank is well positioned to capitalise on emerging opportunities, and notwithstanding challenges, remains confident in our strategy to navigate the evolving landscape. With a strong foundation, clear vision, and dedicated workforce, we are committed to driving sustainable growth, embracing innovation, and delivering long-term value for our stakeholders.

Acknowledgements

I extend sincere appreciation to our management and staff for their hard work and commitment which enabled achievement of these noteworthy results.

Appreciation is also extended to our customers, business partners, and stockholders for their ongoing confidence and support, and our Board of Directors for their guidance.

DAVID R. ROBINSON
MANAGING DIRECTOR

Employee excellence shines bright

Behind every achievement is the ingenuity of our people. The annual Employee Awards Ceremony celebrates those whose dedication and creativity drive progress—shaping the future of banking and powering Republic Bank's continued journey toward excellence.

smart access

By understanding your needs we have geared our digital touchpoints, including our new smart ATMs, to prioritise your individual requirements. We are ensuring that all our retail and commercial customers benefit from our expertise as we strategise to help them access the lifestyle they dream of through loans, tactical credit card use, leveraging technological services and sound investment of funds.

Fun, family and the Republic spirit

It was all smiles and energy at the family Fun Day as employees came together in friendly competition, laughter, and teamwork. Beyond the fun and colour, the day reflected the creativity, collaboration, and spirit that drive innovation within Republic Bank—proving that our greatest ideas begin where connection and camaraderie thrive.

limitless collaborations

We're unlocking the power of ideas. The Republic Bank Digital and Innovation Centre is where creativity meets technology, and collaboration fuels transformation. It's a space designed to inspire bold thinking, connect teams across the region, and turn imagination into impact. Together, we're creating a culture of continuous growth—where ideas spark progress and innovation shapes our future.

Statement of Corporate Governance Practices

Corporate Governance has been defined as the system by which companies are controlled or directed. This system, comprises policies, rules, practices and processes all of which need to be carefully designed and implemented to improve resilience in a company. Importantly, the development of sound corporate governance is driven by wider stakeholder interests and is not limited to protecting the interests of shareholders. Corporate governance principles have transformed the way companies are controlled and paved the way for enhanced accountability within companies. The end result is greater fairness, adequate oversight by independent parties and greater transparency.

For companies genuinely committed to corporate governance, ethical practices are incorporated into lines of business and systems are implemented to promote and encourage a culture focused on doing things the right way and improving profitability without compromising on core values. Another interesting development has been how it has impacted risk management and caused companies to take a more comprehensive approach to evaluating risks.

The Republic Financial Holdings Group has embraced corporate governance principles as a pillar of its business model. Consequently, Republic Bank (Guyana) Limited and its Board of Directors continue to demonstrate commitment to the highest standards of corporate governance through the various governance structures and strategies embraced. Additionally, Directors continue to explore emerging initiatives and international best practices with a view to further strengthening its corporate governance regime.

The Bank is guided by the *Recommendations for a Code of Corporate Governance* issued by the Guyana Securities Council, and Supervision Guideline No. 8 on Corporate Governance issued by the Bank of Guyana under the authority of the Financial Institutions Act Cap. 85:03. The Bank has adopted the recommendations contained in that Guideline. This statement is made pursuant to the abovementioned Supervision Guideline No. 8. In addition, the Bank is compliant with Supervision Guideline No. 10 on the Public Disclosure of Information.

The Board of Directors comprises ten directors including one executive director. The non-executive directors, six of whom are independent, comprise persons with experience in business, management, law and finance, and provide invaluable input at meetings through their personal values and standards arising from their varied and distinct professional experience. Together the Board members provide entrepreneurial leadership within a framework of prudent and effective controls. In keeping with the Bank's culture of broad disclosure the Executive Director ensures that all pertinent information on the Bank's operations is provided to members of the Board of Directors. Additionally, Directors may request additional information that they believe would enhance their ability to discharge their statutory duty. This allows the Board of Directors to make informed decisions and provide the necessary leadership to promote and protect the interests of all stakeholders.

In keeping with its mandate to lead the Bank, the Board directs the Bank along a path of greater profitability while taking appropriate steps to ensure that the Bank's sound financial position is not compromised and all applicable laws adhered to. Of critical importance to the Board of Directors is the responsibility to approve and review the Bank's Strategic Plan and within this context, to approve annual budgets, including capital expenditure. The Board retains the responsibility for reviewing and approving credit applications above a specified limit. Pursuant to the mandate to ensure that the interests of the various stakeholders are considered the Board of Directors meets, at a minimum, on a quarterly basis while the Executive Subcommittee of the Board, chaired by Mr. Roy E. Cheong, comprising eight Board members, meets for the remaining months.

In accordance with the Bank's By-laws, three Directors retire from the Board annually and may offer themselves for re-election at the Bank's Annual General Meeting.

There are established Board committees which play an important role in helping the Bank maintain the highest standards of Corporate Governance. Each Board Committee has Terms of Reference which clearly define its mandate. These Terms of Reference are reviewed and where necessary, updated as a means of ensuring that the mandate of the Committee remains relevant and supportive of the emerging needs of the Bank. A brief overview of the Board Committees is provided below.

Audit committee

The members of the Audit Committee are:

Mr. Roy E. Cheong, *Chairman*
Mr. Richard M. Lewis
Mr. P. Vic. Salickram
Mr. Lekhnaraine Shivraj
Mr. Richard I. Vasconcellos
Mr. John G. Carpenter, *Alternate Member*

The Audit Committee of the Board meets at least quarterly to review the Bank's system of internal control, financial reporting process, audit and examination process, and compliance with statutory and regulatory laws. When necessary, the Audit Committee is responsible for reviewing the independence, competence and qualifications of the External Auditors. The External Auditors have full and free access to, and meet, when necessary, with the Audit Committee to discuss their audit and findings as to the integrity of the Bank's financial and accounting reporting and the adequacy of the system of internal controls. The External Auditors receive notice of every meeting of the Audit Committee and may attend as of right. The head of the Bank's Internal Audit Department, reports directly to the Audit Committee. The Internal Audit Department conducts periodic examinations of all aspects of the Bank's operations to ensure that management's controls for the integrity and fairness of the financial statement and accounting systems are adequate and are complied with.

Compensation committee

The members of the Compensation Committee are:

Mr. Aldrin Ramgoolam, *Chairman*
Mr. Roy E. Cheong
Mr. Richard M. Lewis
Ms. Natalia Seepersaud
Mr. Lekhnaraine Shivraj, *Alternate Member*

This Committee, which meets at minimum once per year, is responsible for formalising the Bank's remuneration policy for staff.

Enterprise risk committee

The members of the Enterprise Risk Committee are:

Mr. John G. Carpenter, *Chairman*
Mr. Roy E. Cheong
Mr. Aldrin Ramgoolam
Ms. Natalia Seepersaud
Mr. Richard M. Lewis, *Alternate Member*

This committee, which meets quarterly, is responsible for reviewing policies and procedures and ensuring that all risks arising across the wide spectrum of the Bank's activities are identified and adequate systems have been implemented to mitigate those risks. The Enterprise Risk Committee is also responsible for overseeing the management of the Bank's Anti-Money Laundering and Countering the Financing of Terrorism Programme and ensuring that adequate systems and procedures are implemented to prevent and detect attempts to launder money and/or finance terrorism.

Governance and nomination committee

The members of the Governance and Nomination Committee are:

Mr. Aldrin Ramgoolam, *Chairman*
Mr. Richard M. Lewis
Mr. Lekhnaraine Shivraj
Mr. Richard I. Vasconcellos

This committee meets at least twice annually and is charged with ensuring the Bank's high standard of corporate governance is maintained. It is also responsible for ensuring the professional development of Directors and making recommendations to enhance performance of the Board by establishing formal and transparent process for selection of Directors.

The Board of Directors has approved an organisational structure for the Bank which ensures a reporting structure with prudent and effective controls. The Managing Director and Senior Management team are appointed by the Board of Directors. Each Management Officer has a written mandate and is required to execute the stated functions as outlined therein. Key areas of responsibility are outlined and adherence to the Bank's core values is mandatory.

Statement of Corporate Governance Practices

The Managing Director's responsibilities and authorities are documented and approved by the Board of Directors. Limits on credit dispensation, capital and operating expenditure are stated specifically in the Managing Director's authorities. In keeping with good corporate governance principles, the Managing Director is charged with the day to day management of the Bank's business and is ably assisted by a competent and experienced management team. The Bank's two General Managers report directly to the Managing Director. Senior Management, which has combined banking experience of more than one hundred years, has general oversight of the Bank's credit portfolio, branch network and general operations. Two members of Senior Management hold Master of Business Administration degrees. The third member of Senior Management is qualified in Business Management making the team extremely qualified to offer leadership to the management team.

The Board of Directors recognises the need to attract and retain employees through various initiatives including ensuring that the compensation package for staff is competitive. The package consists of basic salary and performance-based incentives. In determining the basic salary to be paid to officers of the Bank, including Management Officers, the responsibilities attached to the position are assessed. This forms the core basis for the basic salary of each employee.

The performance of each staff member, is evaluated annually based on individual and collective performance criteria. In keeping with the expectation of the Board of Directors the performance of each Management Officer is also assessed against all Key Performance Areas which among other things may include financial targets. The performance of all Management Officers is reviewed by the Board of Directors on an annual basis.

Cognisant of the need to monitor transactions with related parties, the Bank has approved a Related Party policy which is consistent with the requirements of the Financial Institutions Act Cap. 85:03.

The Bank's Related Party policy underscores the need for all transactions done with related parties and affiliates to be done on the same terms and conditions as with a non-related party. Directors are required to disclose their interest in related party transactions and recuse themselves from considering or approving transactions in which they have an interest. All material related party transactions must be approved by the Board of Directors. On an annual basis the Board of Directors reviews a report on related party transactions to ensure compliance with the Bank's Related Party policy.

The Bank regards its business and the banking affairs of its clients as confidential, and has established rules to ensure the highest ethical standards in this regard. These rules pertain to honesty and integrity, integrity of records, client privacy, proprietary bank information, insider information, and non-discrimination among others.

The Bank encourages its stockholders to communicate all issues of concern orally or in writing. All stockholder concerns are addressed in a prompt and efficient manner by management. Additionally, the Bank is responsive to the concerns of stakeholders.

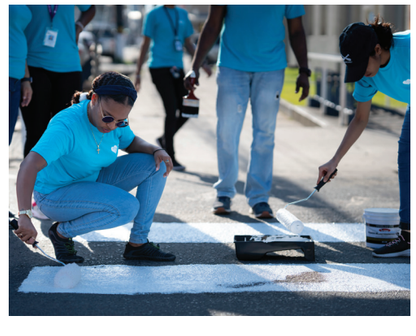
Signed on behalf of the Board,

NIGEL M. BAPTISTE
CHAIRMAN

September 30, 2025

Employees Turning Care into Action

At our Water Street branch, the team turned care into action—repainting pedestrian crossings to promote safety and pride in their community. Their initiative reflects the same forward-thinking spirit that drives Republic Bank's future: a belief that progress begins with people who see possibility, act with purpose, and help shape a safer, better tomorrow.



Pioneering Progress

RFHL's Path to Regional and Global Impact

Republic Financial Holdings Limited (RFHL) has made significant strides in embedding sustainability into the core of our business strategy over the last fiscal year. In the last three years, we have transitioned from establishing the foundational Environmental, Social and Governance (ESG) framework to executing high-impact initiatives that are shaping a more sustainable future for the region. This new era of sustainable governance and accountability has culminated in RFHL's publication of the first dedicated Sustainability Report. The document immediately cemented a regional leadership position and established standard for transparent disclosure across all 16 subsidiaries. By anchoring the comprehensive framework to global standards, including the United Nations Environment Programme Finance Initiative (UNEP FI) Principles for Responsible Banking (PRB) and the Net-Zero Banking Alliance (NZBA), and establishing Board-level oversight, sustainability is now firmly embedded into the core of the Group's strategic decision-making and risk management architecture.

Sustainability is now firmly embedded into the core of the Group's strategic decision-making and risk management architecture.

The Group successfully generated tangible financial and economic value through the execution of our climate finance mandate. Our transition financing strategy saw the catalytic completion of 93 percent of the USD 200 million Climate Finance Fund target as at end of September 2025, actively building regional climate resilience. In parallel, the Group's Micro, Small and Medium Enterprise (MSME) Loan Facility continued to advance financial inclusion and entrepreneurial growth, disbursing TTD 118.28 million to 1,566 MSMEs, with 46 percent of financing reaching women-led enterprises. Beyond financing, the programme also provides targeted capacity-building support to strengthen the business resilience and long-term success of MSME clients.

18
SUSTAINABILITY TRAINING SESSIONS ON SCOPE 1 AND 2 EMISSIONS BASELINE

Furthermore, efforts to stimulate sustainable markets resulted in the successful launch of the Caribbean's first Sustainability Expo, which mobilised over 3,000 attendees daily and ignited growth and visibility for 126 sustainable businesses. These actions confirm that responsible growth is the most powerful driver of profitability and shared prosperity. The report also showcases subsidiary-level initiatives from renewable energy investments in Grenada and Ghana to coral reef restoration in Barbados, food security financing in Trinidad and Tobago and Guyana, and youth empowerment projects across Suriname and the Eastern Caribbean.

RFHL's institutional capacity was critically enhanced, establishing the necessary infrastructure to future-proof the organisation. The Group advanced its environmental performance by establishing its Scope 1 and 2 emissions baseline and strengthening emissions measurement across all subsidiaries. Internal expertise was fortified through the deployment of 18 high-impact sustainability training sessions for Board and branch leadership. Governance was reinforced through a formal Sustainability policy framework and enhanced Board oversight to embed sustainability into core strategic decision-making. Externally, global influence was extended through leadership in the Glasgow Financial Alliance for Net-Zero (GFANZ) Caribbean Chapter and the successful delivery of mission-critical technical assistance to our subsidiary in Grenada, advancing its application to Stage 2 of the accreditation process to access transformative capital from the Green Climate Fund (GCF).

Furthermore, efforts to stimulate sustainable markets resulted in the successful launch of the Caribbean's first Sustainability Expo, which mobilised over 3,000 attendees daily and ignited growth and visibility for 126 sustainable businesses

Bolstered by the successful integration of our sustainability initiatives across the entire Group, this inaugural, globally aligned report decisively reinforces RFHL's status as the regional pioneer in sustainable finance and serves as the definitive statement of our commitment to a resilient and inclusive future.

People

Building a culture of belonging is central to who we are. This year, we advanced our Diversity, Equity and Inclusion (DEI) journey through initiatives that celebrate our differences and strengthen connection across the Group. From Culture Days in eight territories to Conversation Caravans and inclusive spaces, we created opportunities for dialogue and inclusion in everyday work life. These efforts, supported by passionate staff volunteers, reflect our belief that DEI is not a programme but a value we live—one that shapes how we work, grow, and succeed together.

Engaging young minds as they grow and learn, Republic Bank sets sights on supporting programmes that foster youth development through sport, education, culture and art, promote healthy lifestyles, and create inclusive opportunities.

Teamwork continued with Cricket West Indies Inc (CWI), with support from the Guyana Cricket Board, leading to the hosting of the Republic Bank "Five for Fun" Cricket programme, a unique 5-over, 5-player format designed to create awareness and appreciation for the sport by reaching out to more than 75 primary schools across the nation.

In 2025, in collaboration with the Ministry of Culture, Youth and Sport, the Bank chartered new territory in hosting the inaugural Republic Bank/One Guyana National B Division Volleyball Tournament that featured the top teams from Regions One, Two, Three, Four, Five, Six, Seven, Nine, and 10 competing for championship glory. The tournament was created as an effective avenue to foster unity, sportsmanship, and talent development in Guyana.

Similarly, the Bank continued to engage more than 1000 young achievers in partnership with EDGE Sports Management to host a 3 x 3 basketball tournament that featured 16 teams from Guyana and the Caribbean; the Vurlon Mills Academy All Girls Football Camp that combined football training with life and social skills workshops; and the Petra Organisation Under-18 Schools Football League that challenged eight secondary schools to showcase their sporting prowess and earn a coveted spot in a regional tournament.

75

PRIMARY SCHOOLS ENGAGED IN OUR "FIVE FOR FUN" CRICKET PROGRAMME

Ongoing sponsorship of the Republic Bank Scholarship programme at the University of Guyana created the means for the Bank to demonstrate its commitment to national development by supporting the academic dreams of young achievers as they pursue excellence in fields such as Agriculture, Forestry, Environmental Sciences, Technology, Natural Sciences, Finance, Entrepreneurship, and Supply Chain Management.

In collaboration with the Ministry of Culture, Youth and Sport, the Bank furthered its longstanding commitment to youth empowerment through culture and art in hosting the 17th Annual Republic Bank Mashramani Panorama Steel Band Competition and the 14th Annual Republic Bank RightStart Pan Minors Music Literacy Programme.

1000+

YOUTH PARTICIPANTS ACROSS BASKETBALL, FOOTBALL, AND OTHER TOURNAMENTS

Through the continued sponsorship of the steel pan events, the Bank systematically invested in creating sustainable solutions and creative outlets for thousands to learn and succeed, while challenging young minds across the nation to discover more about the steel pan's history as they develop playing skills and techniques in fun-filled, safe, learning environments.

Planet

We have embedded sustainability into the heart of our strategy, moving from building an Environmental, Social and Governance foundation, to delivering impactful initiatives that strengthen climate resilience and inclusive growth. This year, we achieved 93 percent allocation of our US$200 million Climate Finance Fund target and advanced financial inclusion through TTD$118.28 million in MSME financing, with nearly half directed to women-led enterprises. These efforts, alongside initiatives in renewable energy, food security, and youth empowerment, reaffirm our commitment to responsible growth and a more sustainable future for the region.

Protecting our planet demands vigilance, increased agency, and action. It calls for individuals and communities to become more committed in taking decisive steps to course correct the climate changes that affect us and ensure that there is a world for future generations.

In 2025, the Bank celebrated 21 consecutive years of collaboration with the Mayor and Councillors of the City of Georgetown on the upkeep of the beloved Promenade Gardens. The project stands out as a staple of the Bank's longstanding commitment to environmental protection and marked the ongoing investment in sustainability initiatives that safeguard and beautify natural spaces in Guyana.

21

YEARS OF ENVIRONMENTAL PARTNERSHIP WITH GEORGETOWN'S MAYOR AND COUNCILLORS

Progress

To strengthen the coordination and impact of our community initiatives, we introduced a comprehensive digital platform that streamlines the management of charitable contributions, sponsorships, volunteerism, and events. This paperless solution enables teams to efficiently track activities, manage approvals, and log volunteer hours. With intuitive workflows, customisable dashboards and real time insights, we are better equipped to measure our outreach and ensure meaningful engagement with the communities we serve.

The journey toward progress envisions a tomorrow where Republic Bank works with a diverse range of allies to bolster programmes that improve the quality of life and inspire people to achieve.

Autism Spectrum Disorder (ASD) affects thousands of children and their families across Guyana. As the nation strives to support those directly impacted, the key to making progress lies in addressing challenges, fostering inclusion and awareness, and creating unique opportunities for their growth and development.

Created five years ago, the Sameir Uniquely ME Inc. School for Autistic Children specialises in providing critical services, including screening for autism, oral language, motor skills, preparing children for school, after-school help, classroom support, and early intervention for children with autism and other learning disorders.

In 2025, with the Bank's support, two children benefited from vital Applied Behavioral Analysis (ABA) therapy over the course of one academic year. This scientifically proven programme works with children with autism, helping them build skills that lead to safer, more empowered and fulfilling lives.

A longstanding collaboration with Women Across Differences (WAD) Comprehensive Empowerment Programme for Adolescent Mothers continued to help equip young women with knowledge and skills in sexual and reproductive health, family planning, vocational training, and personal development, enabling them to take greater agency of their futures and those of their children.

2 STUDENTS BENEFITED FROM VITAL ABA THERAPY

Communities

Through our Power to Make a Difference (PMAD) programme, we invest not only capital but purpose. Since its inception, PMAD has supported education, health, youth development, the arts and culture, and environmental initiatives across the Bank's markets. This is social investment reimagined—where meaningful impact, creative collaboration, and shared progress shape our unwavering commitment to our communities.

At the heart of nation building is providing the means for diverse communities to become more resilient in the face of challenge. It is the ongoing pursuit of ways that we can inspire through example and encourage others to succeed in today's world.

The Bank explored new territory in the journey toward community growth in support of the Restore a Sense of I Can programme that used tech clubs to equip secondary school students across the country with hands-on skills in PC repair, video editing, web and app development, and cybersecurity.

In staying the course, the Bank strengthened its commitment with the continued sponsorship of the Specialists in Sustained Youth Development & Research (SSYDR) Youth Entrepreneurship Programme that empowered 30 young entrepreneurs, ages 17–28, to pursue their business development ambitions.

60+

VOLUNTEER RECORDED HOURS BY EMPLOYEES

30

YOUTH SUPPORTED THROUGH SSYDR ENTREPRENEURSHIP INITIATIVE

Cultivating a culture of responsible financial practices among schoolchildren, a groundbreaking collaboration continued with WizdomCRM, an educational and technology company aimed at enhancing financial literacy among youth in Guyana, to host the sustainable Virtual Stock Market Game that challenged more than 900 secondary school students to enrich themselves through Mathematics, Economics, and personal finance education.

900

STUDENTS PARTICIPATING IN FINANCIAL LITERACY INITIATIVE

THE POWER TO MAKE A DIFFERENCE

powering performance

At Republic Bank, performance isn't just about results, it's about impact. We're transforming how we serve through technology that enhances efficiency, and innovation that strengthens communities. From digital advancements to creative social initiatives, we're redefining what it means to perform—delivering growth that uplifts lives and builds lasting possibilities for generations to come.

The Power to Make A Difference

Investing in our future

Investing in our future means understanding the importance and the need for decisive action today. It means committing to the development and protection of our people, working together toward sustainable progress, nurturing strength and resilience within our communities, and safeguarding the future of our planet.

Over the course of decades, united in purpose with allies across communities in the Caribbean, South America, and Ghana, the Republic Group has pursued a course toward a tomorrow of prosperous and inclusive societies and empowered people.

In support of initiatives that advocate youth empowerment through literacy, sport, culture and the arts; champion healthcare, environmental integrity, social well-being and equity; spur business and economic resilience; and challenge diverse communities and individuals, inside and outside of the banking halls, the Group continued to leverage its resources and talents for the greater good.

Guided by the Power to Make A Difference programme; sound Sustainability; and Diversity, Equity and Inclusion (DEI) frameworks; and the United Nations Principles for Responsible Banking (PRB), the Group demonstrates an ongoing commitment to serve, aligning with purpose-driven partners to help build stronger societies and significantly invest in a sustainable future for all.

A True Blue effort

Across the nation, staff volunteers continued to live by the Republic spirit; showing up early, often, and wholeheartedly. Joining forces with the Rose Hall Town Youth and Sports Club for the 17th consecutive year provided the means for staff volunteers to actively champion education and youth empowerment in the community. The collaboration paved the way for the hosting of a summer camp for the benefit of 80 new secondary school students to receive academic support and essential life and social skills training.

Together toward a brave new world

As we look ahead, our purpose remains clear: to work hand-in-hand with our allies, communities, and partners to create a brighter, more sustainable tomorrow.

With every restored home, every inspired student, every cleaner coastline, and every life uplifted, our commitment endures—a commitment to build, to empower, and to believe in the boundless potential of our people.

That is the Republic promise… made with every community, kept with every action, and renewed with every generation on the path, together toward a brave new world.

Financial Reporting Requirements

The Directors of Republic Bank (Guyana) Limited are responsible for the preparation and fair presentation of the financial statements and other financial information contained in this Annual Report. The accompanying financial statements have been prepared in conformity with International Financial Reporting Standards and present a true and fair view of the financial affairs of the company. Where amounts are based on estimates and judgements, these represent the best estimate and judgement of the Directors.

General responsibilities include:

- establishing and maintaining effective internal controls and procedures for financial reporting;
- safeguarding of assets; and
- prevention and detection of fraud and other irregularities.

The financial information appearing throughout this Annual Report is consistent with that in the financial statements. Directors have a responsibility for ensuring that the Bank keeps accounting records which disclose with reasonable accuracy the financial position of the Bank.

The Directors have always recognised the importance of the Bank maintaining and reinforcing the highest possible standards of conduct in all of its actions, including the preparation and dissemination of statements presenting fairly the financial condition of the Bank. In this regard, the Directors have developed and maintained a system of accounting and reporting which provides the necessary internal controls to ensure that transactions are properly authorised and recorded, assets are safeguarded against unauthorised use or disposition and liabilities are recognised. The system is augmented by written policies and procedures, the careful selection and training of qualified staff, the establishment of an organisational structure that provides an appropriate and well-defined division of responsibility, and the communication of policies and guidelines of business conduct throughout the Bank.

The system of internal controls is further supported by a professional staff of Internal Auditors who conduct periodic audits of all aspects of the Bank's operations. External Auditors have full and free access to, and meet periodically with, the Audit Committee to discuss their audit and findings as to the integrity of the Bank's accounting and financial reporting and the adequacy of the system of internal controls.

Independent auditor's report

To the Stockholders of Republic Bank (Guyana) Limited

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Republic Bank (Guyana) Limited (the Bank), which comprise the statement of financial position as at September 30, 2025, and the statement of income, statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Bank as at September 30, 2025, and its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report. We are independent of the Bank in accordance with the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)* (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other matter

The financial statements of Republic Bank (Guyana) Limited for the year ended September 30, 2024 were audited by another auditor who expressed an unmodified opinion on those financial statements on October 21, 2024.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's responsibilities for the audit of the financial statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

Independent auditor's report

To the Stockholders of Republic Bank (Guyana) Limited

Report on the audit of the financial statements *(continued)*

Key audit matters *(continued)*

Key audit matter	How our audit addressed the key audit matter
Allowance for Expected Credit Losses (ECLs)	
Refer to Notes 2i, 5, and 21. IFRS 9: "Financial Instruments" requires the Bank to record an allowance for Expected Credit Losses (ECLs) for all advances and other financial assets not held at fair value through profit and loss (FVPL), together with loan commitments and financial guarantee contracts. Advances (loans) and other financial assets held at amortised cost comprise 96% of the Bank 's total assets. The estimation of ECLs on financial assets is inherently uncertain and is subject to significant judgment. Furthermore, models used to determine credit impairments are complex and certain inputs used are not fully observable. Management compensates for any model and data deficiencies by applying overlays to these outputs, which adjusts the ECLs.	We assessed and tested the modelling techniques and methodologies developed by the Bank in order to estimate ECLs and evaluated its compliance with the requirements of IFRS 9. We reviewed the completeness and accuracy of data from underlying systems through to the models used to determine the ECLs. We considered the methodologies applied in determining Probabilities of Default (PDs) and the data used to estimate Loss Given Defaults (LGDs) and tested the Exposures at Default (EADs) against asset subledgers and amortisation schedules. Where PDs and LGDs were based on assigned global credit ratings, we independently tested to the source data. We tested the aging of the portfolios and performed an independent assessment for a sample of commercial facilities to assess the accuracy and timely assignment of risk ratings in compliance with management's policy, both of which are inputs in the staging of the portfolios. We concluded on the accuracy of the staging applied against the methodologies and assessed the reasonableness of all assumptions used to determine whether the Bank appropriately reflected additional risks where identified. We also ensured that the definition of a significant deterioration in credit risk and staging adopted by the Bank were in compliance with IFRS 9.

To the Stockholders of Republic Bank (Guyana) Limited

Report on the audit of the financial statements *(continued)*

Key audit matters *(continued)*

Key audit matter	How our audit addressed the key audit matter
Allowance for Expected Credit Losses (ECLs)	
Key areas of judgment included: • the interpretation of the requirements to determine impairment under the application of IFRS 9, which is reflected in the Bank 's ECL models; • the application of assumptions where there was limited or incomplete data; • the identification of exposures with a significant deterioration in credit quality; • assumptions used in the ECL model such as the financial condition of the counterparty or valuation of security; • the need to apply overlays, the quantification of which can be highly subjective, to reflect current or future external factors that are not appropriately captured by the ECL model; and • additional credit risk that could stem from the impact of any expected economic changes in the country in which the Bank operates, on the ability of the Bank's customers/investors to meet their financial commitments. These factors, individually and collectively, result in a higher judgmental risk and thus are considered a key audit matter in the context of the financial statements.	Management's judgmental provisions applied on specific high-risk customers of the Bank were reviewed in detail, in assessing the reasonableness of the resulting ECL overlay applied by management on advances. For ECLs calculated on an individual basis we tested the factors underlying the impairment identification and quantification including forecasts of the amount and timing of future cash flows, valuation of assigned collateral and estimates of recovery on default. We utilised our EY valuation specialists to assess the appropriateness of the models and assumptions used by the Bank, including monitoring/validation, model governance and its mathematical accuracy. Finally, we assessed the disclosure in the financial statements considering whether it satisfies the requirements of IFRS Accounting Standards.

Independent auditor's report

To the Stockholders of Republic Bank (Guyana) Limited

Report on the audit of the financial statements *(continued)*

Key audit matters *(continued)*

Key audit matter	How our audit addressed the key audit matter
Goodwill impairment assessment	
Refer to Notes 2p and 9. The Bank has recorded goodwill of $1.228 billion in its statement of financial position. Goodwill impairment assessment is very subjective as it requires the use of projected financial information and judgemental assumptions. As required by IAS 36: "Impairment of Assets", management performs an annual impairment assessment on goodwill. Management conducted the impairment test using sensitivity analyses, including a range of growth rates, interest rates, recovery assumptions, macro-economic outlooks and discount rates in arriving at an expected cashflow projection. The purpose of the impairment review is to ensure that goodwill is not carried at an amount greater than its recoverable amount. The recoverable amount is compared with the carrying value of the cash-generating unit (CGU) to determine if the asset is impaired. Recoverable amount is defined as the higher of fair value less costs of disposal (FVLCD) and value in use (VIU); the underlying concept being that the CGU should not be carried at more than the amount it could raise, either from selling it now or from using it.	We evaluated and tested the Bank 's process for goodwill impairment assessment. We involved our EY valuation specialists team to assist us in the review of the key assumptions, cash flows and discount rate used to ensure that they are reasonable. We evaluated Management's judgments used in its assessments, including growth assumptions, by applying our own sensitivity analyses to account for market volatility. We also assessed whether appropriate and complete disclosures have been included in the financial statements that are in accordance with the requirements of IAS 36.

Independent auditor's report

To the Stockholders of Republic Bank (Guyana) Limited

Report on the audit of the financial statements *(continued)*

Other information included in the Bank's 2025 Annual Report

Other information consists of the information included in the Bank's 2025 Annual Report, other than the financial statements and our auditor's report thereon. Management is responsible for the other information. The Bank's 2025 Annual Report is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

Responsibilities of management and the audit committee for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

The audit committee is responsible for overseeing the Bank 's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Independent auditor's report

To the Stockholders of Republic Bank (Guyana) Limited

Report on the audit of the financial statements *(continued)*

Auditor's responsibilities for the audit of the financial statements *(continued)*

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the audit committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the audit committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

Independent auditor's report

To the Stockholders of Republic Bank (Guyana) Limited

Report on the audit of the financial statements *(continued)*

Auditor's responsibilities for the audit of the financial statements *(continued)*

From the matters communicated with the audit committee, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The partner in charge of the audit resulting in this independent auditor's report is Sham Ramnarain.

The accompanying notes on pages 91 to 157 form an integral part of these financial statements.

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

1 Corporate information

The Bank was incorporated in the Co-operative Republic of Guyana on November 20, 1984, as a limited liability company and continued under the Companies Act Cap. 89:01 on May 16, 1997, and is licensed as Bankers under the Financial Institutions Act Cap. 85:03.

The Bank was registered as a reporting issuer under the Securities Industry Act Cap. 73:04 on April 7, 2003. It was designated as an approved mortgage finance company by the Minister of Finance on September 2, 2003, under section 15 of the Income Tax Act Cap. 81:01.

Banking operations began on February 16, 1837, by the British Guiana Bank which had been incorporated on November 11, 1836. On November 17, 1913, operations were sold to the Royal Bank of Canada. Assets and Liabilities of the Guyana operations of the Royal Bank of Canada were acquired by the Government of Guyana on November 29, 1984, and vested in the National Bank of Industry and Commerce Limited on December 1, 1984. In October 1997, the Bank became a subsidiary of Republic Bank Limited of Trinidad and Tobago, now Republic Financial Holdings Limited (RFHL) and subsequently changed its name to Republic Bank (Guyana) Limited on June 5, 2006. As at September 30, 2025, the stockholdings of Republic Financial Holdings Limited in the Bank were 50.97 percent.

On December 16, 2015, by Legal Notice No. 215 of 2015, the business of Republic Bank Limited was transferred and vested into Republic Finance and Merchant Bank Limited (FINCOR) save for the shareholdings in several subsidiaries. FINCOR was renamed Republic Bank Limited and Republic Bank Limited was renamed Republic Financial Holdings Limited.

Republic Financial Holdings Limited, the financial holding company for the Republic Group, is incorporated in the Republic of Trinidad and Tobago and its registered office is located at Republic House, 9-17 Park Street, Port of Spain. Republic Financial Holdings Limited is listed on the Trinidad and Tobago Stock Exchange.

The Republic Group (the 'Group') is a financial services group comprising several subsidiaries and associated companies. The Group is engaged in a wide range of banking, financial and related activities mainly in the Caribbean Community (CARICOM) region, Cayman Islands, Ghana, St. Maarten, Anguilla and the British Virgin Islands. It has most recently launched an insurance subsidiary in Trinidad and Tobago.

2 Material accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below.

a Basis of preparation

The Bank has prepared its financial statements on the basis that it will continue to operate as a going concern. The financial statements of the Bank are prepared in accordance with IFRS Accounting Standards, the Financial Institutions Act Cap. 85:03 and guidelines issued thereunder, the Companies Act Cap. 89:01 and the Securities Industry Act Cap. 73:04 and are stated in Guyana Dollars. These financial statements have been prepared on a historical cost basis, except for the measurement at fair value of investment securities classified as available-for-sale and at Fair Value Through Profit or Loss (FVPL) and derivative financial instruments. The preparation of financial statements in conformity with International Financial Reporting Standards requires management to make estimates and assumptions. Actual results could differ from those estimates. Significant accounting judgements and estimates in applying the Bank's accounting policies have been described in Note 3.

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

2 Material accounting policies *(continued)*

b Changes in accounting policies

i New accounting standards/improvements adopted

The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the preparation of the Bank's annual financial statements for the year ended September 30, 2024, except for the adoption of new standards and interpretations below.

Several other amendments and interpretations apply for the first time in 2025, but do not have any impact on the financial statements of the Bank. These are also described in more detail below. The Bank has not early adopted any standards, interpretations or amendments that have been issued but are not yet effective.

IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2 – Amendments to IAS 1 – Classification of Liabilities as Current or Non-current and Non-current Liabilities with Covenants (effective January 1, 2024)

The IASB issued amendments to paragraphs 69 to 76 of IAS 1 Presentation of Financial Statements to specify the requirements for classifying liabilities as current or non-current.

The amendments clarify:

- What is meant by a right to defer settlement
- That a right to defer must exist at the end of the reporting period
- That classification is unaffected by the likelihood that an entity will exercise its deferral right
- That only if an embedded derivative in a convertible liability is itself an equity instrument, would the terms of a liability not impact its classification
- Disclosures

These amendments had no impact on the financial statements of the Bank.

IFRS 16 Leases – Amendments to IFRS 16 (effective January 1, 2024)

The amendment specifies the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction, to ensure the seller-lessee does not recognise any amount of the gain or loss that relates to the right of use it retains.

After the commencement date in a sale and leaseback transaction, the seller-lessee applies paragraphs 29 to 35 of IFRS 16 to the right-of-use asset arising from the leaseback and paragraphs 36 to 46 of IFRS 16 to the lease liability arising from the leaseback. In applying paragraphs 36 to 46, the seller-lessee determines 'lease payments' or 'revised lease payments' in such a way that the seller-lessee would not recognise any amount of the gain or loss that relates to the right of use retained by the seller-lessee. Applying these requirements does not prevent the seller-lessee from recognising, in the consolidated statement of income, any gain or loss relating to the partial or full termination of a lease, as required by IFRS 16.

The amendment does not prescribe specific measurement requirements for lease liabilities arising from a leaseback. The initial measurement of the lease liability arising from a leaseback may result in a seller-lessee determining 'lease payments' that are different from the general definition of lease payments in Appendix A of IFRS 16. The seller-lessee will need to develop and apply an accounting policy that results in information that is relevant and reliable in accordance with IAS 8.

2 Material accounting policies *(continued)*

b Changes in accounting policies *(continued)*

i New accounting standards/improvements adopted (continued)

IFRS 16 Leases – Amendments to IFRS 16 (effective January 1, 2024) (continued)

A seller-lessee applies the amendment to annual reporting periods beginning on or after January 1, 2024. Earlier application is permitted and that fact must be disclosed.

A seller-lessee applies the amendment retrospectively in accordance with IAS 8 to sale and leaseback transactions entered into after the date of initial application (i.e., the amendment does not apply to sale and leaseback transactions entered into prior to the date of initial application). The date of initial application is the beginning of the annual reporting period in which an entity first applied IFRS 16.

These amendments had no impact on the financial statements of the Bank.

IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures – Amendments to IAS 7 and IFRS 7 (effective January 1, 2024)

The amendments specify disclosure requirements to enhance the current requirements, which are intended to assist users of financial statements in understanding the effects of supplier finance arrangements on an entity's liabilities, cash flows and exposure to liquidity risk.

Characteristics

The amendments clarify the characteristics of supplier finance arrangements. In these arrangements, one or more finance providers pay amounts an entity owes to its suppliers. The entity agrees to settle those amounts with the finance providers according to the terms and conditions of the arrangements, either at the same date or at a later date than that on which the finance providers pay the entity's suppliers.

Disclosure requirements

The amendments require an entity to provide information about the impact of supplier finance arrangements on liabilities and cash flows, including terms and conditions of those arrangements, quantitative information on liabilities related to those arrangements as at the beginning and end of the reporting period and the type and effect of non-cash changes in the carrying amounts of those arrangements. The information on those arrangements is required to be aggregated unless the individual arrangements have dissimilar or unique terms and conditions. In the context of quantitative liquidity risk disclosures required by IFRS 7, supplier finance arrangements are included as an example of other factors that might be relevant to disclose.

These amendments had no impact on the financial statements of the Bank.

ii Standards in issue not yet effective

The following is a list of standards and interpretations that are not yet effective up to the date of issuance of the Bank's financial statements. These standards and interpretations will be applicable to the Bank at a future date and will be adopted when they become effective. The Bank is currently assessing the impact of adopting these standards and interpretations.

IAS 21 The Effects of Changes in Foreign Exchange Rates – Amendments to IAS 21 (effective January 1, 2025)

The amendment to IAS 21 specifies how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking.

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

2 Material accounting policies *(continued)*

b Changes in accounting policies *(continued)*

ii ***Standards in issue not yet effective*** *(continued)*

IAS 21 The Effects of Changes in Foreign Exchange Rates – Amendments to IAS 21 (effective January 1, 2025) (continued)

A currency is considered to be exchangeable into another currency when an entity is able to obtain the other currency within a time frame that allows for a normal administrative delay and through a market or exchange mechanism in which an exchange transaction would create enforceable rights and obligations.

If a currency is not exchangeable into another currency, an entity is required to estimate the spot exchange rate at the measurement date. An entity's objective in estimating the spot exchange rate is to reflect the rate at which an orderly exchange transaction would take place at the measurement date between market participants under prevailing economic conditions. The amendments note that an entity can use an observable exchange rate without adjustment or another estimation technique.

When an entity estimates a spot exchange rate because a currency is not exchangeable into another currency, it discloses information that enables users of its financial statements to understand how the currency not being exchangeable into the other currency affects, or is expected to affect, the entity's financial performance, financial position and cash flows.

IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures – Amendments to IFRS 9 and IFRS 7 (effective January 1, 2026)

The amendments:

- Clarifies that a financial liability is derecognised on the 'settlement date', i.e., when the related obligation is discharged, cancelled, expires or the liability otherwise qualifies for derecognition. It also introduces an accounting policy option to derecognise financial liabilities that are settled through an electronic payment system before settlement date if certain conditions are met
- Clarifies how to assess the contractual cash flow characteristics of financial assets that include Environmental, Social and Governance (ESG)-linked features and other similar contingent features
- Clarifies the treatment of non-recourse assets and contractually linked instruments
- Requires additional disclosures in IFRS 7 for financial assets and liabilities with contractual terms that reference a contingent event (including those that are ESG-linked), and equity instruments classified at fair value through other comprehensive income

The new requirements will be applied retrospectively with an adjustment to opening retained earnings. Prior periods are not required to be restated and can only be restated without using hindsight. An entity is required to disclose information about financial assets that change their measurement category due to the amendments.

IFRS 18 Presentation and Disclosure in Financial Statements (effective January 1, 2027)

IFRS 18 introduces new categories and subtotals in the statement of income. It also requires disclosure of management-defined performance measures (as defined) and includes new requirements for the location, aggregation and disaggregation of financial information.

2 Material accounting policies *(continued)*

b Changes in accounting policies *(continued)*

ii ***Standards in issue not yet effective*** *(continued)*

IFRS 18 Presentation and Disclosure in Financial Statements (effective January 1, 2027)(continued)

Statement of income

An entity will be required to classify all income and expenses within its statement of income into one of five categories: operating; investing; financing; income taxes; and discontinued operations. In addition, IFRS 18 requires an entity to present subtotals and totals for 'operating profit or loss', 'profit or loss before financing and income taxes' and 'profit or loss'.

Main business activities

For the purposes of classifying its income and expenses into the categories required by IFRS 18, an entity will need to assess whether it has a 'main business activity' of investing in assets or providing financing to customers, as specific classification requirements will apply to such entities. Determining whether an entity has such a specified main business activity is a matter of fact and circumstances which requires judgement. An entity may have more than one main business activity.

Management-defined performance measures

IFRS 18 introduces the concept of a Management-defined Performance Measure (MPM) which it defines as a subtotal of income and expenses that an entity uses in public communications outside financial statements, to communicate management's view of an aspect of the financial performance of the entity as a whole to users. IFRS 18 requires disclosure of information about all of an entity's MPMs within a single note to the financial statements and requires several disclosures to be made about each MPM, including how the measure is calculated and a reconciliation to the most comparable subtotal specified by IFRS 18 or another IFRS accounting standard.

Location of information, aggregation and disaggregation

IFRS 18 differentiates between 'presenting' information in the primary financial statements and 'disclosing' it in the notes, and introduces a principle for determining the location of information based on identified 'roles' of the primary financial statements and the notes. IFRS 18 requires aggregation and disaggregation of information to be performed with reference to similar and dissimilar characteristics. Guidance is also provided for determining meaningful descriptions, or labels, for items that are aggregated in the financial statements.

Consequential amendments to other accounting standards

Narrow-scope amendments have been made to IAS 7 Statement of cash flows, which include changing the starting point for determining cash flows from operations under the indirect method from 'profit or loss' to 'operating profit or loss'. The optionality around classification of cash flows from dividends and interest in the statement of cash flows has also largely been removed.

IAS 33 Earnings per Share is amended to include additional requirements that permit entities to disclose additional amounts per share, only if the numerator used in the calculation meets specified criteria. The numerator must be:

- An amount attributable to ordinary equity holders of the parent entity; and
- A total or subtotal identified by IFRS 18 or an MPM as defined by IFRS 18.

Some requirements previously included within IAS 1 Presentation of Financial Statements have been moved to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors, which has been renamed IAS 8 Basis of Preparation of Financial Statements. IAS 34 Interim Financial Reporting has been amended to require disclosure of MPMs.

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

2 Material accounting policies *(continued)*

b Changes in accounting policies *(continued)*

ii ***Standards in issue not yet effective*** *(continued)*

IFRS 19 Subsidiaries without Public Accountability: Disclosures (effective January 1, 2027)

IFRS 19 Subsidiaries without Public Accountability: Disclosures, allows eligible entities to elect to apply reduced disclosure requirements while still applying the recognition, measurement and presentation requirements in other IFRS accounting standards. Unless otherwise specified, eligible entities that elect to apply IFRS 19 will not need to apply the disclosure requirements in other IFRS accounting standards.

An entity applying IFRS 19 is required to disclose that fact as part of its general IFRS accounting standards compliance statement. IFRS 19 requires an entity whose financial statements comply with IFRS accounting standards including IFRS 19 to make an explicit and unreserved statement of such compliance.

Eligible entities

An entity may elect to apply IFRS 19 if at the end of the reporting period:

- It is a subsidiary as defined in IFRS 10 Consolidated financial statements;
- It does not have public accountability; and
- It has a parent (either ultimate or intermediate) that prepares Consolidated financial statements, available for public use, which comply with IFRS accounting standards.

Public accountability

An entity has public accountability if:

- Its debt or equity instruments are traded in a public market, or it is in the process of issuing such instruments for trading in a public market; or
- It holds assets in a fiduciary capacity for a broad group of outsiders as one of its primary businesses (i.e., not for reasons incidental to its primary business).

Disclosure requirements and references to other IFRS accounting standards

The disclosure requirements in IFRS 19 are organised into subheadings per IFRS accounting standards and where disclosure requirements in other IFRS Accounting Standards remain applicable, these are specified under the subheading of each IFRS accounting standard.

IFRS 19 disclosures exclude IFRS 8 Operating Segments, IFRS 17 Insurance Contracts and IAS 33 Earnings per Share. Therefore, if an entity that applies IFRS 19 is required to apply IFRS 17 or elects to apply IFRS 8 and/or IAS 33, that entity would be required to apply all the relevant disclosure requirements in those standards.

Expected 'catch-up' amendments

In developing the disclosure requirements in IFRS 19, the Board considered the disclosure requirements in other IFRS accounting standards as at February 28, 2021. Disclosure requirements in IFRS accounting standards that have been added or amended subsequent to this date have been included in IFRS 19 unchanged. Consequently, the Board indicated it will publish an exposure draft setting out whether and how to reduce the disclosure requirements of any amendments and additions made to other IFRS accounting standards post February 28, 2021, for the purpose of updating IFRS 19.

2 Material accounting policies *(continued)*

b Changes in accounting policies *(continued)*

iii ***Improvements to International Financial Reporting Standards***

The annual improvements process of the International Accounting Standards Board deals with non-urgent but necessary clarifications and amendments to IFRS. The following amendments are applicable to annual periods beginning on or after January 1, 2026.

IFRS	Subject of Amendment
IFRS 1	First-time Adoption of International Financial Reporting Standards – Hedge accounting by a first-time adopter.
IFRS 7	Financial Instruments: Disclosures – Gain or loss on derecognition
IFRS 7	Financial Instruments: Disclosures – Disclosure of deferred difference between fair value and transaction price
IFRS 7	Financial Instruments: Disclosures – Introduction and credit risk disclosures
IFRS 9	Financial Instruments – Lessee derecognition of lease liabilities
IFRS 9	Financial Instruments – Transaction price
IFRS 10	Consolidated financial statements – Determination of a 'de facto agent'
IAS 7	Statement of cash flows – Cost method

c Cash and cash equivalents

For the purpose of presentation in the Statement of cash flows, cash and cash equivalents consist of highly liquid investments, cash on hand, due from banks, Treasury Bills, bills discounted and bankers' acceptances with original maturities of three months or less. Bankers' acceptances and due from banks with maturities greater than three months are classified as investments.

d Statutory deposit with Bank of Guyana

Pursuant to the Financial Institutions Act Cap. 85:03, the Bank is required to maintain with the Bank of Guyana a statutory reserve balance in relation to the deposit liabilities of the institution.

e Financial instruments – initial recognition

i *Date of recognition*

Financial assets and liabilities, with the exception of loans and advances to customers and balances due to customers, are initially recognised on the trade date, i.e., the date that the Bank becomes a party to the contractual provisions of the instrument. This includes regular way trades: purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place. Loans and advances to customers are recognised when funds are transferred to the customers' accounts. The Bank recognises balances due to customers when funds are transferred to the Bank.

ii *Initial measurement of financial instruments*

The classification of financial instruments at initial recognition depends on their contractual terms and the business model for managing the instruments, as described in Note 2 (f) (i). Financial instruments are initially measured at their fair value, except in the case of financial assets and financial liabilities recorded at FVPL, transaction costs are added to, or subtracted from, this amount.

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

2 Material accounting policies *(continued)*

e Financial instruments - initial recognition *(continued)*

iii Measurement categories of financial assets and liabilities

The Bank classifies all of its financial assets based on the business model for managing the assets and the assets' contractual terms, measured at either:

- Amortised cost, as explained in Note 2 (f) (i)
- FVPL, as explained in Note 2 (f) (ii)

The Bank classified its financial assets as loans and receivables (amortised cost), FVPL, available-for-sale or held-to-maturity (amortised cost), as explained in Notes 2 (f) (i), 2 (f) (v) and 2 (f) (vi).

Financial liabilities, other than loan commitments and financial guarantees, are measured at amortised cost.

f Financial assets and liabilities

i Other assets, Due from banks, Treasury Bills, Advances and Investment securities

The Bank only measures Other assets, Due from banks, Treasury Bills, Advances to customers and Investment securities at amortised cost if both of the following conditions are met:

- The contractual terms of the financial asset give rise on specified dates to cash flows that are Solely Payments of Principal and Interest (SPPI) on the principal amount outstanding.
- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows and

The details of these conditions are outlined below.

The SPPI test

For the first step of its classification process, the Bank assesses the contractual terms of financial assets to identify whether they meet the SPPI test.

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (e.g., if there are repayments of principal or amortisation of the premium/discount).

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Bank applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

In contrast, contractual terms that introduce a more than de minimis exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are SPPI on the amount outstanding. In such cases, the financial asset is required to be measured at FVPL or Fair Value Through Other Comprehensive Income (FVOCI) without recycling.

Business model assessment

The Bank determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective.

2 Material accounting policies *(continued)*

f Financial assets and liabilities *(continued)*

i Other assets, Due from banks, Treasury Bills, Advances and Investment securities (continued)

Business model assessment (continued)

The Bank's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed
- The expected frequency, value and timing of sales are also important aspects of the Bank's assessment

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Bank's original expectations, the Bank does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

ii Financial assets at Fair value through profit or loss

Financial assets in this category are those that are designated by management upon initial recognition or are mandatorily required to be measured at fair value under IFRS 9. Management may designate an instrument at FVPL upon initial recognition.

The designation eliminates, or significantly reduces, the inconsistent treatment that would otherwise arise from measuring the assets or recognising gains or losses on them on a different basis.

Financial assets at FVPL are recorded in the statement of financial position at fair value. Interest earned or incurred on instruments designated at FVPL is accrued in interest income, using the Effective Interest Rate (EIR), taking into account any discount/premium and qualifying transaction costs being an integral part of the instrument. Dividend income from equity instruments measured at FVPL is recorded in profit or loss as other income when the right to the payment has been established.

iii Undrawn loan commitments

Undrawn loan commitments and letters of credit are commitments under which, over the duration of the commitment, the Bank is required to provide a loan with pre-specified terms to the customer. These contracts are in the scope of the Expected Credit Loss (ECL) requirements but no ECL was determined based on historical observation of defaults.

iv Debt securities and other fund raising instruments

Financial liabilities issued by the Bank that are designated at amortised cost, are classified as liabilities under Debt securities in issue and Other fund raising instruments, where the substance of the contractual arrangement results in the Bank having an obligation to deliver cash to satisfy the obligation. After initial measurement, debt issued and other borrowed funds are subsequently measured at amortised cost. Amortised cost is calculated by taking into account any discount or premium on issued funds, and costs that are an integral part of the EIR.

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

2 Material accounting policies *(continued)*

g Reclassification of financial assets and liabilities

The Bank does not reclassify its financial assets subsequent to their initial recognition, apart from the exceptional circumstances in which the Bank acquires, disposes of, or terminates a business line. Financial liabilities are never reclassified.

h Derecognition of financial assets and liabilities

Derecognition due to substantial modification of terms and conditions

The Bank derecognises a financial asset, such as a loan to a customer, to facilitate changes to the original loan agreement or arrangement due to weaknesses in the borrower's financial position and/or non-repayment of the debt as arranged and terms and conditions have been restructured to the extent that, substantially, it becomes a new loan, with the difference recognised as an impairment loss. The newly recognised loans are classified as Stage 2 for ECL measurement purposes.

When assessing whether or not to derecognise a loan to a customer, amongst others, the Bank considers the following factors:

- Change in currency of the loan
- Change in counterparty
- If the modification is such that the instrument would no longer meet the SPPI criterion

If the modification does not result in cash flows that are substantially different, the modification does not result in derecognition. Based on the change in cash flows discounted at the original rate (or credit adjusted effective interest rate for purchased or credit impaired financial assets), the Bank records a modification gain or loss, to the extent that an impairment loss has not already been recorded.

Derecognition other than for substantial modification

Financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when the rights to receive cash flows from the financial asset have expired. The Bank also derecognises the financial asset if it has both transferred the financial asset and the transfer qualifies for derecognition.

The Bank has transferred the financial asset if, and only if, either:

- The Bank has transferred its contractual rights to receive cash flows from the financial asset, or
- It retains the rights to the cash flows, but has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement.

Pass-through arrangements are transactions whereby the Bank retains the contractual rights to receive the cash flows of a financial asset (the 'original asset'), but assumes a contractual obligation to pay those cash flows to one or more entities (the 'eventual recipients'), when all of the following three conditions are met:

- The Bank has no obligation to pay amounts to the eventual recipients unless it has collected equivalent amounts from the original asset, excluding short-term advances with the right to full recovery of the amount lent plus accrued interest at market rates
- The Bank cannot sell or pledge the original asset other than as security to the eventual recipients

2 Material accounting policies *(continued)*

h Derecognition of financial assets and liabilities *(continued)*

Derecognition other than for substantial modification (continued)

Financial assets *(continued)*

- The Bank has to remit any cash flows it collects on behalf of the eventual recipients without material delay. In addition, the Bank is not entitled to reinvest such cash flows, except for investments in cash or cash equivalents including interest earned, during the period between the collection date and the date of required remittance to the eventual recipients.

A transfer only qualifies for derecognition if either:

- The Bank has transferred substantially all the risks and rewards of the asset, or
- The Bank has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

The Bank considers control to be transferred if and only if, the transferee has the practical ability to sell the asset in its entirety to an unrelated third party and is able to exercise that ability unilaterally and without imposing additional restrictions on the transfer.

When the Bank has neither transferred nor retained substantially all the risks and rewards and has retained control of the asset, the asset continues to be recognised only to the extent of the Bank's continuing involvement, in which case, the Bank also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Bank has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration the Bank could be required to pay.

Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognised in profit or loss.

i Impairment of financial assets

i Overview of the ECL principles

The Bank records an allowance for ECL for all loans and other debt financial assets not held at FVPL, together with loan commitments and financial guarantee contracts, in this section all referred to as 'financial instruments'. Equity instruments are not subject to impairment under IFRS 9.

The Bank uses the general probability of default approach when calculating ECLs. The ECL allowance is based on the credit losses expected to arise over the life of the asset (the Lifetime Expected Credit Loss or LTECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' Expected Credit Loss (12mECL) as outlined in Note 21.2.7. The Bank's policies for determining if there has been a significant increase in credit risk are set out in Note 21.2.

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

2 Material accounting policies *(continued)*

i Impairment of financial assets *(continued)*

i Overview of the ECL principles (continued)

The 12mECL is the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

Both LTECLs and 12mECLs are calculated on either an individual basis or a collective basis, depending on the size and nature of the underlying portfolio of financial instruments. The Bank's policy for grouping financial assets measured on a collective basis is explained in Note 21.2.7.

Where, the financial asset meets the definition of Purchased or Originated Credit Impaired (POCI), the allowance is based on the change in the ECLs over the life of the asset.

The Bank has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument.

Based on the above process, the Bank classifies its loans and investments into Stage 1, Stage 2 and Stage 3, as described below:

Stage 1

When loans and investments are first recognised, the Bank recognises an allowance based on 12mECLs. Stage 1 loans and investments also include facilities where the credit risk has improved and the loan has been reclassified from Stage 2.

Stage 2

When a loan or investment has shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECLs. Stage 2 loans and investments also include facilities, where the credit risk has improved and the loan or investment has been reclassified from Stage 3.

Stage 3

Loans and investments considered credit-impaired (as outlined in Note 21.2). The Bank records an allowance for the LTECLs.

POCI

POCI assets are financial assets that are credit impaired on initial recognition. POCI assets are recorded at fair value at original recognition and interest income is subsequently recognised based on a credit-adjusted EIR. ECLs are only recognised or released to the extent that there is a subsequent change in the expected credit losses.

For financial assets for which the Bank has no reasonable expectations of recovering either the entire outstanding amount, or a proportion thereof, the gross carrying amount of the financial asset is reduced. This is considered a (partial) derecognition of the financial asset.

2 Material accounting policies *(continued)*

i Impairment of financial assets *(continued)*

ii The calculation of ECLs

The Bank calculates ECLs based on the historical measure of cash shortfalls, discounted at the instrument's coupon rate. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive.

The mechanics of the ECL calculations are outlined below and the key elements are as follows:

PD The Probability of Default is an estimate of the likelihood of default over a given period of time. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognised and is still in the portfolio. The concept of PDs is further explained in Note 21.2.5.

EAD The Exposure at Default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments.

LGD The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realisation of any collateral. It is usually expressed as a percentage of the EAD.

When estimating the ECLs, the Bank considers among other factors the risk rating category and aging of the financial asset. Each of these is associated with different PDs, EADs and LGDs. When relevant, it also incorporates how defaulted loans and investments are expected to be recovered, including the value of collateral or the amount that might be received for selling the asset.

With the exception of credit cards and other revolving facilities, for which the treatment is separately set out, the maximum period for which the credit losses are determined is the contractual life of a financial instrument.

Impairment losses and recoveries are accounted for and disclosed separately.

The mechanics of the ECL method are summarised below:

Stage 1

The 12mECL is calculated as the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Bank calculates the 12mECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast EAD and multiplied by the expected LGD which are derived as explained under Stage 3 for loans and using Global Credit Loss tables for traded investments and modified with management overlays when not traded.

Stage 2

When a loan or investment has shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECLs. The mechanics are similar to those explained above, but PDs and LGDs are estimated over the lifetime of the instrument. The LGDs are derived as explained under Stage 3 for loans and using Global Credit Loss tables for traded investments and modified with management overlays when not traded.

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

2 Material accounting policies *(continued)*

i Impairment of financial assets *(continued)*

ii The calculation of ECLs (continued)

Stage 3

For loans and investments considered credit-impaired (as set out in Note 21.2.8), the Bank recognises the lifetime expected credit losses for these loans and investments. The method is similar to that for Stage 2 assets, with the PD set at 100 percent.

POCI

POCI assets are financial assets that are credit impaired on initial recognition. The Bank only recognises the cumulative changes in lifetime ECLs since initial recognition, based on a probability-weighting of the four scenarios, discounted by the credit adjusted EIR.

In most instances, LGDs are determined on an individual loan or investment basis, including discounting the expected cash flows at the original EIR. Stage 3 LGDs are grouped by similar types to provide percentage averages to be applied for Stage 1 and Stage 2 loans.

In limited circumstances within the Bank, where portfolios were small and the products homogenous with minimal history of defaults, a simplified ECL approach was applied using historical loss rates and staged based on the sovereign rating of the residence of the loan.

iii Revolving facilities

The Bank's product offering includes a variety of corporate and retail overdraft facilities, in which the Bank has the right to cancel and/or reduce the facilities. The Bank limits its exposure to credit losses on overdraft facilities to the outstanding balance.

The ongoing assessment of whether a significant increase in credit risk has occurred for revolving facilities is similar to other lending products. This is based on shifts in the customer's internal credit grade, as explained in Note 21.2.5, but emphasis is also given to qualitative factors such as changes in usage and repayment patterns.

The interest rate used to discount the ECLs for credit cards is based on the interest rate that is expected to be charged over the expected period of exposure to the facilities. This estimation takes into account that many facilities are repaid in full each month and are consequently charged no interest.

iv Treasury Bills, Statutory deposits with Central Banks and Due from banks

Treasury Bills, Statutory deposits with Central Banks and Due from banks are short term funds placed with Central Banks in the countries where the Bank is engaged in the full range of banking and financial activities and correspondent banks. The ECL on these instruments were determined to be zero, with the exception of the Bank's exposure to the Government of Barbados.

v Financial guarantees, letters of credit and undrawn loan commitments

The Bank issues financial guarantees, letters of credit and loan commitments.

Financial guarantees, letters of credit and loan commitments are off-balance sheet instruments and have no history of default.

2 Material accounting policies *(continued)*

i Impairment of financial assets *(continued)*

vi Forward looking information

The Bank integrates Forward-Looking Indicators (FLIs) and macroeconomic factors into its ECL calculations to estimate potential future credit risks. Key FLIs include interest rates, inflation trends, unemployment rates, and industry-specific forecasts, which help assess the probability of default for financial assets. Broader macroeconomic factors such as Gross Domestic Product (GDP) growth, current account balance, fiscal deficit and foreign exchange reserves are also considered. The Bank uses scenario analysis and probability-weighted outcomes, best to worst case, to model different economic conditions, ensuring more accurate and robust ECL estimates.

j Collateral valuation

To mitigate its credit risks on financial assets, the Bank seeks to use collateral, where possible. The collateral comes in various forms, such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories and other non-financial assets. The Bank's accounting policy for collateral assigned to it through its lending arrangements under IFRS 9 is the same as it was under IAS 39. Collateral, unless repossessed, is not recorded on the Bank's statement of financial position. However, the fair value of collateral affects the calculation of ECLs. It is generally assessed at inception and re-assessed on a periodic basis.

To the extent possible, the Bank uses active market data for valuing financial assets held as collateral. Other financial assets which do not have readily determinable market values are valued using models. Non-financial collateral, such as real estate, is valued based on independent valuations and other data provided by third parties.

k Collateral repossessed

The Bank's accounting policy under IFRS 9 remains the same as it was under IAS 39. The Bank's policy is for a repossessed asset to be sold. Assets to be sold are transferred to assets held for sale at their fair value (if financial assets) and fair value less cost to sell for non-financial assets at the repossession date, in line with the Bank's policy.

In its normal course of business, should the Bank repossess properties or other assets in its retail portfolio, it sometimes engages external agents to assist in the sale of these assets to settle outstanding debt. Any surplus funds are returned to the customers/obligors. As a result of this practice, the residential properties under legal repossession processes are not recorded on the statement of financial position.

l Write-offs

The Bank's accounting policy under IFRS 9 remains the same as it was under IAS 39. Financial assets are written off either partially or in their entirety only when the Bank has stopped pursuing the recovery. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to other income.

m Leases

The Bank assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Bank as a Lessee

The Bank applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Bank recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

2 Material accounting policies *(continued)*

m Leases *(continued)*

Right-of-use assets

Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the lease term.

Lease liabilities

At the commencement date of the lease, the Bank recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (less any lease incentives receivable), variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the entity and payments of penalties for terminating the lease, if the lease term reflects exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Bank uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term or a change in the lease payments (e.g., changes to future payments resulting from a change in rate used to determine such lease payments).

The Bank applies the short-term lease recognition exemption to its short-term leases of property (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of IT equipment that is considered to be low value. Lease payments on short-term leases and leases of low value assets are recognised as an expense on a straight-line basis over the lease term.

Bank as a Lessor

Leases in which the Bank does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the Statement of income due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

n Premises and equipment

Premises and equipment are stated at cost less accumulated depreciation.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Bank and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the Statement of income during the financial period in which they are incurred.

2 Material accounting policies *(continued)*

n Premises and equipment *(continued)*

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each reporting date. Gains and losses on disposals are determined by comparing proceeds with carrying amounts. These are included in the Statement of income.

Leasehold buildings and leased equipment are depreciated on a straight-line basis over the period of the lease. Depreciation other than on leasehold buildings and leased equipment is computed on the declining balance method at rates expected to apportion the cost of the assets over their estimated useful lives as follows:

Buildings	30 to 75 years
Security equipment	6 to 15 years
Computer equipment	4 to 10 years
Furniture, fixtures and other equipment	4 to 15 years

Land and work-in-progress are not depreciated.

o Intangible assets

The Bank's intangible assets comprise of the value of computer software. An intangible asset is recognised only when its cost can be measured reliably and it is probable that the expected future economic benefits that are attributable to it will flow to the Bank.

Intangible assets are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation.

Amortisation is calculated using the reducing balance method over their estimated useful lives of three to five years.

p Goodwill

Goodwill on acquisition is initially measured at cost being the excess of the cost of the business combination over the Bank's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities. Following initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is reviewed for impairment, annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired.

As at acquisition date, any goodwill acquired is allocated to each of the cash-generating units expected to benefit from the combination's synergies. Impairment is determined by assessing the recoverable amount of the cash-generating unit, to which goodwill relates. Where the recoverable amount of the cash-generating unit is less than the carrying amount, an impairment loss is recognised.

Where the Bank's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities exceeds the cost of the business combination, this gain is recognised immediately in the Statement of income as a credit to other income.

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

2 Material accounting policies *(continued)*

q Employee benefits

i Pension obligations

The Bank operates a defined benefit pension plan for qualifying employees. The Plan is funded and the Bank's contribution is determined by the independent actuaries. Annually, the Bank's independent actuaries conduct a valuation exercise to measure the effect of the employee benefit plan.

The starting point for this year's IAS 19, 'Employee Benefits' disclosures is the corresponding disclosures for the year ended September 30, 2024. An actuarial valuation of the Plan's liabilities has been carried out at September 30, 2023, rolled forward using a combination of asset, liabilities, person-by-person, and global data to September 30, 2025. In doing this the actuaries have allowed for the further accrual of benefits and the increase in liabilities arising from actual and outstanding salary increases and pension increases during the period under review. The actuaries have assumed that the Plans' membership changes during the period under review have followed the demographic assumptions adopted for previous year's IAS 19 disclosures rather than allowing for the actual changes in membership. These calculations have been carried out using the Projected Unit actuarial method as required by IAS 19.

The pension obligation is measured as the present value of the estimated future cash outflows using interest rates of government securities which have terms to maturity approximating the terms of the related liability. Re-measurements of the net defined benefit asset, which comprise actuarial gains and losses and return on plan assets (excluding interest) are recognised immediately through Other comprehensive income.

The defined benefit plans mainly expose the Bank to risks such as investment risk, interest rate risk and longevity risk.

The above accounting requirement in no way affects the pension plan which continues to be governed by the approved Trust Deed and Rules and remain under the full control of the appointed Trustees.

The full results of the valuation exercise are disclosed in note 10 to these financial statements.

ii Profit sharing scheme

The Bank operates an employee profit share scheme in accordance with terms outlined in the Human Resource Policy Guidelines. The profit share to be distributed to employees each year is based on a specific formula outlined in these guidelines. Employees are paid profit share in cash. The Bank accounts for the profit share as an expense through the Statement of income.

r Taxation

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the reporting date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised where it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Income tax payable on profits, based on the applicable tax law in each jurisdiction, is recognised as an expense in the period in which profits arise. The tax effects of income tax losses available for carry forward are recognised as an asset when it is probable that future taxable profits will be available against which these losses can be utilised.

2 Material accounting policies *(continued)*

s Statutory reserves

In accordance with the Financial Institutions Act Cap. 85:03, a minimum of 15.00 percent of the current year's net profit must be transferred to the Reserve Fund until the amount in the Fund is equal to the paid up Capital of the Bank. This reserve is non-distributable.

t Earnings per stock unit

Data on earnings per stock unit has been computed by dividing the net profit attributable to ordinary stockholders, by the weighted average number of ordinary stocks in issue during the year. The Bank has no dilutive ordinary stocks.

u Foreign currency translation

The financial statements are presented in Guyana dollars which is the currency of the primary economic environment in which the Bank operates (its functional currency).

Monetary assets and liabilities which are denominated in foreign currencies are expressed in Guyana dollars at rates of exchange ruling at the reporting date. Non monetary assets and liabilities denominated in foreign currencies are translated at historic rates. All revenue and expenditure transactions denominated in foreign currencies are translated at mid-exchange rates and the resulting profits and losses on exchange from these trading activities are dealt with in the Statement of income.

v Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Bank and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duty. The Bank has concluded that it is the principal in all of its revenue arrangements since it is the primary obligor in all the revenue arrangements, has pricing latitude and is also exposed to credit risks.

The specific recognition criteria described below must also be met before revenue is recognised

The EIR method

Interest income and expense are recorded using the EIR method for all financial instruments measured at amortised cost. The EIR is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument or, when appropriate, a shorter period, to the net carrying amount of the financial asset.

The EIR (and therefore, the amortised cost of the asset) is calculated by taking into account any discount or premium on acquisition, fees and costs that are an integral part of the EIR. The Bank recognises interest income using a rate of return that represents the best estimate of a constant rate of return over the expected life of the loan. Hence, it recognises the effect of potentially different interest rates charged at various stages, and other characteristics of the product life cycle (including prepayments, penalty interest and charges).

Interest income and expense

The Bank calculates interest income and expense by applying the EIR to the gross carrying amount of financial assets and liabilities other than credit-impaired assets. For purchased or originated credit-impaired financial assets, a credit-adjusted effective interest rate is applied to the amortised cost of the financial asset.

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

2 Material accounting policies *(continued)*

v Revenue recognition *(continued)*

Interest income and expense (continued)

Interest income on all trading assets and financial assets mandatorily required to be measured at FVPL is recognised using the contractual interest rate in net trading income and net gains or losses on financial assets at FVPL, respectively.

Fee and commission income

The Bank earns fee and commission income from a diverse range of financial services it provides to its customers. Fee and commission income is recognised at an amount that reflects the consideration to which the Bank expects to be entitled in exchange for providing the services. The performance obligations, as well as the timing of their satisfaction, are identified, and determined, at the inception of the contract.

When the Bank provides a service to its customers, consideration is invoiced and generally due immediately upon satisfaction of a service provided at a point in time or at the end of the contract period for a service provided over time. The Bank has generally concluded that it is the principal in its revenue arrangements because it typically controls the services before transferring them to the customer.

Dividends

Dividend income is recognised when the right to receive the payment is established.

w Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker is the person or group that allocates resources to and assesses the performance of the operating segments of an entity. The Bank has determined the Managing Director as its chief operating decision-maker.

Management considers its banking operation to be a single business unit. All business is conducted in Guyana with the exception of certain investment activities.

x Customers' liability under acceptances, guarantees, indemnities and letters of credit

These represent the Bank's potential liability, for which there are equal and offsetting claims against its customer in the event of a call on these commitments. These amounts are not recorded on the Bank's Statement of financial position but set out in Note 27 (b) of these financial statements.

y Assets classified as held-for-sale

A non-current asset is classified as held-for-sale when: its carrying amount will be recovered principally through a sale transaction rather than through continuing use; the asset is available for immediate sale in its present condition; and its sale is highly probable. Assets classified as held-for-sale are not depreciated or amortised and are carried at the lower of the carrying amount and fair value less cost to sell.

z Comparatives

Certain changes in presentation have been made in these financial statements. These changes had no effect on the operating results, profit after tax or earnings per stock unit of the Bank for the previous year.

2 Material accounting policies *(continued)*

aa Equity reserves

The reserves recorded in equity on the Bank's Statement of financial position include:

Stated Capital – Ordinary stated capital is classified within equity and is recognised at the fair value of the consideration received by the Bank at the date received.

General contingency reserves/Other reserves – prior to October 1, 2017, the General Contingency reserve was used as an appropriation of retained earnings for the difference between specific provisions and the non-performing advances. From October 1, 2017, the balance on this reserve represents the difference between IFRS 9 provision and regulatory requirement.

Other statutory reserves that qualify for treatment as equity are discussed in Note 2 (s).

3 Significant accounting judgements and estimates in applying the Bank's accounting policies

Management has made the following judgements in its application of the Bank's accounting policies which have the most significant effect on the amounts reported in the financial statements:

Impairment losses on financial assets (Policy applicable under IFRS 9)

The measurement of impairment losses under IFRS 9 across all categories of financial assets requires judgement. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Bank's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

- The estimation of the amount and timing of future cash flows and collateral values when determining impairment losses
- The Bank's internal credit grading model, which assigns PDs to the individual grades for corporate facilities
- The Bank's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a LTECL basis and the qualitative assessment
- Development of ECL models, including the various formulas and the choice of inputs
- Determination of the existence of associations between macroeconomic scenarios and, economic inputs, such as unemployment levels and collateral values, and the effect on PDs, EADs and LGDs
- The inclusion of overlay adjustments based on judgement and future expectations

Net pension asset/liability (Note 10)

In conducting valuation exercises to measure the effect of the employee benefit plan, the Bank's independent actuaries use judgement and assumptions in determining discount rates, salary increases, National Insurance Scheme (NIS) ceiling increases, pension increases and the rate of return on the assets of the Plan.

Goodwill (Note 9)

The Bank's financial statements include goodwill arising from acquisitions. In accordance with IFRS 3, goodwill was reviewed for impairment as at September 30, 2025, using the 'value in use' method. This requires the use of estimates for determination of future cash flows expected to arise from each cash-generating unit and an appropriate discount rate to calculate present value.

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

3 Significant accounting judgements and estimates in applying the Bank's accounting policies *(continued)*

Deferred taxes (Note 11)

In calculating the provision for deferred taxation, management uses judgement to determine the probability that future taxable profits will be available to facilitate utilisation of temporary tax differences which may arise.

Premises and equipment and Intangible Assets (Note 7)

Management exercises judgement in determining whether costs incurred can accrue sufficient future economic benefits to the Bank to enable the value to be treated as a capital expense. Further judgement is used upon annual review of the residual values and useful lives of all capital items to determine any necessary adjustments to carrying value.

Leases (Note 8)

The Bank determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Bank has several lease contracts that include extension and termination options. The Bank applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Bank reassesses the lease term if there is a significant event or change in circumstances that is within its control that affects its ability to exercise or not to exercise the option to renew or to terminate (e.g. construction of significant leasehold improvements or significant customisation of the leased asset).

The Bank cannot readily determine the interest rate implicit in the lease, therefore, it uses its Incremental Borrowing Rate ('IBR') to measure lease liabilities. The IBR is the rate of interest that the Bank would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Bank 'would have to pay', which requires estimation when no observable rates are available (such as for subsidiaries that do not enter into financing transactions) or when they need to be adjusted to reflect the terms and conditions of the lease (for example, when leases are not in the subsidiary's functional currency). The Bank estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific adjustments (such as the subsidiary's stand-alone credit rating, or to reflect the terms and conditions of the lease).

e Restructured/Modified loans

Within the retail portfolio, management will in the normal course of business modify the terms and conditions of facilities in the case of difficulties being experienced by the borrower. These modifications rarely result in an impairment loss and if they do, it is not material.

The Bank occasionally makes modifications to the original terms of large commercial and corporate loans as a response to the borrower's financial difficulties, rather than taking possession or to otherwise enforce collection of collateral. These modifications are made only when the Bank believes the borrower is likely to meet the modified terms and conditions. Indicators of financial difficulties include defaults on covenants, overdue payments or significant concerns raised by the Credit Risk Department. Once the terms have been renegotiated, any impairment is measured using the original EIR as calculated before the modification of terms.

Restructured loans are carefully monitored. Restructured large commercial and corporate loans are classified as Stage 1, 2 and 3. These amounted to $253.6 million as at September 30, 2025 ($311.9 million as at September 30, 2024).

f The undiscounted fair value of collateral that the Bank holds relating to loans individually determined to be impaired at September 30, 2025, amounts to $2,735.2 million (2024: $3,453.0 million). The collateral consists of cash, securities and properties.

g Collateral realised

During the year, the Bank realised collateral amounting to $4.1 million (2024: $4.2 million).

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

Interest expense on lease liabilities	**147**	176
	199	**11,499**

The Bank had no cash outflows for leases in 2025 ($11.4 million in 2024). The Bank also had no non-cash additions to right-of-use assets and lease liabilities in 2025 ($10.6 million in 2024).

9 Goodwill

	2025	2024
Total unimpaired goodwill on acquisition	**1,228,222**	1,228,222

Impairment testing of goodwill

The residual balance of goodwill arising from business combinations was generated from the acquisition of certain assets and liabilities of the Guyana National Cooperative Bank. In accordance with IFRS 3, all assets that gave rise to goodwill were reviewed for impairment at September 30, 2025, using the 'value in use' method. Based on the results of this review, no impairment expense was required.

10 Employee benefits

The Bank has a defined benefit pension plan for employees. The Bank's defined benefits plan is the final salary plans for employees, which requires contributions to be made to a separately administered fund.

The Plan's assets consists of investments in government, corporate and foreign securities, local and foreign equities, mortgages, investment properties, managed funds and cash and cash equivalents. There are no asset-liability matching strategies used by the Plans.

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

10 Employee benefits *(continued)*

It is the Plan's policy to enter into financial arrangements with a variety of creditworthy counterparties and monitor the size of the exposure to any one issues and the duration of the investment. The Plan's investments are susceptible to market price risk arising from uncertainties about future prices whereby changes in interest rates may affect the value of securities, risks associated with fluctuations in foreign currency rates, and changes in the life expectancies for pensioners.

		2025	2024
a	The amounts recognised in the Statement of financial position are as follows:		
	Present value of defined benefit obligation	**3,545,300**	3,165,900
	Fair value of plan assets	**(3,409,700)**	(3,345,100)
	Net (asset)/liability recognised in the Statement of financial position	**135,600**	**(179,200)**
b	Changes in the present value of the defined benefit obligation are as follows:		
	Opening defined benefit obligation	**3,165,900**	2,865,500
	Current service cost	**106,700**	99,100

h Sensitivity analysis

The calculation of the defined benefit obligation is sensitive to the assumptions used. The following table summarises how the defined benefit obligation as at September 30, 2025, would have changed as a result of a change in the assumptions used.

	1% per annum decrease $'000	1% per annum increase $'000
– Discount rate	737,200	(566,100)
– Future salary increases	(353,800)	435,800

An increase of 1 year in the assumed life expectancies shown above would increase the defined benefit obligation at September 30, 2025, by $61.4 million.

These sensitivities were calculated by re-calculating the defined benefit obligations using the revised assumptions.

i Summary of principal actuarial assumptions as at September 30

	2025 %	2024 %
Discount rate	**5.50**	5.50
Rate of salary increase	**5.50**	5.50
NIS ceiling rates	**5.00**	5.00

Assumptions regarding future mortality are based on published mortality rates. The life expectancies underlying the value of the defined benefit obligation as at September 30, are as follows:

	2025	2024
Life expectancy at age 65 for current pensioner in years:		
- Male	**17.7**	17.6
- Female	**21.6**	21.6
Life expectancy at age 65 for current members age 40 in years:		
- Male	**18.7**	18.6
- Female	**22.8**	22.7

j Plan asset allocation as at September 30

	2025	2024
Local equities	**916,400**	1,012,700
Overseas equities	**386,000**	337,200
Cash and cash equivalents	**1,841,300**	1,705,100
Mortgages	**266,000**	290,100
Fair value of scheme assets at end of year	**3,409,700**	**3,345,100**

10 Employee benefits *(continued)*

k Funding

The Bank meets the balance of the cost of funding the defined benefit Pension Scheme and the Bank must pay contributions at least equal to those paid by members, which are fixed. The funding requirements are based on regular (at least every 3 years) actuarial valuations of the Scheme and the assumptions used to determine the funding required may differ from those set out above. The Bank expects to pay $126.0 million to the Pension Scheme during 2025/2026.

11 Deferred tax assets and liabilities

Components of deferred tax assets and liabilities

a Deferred tax assets

	Opening balance 2024	Impact of IFRS 9	Credit /(Charge) Statement of income	Other comprehensive income	Closing balance **2025**

16 Other reserves

a Statutory reserves

In accordance with the Financial Institutions Act Cap. 85:03, a minimum of 15.00 percent of the current year's net profit must be transferred to the Reserve Fund until the amount in the Fund is equal to the paid up Capital of the Bank. This reserve is non-distributable.

b General banking risk reserve/ Other reserves

Prior to the adoption of IFRS 9, a General Contingency Reserve was created as a voluntary appropriation of retained earnings, for the difference between the specific provision and non-performing advances. With the adoption of IFRS 9 and the enhanced provisioning levels, the Bank has opted to reduce the level of General Contingency Reserves held, and has included the transfer of a portion of these reserves to retained earnings in the Statement of changes in equity. The remaining balance represents the difference between IFRS 9 provision and regulatory reserve requirement.

Reconciliation

Income taxes in the Statement of income vary from amounts that would be computed by applying the statutory tax rate for the following reasons:

	2025	2024
Accounting profit	**12,902,767**	11,702,701
Tax at applicable statutory tax rates (40%)	**5,161,107**	4,681,080
Tax effect of items that are adjustable in determining taxable profit:		
Tax exempt income	**(451,297)**	(423,359)
Depreciation	**179,927**	150,378
Donations	**1,288**	1,249
Property and Capital Gains tax	**148,664**	139,475
Wear and tear allowance	**(148,759)**	(137,995)
Expected credit loss (Stages 1 and 2)	**105,649**	(51,513)
Loss on sale of premises and equipment	**7,265**	11,240
Defined benefit obligation	**(7,600)**	(16,080)
Deferred fee income	**20,803**	(5,105)
Current tax	**5,017,047**	4,349,370
Recovery of prior years tax provision	**(367,066)**	–
Deferred tax	**(118,007)**	90,847
Total taxation	**4,531,974**	**4,440,217**

The effective income tax rate for 2025 is 35.1 percent (2024: 37.9 percent).

20 Related parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operating decisions. A number of banking transactions are entered into with related parties in the normal course of business. These transactions are both secured and unsecured and were carried out on commercial terms and conditions, at market rates.

21 Risk management

21.1 Introduction

The Bank's prudent banking practices are founded on solid risk management. In an effort to keep apace with its dynamic environment, the Bank has established a comprehensive framework for managing risks, which is continually evolving as the Bank's business activities change in response to market, credit, product and other developments.

The basic principles of risk management followed by the Bank include:

- Managing risk within parameters approved by the Board of Directors and Executives;
- Assessing risk initially and then consistently monitoring those risks through their life cycle;
- Abiding by all applicable laws, regulations and governance standards;
- Applying high and consistent ethical standards to our relationships with all customers, employees and other stakeholders; and
- Undertaking activities in accordance with fundamental control standards. These controls include the disciplines of planning, monitoring, segregation, authorisation and approval, recording, safeguarding, reconciliation and valuation.

The Board of Directors has ultimate responsibility for the management of risk within the Bank. Acting with authority delegated by the Board, the Audit, Asset and Liability and Other Risks Committees, review specific risk areas.

The Asset/Liability Committee (ALCO) of the Bank reviews on a monthly basis the non-credit and non-operational risks of the Bank. Asset and Liability management is a vital part of the risk management process of the Bank. The mandate of the Committee is to approve strategies for the management of the non-credit risks of the Bank, including interest rate, foreign exchange, liquidity and market risks.

The Internal Audit function audits Risk Management processes throughout the Bank by examining both the adequacy of the procedures and the Bank's compliance with these procedures. Internal Audit discusses the results of all assessments with Management and reports its findings and recommendations to the Audit Committee.

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

21 Risk management *(continued)*

21.1 Introduction *(continued)*

The Bank's activities are primarily related to the use of financial instruments. The Bank accepts funds from customers and seeks to earn above average interest margins by investing in high quality assets such as government and corporate securities as well as equity investments and seeks to increase these margins by lending for longer periods at higher rates, while maintaining sufficient liquidity to meet all claims that might fall due.

The main risks arising from the Bank's financial instruments are credit risk, interest rate and market risk, liquidity risk, foreign currency risk, operational risk and country risk. The Bank reviews and agrees policies for managing each of these risks as follows:

21.2 Credit risk

Credit risk is the potential that a borrower or counterparty will fail to meet its stated obligations in accordance with agreed terms. The objective of the Bank's credit risk management function is to maximise the Bank's risk-adjusted rate of return by maintaining credit risk exposure within acceptable parameters. The effective management of credit risk is a key element of a comprehensive approach to risk management and is considered essential to the long-term success of the Bank.

The Bank's credit risk management process operates on the basis of a hierarchy of discretionary authorities. The Board has the final authority on all risk management decisions.

The Risk Management Unit is accountable for the general management and administration of the Bank's credit portfolio, ensuring that lendings are made in accordance with current legislation, sound banking practice and in accordance with the applicable general policy of the Board of Directors. The Risk Management function is kept separate from and independent of the business development aspect of the operations.

The Bank uses a risk rating system which groups commercial/corporate accounts and overdrafts into various risk categories to facilitate the management of risk on both an individual account and portfolio basis. Retail lending, mortgages and retail overdrafts are managed by product type. Preset risk management criteria are in place at all branches to facilitate decision-making for all categories of loans including credit cards. Trend indicators are also used to evaluate risk as improving, static or deteriorating. The evaluation of the risk and trend informs the credit decision and determines the intensity of the monitoring process.

The debt securities within the Bank's investment security portfolio are exposed to credit risk and are managed by investment grading or country exposure with preset exposure limits as approved by the Board of Directors. The credit quality of each individual security is assessed based on the financial strength, reputation and market position of the issuing entity and the ability of that entity to service the debt.

The Bank avoids exposure to undue concentrations of risk by placing limits on the amount of risk accepted from a number of borrowers engaged in similar business activities, or activities in the same geographic region or with similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Such risks are controlled and monitored on a revolving basis and subject to an annual or more frequent review. Limits on the level of credit risk by product, industry sector, client and geography are approved by the Board of Directors.

21 Risk management *(continued)*

21.2 Credit risk *(continued)*

The Bank's credit control processes emphasise early detection of deterioration and prompt implementation of remedial action and where it is considered that recovery of the outstanding balance may be doubtful or unduly delayed, such accounts are transferred from performing to non-performing status.

21.2.1 Maximum exposure to credit risk without taking account of any collateral and other credit enhancements

The table below shows the Bank's maximum exposure to credit risk:

	Gross maximum exposure	
	2025	2024
Statutory deposit with Bank of Guyana	**43,770,573**	35,198,265
Due from banks	**13,949,019**	11,227,042
Treasury Bills	**167,114,881**	138,395,612
Investment interest receivable	**362,336**	305,967
Investment securities	**31,224,230**	22,405,804
Loans and advances to customers	**150,237,755**	126,366,361
Total	**406,658,794**	**333,899,051**
Undrawn commitments	**19,447,601**	18,541,317
Guarantees and indemnities	**2,427,683**	3,809,143
Letters of credit	**371,288**	232,675
Total	**22,246,572**	**22,583,135**
Total credit risk exposure	**428,905,366**	**356,482,186**

Where financial instruments are recorded at fair value the amounts shown above represent the current credit risk exposure but not the maximum risk exposure that could arise in the future as a result of changes in values.

Collateral and other credit enhancements

The Bank maintains credit risk exposure within acceptable parameters through the use of collateral as a risk-mitigation tool. The amount and type of collateral required depends on an assessment of the credit risk of the counterparty. Guidelines are implemented regarding the acceptability of types of collateral and valuation parameters.

The main types of collateral obtained are cash or securities, charges over real estate properties, inventories and trade receivables and mortgages over residential properties and chattels. The Bank also obtains appropriate guarantees for loans from parent companies, owners/stockholders, directors or other parties.

Management monitors the market value of collateral, requests additional collateral in accordance with the underlying agreement, and monitors the market value of collateral obtained during its review of the adequacy of the allowance for impairment losses.

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

21 Risk management *(continued)*

21.2 Credit risk *(continued)*

21.2.1 Maximum exposure to credit risk without taking account of any collateral and other credit enhancements *(continued)*

It is the Bank's policy to dispose of repossessed properties in an orderly fashion. The proceeds are used to repay the outstanding claim. In general, the Bank does not occupy repossessed properties for business use. As at September 30, 2025, $55.2 million (2024: $14.8 million) in repossessed properties are still in the process of being disposed of.

21.2.2 Risk concentrations of the maximum exposure to credit risk

Concentration of risk is managed by client/counterparty, by geographical region and by industry sector as detailed in the following tables:

a Geographical sectors

The Bank's maximum credit exposure, after taking account of credit loss provisions established but before taking into account any collateral held or other credit enhancements, can be analysed by the following geographical regions based on the country of domicile of our counterparties:

	2025	2024
Guyana	**395,815,938**	334,115,341
Trinidad and Tobago	**4,048,320**	6,672,504
Barbados	**521,844**	474,342
Eastern Caribbean	**106,558**	6,179
United States	**19,164,615**	6,314,800
Other countries	**9,248,091**	8,899,020
	428,905,366	**356,482,186**

21 Risk management *(continued)*

21.2 Credit risk *(continued)*

21.2.2 Risk concentrations of the maximum exposure to credit risk *(continued)*

b Industry sectors

The following table breaks down the Bank's maximum credit exposure as categorised by the industry sectors of our counterparties:

	2025	2024
Government and government bodies	**217,983,041**	180,577,166
Financial sector	**21,795,273**	23,252,012
Mining	**2,222,513**	1,187,863
Agriculture	**3,390,040**	4,192,272
Electricity and water	**118,393**	9,993
Transport, storage and communication	**10,737,874**	4,816,312
Distribution	**13,586,877**	10,237,909
Real estate mortgages	**69,944,418**	54,523,216
Manufacturing	**8,318,951**	2,507,837
Construction	**6,415,462**	6,136,702
Personal	**24,980,839**	20,120,632
Non-residents	**202,535**	358,468
Other services	**49,209,150**	48,561,804
	428,905,366	**356,482,186**

There were no exposure to Public Non-Financial Institutions included above (2024: Nil).

c Top five concentration (as a percent of capital base)

	2025 %	2024 %
Government	**394.71**	366.56
Central Bank	**128.00**	120.08
Counterparty 3	**25.92**	27.48
Counterparty 4	**17.28**	24.93
Counterparty 5	**12.91**	14.89

21.2.3 Impairment Assessment

Financial asset provisions are reviewed quarterly in accordance with established guidelines and recommended provisions arising out of this review are submitted to the Board for approval. Non-performing debts recommended for write-off are also reviewed annually and action taken in accordance with prescribed guidelines. The Bank's impairment assessment and measurement approach is set out below.

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

21 Risk management *(continued)*

21.2 Credit risk *(continued)*

21.2.4 Default and cure

The Bank considers a financial instrument defaulted and therefore Stage 3 (credit-impaired) for ECL calculations in cases when the borrower becomes 90 days past due on its contractual payments.

As a part of a qualitative assessment of whether a borrower is in default, the Bank also considers a variety of instances that may indicate unlikeliness to pay. When such events occur, the Bank carefully considers whether the event should result in treating the borrower as defaulted and therefore assessed as Stage 3 for ECL calculations or whether Stage 2 is appropriate

It is the Bank's policy to consider a financial instrument as 'cured' and therefore re-classified out of Stage 3 when none of the default criteria have been present for at least six consecutive months. The decision whether to classify an asset as Stage 2 or Stage 1 once cured depends on the updated credit grade, at the time of the cure, and whether this indicates there has been a significant increase in credit risk compared to initial recognition.

21.2.5 The Bank's internal rating and PD estimation process

Commercial and corporate lending and mortgages

The Bank has an independent internal credit risk department. Risk ratings were selected as cohort for PD analysis. A vintage approach was applied looking at the movements of ratings over a period of time. Historical PDs were developed and using statistical correlation between macroeconomic trends and historical default rates, management applied overlays based on expectations. As previously mentioned, LGD percentage estimates were developed based on historical loss trends for non-performing loans which are assessed on an individual level including estimating the present value of future cash flows. EAD equals the loan balance outstanding plus accrued interest.

Retail lending and mortgages

Product types were selected as the cohort for PD analysis for retail lending and retail mortgages. A vintage approach was applied looking at the number of defaults by segment over a period of time. Historical PDs were developed and using correlation between macroeconomic trends, management applied overlays based on expectations. LGD percentage estimates were developed based on historical loss trends for non-performing loans which are assessed on both an individual and collective level. EAD equals the loan balance outstanding plus accrued interest.

Overdrafts

PDs were developed for the Corporate portfolio and were applied to corporate customers to whom overdraft facilities were extended. LGDs for the Corporate portfolio were also utilised for overdrafts. EADs were developed based on historical trends in utilisation of overdraft limits. ECL percentages for the Retail portfolio were utilised for retail overdrafts.

Management judgmentally applied overlays as required as there was no noted correlation between macroeconomic trends and historical default rates.

21 Risk management *(continued)*

21.2 Credit risk *(continued)*

21.2.5 The Bank's internal rating and PD estimation process *(continued)*

Investment securities

PDs and LGDs for traded instruments were based on the global credit ratings assigned to the instrument. PDs and LGDs for non traded instruments were based on one notch below the credit rating of the sovereign in which the instrument is issued or on company ratings where they existed. Management applied judgmental overlays based on local debt instruments. EAD equals the amortised security balance plus accrued interest.

Internal rating

The Bank's internal credit ratings are correlated to stages as follows:

Rating	Stage
Superior/Desirable < 30 days	1
Watch list 31 to 90 days	2
Credit Impaired/ Non-performing loans > 90 days	3

A description of the internal credit ratings is noted below:

Superior/Desirable:	These counterparties have a good financial position. Facilities are well secured or reasonably well secured and underlying business is performing well.
Watch list:	These counterparties are of average risk with a fair financial position. Business or industry may be subject to more volatility and facilities typically have lower levels of security.
Credit impaired/Non-performing loans:	Past due or individually impaired.

21.2.6 Significant increase in credit risk

The Bank continuously monitors all assets subject to ECLs. In order to determine whether an instrument or a portfolio of instruments is subject to 12mECL or LTECL, the Bank assesses whether there has been a significant increase in credit risk since initial recognition.

The Bank also applies a secondary qualitative method for triggering a significant increase in credit risk for an asset. Regardless of the change in credit grades, if contractual payments are more than 30 days past due, the credit risk is deemed to have increased significantly since initial recognition.

When estimating ECLs on a collective basis for a bank with similar assets (as set out in Note 21.2.7), the Bank applies the same principles for assessing whether there has been a significant increase in credit risk since initial recognition.

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

21 Risk management *(continued)*

21.2 Credit risk *(continued)*

21.2.7 Grouping financial assets measured on a collective basis

As explained in Note 2 (i) (i) dependent on the factors below, the Bank calculates ECLs either on a collective or an individual basis. Asset classes where the Bank calculates ECL on an individual basis include:

- All Stage 3 assets, regardless of the class of financial assets
- The Commercial and corporate lending and overdraft portfolio
- The Mortgage portfolio
- The Retail lending portfolio

Asset classes where the Bank calculates ECL on a collective basis include:

- The retail overdraft portfolio
- Past due not yet relegated credit facilities

21.2.8 Analysis of Gross Carrying Amount and corresponding ECLs is as follows:

Advances

	2025 %	2024 %
Stage 1	**98.50**	97.45
Stage 2	**0.84**	1.51
Stage 3	**0.66**	1.04

The ECL methodology and definition of default remained consistent with prior periods. Calculation inputs, including forward-looking information, together with the determination of the staging of exposures were however revised.

2025	Retail lending	Commercial and corporate lending	Mortgages	Overdrafts	Total
Stage 1					
Gross loans	18,464,947	55,076,241	61,892,132	13,703,340	**149,136,660**

The increase in ECLs was driven by a 39.4 percent increase of exposure.

21 Risk management *(continued)*

21.3 Liquidity risk

Liquidity risk is defined as the risk that the Bank either does not have sufficient financial resources available to meet all its obligations and commitments as they fall due, or can access these only at excessive cost.

The Bank's liquidity management policy is formulated by the Board and Management to ensure that funding requirements can be met, including the replacement of existing funds as they mature or are withdrawn, to satisfy the demands of customers for additional borrowings or to meet undrawn commitments. Undrawn commitments are reviewed by the ALCO and are subject to review by Management prior to disbursement. Liquidity management focuses on ensuring that the Bank has sufficient funds to meet all of its obligations.

Periodic stress testing is conducted by the regulator and corrective action taken by the Bank, if deemed necessary.

Two primary sources of funds are used to provide liquidity – retail deposits and excess at central bank. A substantial portion of the Bank is funded with "core deposits". The Bank maintains a core base of retail funds, which can be drawn on to meet ongoing liquidity needs. Facilities are also established with correspondent banks, which can provide additional liquidity as conditions demand.

The ALCO sets targets for daily float, allowable liquid assets and funding diversification in line with system liquidity trends. While the primary asset used for short-term liquidity management is the Treasury Bill, the Bank also holds significant investments in other Government securities, which can be used for liquidity support. The Bank continually balances the need for short-term assets, which have lower yields, with the need for higher asset returns.

21.3.1 Analysis of financial liabilities by remaining contractual maturities

The table below summarises the maturity profile of the Bank's financial liabilities based on contractual undiscounted repayment obligations, over the remaining life of those liabilities. These balances include interest to be paid over the remaining life of the liabilities and will therefore be greater than the carrying amounts on the Statement of financial position.

Financial liabilities – on Statement of financial position

2025	On demand	Up to one year	1 to 5 years	Over 5 years	**Total**
Customers' chequing, savings and deposit accounts	366,494,086	8,466,541	502,904	–	**375,463,531**

Total undiscounted financial liabilities	**623,122**	**(256,825)**	**5,289**	**–**	**371,586**

21.4 Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rates, foreign exchange rates, and equity prices.

21.4.1 Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial instruments. Interest rate risk management is primarily designed by the Board and Management to ensure competitiveness and maximise returns.

The primary tools currently in use by the Bank are gap analysis, interest rate sensitivity analysis and exposure limits for financial instruments. The limits are defined in terms of amount, term, issuer, depositor and country. The Bank is committed to refining and defining these tools to be in line with international best practice.

21.4.2 Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The Bank's exposure to the effects of fluctuations in foreign currency exchange rates arises mainly from its investments. The Bank's policy is to match the initial net foreign currency investment with funding in the same currency. The ALCO and Centralised Payments Unit also monitor the Bank's foreign currency position for both overnight and intra-day transactions based on limits set by the Board.

Changes in foreign exchange rates affect the Bank's earnings and equity through differences on the re-translation of monetary assets and liabilities to Guyana dollars. Such gains or losses are recognised in the Statement of income.

The principal currencies of the Bank's investments are United States and Guyana dollars.

The following tables indicate the currencies to which the Bank had significant exposure at September 30, 2025, on its non-trading monetary assets and liabilities and forecast cash flows. The analysis also calculates the effect of a reasonably possible movement of each currency rate against the Guyana dollar, with all other variables held constant.

Notes to the Financial Statements

21.5 Operational risk

The growing sophistication of the banking industry has made the Bank's operational risk profile more complex. Operational risk is inherent to all business activities and is the potential for financial or reputational loss arising from inadequate or failed internal controls, operational processes or the systems that support them. It includes errors, omissions, disasters and deliberate acts such as fraud.

The Bank recognises that such risk can never be entirely eliminated and manages the risk through a combination of systems and procedures to monitor and document transactions. The Bank's Enterprise Risk Management Department oversees the operation of, conducts training on and makes recommendations for the enhancement of internal controls. Where appropriate, risk is transferred by the placement of adequate insurance coverage.

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

21 Risk management *(continued)*

21.5 Operational risk *(continued)*

The Bank has developed contingency arrangements and established facilities to support operations in the event of disasters. Independent checks on operational risk issues are also undertaken by the internal audit function.

21.6 Country risk

Country risk is the risk that an occurrence within a country could have an adverse effect on the Bank directly by impairing the value through an obligor's ability to meet its obligation to the Bank. The parent's risk management unit monitors this risk by using the measures of risk rating and the Board set limits by country for investments.

22 Capital management

The Bank's policy is to diversify its sources of capital, to allocate capital within the Bank efficiently and to maintain a prudent relationship between capital resources and the risk of its underlying business. Equity increased by $4,583.2 million to $42,338.3 million during the year under review.

The Bank's dividend policy is to distribute 40 percent to 50 percent of net earnings to stockholders. Similar to the criteria applied in previous years, the distribution was based on core operating performance. Total proposed distribution based on the results for the financial year 2025 of $3,825 million represents 45.69 percent of core operating profit.

Capital adequacy is monitored by the Bank, employing techniques based on the guidelines developed by the Basel Committee on Banking Regulations and Supervisory Practice (the Basel Committee), as implemented by the Bank of Guyana for supervisory purposes. Effective March 2022, Supervision Guideline 14 – Capital Adequacy Framework was implemented, requiring all licensee to maintain at least a capital adequacy ratio (CAR) of at least 8 percent at all times. Further, each licensee must maintain a minimum ratio of eligible Tier 1 capital to total risk-weighted assets of 6 percent. Core capital (Tier 1) comprises mainly stockholders' equity.

The Bank's Tier 1 capital at September 30, 2025, is 20.06 percent (2024 - 21.84 percent). At September 30, 2025, the Bank exceeded the minimum levels required.

The Bank's Regulatory Capital is as follows:

	2025	2024
Tier 1		
Stated capital	**300,000**	300,000
Statutory reserves	**400,480**	1,836,346
Retained earnings	**38,712,840**	33,068,759
Goodwill	**(1,228,222)**	(1,228,222)
Other deductions	**(658,621)**	(474,284)
Total	**37,526,477**	**33,502,599**

23 Fair value

In accordance with IFRS Accounting Standard No. 7 "Financial Instruments: Disclosures", the Bank calculates the estimated fair value of all financial instruments at the reporting date and separately discloses this information where these fair values are different from net book values.

The Bank's available-for-sale investments are not actively traded in organised financial markets, and fair value is determined using discounted cash flow analysis, which requires considerable judgement in interpreting market data and developing estimates. Accordingly estimates contained herein are not necessarily indicative of the amounts that the Bank could realise in a current market exchange. The use of different assumptions and/or estimation methodologies may have a material effect on the estimated fair values. The fair value information for available-for-sale investments is based on information available to management as at the dates presented. Management is not aware of any factors that would significantly affect the estimated fair value amounts.

Investments classified as "at fair value through profit or loss" are actively traded in organised markets and fair value is determined by reference to the market price at year end or on the last trade date prior to year end.

Financial instruments where carrying value is equal to fair value: owing to their short-term maturity, the carrying value of certain financial instruments is assumed to approximate their fair values. These include cash and cash equivalents, investment interest receivable, customers' deposit accounts, other fund raising instruments, other assets and other liabilities. The Bank is required to maintain with the Bank of Guyana, statutory reserve balances in relation to deposit liabilities and the carrying value of these reserves is assumed to equal fair value.

Advances are net of specific and other provisions for impairment. The fair values of advances are based on a current yield curve appropriate for the remaining term to maturity.

The fair values of the floating rate debt securities in issue are based on quoted market prices where available and where not available are based on a current yield curve appropriate for the remaining term to maturity. For balances due to banks, where the maturity period is less than one year, the fair value is assumed to equal carrying value. Where the maturity period is in excess of one year, these are primarily floating rate instruments, the interest rates of which reset with market rates therefore the carrying values are assumed to equal fair values.

The fair value of fixed rate debt securities carried at amortised cost is estimated by comparing market interest rates when they were first recognised with current market rates offered for similar financial instruments. The estimated fair value of fixed interest-bearing deposits is based on discounted cash flows using prevailing money market interest rates for facilities with similar credit risk and maturity.

The following table summarises the carrying amounts and the fair values of the Bank's financial assets and liabilities:

2025	Carrying value	Fair value	Un-recognised gain/(loss)
Financial assets			
Cash, due from banks and Treasury Bills	185,494,873	185,494,873	–
Statutory deposit with Bank of Guyana	43,770,573	43,770,573	–
Investment securities	31,224,230	31,360,256	136,026
Advances	150,237,755	151,150,468	912,713
Investment interest receivable	362,336	362,336	–

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

Total unrecognised change in unrealised fair value			**990,613**

23.1 Fair value and fair value hierarchies

23.1.1 Determination of fair value and fair value hierarchies

The Bank uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation techniques:

Level 1

Included in the Level 1 category are financial assets and liabilities that are measured in whole or in part by reference to published quotes in an active market. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis.

Level 2

Included in the Level 2 category are financial assets and liabilities that are measured using a valuation technique based on assumptions that are supported by prices from observable current market transactions and for which pricing is obtained via pricing services, but where prices have not been determined in an active market. This includes financial assets with fair values based on broker quotes, investments in private equity funds with fair values obtained via fund managers and assets that are valued using the Bank's own models whereby the majority of assumptions are market observable.

23 Fair value *(continued)*

23.1 Fair value and fair value hierarchies *(continued)*

23.1.1 Determination of fair value and fair value hierarchies *(continued)*

Level 3

Included in the Level 3 category are financial assets and liabilities that are not quoted as there are no active markets to determine a price. These financial instruments are held at cost, being the fair value of the consideration paid for the acquisition of the investment, and are regularly assessed for impairment.

The following table shows the fair value measurement hierarchy of the Bank's assets and liabilities as at September 30, 2025.

	Level 1	Level 2	Level 3	Total
Financial assets measured at fair value				
Investment securities				
2025	27,973,076	3,363,799	23,381	**31,360,256**
2024	15,608,563	7,000,007	27,732	**22,636,302**
Financial assets for which fair value is disclosed				
Advances				
2025	–	-	151,150,468	**151,150,468**
2024	–	–	127,150,734	**127,150,734**
Financial liabilities for which fair value is disclosed				
Customers' current, savings and deposit accounts				
2025	–	–	375,426,977	**375,426,977**
2024	–	–	304,330,950	**304,330,950**

The following table shows an analysis of financial instruments recorded at fair value categorised by hierarchy level.

2025	Level 1	Level 2	Level 3	Total
Debt Intruments at amortised cost	27,973,076	3,363,799	23,381	**31,360,256**
	27,973,076	3,363,799	23,381	**31,360,256**
2024				
Debt Intruments at amortised cost	15,608,563	7,000,007	27,732	**22,636,302**
	15,608,563	7,000,007	27,732	**22,636,302**

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

23 Fair value *(continued)*

23.1 Fair value and fair value hierarchies *(continued)*

23.1.1 Determination of fair value and fair value hierarchies *(continued)*

Description of significant unobservable inputs to valuation

The significant unobservable inputs used in the fair value measurements categorised within Level 3 of the fair value hierarchy as at September 30, 2025, are as shown below:

	Valuation technique	Significant unobservable inputs	Range
Advances	Discounted cash flow method	Growth rate for cash flows for subsequent years	3.5%-15.0%
Customers' chequing, savings and deposit accounts	Discounted cash flow method	Growth rate for cash flows for subsequent years	0.0%-1.2%

23.1.2 Transfers between Level 1 and 2

For the year ended September 30, 2025, there were no assets transferred between Level 1 and Level 2.

23.1.3 Reconciliation of movements in Level 3 financial instruments measured at fair value.

	Balance at beginning of year	Additions	Disposals /transfers to level 2	**Balance at end of year**
Financial assets designated at fair value through profit or loss	27,732	–	(4,351)	**23,381**
	27,732	–	(4,351)	**23,381**

24 Segmental information

24.1 Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker is the person or group that allocates resources to and assesses the performance of the operating segments of the entity. The Bank has determined the Managing Director as its chief operating decision-maker.

Management considers its banking operation to be a single business unit. All business is conducted in Guyana with the exception of certain investment activities.

24 Segmental information *(continued)*

24.2 Geographical Information

The Bank operates only in Guyana but conducts investment and other correspondent banking business in other countries. The following tables show the distribution of the Bank's revenues, interest expenses, total assets and total liabilities allocated based on the location of the customers and assets respectively:

2025	Guyana	Trinidad and Tobago	Other countries	**Total**
Interest income	15,382,793	171,775	862,757	**16,417,325**
Interest expense	(1,080,067)	–	–	**(1,080,067)**
Net interest income	14,302,726	171,775	862,757	**15,337,258**
Other income	6,612,943	–	–	**6,612,943**
Net interest and other income	20,915,669	171,775	862,757	**21,950,201**
Total assets	388,728,840	9,299,140	27,754,647	**425,782,627**
Total liabilities	382,059,548	1,240,472	144,287	**383,444,307**
Cash flow from/(used in) operating activities	45,697,012	1,020,731	4,698	**46,722,441**

26 Dividends paid and proposed

	2025	2024
Declared and paid during the year		
Equity dividends on ordinary stock units:		
Final dividend for 2024: $8.50 (2023: $5.25)	**2,550,000**	1,575,000
First dividend for 2025: $3.00 (2024: $2.42)	**900,000**	726,000
Total dividends paid	**3,450,000**	**2,301,000**

Notes to the Financial Statements

For the Year Ended September 30, 2025. Expressed in thousands of Guyana dollars ($'000), except where otherwise stated.

26 Dividends paid and proposed *(continued)*

	2025	2024
Proposed for approval at Annual General Meeting (not recognised as a liability as at September 30)		
Equity dividends on ordinary stock units:		
Final dividend for 2025: $9.75 (2024: $8.50)	**2,925,000**	2,550,000

27 Contingent liabilities

a Litigation

As at September 30, 2025, there were certain legal proceedings outstanding against the Bank and provision has been made in event any of these matters are not determined in the Bank's favour.

b Customers' liability under acceptances, guarantees, indemnities and letters of credit

	2025	2024
Guarantees and indemnities	**2,427,683**	3,809,143
Letters of credit	**371,288**	232,675
	2,798,971	**4,041,818**

c Sectoral information

State	**985,185**	1,931,287
Corporate and commercial	**1,813,786**	2,110,531
	2,798,971	**4,041,818**

d Pledged assets

Below illustrates the distribution of pledged assets in the Bank's Statement of financial position:

	Carrying Amount		Related Liability	
	2025	2024	**2025**	2024
Statutory deposit	**43,770,573**	35,198,265	**375,463,531**	304,355,208

The statutory deposit is provided to the Bank of Guyana as a percentage of deposit liabilities under the Financial Institutions Act, Cap. 85:03.

e Non-cancellable operating lease commitments

	2025	2024
Less than one year	**33,404**	47,615
Between one to five years	**32,607**	33,044
	66,011	**80,659**

28 External Payment Deposit Scheme

2025	2024
47,400	47,400

This represents monies received on behalf of customers and deposited in the External Payment Deposit Scheme with the Bank of Guyana, in accordance with the terms of agreements signed with each customer which specifically exclude the Bank from any liability.

29 Events after the reporting period

There are no events after the reporting date that require adjustment to or disclosure in these financial statements.
